2 PRINCIPAL ACCOUNTING CONVENTIONS

■ PRESENTATION OF THE FINANCIAL STATEMENTS

The Fund's financial statements were prepared in accordance with the legal and regulatory provisions in force in Luxembourg concerning undertakings for collective investment.

The financial statements are presented on the basis of the latest Net Asset Value ("NAV") calculated during the financial period. In accordance with the prospectus dated December 2022, the NAVs were calculated using the latest market values and exchange rates known at the time of the calculation meaning:

- For all Sub-Funds (except for Amundi Funds Equity MENA): 30 December 2022.
- For Amundi Funds Equity MENA: 29 December 2022.

In the semi-annual report as at 31 December 2022, the Sub-Funds merged or liquidated during the period are shown separately in the Statement of Operations and Changes in Net Assets and are included in the combined figures.

The financial statements of the Fund and each of its Sub-Funds have been prepared on a going concern basis of accounting.

The objective of Amundi Funds Protect 90 is to provide a participation in financial markets evolution while also providing permanent partial protection of your investment over any given 3-year period. Specifically, the Sub-Fund is designed to ensure that its share price does not fall below 90% of the highest net asset value it has ever achieved, that for Protect 90 and as from 05/06/2020, Sub-Fund is designed to ensure that share price does not fall below 90% of the highest net asset value recorded as from 05/06/2022, as per prospectus.

- **Cross Sub-Funds investments** - As at 31 December 2022, the value of the investments made by Sub-Funds in other Sub-Funds of the SICAV amounts to EUR 758,338,231.44 corresponding to 1.04% of the total net asset value. Therefore, the total combined NAV at the period end without those cross investments would amount to EUR 71,930,879,061.56.
- **Securities portfolio** - Transferable securities listed on a Stock Exchange or on a regulated market are valued at their last known price. When these prices are not representative or when securities are not listed, they are valued at their reasonably probable realisation value, determined with care and in good faith by the Board of Directors.
- **Conversion of items expressed in foreign currencies** - The Fund's financial statements are expressed in Euro (EUR). Net assets of each Sub-Fund expressed in foreign currencies are therefore converted and combined in EUR at the exchange rate in force at the close of the financial period. Transactions and acquisition costs for portfolio securities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund concerned at the exchange rate in force on the date of transaction or acquisition, as appropriate. Valuation values for securities in the portfolio and of other assets and liabilities expressed in foreign currencies are converted into the accounting currency of the Sub-Fund at the exchange rate in force at the end of the financial period. Currency differences resulting from these conversions are recorded under the caption "Reevaluation of consolidated Net Assets" in the Statement of Operations and Changes in Net Assets.
- **Return on investments** - Dividends are entered as yields on the date when they are declared and in so far as the appropriate information can be obtained by the Fund. Interest is accrued on a daily basis.
- **Distribution of costs and expenses** - Each Sub-Fund is charged with costs or expenses specifically attributable to it. Costs and expenses not attributable to a specific Sub-Fund are distributed between the Sub-Funds on an equitable basis, in proportion to their respective Net Assets.
- **Repurchase agreements** - Repurchase agreements (Repos) are equivalent to borrowings guaranteed by underlying assets presented in the securities portfolio of the Sub-Fund which remains exposed to market risk. Reverse Repurchase agreements (Reverse Repos) are similar to guaranteed loans. In this case, the Sub-Fund is not subject to the risk of depreciation in the value of the underlying assets. Repos and Reverse Repos are regarded as borrowings and loans, respectively, of the sum of liquid assets received and/or paid.
- **Futures contracts** - Unexpired futures contracts are valued at their last known price on the date of valuation or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Futures-style options contracts** - Futures-style options contracts are valued at the quoted price available on an official stock exchange. Initial margin deposits are paid in cash upon entering into the contract. Subsequent positive or negative cash-flows, referred to as variation margins, are paid or received by the Sub-Fund periodically and are based on changes in the market value of future-style options contracts. When the contract is closed, the concerned Sub-Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction. Net unrealised appreciations or depreciations on futures-style options contracts are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures-style options contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Forward foreign exchange contracts** - Unexpired forward foreign exchange contracts are valued at the exchange rates applicable on the valuation date or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on forward foreign exchange contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Valuation of options and swaptions** - Options officially listed on a stock market or any other regulated market, operating in a regular manner, recognised and open to the public, are valued on the basis of their closing prices on the valuation day or, in the absence of such prices, on the basis of the last-known prices available. OTC options including swaptions are marked-to-market based on the elements laid down in their contracts. If the last known prices for listed options or the calculated price for OTC options are not representative, the valuation will be based on the potential realisation value estimated by the Board of Directors of the SICAV with prudence and in good faith. Net realised and net change in unrealised gain/(loss) on OTC options and swaptions are recorded in the Statement of Operations and Changes in Net Assets.
- **Swaps** - The Fund is authorised to enter into variance swaps, credit default swaps, total return swaps, inflation swaps, asset swaps, interest rate swaps or currency swaps. Those swaps are recorded at market value based on the valuation elements laid down in the contracts. The unrealised net gain is included in the item "Unrealised net appreciation on swaps and CFD" in the Statement of Net Assets and the unrealised net loss is included in the item "Unrealised net depreciation on swaps and CFD" in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on swaps are recorded in the Statement of Operations and Changes in Net Assets.
- **Money market instruments** - The money market is a financial instrument with high liquidity and very short maturities. It is used by participants as a means for borrowing and lending in the short term, with maturities that usually range from overnight to just under a year. For the money market instruments, the accretion (difference between cost and amortised value), is reported under "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements" in the Statement of Operations and Changes in Net Assets for securities held at period end. If the instruments have been sold or reimbursed, this result is considered as "Net realised profit/(loss) on securities sold" in the Statement of Operations and Changes in Net Assets.
- **To Be Announced securities (TBAs)** - TBA positions refer to the common trading practice in the mortgage backed securities market in which a security is to be bought from a mortgage pool (e.g. Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed price at a future date. At the time of purchase the exact security is not known, but the main characteristics of it are specified. Although the price has been established at the time of purchase, the principal value has not been finalised. TBA positions are disclosed in the Securities Portfolio. The purchase of this type of security has not been settled and as a consequence, the amount corresponding to the payable due when the transaction is settled, is disclosed under "Brokers payable" in the Statement of Net Assets. The realised profits/(losses) on TBAs and

changes in unrealised appreciation/depreciation are disclosed in the Statement of Operations and Changes in Net Assets respectively under the headings "Net realised profit/(loss) on securities sold" and "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements". MBS / ABS risk Mortgage-backed and asset-backed securities (MBSs and ABSs) typically carry prepayment and extension risk and can carry above-average liquidity, credit and interest rate risks.

- **Net realised profit/(loss) on securities sold** - The "Net realised profit/(loss) on securities sold" figure of the Statement of Operations and Changes in Net Assets reflects the difference between the cost and proceeds from securities sold, including the market as well as the currency impacts.
- **Transaction costs** - The transaction costs include broker fees and fees charged by the custodian for securities and derivatives transactions. The transaction fees are excluded from the cost of securities and derivatives purchased and sold. All these fees are recorded under caption "Broker and transaction fees" in Statement of Operations and Changes in Net Assets. Refer to note 13 which describes the reception and transmission of orders fees.
- **Contracts for difference (CFD)** - At each valuation date, the difference in price between the opening price and the current market price of the underlying security or index to the CFD is recorded as the market value (unrealised gain or loss) of the contract; when the Sub-Fund enters a closing transaction, the difference between the opening notional amount and the closing notional amount of the underlying security is recorded as a realised gain or loss under captions Net realised profit/(loss) on swaps and CFD in Statement of Operations and Changes in Net Assets. Initial margin deposits may be made in cash upon entering in CFD. Subsequent payments, referred to as variation margins, are made or received by the Sub-Fund periodically and are based on changes in the market value of open CFD contracts.
- **Securities lending** - In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender. The borrower must provide a guarantee, in the form of collateral, that extends throughout the loan period and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

Amundi Funds Impact Green Bonds

The objective of the Sub-Fund Amundi Funds Impact Green Bonds is to achieve a combination of income and capital growth (total return) over the recommended holding period through investment in Sustainable Investments pursuant to Article 9 of the Disclosure Regulation.

Specifically, the Sub-Fund invests as a feeder fund in Amundi Responsible Investing - Impact Green Bonds (master fund) that seeks to provide performance linked to Sustainable Investments pursuant to Article 9 of the Disclosure Regulation, by investing in green bonds whose impact on the environment is positive, assessed on the basis of estimated greenhouse gas emissions avoided and using the tonnes of CO2 equivalent emissions (tCO2e) avoided as indicator.

The master fund invests mainly in OECD investment grade green bonds issued by any issuer around the world and denominated in any currency.

Non-Euro currency exposure is limited to 10% of net assets.

Specifically, the Sub-Fund invests at least 85% of net assets in units of the master fund (OR-D class). The Sub-Fund may invest up to 15% in deposits.

The Impact Green Bonds master fund is a Sub-Fund of the Amundi Responsible Investing SICAV constituted under French law and qualifies as a master fund under Directive 2009/65/EC.

The master fund may invest up to 100% of its net assets in all of the following types of green bonds traded on a regulated market and issued by governments, supra-national organizations, and private or public companies around the world, including up to 15% of the assets in emerging markets:

- fixed-rate and variable-rate bonds;
- indexed bonds: inflation, CMR (Constant Maturity Rate);
- subordinated securities issued by any type of bank, corporation or insurance company;
- Asset-Backed Securities (ABS) and Mortgage-Backed Securities (MBS) up to a maximum of 10% of net assets.

The master fund will invest a minimum of 50% of the net assets in green bonds from issuers with an ESG rating of between A and D (meeting the criteria and guidelines of the Green Bond Principles, as published by the ICMA).

At least 90% of the securities held in the portfolio are subject to a non-financial analysis.

The master fund may invest up to 15% of net assets in unrated or below investment grade securities.

The currency risk will be hedged up to a total exposure to currencies other than the euro of 10% of the net assets.

While complying with the above policies, the master fund may also invest:

- up to 30% of its net assets in money market instruments;
- up to 10% of net assets in UCITS/UCIs;
- in deposits;

The master fund makes use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on interest rates, credit and foreign exchange).

The master fund is actively managed. The Barclays MSCI Global Green Bond Index (coupons reinvested), hedged in euro (the "Index") serves a posteriori as an indicator for assessing the master fund's performance.

There are no constraints relative to the Index restraining portfolio construction. The master fund has not designated the Index as a reference benchmark for the purpose of the Disclosure Regulation.

The master fund's sustainable investment is focused primarily on environmental objectives by investing in so-called "green bonds" which fund eligible projects (i) meeting the criteria and guidelines of the Green Bond Principles (as published by the ICMA) and (ii) for which the positive impact on energy transition and the environment of the projects it finances can be assessed.

The Investment manager of the both Sub-Funds is Amundi Asset Management.

From 20th March 2019 Amundi Funds Cash EUR and Amundi Funds Cash USD are compliant with the EU regulation 2017/1131 related to money market funds. Those 2 Sub-Funds belong to the category VNAV MMF as defined by the EU regulation.

16 RECEPTION AND TRANSMISSION OF ORDERS FEES

Reception and transmission of orders fees are:

- paid to Amundi Intermediation or to Amundi (UK) Ltd, for their services rendered to Sub-Funds managed by Amundi which consist in centralizing orders and in supporting their best execution.
- accrued daily and paid quarterly on the basis of the transactions handled by Amundi's related parties.

Compared to an investment manager negotiating transactions on his own, the centralization of order enables namely to negotiate better prices with the brokers thanks to an increase of transactions volume, to have access to a larger number of brokers and to more market information, to benefit from the know-how of trading specialists and dedicated trading controllers.

These fees are recorded under caption "Reception and transmission of orders fees" in the Statement of Operations and Changes in Net Assets.

18 SWING PRICING

Since January 2016, a Swing Pricing policy has been implemented in the Fund.

Significant net inflows or outflows in a Sub-Fund cause the Investment Manager to trade the Sub-Funds' securities, thereby incurring trading costs.

With Swing Pricing, a Sub-Fund's Net Asset Value per share is adjusted to account for trading costs incurred where shareholders' subscriptions or redemptions activity exceeds a Sub-Fund's predetermined threshold. Swing Pricing is a mechanism of valuation which adjusts (swings) a Sub-Fund's Net Asset Value per share to account for these trading costs.

The aim is to protect the interests of non-dealing shareholders by ensuring the shareholders making significant subscriptions or redemptions contribute to the cost of their transactions.

Market conditions, trading costs and other Sub-Fund's data are used by the Management Company to determine which Sub-Fund's Net Asset Value per unit may be affected by Swing Pricing, and the appropriate threshold and swing factor to be applied for each Sub-Fund. These are reviewed by the Board of Directors of the Management Company on a periodic basis.

The Swing Factor may not exceed 2% of Net Asset Value as outlined in the prospectus.

During July 2022 - December 2022, Swing Pricing adjustments were applicable on the Net Asset Value per unit of the following Sub-Funds:

All transactions are bilateral transactions.

Sub-funds respect at all time the constraint "Cash received as collateral of OTC contracts and repurchase agreements has to be higher than the sum of deposits with credit institutions, investments in high-quality government bonds, reverse repurchase transactions with credit institutions and investments in short term money market funds". Cash is managed as a whole; the investment management process does not specifically isolate cash received as collateral from other cash. Collateral granted by the sub-funds in the context of repurchase agreements are held on segregated accounts.

The interest received and paid under reverse repurchase agreements and repurchase agreements are disclosed in the Statement of Operations and Changes in Net Assets, for each Sub-Fund under the captions "Interest received on Repos/Reverse Repos" and "Interest paid on Repos/Reverse Repos".

All transactions are bilateral transactions.

For each counterparty and each sub-fund, collateral positions are followed-up globally for all OTC instrument types.

Cash collateral is managed as a whole; the investment management process does not specifically isolate cash received as collateral from other cash.

Returns and costs incurred from performance swaps transactions during the period ended 31 December 2022 are included in the valuation of the swaps.
