Activity report

Situation

Sentiment improved as case numbers fell, more and more parts of the economy reopened and economic data were favourable, resulting in equity indices in Europe and the US setting records once again. The approval of a comprehensive economic package kept the equity market rally going. Against the backdrop of an improved economic outlook, cyclical stocks generally gained momentum. The prices of oil and other commodities also climbed. In the US in particular, rising inflation expectations reflected in a temporary increase in long-term bond yields and put the pressure on central banks to prepare for an exit from loose monetary policy. With the ECB adhering to its supportive stance and the Fed not expected to raise interest rates until 2023, interest rate volatility has lessened of late.

The emergence and global spread of the coronavirus has had a negative impact on growth, employment and capital markets, which, from March 2020 onwards, has affected the Fund's performance and the processes of the investment management company, its service providers and the companies with which it has an outsourcing arrangement. The investment management company has introduced comprehensive measures to ensure proper management of the Fund, and has obtained assurances that the companies with which it has an outsourcing arrangement have adequate contingency plans.

It is currently unclear how successful the measures implemented – in particular the preventive action of governments and the monetary policies of central banks – will be in reassuring capital markets. We cannot rule out an impact on the Fund's performance in the coming financial year as a result of pressure from volatile market conditions and exogenous factors.

ODDO BHF Polaris Moderate

ODDO BHF Polaris Moderate invests actively in a mixture of bonds, equities, certificates and money market investments. The target equity quota is between 0 and 40%. The fixed income investments of the fund are comprised predominantly of government and corporate bonds along with Pfandbriefe. In addition, up to 10% of its assets can be invested in units of investment funds and ETFs. The fund may also be managed using financial futures.

The fund follows the STOXX Europe 50 (NR) (20%), the JPM EMU Investment Grade 1-10 years (60%) and the JPM Euro Cash 1 M (20%) as its benchmark indices*, seeking to outperform them rather than replicate them exactly. As a result of this, significant differences between it and the benchmark indices, both positive and negative, are possible. The fund is actively managed, with a constant search for promising investment opportunities that are expected to perform well. Stock selection is based on in-depth ESG and market analyses, and macroeconomic studies. Fundamental analysis also forms the cornerstone of active investment decisions, as well as the use of a quality-oriented approach.
