Semiannual report 2021/2022

for the period from October 1, 2021, through March 31, 2022

(in accordance with article 103 of the German Investment Code (KAGB))

General information 2

Semiannual report
DWS Aktien Strategie Deutschland 6

General information

Performance

The investment return, or performance, of a mutual fund investment is measured by the change in value of the fund's units. The net asset values per unit (= redemption prices) with the addition of intervening distributions, which are, for example, reinvested free of charge within the scope of investment accounts at DWS Investment GmbH, are used as the basis for calculating the value; in the case of domestic reinvesting funds, the domestic investment income tax – following any deduction of foreign withholding tax – plus solidarity surcharge charged to the fund are added. Performance is calculated in accordance with the "BVI method". Past performance is not a guide to future results.

The corresponding benchmarks – if available – are also presented in the report. All financial data in this publication is **as of March 31, 2022** (unless otherwise stated).

Sales prospectuses

The sole binding basis for a purchase are the current version of the sales prospectus, including the Terms and Conditions of Investment, and the key investor information document, which are available from DWS Investment GmbH or any branch of Deutsche Bank AG as well as from other paying agents.

Information about the all-in fee

The all-in fee does not include the following expenses:

- a) any costs that may arise in connection with the acquisition and disposal of assets;
- b) any taxes that may arise in connection with administrative and custodial costs;
- c) the costs of asserting and enforcing the legal claims of the investment fund.

The details of the fee structure are set out in the current sales prospectus.

Issue and redemption prices

Russia/Ukraine crisis

The escalating conflict between Russia and Ukraine marked a dramatic turning point in Europe, which, among other things, is expected to have a lasting effect on Europe's security architecture and energy policies and to cause considerable volatility. However, the specific or possible medium to long-term effects of the crisis on the economy, individual markets and sectors, as well as the social implications, cannot be conclusively assessed due to the uncertainty at the time of preparing this report. The Asset Management Company of the investment fund is therefore continuing its efforts, within the framework of its risk management strategy, to assess these uncertainties and their possible impact on the activities, liquidity and performance of the investment fund. The Asset Management Company is taking all measures deemed appropriate to protect investor interests to the greatest possible extent.

Coronavirus crisis

The coronavirus has spread since January 2020 and has subsequently led to a serious economic crisis. The rapid proliferation of the virus was reflected in, among other things, significant price market distortions and substantially increased volatility at the same time. Restrictions on freedom of movement, repeated lockdown measures, production stoppages, as well as disrupted supply chains, are exerting major pressure on downstream economic processes, which caused global economic prospects to deteriorate considerably. In the interim, noticeable recoveries and some new highs were to be observed in the markets – due, among other factors, to monetary and fiscal policy support programs and extensive vaccination and testing campaigns. Nevertheless, the specific or possible medium-to-long-term effects of the crisis on the economy, individual markets and sectors as well as the social implications in respect of the vigorous global spread of the virus or the emergence of various mutations and the associated high level of uncertainty at the time of preparing this report cannot be reliably assessed. There may therefore still be a significant impact on the respective investment fund's assets. A high level of uncertainty exists in relation to the financial implications of the pandemic, as these are dependent on external factors such as the spread of the virus/emerging variants and the measures taken by individual governments and central banks, the successful stemming of the development of infection rates in connection with vaccination rates and the speedy and sustainable restart of the economy.

The Asset Management Company of the investment fund is therefore continuing its efforts, within the framework of its risk management strategy, to assess these uncertainties and their possible impact on the activities, liquidity and performance of the investment fund. The Asset Management Company is taking all measures deemed appropriate to protect investor interests to the greatest possible extent. In coordination with the service providers, the Asset Management Company observed the consequences of the coronavirus crisis and adequately included its impact on the investment fund and the markets in which the investment fund invests into its decision-making processes. As of the date of this report, no significant redemption requests had been made in respect of the investment fund; the effects on the investment fund's unit certificate transactions are continuously monitored by the Asset Management Company; the performance capability of the most important service providers did not experience any significant impairment. In this context, the Asset Management Company of the investment fund satisfied itself in line with numerous national guidelines and following discussions with the most important service providers (especially the Depositary, the portfolio management and the fund administration) that the measures taken and the business continuity plans put in place (including extensive hygiene measures on the premises, restrictions on business travel and events, precautions to ensure the reliable and smooth running of business processes in the event of a suspected case of coronavirus infection, expansion of the technical options for mobile working) will curb the currently foreseeable or ongoing operational risks and will ensure that the investment fund's activities will not be disrupted.

At the time of preparing this report, the Asset Management Company is of the opinion that there are no signs indicating any doubt on the ability of the respective investment fund to continue as a going concern, nor were there any liquidity problems for the investment fund.

Disclosure regarding asset valuation procedures:

The Depositary shall determine the value with the participation of the asset management company. The Depositary generally bases its valuation on external sources.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between the Depositary and the asset management company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Investments reported in this report are not valued at derived market values.
