Fund Objective

The Algebris Financial Income Fund can invest in the capital structure of financial companies globally, in both equities and fixed income. The objective of the Fund is to maximise income and generate superior risk adjusted returns over an investment cycle by investing in high dividend yielding stocks and bonds. The Fund invests in equities and subordinated debt capital instruments of financial institutions globally, including preference shares and hybrid capital instruments (e.g. Additional Tier 1 securities), which may be rated investment grade or below investment grade.

Investment in the Fund may be suitable for investors with a medium to long term investment horizon.

General Risks

- As the Fund invests in debt securities (e.g. bonds) it is subject to credit risk (the risk of a bond issuer failing to pay) and interest rate risk (the risk of changes in interest rates).
- The strategy employed may result in the NAV exhibiting a high level of volatility. The Fund may be leveraged which can potentially increase losses. This Fund may invest in contingent convertible securities. These securities have unique risks, for example, due to equity conversion or principal write-down features which are tailored to the issuing entity and its regulatory requirements, which means the market value of the securities may fluctuate. Additional risk factors associated with contingent convertible securities are set out in the Fund's Prospectus. There is no secondary market for investments in the Fund and none are expected to develop. The Fund may lack diversification. The Fund's high fees and expenses may offset the Fund's trading profits.
- The Fund can invest in equities which may be affected by market risk (the risk of an investment losing its value due to changes in economic conditions).
- The Fund can invest in emerging markets. Such markets carry additional risks such as political instability, weaker auditing and financial reporting standards and less government supervision and regulation.
- The Fund's investments may be in currencies other than Euros. The impact of this is that as the value of a currency rises or falls it can have a positive or negative impact on the value of the Fund's investments.
- The Fund can invest in Financial Derivative Instruments (FDI). These instruments have additional risks such as legal risk or liquidity risk (the inability to sell the contract due to lack of buyers in the market). These risks can have adverse impacts on the overall value of the Fund.
- Sustainability risks may adversely affect the returns of the Fund. A sustainability risk is an environmental, social or governance (ESG) event that if it occurs, could cause an actual or potential material negative impact on the value of the Fund's investment. The Fund's investments are also exposed to the risk of losses resulting from reputational damage an issuer may face in connection with an ESG event.
- For a complete overview of all risks attached to this fund, refer to the section entitled "Risk Factors" in the Supplement and Algebris UCITS Funds plc Prospectus.

Note: When an investor purchases or sells shares, an additional charge called Dilution Adjustment may be payable respectively on net subscriptions for shares and net redemptions of shares from the fund in order to cover the costs incurred by the fund in buying or selling investments. The level of the Dilution Adjustment can vary over time and can reach up to 0.75%. Further information on the Dilution Adjustment can be found in the Supplement and Algebris UCITS Funds plc Prospectus.

Important Information

Algebris Financial Income Fund (the "Fund") is a sub-fund of Algebris UCITS Funds plc (the "Company") an investment company with variable capital incorporated with limited liability in Ireland with registered number 509801 and established as an umbrella fund with segregated liability between sub-funds pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) 2011. Algebris Investments (Ireland) Limited is the UCITS Management Company of the Fund. Algebris Investments (Ireland) Limited is authorized and regulated by the Central Bank of Ireland. Algebris (UK) Limited is the Investment Manager, Distributor and Promotor of the Fund. Algebris (UK) Limited is authorised and regulated in the UK by the Financial Conduct Authority. The fund administrator is BNP Paribas Fund Administration Services (Ireland) Limited and the fund depositary is BNP Paribas Dublin Branch.

The value of Shares in the Fund ("Shares") is not guaranteed and the value of such Shares can reduce as well as increase and therefore the return on investment in the Shares will be variable. Changes in exchange rates may have an adverse impact on the value price or income of the Shares. The difference at any one time between the sale and repurchase price of Shares means that the investment should be viewed as medium to long term. Past Performance is not a reliable guide to future performance. Neither past experience nor the current situation are necessarily accurate guides to the future growth in

value or rate of return. The strategy employed by the Fund may result in the NAV exhibiting a high level of volatility and therefore may be subject to sudden large falls in value, and, if it is the case, investors could lose the total value of the initial investment.

The Company has issued a Prospectus and Key Investor Information Document ("KID/KIID") with respect to the Fund the English language version of which is available from Algebris Investments on request and from www.algebris.com. Where required under national rules, the KID/KIID will also be available in the local language of the relevant EEA Member State. Information relating to investor rights including information on access to collective redress mechanisms at EU Level and national level, where available, can be found in English at <https://www.algebris.com/cbdr-investor-rights/>. A decision may be taken at any time to terminate the arrangements made for the marketing of the Fund in any EEA Member State in which it is currently marketed. In such circumstances, Shareholders in the affected EEA Member State will be notified of this decision and will be provided with the opportunity to redeem their shareholding in the Fund free of any charges or deductions for at least 30 working days from the date of such notification.

The Fund is considered to be actively managed but not in reference to a benchmark. The performance data do not take account of the commissions and costs incurred on the issue and redemption of units. This Fund may invest in contingent convertible securities. These securities have unique risks, for example, due to equity conversion or principal write-down features which are tailored to the issuing entity and its regulatory requirements, which means the market value of the securities may fluctuate. Additional risk factors associated with contingent convertible securities are set out in the Prospectus. All figures, unless stated otherwise, are as at the last business day of the relevant month showing above. Some of the figures shown in the tables are estimates, provided by Algebris Investments.

Glossary

Annualised volatility: The Annualised volatility measures the extent to which returns vary up and down over a given period. The measure is expressed as an annualised value.

Sharpe ratio: The Sharpe ratio measures the performance of an investment adjusting for the amount of risk taken (compared to a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Effective Duration: Duration is the price sensitivity (expressed in years) of a fixed income security to a change in interest rates. Effective duration is a duration calculation for bonds that have embedded options. A higher (effective) duration indicates a higher price sensitivity.

Yield to worst: The yield to worst (YTW) is the lowest potential yield that can be received on a bond which can be redeemed by the issuer on a call date which is earlier than the final maturity date. The reported yield is gross of fees and expenses and excludes interest generated from cash held in the Fund.

Yield to Call: yield to call (YTC) is the return a bondholder would earn, inclusive of coupons and capital appreciation, if the bond is redeemed on the first call date. The reported yield is gross of fees and expenses and excludes interest generated from the cash held in the Fund.
