12 Month Yield = (Sum of Dividends) / (Ending NAV). The 12 Month Yield is calculated based on the sum of the distributions over the previous 12 months and the latest NAV. The 12 month yield may be higher or lower than the actual annual dividend yield. A positive distribution yield does not imply positive return. Dividends are not guaranteed. Past dividends are not indicative of future dividends. Investors should not make any investment decision solely based on information contained in the table above. You should read the relevant offering document (including the key facts statement) of the fund for further details including the risk factors.

As disclosed in the most recent Annual Report, the ongoing charges calculation excludes performance fees, but includes management and applied services fees. The effective Applied Service Fee is accrued at each calculation of the Net Asset Value and included in the ongoing charges of each Share Class. The investment will be reduced by the payment of the above mentioned fees.

#### **Fund Objectives**

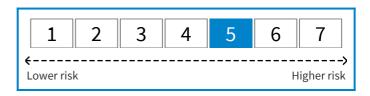

The investment objective of the UCITS is to seek long-term capital growth by investing in listed securities of the real estate sector of eurozone Member States.

#### **Investment Horizon**

The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 5 years.

#### **Risk Indicator**

The information shown below is from the KID PRIIPS.

The risk indicator assumes you keep the product for 5 years.

The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7 which is the a medium-high risk class. This rates the potential losses from future performance at a medium-high level. The risk category associated to this product was determined based on past observations, it is not guaranteed and can evolve in the future.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

#### **Subscription Redemption**

Subscription and redemption orders must reach the depositary by 12:00 noon (CET) on a trading day and are executed on the basis of the next net asset value. Shareholders should note the possibility of additional processing time when making requests through a financial advisor or distributor. The management company may apply a redemption cap (Gate provision), the terms and conditions of which are specified in the prospectus and articles of association of the UCITS. The net asset value of this UCITS is calculated daily.

#### How to Invest

Before making an investment, investors should read the relevant Prospectus and the Key Investor Information Document (particularly for UK investors) / Key Information Document / scheme documents, which provide full product details including investment charges and risks. The information contained herein is not a substitute for those documents or for professional external advice. Retail Investors

Retail investors should contact their Financial intermediary.

#### **ESG Metrics Definition**

Our approach to ESG measurement seeks to combine qualitative and

This marketing communication does not constitute on the part of AXA Investment Managers a solicitation or investment, legal or tax advice. This material does not contain sufficient information to support an investment decision. The information contained herein is intended solely for the entity and/or person(s) to which it has been delivered, unless otherwise allowed under applicable agreements.

The tax treatment associated with holding, buying or disposing of shares or units in a fund depends on the status or tax treatment of each investor and may be subject to change. Potential investors are strongly encouraged to seek the advice of their own tax adviser.

Due to its simplification, this document is partial and opinions, estimates and forecasts herein are subjective and subject to change without notice. There is no guarantee forecasts made will come to pass. Data, figures, declarations, analysis, predictions and other information in this document is provided based on our state of knowledge at the time of creation of this document. Whilst every care is taken, no representation or warranty (including liability towards third parties), express or implied, is made as to the accuracy, reliability or completeness of the information contained herein. This material does not contain sufficient information to support an investment decision.

Past performance is not a guide to current or future performance, and any performance or return data displayed does not take into account commissions and costs incurred when issuing or redeeming units. The value of investments, and the income from them, can fall as well as rise and investors may not get back the amount originally invested. Exchange-rate fluctuations may also affect the value of their investment. Due to this and the initial charge that is usually made, an investment is not usually suitable as a short term holding. Commissions and costs have an adverse effect on the performance of the fund

The Fund's characteristics do not protect the investors from the potential effect of inflation over time. The investments and/or any potential income generated during the period will not be adjusted by the rate of inflation over the same period. Thus, the return on the fund adjusted from the rate of inflation could be negative. Consequently, the inflation might undermine the performance and/or the value of your investment.

The Fund referenced herein has not been registered under the United States Investment Company Act of 1940, as amended, nor the United States Securities Act of 1933, as amended. None of the shares may be offered or sold, directly or indirectly in the United States or to any US Person unless the securities are registered under the Act, or an

exemption from the registration requirements of the Act is available. A US Person is defined as (a) any individual who is a citizen or resident of the United States for federal income tax purposes; (b) a corporation, partnership or other entity created or organized under the laws of or existing in the United States; (c) an estate or trust the income of which is subject to United States federal income tax regardless of whether such income is effectively connected with a United States trade or business. In the United States, this material may be distributed only to a person who is a "distributor," or who is not a "U.S. person," as defined by Regulation S under the U.S. Securities Act of 1933 (as amended).

For the purposes of presenting the breakdown by country, sector, principal exposures and active strategies, equities and similar instruments relating to a single company (ADRs, GDRs, RSPs, rights, etc.) are grouped in order to form a single exposure for the said company.

The geographical breakdown is based on the Bloomberg country classification.

Annual turnover rate: Sum the last 12 monthly results to obtain the turnover rate over 1 rolling year, calculated according to the following formula: (abs(purchase) + abs(sale) - abs(subscription - redemption)) /  $(2^*$  average AUM).

Purchase and sale exclude derivatives, short term instruments and some corporate actions.

Subscription and redemption are netted on a monthly basis, impact of inflows and outflows can result in negative turnover which does not reflect portfolio turnover, therefore annual turnover has a floor of 0.

#### **Glossary**

Volatility (%): is an indicative measure of degree of variation of an asset's price changes over time.

Sharpe ratio: is the measure of the risk-adjusted excess return over risk free rate of a financial portfolio and is used to compare the excess return of an investment to its risk. The higher the Sharpe ratio the better the return compared to the risk taken.
