The company ensures that investor interests are not adversely affected by transaction costs, by setting a threshold for transaction costs based on average Fund volume, and for the portfolio turnover rate, taking into account the investment objectives of this Fund. The company monitors compliance with the threshold values and takes further measures if they are exceeded.

## Specification of procedures for the valuation of assets

#### Valuation

The procedures outlined below for the valuation of assets take account of any market effects resulting from the Covid-19 pandemic. No additional valuation adjustments were necessary.

For currencies, equities, bonds and derivatives that are admitted to trading on a stock exchange or are admitted to or included in another organised market, the last available trading price will be taken as a basis in accordance with Section 27 of the KARBV. In accordance with Section 29 KARBV, the current values are used as the basis for investment fund units, and the par value or redemption amount is used as the basis for bank balances and liabilities. Assets that are not admitted to trading on a stock exchange or another organised market, or included in the regulated market or OTC trading on a stock exchange, or for which there is no tradeable price available, are valued pursuant to Section 28 KARBV in conjunction with Section 168(3) of the German Capital Investment Code (KAGB), at a market value that is reasonable upon careful estimation in accordance with suitable valuation models taking the current market conditions into account. Market value is considered to be the amount for which the asset concerned could be exchanged in a transaction between knowledgeable, willing and independent counterparties.
