

DNB FUND TMT LONG/SHORT EQUITIES N (ACC) EUR

ISIN: LU1706375778. BLOOMBERG TICKER: DTMTRAN LX. WKN: A2H9YT

Fund Objective and Policy

The Sub-Fund takes long and short positions primarily in equities of or in derivative contracts principally related to equities of companies operating in or associated with the communication services and information technology sectors. Geographically, the Sub-Fund has full flexibility.

The majority of the Sub-Fund invests primarily in securities from the communication services and information technology sectors, independent of its benchmark composition. The Sub-Fund may also invest at the Investment Manager's discretion in other transferable securities, derivative instruments and collective investment schemes.

The Sub-Fund engages in forward foreign currency exchange contracts in order to hedge the assets of this Sub-Fund against currency fluctuations. The Sub-Fund will aim to hedge the performance of the classes not expressed in EUR to replicate the base currency performance of the Sub-Fund on a best effort basis. The Sub-Fund is Actively Managed. The Sub-Fund benchmark index is German 3 mth Bubill for share classes denominated in EUR, US 3 mth Treasury Bill for share classes denominated in USD and OMRX Treasure Bill Index for share classes denominated in SEK. The Sub-Fund benchmark index is used for the calculation of the performance fee. The Sub-Fund does not track the benchmark index and can deviate significantly or entirely from it.

Fund vs. index performance

Past performance does not predict future returns.

Performance disclaimer

The performance quoted is past performance and is not a guarantee of future returns. Future returns will e.g. depend on market developments, the manager's skill, the fund's risk, as well as the costs of subscription, management and redemption. The principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than the original cost. Current performance: www.dnbam.com

SFDR - Article 8

The fund promotes environmental and social characteristics.

ESG approaches

ESG integration	Yes
Voting	Yes
Exclusions	Yes
Dialogues	Yes
Inclusions	No
Thematic	No

Source: DNB Asset Management

Exclusion criteria (negative screening)

In addition to norms-based screening, the fund avoids investing in companies operating in:

- Controversial weapons
- Tobacco (production)
- Pornography (production)
- Cannabis for recreational use
- Coal ≥ 30% of revenues + Absolute criterion
- Oil sands ≥ 30% of revenues

[DNB instruction for responsible investments](#)

[Excluded companies](#)

Voting

A way of influencing companies in a positive direction is by voting at general meetings. Our voting guidelines for Norway state that we shall vote at all Norwegian general meetings for listed companies we have ownership in, and we have adopted a systematic approach to determining which global companies meetings we will vote at.

Standard setting

Standard setting is an important element of active ownership. As part of this, we develop and publish expectation documents within important areas, which we use to contribute to the improvement of standards in the market, and to form the basis of engagements with companies:

International Norms and standards

ESG data is incorporated into the portfolio management system, and is used to assess ESG risks and opportunities in investment decision-making.

Dialogues

Company dialogues may be undertaken to discuss specific ESG incidents (reactive), or to improve companies general performance in regards to ESG risks and opportunities (proactive).

The detailed Responsible Investment Policy and the Corporate Exclusion List are available at: <https://dnbam.com/en/responsible-investments/esg-overview-dnb-funds>

Water

Anti corruption

Climate change

Environment

Human rights

Tax

Gender equality

Oceans

Biodiversity

MSCI ESG Research Ltd

Although DNB Asset Management's information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the 'ESG Parties'), obtain information (the 'Information') from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. The Information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for, or a component of any financial instruments or products or indices. Further, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

The decision to invest in the sub-fund should consider all the characteristics as described in the Prospectus and Key Information Document (KID). The documents are available on www.dnbam.com under section "Our funds", DNB Asset Management AS at Dronning Eufemias gate 30, 0021 Oslo Norway, or the management company FundPartner Solutions (Europe) S.A at 15, avenue John F. Kennedy, L-1855 Luxembourg.

ISIN: LU1706375778. BLOOMBERG TICKER: DTMTRAN LX. WKN: A2H9YT

Risk considerations (Generally speaking, every investment presents a risk of loss of capital.)

Company risk

The risk that something will happen to one or more companies in which the fund have invested causing those investments to lose value.

Concentration risk

The risk that a negative event or shift in a particular sector or geography to which the fund's investments are exposed causing those investments to lose value.

Systematic risk

The risk that e.g. an economic shocks or political instability in the market in which the fund invests causing all of the fund's investments to lose value.

Liquidity risk

The risk that one or more of the fund's investments could become hard to value, or to sell at a desired time and price.

Derivate risk

The risk that certain derivatives could behave unexpectedly or could expose the fund to losses that are significantly greater than the cost of the derivative.

Sustainability risk

The risk that the occurrence of an environmental, social or governance event would exert material negative impact on the value of a given investment and result in value fluctuation.

Further investment risks are set out in the risk warnings chapter in the prospectus.

Glossary

Cut-off

Deadline for remittance of orders to the transfer agent in Luxembourg as set out in the relevant annexes to the prospectus. You may be required to submit your orders to your financial advisor or fund distributor by an earlier cut-off time.

Correlation and annualised volatility

Correlation shows how a fund's return moves in relation to the benchmark. Highly correlated investments tend to move up and down together while this is not true for investments with low correlation. Standard deviation or annualised volatility is a measure of historical volatility. It is calculated by comparing the average return with the average variance from that return.

Inception date

The inception date is the date taken into account for the start of performance calculation. On the launch date, all assets were transferred to the current sub-fund in exchange for shares of the current sub-fund.

Maximum drawdown

The largest loss measured from peak to trough until a new peak is attained.

NAV

An acronym of net asset value.

Ongoing charges (OCR)

Ongoing charges are based over 12 months of expenses ending the 31 December of the previous year. It is annually updated, but may be adjusted more frequently.

Sharpe ratio

The Sharpe ratio shows the fund's risk-adjusted performance. It is calculated by dividing the excess return (portfolio return minus risk free return) by the volatility.

SRI

The Summary Risk Indicator is a guide to the level of risk of this product compared to other products. The risk of the product may be significantly higher if held for less than the recommended holding period.

Swing pricing

Swing pricing is an anti-dilution technique which protects long term investors from the direct and indirect costs of capital activities in the fund. The long-term performance of the fund is maintained with this solution.

Tracking error

The volatility of the fund's excess returns over its benchmark returns. It quantifies how closely a manager's return pattern follows that of the benchmark.

Long Exposure

The long exposure measures the sum of all long positions in percentage (long book).

Short Exposure

The short exposure measures the sum of all short position in percentage (short book).

Gross Exposure

The gross exposure measures the absolute level of a fund's investments and is the sum of all long & short positions in percentage.

Net Exposure

The net exposure measures the difference between all long positions minus all short positions in percentage. A fund is said to have a net long exposure if the long positions exceed the short positions. A net short position occurs when the short positions exceed the long positions.
