Note 1: The Fund

The MFS Meridian Funds (the “fund” or the “Company”) is an open-ended investment company incorporated under the laws of the Grand Duchy of Luxembourg on 4 February 1992. It is organised under Part I of the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment, as amended, as a Société Anonyme qualifying as a “Société d’Investissement à Capital Variable” (“SICAV”). The fund is registered with the Registre de Commerce et des Sociétés of Luxembourg, under number R.C.S. B 39346. On 31 October 2014, MFS Investment Management Company (Lux) S.à r.l. (“MFS Lux”) was appointed by the fund to act as Management Company.

The fund is organised as an “umbrella fund” comprising separate sub-funds each of which relates to a separate portfolio of securities with specific investment objectives. At 31 July 2023, it comprises 38 sub-funds, each relating to a separate investment portfolio consisting of securities, cash, and other instruments. Each sub-fund may offer various types of classes of shares, which may differ in the minimum subscription amount, minimum holding amount, currency and/or eligibility requirements, the fees and expenses, and the dividend policy applicable to them. The fund may be offered for sale in European Economic Area (“EEA”) states, subject to notification in countries other than the Grand Duchy of Luxembourg, and in certain jurisdictions subject to local offering requirements. Please note that not all of the sub-funds or classes may be registered or authorized for distribution in every jurisdiction. Share classes available for each sub-fund at 31 July 2023 can be found under “Statistical Information” in this report.

Note 2: Summary of Significant Accounting Policies

The financial statements have been prepared in accordance with Luxembourg legal and regulatory requirements applicable to investment funds. A reconciliation of the impact on net investment income for those impacted sub-funds arising from accounting differences between Luxembourg legal and regulatory requirements for investment funds and Generally Accepted Accounting Principles (“GAAP”) used in the United States is provided in Note 16.

- A) *Use of Estimates* – The preparation of financial statements in conformity with accounting principles generally accepted in Luxembourg requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of income and expenses during the reporting period. Actual results may differ from those estimates.
- B) *Financial Instrument Valuations* – Equity securities are generally valued at the last sale or official closing price on their primary market or exchange as provided by a third-party pricing service. Equity securities, for which there were no sales reported that day, are generally valued at the last quoted daily bid quotation on their primary market or exchange as provided by a third-party pricing service.

Debt instruments and floating rate loans are generally valued at an evaluated or composite bid as provided by a third-party pricing service.

Exchange-traded options are generally valued at the last sale or official closing price on their primary exchange as provided by a third-party pricing service. Exchange-traded options for which there were no sales reported that day are generally valued at the last daily bid quotation on their primary exchange as provided by a third-party pricing service. For put options, the position may be valued at the last daily ask quotation if there are no trades reported during the day. Options not traded on an exchange are generally valued at a broker/dealer bid quotation. Foreign currency options are generally valued at valuations provided by a third-party pricing service.

Futures contracts are generally valued at the last posted settlement price on their primary exchange as provided by a third-party pricing service. Futures contracts for which there were no trades that day for a particular position are generally valued at the closing bid quotation on their primary exchange as provided by a third-party pricing service.

Swap agreements are generally valued using valuations provided by a third-party pricing service, which for cleared swaps includes an evaluation of any trading activity at the clearinghouses.

Forward foreign currency exchange contracts are generally valued at the mean of bid and asked prices for the time period interpolated from rates provided by a third-party pricing service for proximate time periods.

Short-term instruments with a maturity at issuance of 60 days or less may be valued at amortized cost, which approximates market value.

Open-end investment companies are generally valued at their net asset value per share excluding redemption fees (if any).

Securities and other assets generally valued on the basis of information from a third-party pricing service may also be valued at a broker/dealer bid quotation.

Values obtained from third-party pricing services can utilize both transaction data and market information such as yield, quality, coupon rate, maturity, type of issue, trading characteristics, and other market data. The values of securities and other assets and liabilities expressed in non-base currencies are converted to the base currency of the sub-fund based upon exchange rates provided by a third-party source.

The Management Company has delegated primary responsibility for determining or causing to be determined the value of the sub-fund’s investments (including any fair valuation) to Massachusetts Financial Services Company (“MFS”), the Investment Manager, pursuant to valuation policies and procedures approved by the Board of Directors of the Company and under the oversight of the Board of Directors. In carrying out the valuation policies and procedures, the Investment Manager provides instructions to the Administration Agent on an ongoing basis. If the Investment Manager determines that reliable market quotations are not readily available, investments are valued at fair value as determined in good faith by the Investment Manager in accordance with such procedures under the oversight of the Board of Directors.

Under the valuation policies and procedures applicable to the sub-funds, investments may be valued at fair value if the Investment Manager determines that an investment’s value has been materially affected by events occurring after the close of the exchange or market on which the investment is principally traded (such as a foreign exchange or market) and prior to the determination of the sub-fund’s net asset value, or after the halt of trading of a specific security where trading does not resume prior to the close of the exchange or market on which the security is principally traded. Events that occur after markets close (such as developments in foreign markets) and prior to the determination of the sub-fund’s net asset value may be deemed to have a material effect on the value of securities traded in these markets. Accordingly, the sub-fund’s non-U.S. (“foreign”) equity securities may often be valued at fair value. The Investment Manager may rely on third-party pricing services or other information (such as the correlation with price movements of similar securities in the same or other markets; the type, cost and investment characteristics of the security; the business and financial condition of the issuer; and trading and other market data) to assist in determining whether to fair value and at what value to fair value an investment. The value of an investment for

purposes of calculating the sub-fund's net asset value can differ depending on the source and method used to determine the value. When fair valuation is used, the value of an investment used to determine the sub-fund's net asset value may differ from quoted or published prices for the same investment. There can be no assurance that the sub-fund could obtain the fair value assigned to an investment if it were to sell the investment at the same time at which the sub-fund determines its net asset value per share.

- C) *Dividends and Interest* – Dividends received in cash are recorded on the ex-dividend date. Certain dividends from foreign securities will be recorded when the sub-fund is informed of the dividend if such information is obtained subsequent to the ex-dividend date. Interest income is recorded on the accrual basis. Each sub-fund generally accretes discounts on debt securities as adjustments to interest income. The sub-funds do not amortize premiums on debt securities. Dividend and interest payments received in additional securities are recorded on the ex-dividend or ex-interest date in an amount equal to the value of the security on such date. Debt obligations may be placed on non-accrual status or set to accrue at a rate of interest less than the contractual coupon when the collection of all or a portion of interest has become doubtful. Interest income for those debt obligations may be further reduced by the write-off of the related interest receivables when deemed uncollectible.

The sub-funds may receive proceeds from litigation settlements. Any proceeds received from litigation involving portfolio holdings are reflected in the Statements of Operations and Changes in Net Assets in net realized gain (loss) on investments, derivatives, and currency transactions if the security has been disposed of by the sub-fund or in net change in unrealized gain (loss) on investments, derivatives, and currency translation if the security is still held by the sub-fund. Any other proceeds from litigation not related to portfolio holdings are recorded as net realized gain, in the Statements of Operations and Changes in Net Assets.

- D) *Foreign Currency Translation* – Purchases and sales of foreign investments, income, and expenses initially expressed in foreign currencies are converted each business day into each sub-fund's base currency based upon currency exchange rates prevailing on the respective dates of such transactions or on the reporting date for foreign denominated receivables and payables. The base currency for the Blended Research European Equity Fund, Continental European Equity Fund, Euro Credit Fund, European Core Equity Fund, European Research Fund, European Smaller Companies Fund, and European Value Fund is EUR. The base currency for the U.K. Equity Fund is GBP. Effective 7 June 2022, the base currency of the Japan Equity Fund was changed from USD to JPY. The base currency for all the remaining sub-funds is USD. Gains and losses attributable to foreign currency exchange rates on sales of securities and foreign exchange rate movements on receivables, payables, income, and expenses are recorded for financial statement purposes as net realized gain (loss) on investments, derivatives, and currency transactions. The portion of both realized and unrealized gains and losses on investments that results from fluctuations in currency exchange rates is not separately disclosed.

- E) *Cost of Securities Sold* – In determining the cost of securities sold, each sub-fund uses the identified cost basis.

- F) *Derivative Collateral Requirements* – Derivative counterparty credit risk is managed through formal evaluation of the creditworthiness of all potential counterparties. On certain, but not all, uncleared derivatives, the sub-fund attempts to reduce its exposure to counterparty credit risk, whenever possible by entering into an International Swaps and Derivatives Association ("ISDA") Master Agreement on a bilateral basis, at the sub-fund level. The ISDA Master Agreement gives each party to the agreement the right to terminate all transactions traded under such agreement if there is a specified deterioration in the credit quality of the other party. Upon an event of default or a termination of the ISDA Master Agreement, the non-defaulting party has the right to close out all transactions traded under such agreement and to net amounts owed under each agreement to one net amount payable by one party to the other. This right to close out and net payments across all transactions traded under the ISDA Master Agreement could result in a reduction of the sub-fund's credit risk to such counterparty equal to any amounts payable by the sub-fund under the applicable transactions, if any. These netting rights may be stayed or limited in the event the counterparty becomes insolvent. However, absent an event of default by the counterparty or a termination of the agreement, the ISDA Master Agreement does not result in an offset of reported balance sheet assets and liabilities across transactions between the sub-fund and the applicable counterparty.

Collateral and margin requirements differ by type of derivative. Margin requirements are set by the clearing broker and the clearinghouse for cleared derivatives (e.g., futures contracts, cleared swaps, and exchange-traded options). Collateral terms are contract specific for uncleared derivatives (e.g., forward foreign currency exchange contracts, uncleared swap agreements, and uncleared options). For derivatives traded under an ISDA Master Agreement, which contains a collateral support annex, the collateral requirements are netted across all transactions traded under such counterparty-specific agreement and an amount is posted from one party to the other to collateralize such obligations. Cash that has been segregated or delivered to cover the sub-fund's collateral or margin obligations under derivative contracts, if any, will be reported separately in the Statements of Assets and Liabilities as "Restricted cash" for uncleared derivatives and/or "Deposits with brokers" for cleared derivatives. Securities pledged as collateral or margin for the same purpose, if any, are noted in the Schedules of Investments. The sub-funds may be required to make payments of interest on uncovered collateral or margin obligations with the broker. Any such payments are included in "Interest expense and similar charges" in the Statements of Operations and Changes in Net Assets. Collateral received consists of cash and/or high quality government debt, which is not reported in the Statements of Assets and Liabilities or Schedules of Investments. At 31 July 2023, the following sub-funds had segregated cash or received cash and/or high quality government debt as collateral for open cleared and uncleared derivatives.

G) *Forward Foreign Currency Exchange Contracts* – Each sub-fund may enter into forward foreign currency exchange contracts for the purchase or sale of a specific foreign currency at a fixed price on a future date. Risks may arise upon entering into these contracts from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of the contract. Certain sub-funds may enter into forward foreign currency exchange contracts for efficient portfolio management, hedging, or for investment purposes. For efficient portfolio management purposes, the sub-fund may enter into contracts to deliver or receive foreign currency it will receive from or require in its normal investment activities. For hedging purposes, the sub-fund may use contracts in a manner intended to protect foreign currency denominated securities from declines in value due to unfavorable exchange rate movements. For investment purposes, certain sub-funds may enter into contracts with the intent of changing the relative exposure of the sub-fund’s portfolio of securities to different currencies to take advantage of anticipated exchange rate changes. The forward foreign currency exchange contracts are adjusted by the daily exchange rate of the underlying currency and any unrealized gains or losses are recorded as a receivable or payable for forward foreign currency exchange contracts until the contract settlement date. On contract settlement date, any gains or losses are recorded as realized gain (loss) on investments, derivatives, and currency transactions in the Statements of Operations and Changes in Net Assets. Collateral, in the form of cash or securities, is held in segregated accounts with the sub-fund’s depository in connection with these agreements. Details of the forward foreign currency exchange contracts outstanding are listed in Note 10.

H) *Hedged Share Classes* – Certain sub-funds offer classes with the aim to reduce exchange rate and return fluctuations between the applicable non-base currency hedged share class (“Hedged Share Classes” with the exception of the BRL-Hedged Share Classes as discussed below) and the unhedged base currency class of the relevant sub-fund. Brown Brothers Harriman Investor Services Limited (“BBH”), as delegated provider of currency hedging services for Hedged Share Classes, engaged in hedging transactions for such Hedged Share Classes. The terms and conditions applicable to the Hedged Share Classes are the same as those which apply for the same classes of shares offered in the base currency, the difference being the hedging of the Hedged Share Class to the base currency of the sub-fund. BBH may execute such hedging transactions by using various hedging techniques and instruments, including forward foreign currency exchange contracts, foreign exchange swap contracts, currency futures, written call options, and purchased put options. The gains/losses and expenses of the hedging process will be borne by the Hedged Share Classes. Given that there is no segregation of liabilities between share classes of the sub-funds, there is a risk that, under certain circumstances, currency hedging transactions in relation to one share class (e.g. a Hedged Share Class) could result in liabilities which might affect the net asset value of the other share classes of the same sub-fund. For example, if a currency hedging transaction in respect of a Hedged Share Class were to result in liabilities that the Hedged Share Class has insufficient assets to cover, assets attributable to the other share classes of the sub-fund may be used to cover the liabilities. Further, collateral posting requirements, which may become more burdensome in light of recent regulatory developments, may require the sub-fund to maintain a larger allocation to cash and cash-equivalent instruments than the Investment Manager would otherwise determine to hold. This could negatively affect performance for the sub-fund as a whole, even where the corresponding derivative transactions are in respect of the Hedged Share Classes alone. Details of the class-specific forward foreign currency exchange contracts outstanding are listed in Note 11.

BRL-Hedged Share Classes seek to systematically convert the value of net assets to the Brazilian Real (“BRL”) through the use of derivatives. BRL-Hedged Share Classes are similar in terms of characteristics and risks to the other Hedged Share Classes as described above, except that they are not denominated in BRL (due to currency trading restrictions on BRL) but in the base currency of the respective Fund. BRL-Hedged Share Classes are designated with an “R” (e.g., IH1R (USD)). References to “Hedged Share Classes” throughout this document otherwise include the BRL-Hedged Share Classes.

I) *Written Options* – In exchange for a premium, each sub-fund may write call options on securities for which it anticipated the price would decline and also write put options on securities for which it anticipated the price would increase. At the time the option was written, the sub-fund believed the premium received exceeded the potential loss that could result from adverse price changes in the options’ underlying securities. In a written option, the sub-fund as the option writer grants the buyer the right to purchase from, or sell to, the sub-fund a specified number of shares or units of a particular security, currency or index at a specified price within a specified period of time. The premium is initially recorded as a liability in the Statements of Assets and Liabilities. The option is subsequently marked-to-market daily with the difference between the premium received and the market value of the written option being recorded as unrealized appreciation or depreciation. When a written option expires, the sub-fund realizes a gain equal to the amount of the premium

received. The difference between the premium and the amount paid on effecting a closing transaction is considered a realized gain or loss. When a written call option is exercised, the premium received is offset against the proceeds to determine the realized gain or loss. When a written put option is exercised, the premium reduces the cost basis of the security purchased by the sub-fund. Collateral, for uncleared options, in the form of cash or securities, is held in segregated accounts with the sub-fund's depository in connection with these agreements.

At the initiation of the written option contract, for exchange traded options, the sub-fund is required to deposit securities or cash as collateral with either the depository for the benefit of the broker or directly with the clearing broker, based on the type of option. For uncleared options, the sub-fund may post collateral subject to the terms of an ISDA Master Agreement as generally described above if the market value of the options contract moves against it. The sub-fund, as writer of an option, may have no control over whether the underlying securities may be sold (call) or purchased (put) and, as a result, bears the market risk of an unfavorable change in the price of the securities underlying the written option. Losses from writing options can exceed the premium received and can exceed the potential loss from an ordinary buy and sell transaction. Although the sub-fund's market risk may be significant, the maximum counterparty credit risk to the sub-fund is equal to the market value of any collateral posted to the broker. For uncleared options, this risk is mitigated in cases where there is an ISDA Master Agreement between the sub-fund and the counterparty providing for netting as described above.

- J) *Purchased Options* – Each sub-fund may purchase call or put options for a premium. Purchased call and put options entitle the holder to buy or sell a specified number of shares or units of particular security, currency or index at a specified price at a specified date or within a specified period of time. Purchasing call options may be used to hedge against an anticipated increase in the cost of securities or currency to be acquired or to increase the sub-fund's exposure to an underlying instrument. Purchasing put options may hedge against an anticipated decline in the value of portfolio securities or currency or decrease the sub-fund's exposure to an underlying instrument. The premium paid is initially recorded as an investment in the Schedules of Investments. That investment is subsequently marked-to-market daily with the difference between the premium paid and the market value of the purchased option being recorded as unrealized appreciation or depreciation. Premiums paid for purchased call and put options which have expired are treated as net realized loss on investments in the Statements of Operations and Changes in Net Assets. Upon the exercise or closing of a purchased option, the premium paid is either added to the cost of the security or financial instrument in the case of a call option, or offset against the proceeds on the sale of the underlying security or financial instrument in the case of a put option, in order to determine the net realized gain or loss on investments, derivatives, and currency transactions. Whether or not the option is exercised, the sub-fund's maximum risk of loss from purchasing an option is the amount of premium paid. All option contracts involve credit risk if the counterparty to the option contract fails to perform. For uncleared options, this risk is mitigated in cases where there is an ISDA Master Agreement between the sub-fund and the counterparty providing for netting as described above and, where applicable, by the posting of collateral by the counterparty to the sub-fund to cover the sub-fund's exposure to the counterparty under such ISDA Master Agreement.
- K) *Swap Agreements* – Certain sub-funds may enter into swap agreements. A swap agreement is generally an exchange of cash payments, at specified intervals or upon the occurrence of specified events, between the sub-fund and another party. Swaps may be centrally cleared ("cleared swaps") or uncleared ("uncleared swaps"). In a cleared swap transaction, the ultimate counterparty to the transaction is a clearinghouse (the "clearinghouse"). The contract is transferred and accepted by the clearinghouse immediately following execution of the swap contract with an executing broker. Thereafter, throughout the term of the cleared swap, the sub-fund interfaces indirectly with the clearinghouse through a clearing broker and has counterparty risk to the clearing broker as well. Net cash payments are exchanged at specified intervals and the expected income or expense is recorded on the accrual basis. The swap agreement is recorded at value and adjusted daily and the change in value is recorded as unrealized appreciation or depreciation in the Statements of Operations and Changes in Net Assets. The value of the swap agreement, which is adjusted daily, is recorded in the Statements of Assets and Liabilities, as "Swaps, at value" for uncleared swaps. For cleared swaps, payments (variation margin) are made or received by the sub-fund each day, depending on the daily fluctuations in the value of the cleared swap, such that only the current day net receivable or payable for variation margin is included in "Receivable due from brokers" or "Payable due to brokers" as reported in the Statement of Assets and Liabilities. Amounts paid or received at the inception of the swap agreement are disclosed as premiums paid or received in Note 14 and are amortized using the effective interest method over the term of the agreement. A liquidation payment received or made upon early termination is recorded as a realized gain or loss in the Statements of Operations and Changes in Net Assets. In most instances, collateral for uncleared swaps, in the form of cash or securities, is held in segregated accounts with the sub-fund's depository in connection with these agreements. Collateral may also be posted directly with certain counterparties. Collateral for cleared swaps, in the form of cash or securities, is posted by the sub-fund directly to the clearing broker.

Risks related to swap agreements include the possible lack of a liquid market, unfavorable market and interest rate movements of the underlying instrument and the failure of the counterparty to perform under the terms of the agreements. The sub-fund's maximum risk of loss from counterparty credit risk is the discounted net value of the cash flows to be received from/paid to the counterparty over the contract's remaining life, to the extent that the amount is positive, plus any collateral posted directly to the counterparty. To address counterparty risk, uncleared swap agreements are limited to only highly-rated counterparties. Risk is further reduced by having an ISDA Master Agreement between the sub-fund and its counterparty providing for netting as described above and, where applicable, by the posting of collateral by the counterparty to the sub-fund to cover the sub-fund's exposure to the counterparty under such ISDA Master Agreement. The sub-fund's counterparty risk due to cleared swaps is mitigated by the fact that the clearinghouse is the true counterparty to the transaction and the regulatory safeguards in the event of a clearinghouse or clearing broker bankruptcy. Certain sub-funds may enter into swaps for efficient portfolio management. Certain sub-funds may also enter into swaps for investment purposes. For efficient portfolio management purposes, the sub-fund may use swaps to reduce its exposure to interest and foreign exchange rate fluctuations. For investment purposes, certain sub-funds may use swaps to take a position on anticipated changes in the underlying financial index.

Interest Rate Swaps – Interest rate swap agreements involve the periodic exchange of cash flows, between the sub-fund and a counterparty, based on the differences between two interest rates applied to a notional principal amount. The two interest rates exchanged may either be a fixed rate and a floating rate or two floating rates based on different indices. The net receivable or payable associated with these payments is accrued daily and recorded as an unrealized gain or loss, and any payments received or made are recorded as realized gain or loss, in the Statements of Operations and Changes in Net Assets. Details of the interest rate swaps outstanding are listed in Note 14.

Credit Default Swaps – Credit default swaps are agreements to manage a sub-fund's exposure to the market or certain sectors of the market, to reduce a sub-fund's credit risk exposure to defaults of corporate and sovereign issuers or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. In a credit default swap, the protection buyer can make an upfront payment and will make a stream of payments to the protection seller based on a fixed percentage applied to the contract notional amount in exchange for the right to receive a specified return upon the occurrence of a

defined credit event on the reference obligation (which may be either a single security or a basket of securities issued by corporate or sovereign issuers) and, with respect to the cases where physical settlement applies, the delivery by the buyer to the seller of a defined deliverable obligation. Although agreement specific, credit events generally consist of a combination of the following: bankruptcy, failure to pay, restructuring, obligation acceleration, obligation default, or repudiation/moratorium, each as defined in the 2003 ISDA Credit Derivatives Definitions as amended by the relevant contract. Restructuring is generally not applicable when the reference obligation is issued by a North American corporation and obligation acceleration, obligation default, or repudiation/moratorium are generally only applicable when the reference obligation is issued by a sovereign entity or an entity in an emerging markets country. Upon determination of the final price for the deliverable obligation (or upon delivery of the deliverable obligation in the case of physical settlement), the difference between the value of the deliverable obligation and the swap's notional amount is recorded as realized gain or loss in the Statements of Operations and Changes in Net Assets. As discussed earlier in this note, collateral requirements for these swaps, if uncleared, are based generally on the market value of the swap netted against collateral requirements for other types of uncleared derivatives traded under each counterparty's ISDA Master Agreement. Details of the credit default swaps outstanding are listed in Note 14.

- L) *Futures Contracts* – The sub-funds may enter into futures contracts which may be used to hedge against or obtain broad market exposure, interest rate exposure, currency exposure, or to manage duration. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date. Upon entering into a futures contract, the sub-fund is required to deposit with the broker either in cash or securities an initial margin in an amount equal to a certain percentage of the notional amount of the contract, which subjects the sub-fund to counterparty risk to the clearing broker and possibly the clearinghouse with respect to such collateral. Subsequent payments (variation margin) are made or received by the sub-fund each day, depending on the daily fluctuations in the value of the contract, and are recorded for financial statement purposes as unrealized gains or losses by the sub-fund until the contract is closed or expires at which point the gain or loss on futures contracts is realized. Upon entering into such contracts, the sub-fund bears the risk of interest or exchange rates or securities' prices moving unexpectedly, in which case, the sub-fund may not achieve the anticipated benefits of the futures contracts and may realize a loss. Details of the futures contracts outstanding are listed in Note 13.
- M) *Combined Statements* – The combined Statements of Assets and Liabilities and Statements of Operations and Changes in Net Assets are presented in EUR at the exchange rate at 31 July 2023. The currency translation adjustment relates to the retranslation of the opening Net Asset Values at this exchange rate. The currency exchange rates (USD to EUR) for 31 July 2023 and 31 January 2023 were 0.909504 and 0.919836, respectively. The currency exchange rates (GBP to EUR) for 31 July 2023 and 31 January 2023 were 1.167211 and 1.134019, respectively. The currency exchange rates (JPY to EUR) for 31 July 2023 and 31 January 2023 were 0.006396 and 0.007067, respectively.
- N) *Negative Interest* – Each sub-fund may be charged interest ("negative interest") on cash balances. Any such payments are included in "Interest expense and similar charges" in the Statements of Operations and Changes in Net Assets.
- O) *Distributions* – The income allocated to Roll-up shares (A1, C1, I1, N1, S1, P1, W1, and Z1, if offered) of each sub-fund shall be included in the portion of the net assets corresponding to such shares. Each sub-fund distributes to shareholders of Income shares (A2, A4, C2, I2, N2, and W2, if offered) substantially all of the net investment income attributable to such shares. For Gross Income shares (I3 if offered), the dividend is calculated at the discretion of the Board of Directors on the basis of the total investment income attributable to such shares, with relevant expenses of the class deducted after such distribution. See the fund's prospectus for additional details.
- P) *Repurchase Agreements* – Each sub-fund may enter into repurchase agreements. Each repurchase agreement is recorded at cost. For certain repurchase agreements, collateral posted by the counterparty is held by the sub-funds' depository or its agent, while for others it may be held with a third-party agent. In the latter case, the sub-funds are exposed to additional counterparty risk with respect to such collateral due to the possibility of insolvency of the third-party agent. Under Luxembourg regulations, the sub-funds' depository has established procedures to monitor collateral held with such third-party agent on behalf of the sub-funds. Each sub-fund monitors, on a daily basis, the value of the collateral to ensure that its value, including accrued interest, is greater than amounts owed to each sub-fund under each such repurchase agreement. Interest income earned on the sub-fund's investment in repurchase agreements are reflected in "Income on repurchase agreements" in the Statements of Operations and Changes in Net Assets. Details of the repurchase agreements including various counterparties and collateral amounts relating to such agreements outstanding are listed in Note 12. For the six months ended 31 July 2023, the following sub-funds had transaction costs for repurchase agreements. These amounts are included in the total transaction costs in Note 15.

Q) *Inflation-Adjusted Debt Securities* – Certain sub-funds may invest in inflation-adjusted debt securities issued by the U.S. Treasury. Certain sub-funds may also invest in inflation-adjusted debt securities issued by U.S. Government agencies and instrumentalities other than the U.S. Treasury and by other entities such as U.S. and foreign corporations and foreign governments. The principal value of these debt securities is adjusted through income according to changes in the Consumer Price Index or another general price or wage index. These debt securities typically pay a fixed rate of interest, but this fixed rate is applied to the inflation-adjusted principal amount. The principal paid at maturity of the debt security is typically equal to the inflation-adjusted principal amount, or the security's original par value, whichever is greater. Other types of inflation-adjusted securities may use other methods to adjust for other measures of inflation.

Note 3: Swing Pricing

Large transactions into or out of a sub-fund can create "dilution" of the sub-fund's assets because the price at which an investor buys or sells shares may not entirely reflect the trading and other related costs that arise when the Investment Manager trades securities to accommodate the large inflows and outflows. Therefore, the Company has adopted procedures such that a sub-fund's net asset value may be adjusted upward or downward (otherwise known as "swing pricing") in order to reduce the impact of such costs to existing shareholders of that sub-fund. Under these procedures, in the usual course of business, the adjustment will be triggered whenever the net subscriptions, exchanges, and redemptions in shares of all classes on a particular business day exceed a certain percentage of the sub-fund's assets as set by the Board of Directors of the Company or Management Company from time to time. In case of a large amount of net purchases, the net asset value per share will be adjusted upward and purchasers of sub-fund shares on that valuation date will effectively contribute an additional amount to offset the related transaction costs. Conversely, net asset value per share will be adjusted downward with a large amount of net redemptions. The adjusted net asset value will be applicable to all purchases, exchanges, or redemptions in shares of all classes on that valuation day. As a sub-fund's net purchases, redemptions, and exchanges vary from business day to business day, it is not possible to predict how frequently a sub-fund's net asset value will be adjusted. Based on these adjustments, the volatility of a sub-fund's net asset value may not fully reflect the true performance of the sub-fund's underlying assets. The published/dealing NAV per share, as adjusted in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, is disclosed in Statistical Information and may include a swing pricing adjustment. This adjustment is not recognized in either the Statements of Assets and Liabilities or the Statements of Operations and Changes in Net Assets. At 31 July 2023, no sub-funds included a swing pricing adjustment. A swing pricing historical activity report for the period is available at meridian.mfs.com.

Any adjustment to a sub-fund's net asset value (the "swing factor") will generally not exceed 2% of the net asset value of the relevant sub-fund on the relevant valuation date. However, under extraordinary conditions and when necessary in light of the best interests of investors, the Board of Directors may determine to use a swing factor in excess of 2% for a sub-fund. Such a decision must be notified to the CSSF, and investors will be informed via notice published in a Luxembourg newspaper and in another newspaper of more general circulation, as well as on meridian.mfs.com.

Note 4: Securities Loaned

Goldman Sachs Agency Lending ("GSAL"), as lending agent, may loan the securities of certain sub-funds to certain qualified institutions (the "Borrowers") approved by the fund. The loans are collateralized by high quality government debt in an amount at least equal to the market value of the securities loaned marked-to-market on a daily basis; such collateral held in custody with the depositary may be held with a sub-custodian within the depositary's network of sub-custodians. GSAL provides the applicable sub-fund with indemnification against Borrower default, including failure to deliver to the sub-fund any applicable distributions with respect to securities on loan or to return to the applicable sub-fund securities on loan in accordance with the lending agreement. On loans collateralized by high quality government debt, a fee is received from the Borrower, and is allocated between the sub-fund and the lending agent (which is not a related party to the fund, Management Company, Investment Manager or Depositary). Under the current securities lending agreement, the Company has agreed to pay the lending agent 15% of income generated up to \$4 million from securities lending transactions and 12.5% of income exceeding \$4 million from securities lending transactions. A nominal account maintenance and per-transaction fee is also paid to the Depositary Trust Clearing Corporation in connection with collateral maintenance. Income and expense from securities lending is separately reported in the Statements of Operations

and Changes in Net Assets. The dividend and interest income earned on the securities loaned is accounted for in the same manner as other dividend and interest income as disclosed in Note 2. The market value of securities loaned and collateral outstanding at 31 July 2023 for the applicable sub-funds were as follows:

Sub-Fund	Market Value of Securities Loaned	Market Value of Collateral
European Research Fund	€3,340,746	€3,763,812
European Smaller Companies Fund	€1,246,719	€1,433,406
Global Total Return Fund	\$ 918,784	\$1,097,172
U.S. Value Fund	\$3,388,608	\$3,872,083

Note 5: Related Party Transactions

A) *Management Company Fee* – The Board of Directors of the fund has appointed MFS Investment Management Company (Lux) S.à r.l. pursuant to a Management Company Agreement to carry out the functions of management of the fund as prescribed under Luxembourg regulations. The Management Company is responsible for the fund's investment management, administration and distribution and marketing functions. The Management Company has been permitted by the fund to delegate, under the Management Company's supervision and control, certain administrative, distribution and investment management functions to affiliates or third party service providers. The Management Company has appointed MFS, an affiliate, as the Investment Manager and Administrative Services Agent.

Each sub-fund pays the Management Company an annual fee approved by the fund's Board of Directors, which is intended to cover the expenses of services the Management Company provides in connection with its mandate, plus a target profit margin. These expenses include fees paid to the Management Company's independent Conducting Persons and Managers of the Management Company, legal, regulatory and operational costs of the Management Company as well as fees paid by the Management Company to third parties to provide certain administrative, risk management and reporting services to the Management Company, including the administrative support services provided by MFS. The fund also reimburses the Management Company for out-of-pocket expenses related to its services. The management company fee is computed daily and is allocated such that each sub-fund pays a fixed fee of \$20,000 (or currency equivalent) plus an asset-based fee based on average daily net assets over \$40 million and up to \$4 billion (or currency equivalent) for each sub-fund. The management company fee incurred by each sub-fund for the six months ended 31 July 2023 was equivalent to the following annual effective rates of each sub-fund's average daily net assets:

(f) ISB1 (EUR) has an investment management fee of 0.37%.

Class P shares pay fees for investment management and distribution services as a single combined annual management charge. The annual management charge is computed daily and paid monthly at the following annual rates as of 31 July 2023 based on average daily net assets of each share class for the sub-funds below:

Sub-Fund	Class P
Blended Research European Equity Fund	1.35%
Diversified Income Fund	1.35%

The investment management fee for Class Z shares will be administratively levied and will be paid directly by the shareholder, in relation to investment management services provided by MFS to the sub-fund, and the payment of such fee is not charged to or paid by the sub-fund.

- C) *Distribution and Service Fees* – The Management Company is also responsible for oversight of the distribution and marketing function with respect to the fund. All distribution and service fees are being paid to the Management Company or its affiliate. The Management Company or its affiliates may pay all or a portion of such fees to financial intermediaries. The Management Company may engage certain of its affiliates (including MFS International Limited) to provide distribution support to the Management Company.

The fund has adopted a distribution plan, which provides that each sub-fund pays the Management Company or its affiliate an annual distribution and/or service fee paid on a monthly basis. Each sub-fund pays a distribution fee annually of average daily net assets of Class A, Class C, and Class N shares at the following rates:

In consideration for the distribution fees, the Management Company or its affiliate pays expenses on behalf of these sub-funds related to the marketing and distribution of their shares, including a fee paid to financial intermediaries or institutions.

The service fee paid to the Management Company or its affiliate is established at the annual rate of 0.50% of average daily net assets attributable to the Class C shares of each sub-fund.

Class A shares are subject to a front-end load of up to 6.00% of the net asset value of such shares. With respect to each sub-fund, certain large purchases of Class A shares may be purchased without a front-end load. Class N shares and Class P shares are subject to a front-end load of up to 3.00% of the net asset value of such shares. Class C shares are subject to a back-end load up to a maximum of 1.00% in the event of a shareholder redemption within twelve months following the purchase. Front-end loads may be paid to the Management Company or its affiliate (all or a portion of which may be paid as a commission by the Management Company or its affiliate to the applicable financial intermediary upon the sale of Class A shares) or may be deducted from the applicable purchase amount directly by the financial intermediary upon the purchase of Class A shares. The Management Company or its affiliate receives all back-end loads, which are generally intended to recapture sales commissions paid by the Management Company or its affiliate to financial intermediaries upon the purchase of the applicable class.

The Management Company has voluntarily agreed to rebate a portion of the service fee for Class C shares and a portion of the distribution fee for Class A shares, Class N, and Class P shares to the respective share class attributable to accounts for which there is no broker-dealer or other financial intermediary designated except for accounts attributable to MFS or its affiliates' seed money. The reductions under these agreements are included in "Expenses reimbursed by related parties" in the Statements of Operations and Changes in Net Assets.

- D) *Directors' Fees* – The fund pays no compensation directly to Directors of the fund who are employees of the Management Company, Investment Manager or its affiliates (other than fund related out-of-pocket expenses). As of the date of this report, all Directors of the fund are employees of the Management

Company, MFS Investment Management or its affiliates, except for Thomas Bogart and James R. Julian Jr., whose compensation, paid by the sub-funds in aggregate amounted to \$50,000 during the reporting period, before taxes. Thomas Bogart and James R. Julian Jr., also received reimbursement for out-of-pocket expenses, paid by the sub-funds in the aggregate amount of \$238 before taxes. These fees are included in the "Miscellaneous" expenses in the Statements of Operations and Changes in Net Assets. Amounts paid for the fiscal year will be disclosed in the 31 January 2024 annual report.

- E) *Expense Cap Arrangement* – Each sub-fund has entered into a temporary expense cap agreement whereby MFS has agreed in writing to bear certain of the sub-fund's "Other Expenses," excluding taxes (other than the Luxembourg tax d'abonnement) and expenses associated with the sub-fund's investment activities such as interest expense, such that these expenses do not exceed the rates of average daily net assets of Class A, Class C, Class I, Class N, Class P, Class W, and Class Z noted in the table below.

"Other Expenses" generally include all direct sub-fund expenses other than investment management, distribution and service fees. "Other Expenses" include fees paid to the Management Company, Depositary and Transfer Agent, legal and audit fees, share class hedging expenses, certain expenses associated with the sub-fund's investment activities including interest, and expenses in connection with the sub-fund's operation and central administration in Luxembourg, among others. "Other Expenses" do not include brokerage commissions and transaction costs or currency conversion costs and the fee paid to the securities lending agent.

For Class S, each sub-fund has entered into a temporary expense cap agreement whereby MFS has agreed in writing to bear certain direct expenses, excluding taxes (other than the Luxembourg tax d'abonnement) and expenses associated with the sub-fund's investment activities such as interest expense, such that the "Total Expense Ratio" does not exceed the rates of average daily net assets noted in the table below.

To the extent the "Total Expense Ratio" (in the case of Class S) or "Other Expenses" (in the case of other classes) exceeds the expense cap rate, the difference is attributable to certain other expenses that are excluded from the expense cap arrangement, such as interest expenses associated with the sub-fund's investment activities, brokerage commissions and transaction costs, currency conversion costs, or the fee paid to the securities lending agent.

For Class IS and Class WS, the Management Company reserves the right to offer a partial waiver of the investment management fee and/or an arrangement to bear "Other Expenses." The reductions under these agreements are included in "Expenses reimbursed by related parties" in the Statements of Operations and Changes in Net Assets.

(e) WSH1 (EUR), WSH1 (CHF), and WS1 (USD) have an other expense cap rate of 0.05%.

(f) ISB1 (EUR) has an other expense cap rate of 0.10%.

The reductions under these agreements are included in “Expenses reimbursed by related parties” in the Statements of Operations and Changes in Net Assets. These expense cap agreements are in place until 31 January 2025, at which time the arrangements may or may not be continued. All transactions entered into between the fund and MFS have been entered into in the ordinary course of business and on normal commercial terms. The fund has not entered into any transactions through a broker who is a connected person, nor has the fund entered into any transactions which are outside the ordinary course of business or not on normal commercial terms.

Note 6: Depositary Fees

Each sub-fund will pay State Street Bank International GmbH, Luxembourg Branch (“State Street”), the fund’s depositary and global custodian (the “Depositary”), a fee based on the monthly net asset value of the month-end holdings by foreign markets of the sub-funds plus a fee based upon the trading activity of each sub-fund. The Depositary and the Management Company or MFS, on behalf of the fund, shall determine the level of the fee from time to time in light of market rates applicable in Luxembourg. The fee is approved by the fund’s Board of Directors. Reasonable disbursements and out-of-pocket expenses incurred by the Depositary or by other banks and financial institutions to which safekeeping of assets of the sub-funds is entrusted are in addition to the Depositary’s fee. The Management Company and the fund have also entered into agreements with State Street to serve as the Registrar, Transfer Agent, Luxembourg Paying Agent, Central Administration Agent, and Fund Accounting Agent. The fund pays State Street fees for such services at commercial rates agreed upon between the parties, together with reasonable out-of-pocket expenses. The fees paid to State Street for these services are part of each sub-fund’s operating expenses which are capped by MFS as described in Note 5.

Note 7: Commission Sharing

The Investment Manager and its affiliates (the “MFS Global Group”) utilize a global investment platform built on the principle of close collaboration among members of its investment team, where research and investment ideas are shared. MFS Global Group investment professionals rely on their own internal research in making investment decisions even though they utilize external research provided by brokers or other research providers to help develop investment ideas. External research is also used to help understand market consensus, sentiment or perception, and identify relative inefficiencies more quickly and effectively.

The MFS Global Group makes decisions on the procurement of external research separately and distinctly from decisions on the selection of brokers that execute transactions for client accounts. The MFS Global Group will only execute a transaction with a broker who provides external research when, in the MFS Global Group’s judgment, the broker is capable of providing best execution for that transaction.

However, as permitted by Section 28(e) of the U.S. Securities Exchange Act of 1934, as amended (“Section 28(e)”), which governs the Investment Manager, the MFS Global Group may cause certain clients to pay a broker that provides “brokerage and research services” (as defined in Section 28(e)) to the MFS Global Group an amount of commission for effecting a securities transaction for clients in excess of the amount other brokers would have charged for the transaction if the MFS Global Group determines in good faith that the greater commission is reasonable in relation to the value of the brokerage and research services provided viewed in terms of the MFS Global Group’s overall responsibilities to its clients. The brokerage and research services received may be useful and of value to the MFS Global Group in serving both the accounts that generated the commissions and other clients of the MFS Global Group. Accordingly, not all of the research and brokerage services provided by brokers through which client securities transactions are effected may be used by MFS in connection with the client whose account generated the brokerage commissions.

The MFS Global Group has undertaken to bear the costs of external research for all accounts it advises, either by paying for external research out of its own resources, or by voluntarily reimbursing clients from its own resources for excess commissions paid to obtain external research. For accounts subject to a regulatory prohibition on the payment of excess commissions for research, including accounts that are directly or indirectly subject to the Markets in Financial Instruments Directive in the EU or U.K. (“MiFID II accounts”), the MFS Global Group will pay for external research out of its own resources. For all other accounts, the MFS Global Group operates a commission sharing arrangement that generates commission “credits” for the purchase of external research from commissions on equity trades in a manner consistent with Section 28(e). Under this arrangement the MFS Global Group may cause a client to pay commissions in excess of what the broker or other brokers might have charged for certain transactions in recognition of brokerage and research services provided by the executing broker. The MFS Global Group has voluntarily undertaken to reimburse clients from its own resources in an amount equal to all commission credits generated under this arrangement.

The research services obtained by the MFS Global Group through the use of commission credits may include: access to corporate management; industry conferences; research field trips to visit corporate management and/or to tour manufacturing, production or distribution facilities; statistical, research and other factual information or services such as investment research reports; access to analysts; a small number of expert networks; reports or databases containing corporate, fundamental, technical and political analyses; ESG-related information; portfolio modelling strategies; and economic research services, such as publications, chart services, and advice from economists concerning macroeconomics information, and analytical investment information about particular corporations.

Through the use of eligible brokerage and research services acquired with commission credits, the MFS Global Group initially avoids the additional expenses that it would incur if it developed comparable information through its own staff or if it purchased such services with its own resources. As a result, clients may pay more for their account transactions in the first instance than if the MFS Global Group caused clients to pay execution only rates. However, because the MFS Global Group has voluntarily undertaken to reimburse clients from its own resources for commission credits generated from client brokerage, the MFS Global Group ultimately assumes the additional expenses that it would incur if it purchased external research with its own resources.

Although the MFS Global Group generally bears the costs of external research, it generally does not pay, and therefore does not reimburse clients with respect to research that is made available by a broker to all of its customers and that the MFS Global Group generally considers to be of de minimis value, or for external research provided by executing brokers in fixed income transactions that incur mark-ups, mark-downs, and other fees rather than commissions. With respect to fixed income, the MFS Global Group believes that executing brokers in fixed income transactions do not charge lower mark-ups, mark-downs, commission equivalents or other fees if clients forego research services. Consequently, the MFS Global Group does not believe it pays higher mark-ups, mark-downs, commission equivalents or other fees to brokers on fixed income transactions than it would if it did not receive any research services from brokers. However, MiFID II generally considers research to be an inducement and therefore the MFS Global Group pays for certain categories of fixed income research received by the relevant affiliates out of its own resources.

Note 8: Taxation

The fund is subject to Luxembourg law with respect to its tax status. Under legislation and regulations currently prevailing in Luxembourg, the fund is subject to a "taxe d'abonnement" on its net assets at an annual rate of 0.05% for Class A, Class C, Class N, Class P, and Class W and 0.01% for Class I, Class S, and Class Z. The "taxe d'abonnement" is calculated and payable quarterly on the basis of the net assets at the end of each calendar quarter. Interest and dividend income, and gains on securities, may be subject to non-recoverable withholding taxes deducted at source in the countries of origin.

The fund is registered for Value Added Tax in the Grand Duchy of Luxembourg and subject to account for Value Added Tax in accordance with current regulations.

United Kingdom Tax Considerations – The Company has received "reporting fund" status for certain sub-funds and share classes for the fiscal year ended 31 January 2023. More information can be found at www.mfs.com.

Note 9: Line of Credit

Each sub-fund and other funds managed by MFS participate in an unsecured committed line of credit, subject to a \$250 million sublimit provided by a syndicate of banks under a credit agreement. Borrowings may be made for temporary financing needs. Interest is charged to each sub-fund, based on its borrowings, generally at a rate equal to the highest of 1) Daily Simple SOFR (Secured Overnight Financing Rate) plus 0.10%, 2) the U.S. Federal Funds Effective Rate, or 3) the Overnight Bank Funding Rate, each plus an agreed upon spread. A commitment fee, based on the average daily unused portion of the committed line of credit, is allocated among the participating sub-funds. The line of credit expires on 14 March 2024 unless otherwise extended or renewed. In addition, each sub-fund and other funds managed by MFS have established a \$200 million unsecured uncommitted borrowing arrangement with its depository bank for temporary financing needs. Interest is charged to each participating sub-fund, based on its borrowings, at rates equal to customary reference rates plus an agreed upon spread. Any interest fees are reflected in "Interest expense and similar charges" and any commitment fees are reflected in "Miscellaneous" expense in the Statements of Operations and Changes in Net Assets. None of the sub-funds had any borrowings outstanding under these arrangements at 31 July 2023.

Note 10: Open Forward Foreign Currency Exchange Contracts

At 31 July 2023, the sub-funds had outstanding the following forward foreign currency exchange contracts. Each sub-fund had sufficient cash and/or other securities to cover any commitments under these derivative contracts.

Note 16: Summary of accounting differences between Luxembourg legal and regulatory requirements for investment funds and accounting principles generally accepted in the United States

The fund's financial statements are prepared in accordance with Luxembourg legal and regulatory requirements for investment funds. These requirements differ in the manner in which discount is accreted and premium is amortized into income for certain fixed income securities from accounting principles generally accepted in the United States ("U.S. GAAP"). These differences do not change the total results of operations but may impact amounts reported for

net investment income and change in realized and unrealized gain (loss) for investments, derivatives, and currency translation. These differences have no impact on the net assets of the sub-funds. A description of the material differences and the financial statement impact for those impacted sub-funds are as follows:

	Luxembourg legal and regulatory requirements	U.S. GAAP	
Fixed income securities	Premium on fixed income securities is not required to be amortized to income on a daily basis. Discount on interest only securities is not required to be accreted to income on a daily basis.	Premium on fixed income securities is amortized to income on a daily basis. Note 17: Russia and Ukraine Conflict

The market disruptions, which began in late February 2022, associated with geopolitical events related to the conflict between Russia and Ukraine may adversely affect the value of the sub-funds' assets and thus the sub-funds' performance. In addition, the Diversified Income Fund, Emerging Markets Debt Fund, Emerging Markets Debt Local Currency Fund, Emerging Markets Equity Fund, Emerging Markets Equity Research Fund, Global Equity Income Fund, Global New Discovery Fund, Global Opportunistic Bond Fund, and Global Total Return Fund invest in securities and/or derivative instruments that are economically tied to Russia and/or Ukraine. Escalation of the conflict between Russia and Ukraine in late February 2022 caused market volatility and disruption in the tradability of Russian securities, including closure of the local securities market, temporary restriction on securities sales by non-residents, and disruptions to clearance and payment systems. To the extent that the sub-funds are unable to sell securities, whether due to market constraints or to the sanctions imposed on Russia by the United States and other countries, those securities will be considered illiquid and the value of those securities will reflect their illiquid classification. This may negatively impact the sub-funds' performance and/or ability to achieve their investment objectives. Management continues to monitor these events and to evaluate the related impacts, if any, to the sub-funds.

SECURITIES FINANCING TRANSACTIONS REGULATION

Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") requires disclosure detailing the Company's use of securities financing transactions in the Company's annual and semiannual reports.

A securities financing transaction ("SFT") is defined per Article 31(11) of the SFTR as:

- a repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction;
- a margin lending transaction.

The SFTR also extends the disclosure requirements to total return swaps.

The disclosure requirements are presented in the tables below. For additional information regarding the sub-funds' usage of SFTs and total return swaps, refer to the following Notes within the Notes to Financial Statements:

- Repurchase Agreements: Note 2 and Note 12
- Securities Loaned: Note 4
- Total Return Swaps: Note 2 and Note 14

At 31 July 2023, the sub-funds had the following amounts of securities on loan as proportion to total lendable assets:

Sub-Fund	Market Value of Securities Loaned	Market Value as % of Total Lendable Assets (a)
European Research Fund	€3,340,746	0.18%
European Smaller Companies Fund	€1,246,719	0.56%
Global Total Return Fund	\$ 918,784	0.06%
U.S. Value Fund	\$3,388,608	0.17%

(a) Total Lendable Assets is defined as "Investments, at value" on the Statements of Assets and Liabilities which excludes cash and cash equivalents.

At 31 July 2023, the sub-funds had the following amounts of assets engaged in each type of SFT and as a percentage of the sub-fund's net assets:

Share of collateral received that is reused, compared to the maximum amount specified in the prospectus or in the disclosure to investors:

The sub-funds are not permitted to sell, reinvest or pledge collateral received in the form of securities. To the extent the sub-funds receive cash as collateral, such cash collateral would only be placed on deposit with credit institutions allowed under Luxembourg law, and if applicable may only be reinvested in high-quality government bonds, reverse repurchase transactions (provided the transactions are with credit institutions subject to prudential supervision and the sub-fund is able to recall at any time the full amount of cash on accrued basis) or short-term money market funds allowed by Luxembourg law in order to mitigate the risk of losses on reinvestment. The sub-funds did not receive cash collateral for SFTs or total return swaps at 31 July 2023.

Safekeeping of collateral received by the sub-funds as part of SFTs, number and names of custodians and the amount of the collateral assets safe-kept by each of the custodians:

Safekeeping of collateral granted by the sub-fund as part of SFTs and total return swaps, proportion of collateral held in segregated accounts or in pooled accounts or in any other accounts:

At 31 July 2023, the sub-funds did not pledge collateral in connection with SFTs or total return swaps.

Data on return and cost for each type of SFTs and total return swaps broken down between the sub-fund, the manager of the collective investment undertaking and third parties (e.g. agent lender) in absolute terms and as a percentage of overall returns generated by that type of SFTs and total return swaps:

For information on income or returns earned and costs incurred for repurchase agreements, refer to Note 2 and for securities loaned, refer to Note 4. At 31 July 2023, the sub-funds did not hold any total return swaps.
