

COMGEST ATTRIBUTES

- Quality Growth philosophy
- Focus on long-term EPS growth
- Team-based approach
- Broad partnership structure

INVESTMENT POLICY

The objective of the Sub-Fund ("the Fund") is to increase the value of the Fund (capital appreciation) over the long term. The Fund intends to achieve this objective through investment in a portfolio of high-quality, long-term growth companies. The Fund will invest at least two-thirds of its assets in securities issued by companies that have their headquarters in, or principally carry out their activities in Europe or which are guaranteed by European governments.

The Fund is actively managed. The index is provided for comparative purposes only.

The Fund is aimed at investors with a long-term investment horizon (typically 5 years or more).

RISK PROFILE

The indicator represents the risk profile presented in the PRIIPs Key Information Document. The indicator assumes you keep the product for 5 years otherwise the actual risk can vary significantly.

CUMULATIVE PAST PERFORMANCE (REBASED TO 100)**ROLLING PERFORMANCE (%)**

FUND COMMENTARY

The first half of 2025 for European equities can be separated into two distinct quarters. In the first quarter, policy uncertainty linked to the Trump administration weakened consumer and business sentiment and hit US tech stocks. In March, the German parliament voted in favour of a large infrastructure and defence spending bill which sparked an increase in long-term European bond yields. It was a benign backdrop for euro-centric businesses such as financials, utilities, communication services and defence companies, hence the value camp. In the second quarter, the playing field between growth and value was more balanced as tech stocks experienced a comeback driven by a truce in the trade war declared on "Liberation Day". On the other hand, the weakness of the US dollar gained pace in Q2, holding back euro earnings growth of the many global leaders in your portfolio. In early April, immediately post Liberation Day, the portfolio demonstrated its defensive characteristics.

From a relative standpoint, your portfolio underperformed the MSCI Europe index in the first half of the year mostly due to what it does not own, namely euro-centric value businesses. For the most part these businesses thrive for macro-economic reasons, and they lack differentiation, something we try to avoid. Consequently, large-cap European growth stocks lagged their large-cap European value counterparts by 10% in euro terms. In other words, it was a difficult period for quality growth investors, and the effect was further compounded by stock-specific issues amongst some of our healthcare holdings.

Air Liquide, one of the largest industrial gas suppliers globally, released robust 2024 results and delivered a strong and confident outlook for margin improvement over the medium-term. The company increased its profitability improvement target to 460 basis points over five years until the end of 2026, by executing on three clearly identified levers within management's control. Shares of Lindt & Sprüngli rose strongly. In March, the company published better-than-expected FY24 results combined with a higher-than-expected top and bottom-line FY25 outlook in the context of high cacao prices underpinning Lindt's strong innovation (like the Dubai chocolate), execution and marketing clout. Novonosis, the merger of bio solutions leaders Christian Hansen and Novozymes, delivered excellent results. In Q1, organic sales grew 11% and EBITDA margin expanded by 300 basis points. Growth was supported by innovation, penetration of bio-solutions across the group's diversified end-markets (from yogurt to bioenergy) and merger synergies. Halma, a diversified group of technology and safety equipment companies, delivered strong FY2025 results with organic sales up 9% and 14% growth in adjusted EBIT. The company's FY26 organic growth outlook in the 'high single digits' was also positive, driven by its photonics business.

Novo Nordisk declined on escalating competitive fears around its next-generation assets in type 2 diabetes and obesity care, as well as disappointing commercial performance mainly due to the competition from US compounding pharmacies. In May, the company reduced its FY25 revenue growth objectives from 16-24% to 13-21%, and shortly after, announced that its CEO would step down. Despite share losses in the anti-obesity market, growth remains dynamic and new commercial initiatives should support a positive change in business momentum in the key US market. LVMH delivered weaker-than-expected Q1 results. Organic sales for the group declined by 5% confirming that the global luxury market has entered its second year of consolidation after a strong post-Covid growth phase. ICON, a leading clinical research organisation, continued to show weak momentum after a soft end to 2024. The group reported weak Q1 results and cut its 2025 guidance because of pharmaceutical trial delays, a difficult environment in biotech funding and big pharma companies reprioritising their innovation spend. Medtech player Coloplast detracted as the company announced the departure of its CEO, followed by slightly weaker-than-expected Q2 results, which led to a reduction in full-year organic growth guidance from 8-9% to 7%. Margins are expected to be between 27-28%, compared to 28% previously. Lars Rasmussen, the current Chairman and former CEO, will assume the role of interim CEO. Mr. Rasmussen indicated that the company's strategy remains unchanged, pointing to a need for improved execution.

During the first half of the year, we initiated a position in Atlas Copco, a global leader in compressor and vacuum pumps. We see the company as a high-quality industrial player boasting attractive margins through the cycle, with potential for both organic and inorganic growth. We exited Jeronimo Martins, Ryanair and Adidas into share price strength, either for quality or growth reasons. Early in the year, we reduced Novo Nordisk and ASML to reflect perceived lower short-term visibility, however, the two companies remain core portfolio holdings. EssilorLuxottica, Ferrari, Nemetschek and Hermès were reduced for valuation reasons. The proceeds were mainly used to reinforce SAP, Coloplast, L'Oréal, London Stock Exchange Group (LSEG) and Novonosis, mostly for quality reasons.

After a highly volatile first half, we expect volatility to persist for the remainder of the year. Final tariff agreements, interest rates and exchange rates will likely continue to create noise. We believe this is an environment that lends itself well to quality investing and stock picking. As such, we remain laser-focused on our investment style. We continue to be exposed to long-term, diversified trends and to favour companies that offer a relatively high degree of visibility.

This can be the case across sectors and holdings. For example, we expect L'Oréal to continue to gain share in an ever-growing beauty market and EssilorLuxottica to benefit from its newer tech edge (smart glasses). Similarly, we anticipate our data businesses, such as LSEG, to continue compounding revenues at high single-digit rates, Air Liquide to leverage renewed pricing power and internal levers to drive net income growth and SAP to pursue a dynamic top- and bottom-line growth path by successfully converting its customer base to cloud and securing new commercial wins. We also believe that after a period of underperformance, there is stored alpha in many of our healthcare holdings.

Overall, our current portfolio is well placed to deliver low double-digit earnings growth in the medium-term and we continue to very selectively look for differentiated ideas which can fit our quality growth style. In the short-term, our portfolio delivered satisfactory operational performance in Q1 with combined organic revenue growth of 9%. Conversely, a weaker US dollar is negative for our portfolio's earnings given our exposure to many global leaders. While rates and changing style preferences can create further volatility in the shorter-term, we believe this solid earnings compounding should drive attractive returns in the mid- to long-term, as it has over the portfolio's long history.

The views expressed in this document are valid at the time of publication only, do not constitute independent investment research and should not be interpreted as investment advice. The reference to specific companies does not constitute a recommendation to invest directly in these securities. Allocation is subject to change without notice. Remember that past performance does not predict future returns.

RISKS

This Fund has the following core inherent risks (non-exhaustive list):

- Investing involves risk including possible loss of principal.
- The value of all investments and the income derived therefrom can decrease as well as increase.
- There is no assurance that the investment objective of the Fund will be achieved.
- To the extent that the Fund is invested in or denominated in a currency other than yours, the cost and return in your currency may increase or decrease due to exchange rate fluctuations.
- A more detailed description of the risk factors that apply to the Fund is set out in the Prospectus.

PLEASE NOTE THAT THE DATA SHOWN BELOW IS THE OUTCOME OF OUR INVESTMENT PHILOSOPHY AND STOCK SELECTION. THESE METRICS ARE NOT ALL SPECIFICALLY TARGETED BY COMGEST BUT MAY BE ADDRESSED AS PART OF OUR RESPONSIBLE INVESTMENT PROCESS.

RESPONSIBLE INVESTMENT APPROACH

We believe a responsible approach to environmental, social and governance issues has a positive impact on a company's growth over the long term. The assessment of ESG factors is part of our fundamental analysis. Comgest implements a three-pronged responsible investment strategy: Integration / Active Ownership / Partnership.

MAIN GROUP-WIDE EXCLUSIONS*

Thermal coal: Mining & electricity production
Tobacco: Producers & distributors
Controversial weapons
Norm-based exclusions: Severe violations
Controversial jurisdictions: High-risk jurisdictions & sanctions regime

* Further information on the exclusion policies and **applicable revenue thresholds** may be found in the Investment Manager's Responsible Investment Policy on the Comgest website at www.comgest.com/en/sustainability/esg

Neither Morningstar nor its information providers are responsible for any investment decisions, damages or losses arising from any use of this information or any information provided in conjunction with it.

Morningstar Medalist Rating™ is a forward-looking measure derived through research of three key pillars, People, Process, and Parent. It is expressed on a five-tier scale running from Gold to Negative. The Medalist Rating is not a statement of fact, nor is it a credit or risk rating, and should not be used as the sole basis for investment decisions. It is not intended to be nor is a guarantee of future performance.

Morningstar Rating™ is an objective, quantitative measure of a fund's historical risk-adjusted performance relative to other funds in its category. The overall rating is a weighted combination of the three-, five- and ten-year ratings. The top 10% of funds will receive a 5-star rating and the next 22.5% receive a 4-star rating.

Carbon Footprint: estimates the apportioned Scope 1 and 2 greenhouse gases emissions of the portfolio holdings.

Environmental Footprint: estimates the apportioned ratio of annual costs linked to greenhouse gases, water abstraction, waste generation, air, land & water pollutants, and natural resource use associated with the portfolio holdings per EUR m invested.

Environmental Footprint Source: S&P Trucost Limited © Trucost 2025. All rights in the Trucost data and reports vest in Trucost and/or its licensors. Neither Trucost, nor its affiliates, nor its licensors accept any liability for any errors, omissions or interruptions in the Trucost data and/or reports. No further distribution of the Data and/or Reports is permitted without Trucost's express written consent.

Science Based Targets Initiative Portfolio Coverage: calculates the % of the Fund's AUM invested in companies with SBTi approved targets or which have committed to set SBTi targets.

Board Gender Diversity: this indicator represents the weighted average ratio of female board members to total board members in investee companies, expressed as a percentage of all board members.

Non-Violation of UNGC Principles: this indicator represents the percentage of investee companies that have not been involved in violations of the United Nations Global Compact (UNGC) principles.

Effective Tax Rate: an indicator of corporate responsibility and impact. Using MSCI data, Comgest calculates the average effective tax rate and average statutory tax rate of the portfolio's holdings.

Index Source: MSCI. This report contains information (the "Information") sourced from MSCI Inc., its affiliates or information providers (the "MSCI Parties") and may have been used to calculate scores, ratings or other indicators. The Information is for internal use only, and may not be reproduced/redisseminated in any form, or used as a basis for or a component of any financial instruments or products or indices. The Information is not intended to constitute investment advice or a recommendation to make (or refrain from making) any investment decision and may not be relied on as such, nor should it be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. None of the MSCI Parties shall have any liability for any errors or omissions in connection with any data or Information herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

For more detailed information on ESG integration please consult our website: www.comgest.com/en/sustainability/esg

Active Share: The percentage of fund holdings that is different from the reference index holdings. A fund that has no holdings in common with the reference index will have an active share of 100%, and a fund that has exactly the same holdings as the reference index considered will have an active share of 0%.

ADR - American Depositary Receipt: A negotiable security that represents securities of a foreign company and allows that company's shares to trade in the financial markets of the United States.

Annualised: A figure converted into an annual rate. Figures covering a period of more than one year are averaged to present a figure for a 12-month period.

Bp(s) - Basis point(s): One basis point is equal to one hundredth of 1% (i.e. 0.01%).

BV - Book Value: The value of the company assets minus its liabilities.

CAGR - Compound Annual Growth Rate: The rate of return that would be required for an investment to grow from its beginning balance to its ending balance, assuming the profits were reinvested at the end of each year of the investment's lifespan.

CapEx - Capital Expenditure: The money invested by a company to acquire or upgrade fixed, physical, non-consumable assets such as property, plants, buildings, technology, or equipment.

Cash Flow: The net amount of cash and cash equivalents being transferred in and out of a company. Cash received signifies inflows, and cash spent signifies outflows.

CPI - Consumer Price Index: An index that measures the overall change in consumer prices based on a representative basket of goods and services over time. It is the metric often used to measure inflation.

DY - Dividend Yield: A ratio that shows how much a company pays out in dividends each year relative to its share price.

EBITDA - Earnings Before Interest, Taxes, Depreciation and Amortisation: Used to measure a company's core profitability and is calculated by adding interest, tax, depreciation and amortisation expenses to net income.

EBIT - Earnings Before Interest and Taxes: Used to measure a company's core profitability and is calculated by adding interest and tax expenses to net income.

EPS - Earnings Per Share: The profits of a company attributed to each share, calculated by dividing profits after tax by the number of shares. EPS serves as an indicator of a company's profitability.

FCF - Free Cash Flow: The cash generated by a company from its normal business operations after subtracting any money spent on capital expenditures.

GDP - Gross Domestic Product: The total market value of all the finished goods and services produced within a country's border in a specific time period.

GDR - Global Depositary Receipt: A certificate issued by a bank that represents shares in a foreign stock on two or more global markets. A GDR is similar to an American depositary receipt (ADR), except an ADR only lists shares of a foreign country in the markets of the United States.

LTM - Last 12 Months: LTM multiples are backward-looking and are based on historical performance.

Market Capitalisation: A measure of a company's size, calculated by multiplying the total number of shares in issue by the current share price. Companies are commonly grouped according to size, such as small cap, mid cap, large cap or all cap. There is no consensus on the definition of these groupings and they may vary from portfolio to portfolio depending on the country of investment.

NAV - Net Asset Value: The current market value of the portfolio's assets minus the portfolio's liabilities.

NTM - Next 12 Months: NTM multiples are forward-looking and are based on projected performance.

Ongoing Charges: A fund's operational costs over a year. Ongoing Charges are calculated as a percentage of the average fund size over the year and include, for example, investment manager's fees, administration fees and custody costs.

Operating Margin: Measures how much profit a company makes on a dollar (or relevant currency) of sales after paying for variable costs of production, such as wages and raw materials, but before paying interest or tax.

Operating Profit: A company's gross income less operating expenses and other business-related expenses, such as wages, cost of goods sold (COGS) and depreciation.

Organic Growth: Growth a company achieves by increasing output and enhancing sales through the business' own operations and internal processes. This does not include profits or growth attributable to mergers, acquisitions, divestitures and foreign exchange but rather an increase in sales and expansion through the company's own resources.

Organic Sales: Sales generated from within a company that are a direct result of the company's existing operations and internal processes. Organic sales do not include the impacts of mergers, acquisitions, divestitures and foreign exchange.

P/B or P/BV - Price-to-Book Value Ratio: Measures the market's valuation of a company relative to its book value. P/B or P/BV is calculated by dividing the company's stock price per share by its book value per share.

P/E - Price-to-Earnings Ratio: A ratio used to value a company's shares. It is calculated by dividing the current market price by the earnings per share.

P/S - Price-to-Sales Ratio: A valuation ratio that compares a company's stock price to its revenues. It is an indicator of the value that financial markets have placed on each dollar of a company's sales or revenues.

PEG - Price/Earnings-To-Growth Ratio: A stock's price-to-earnings (P/E) ratio divided by the growth rate of its earnings for a specified time period. The PEG ratio is used to determine a stock's value while also factoring in the company's expected earnings growth.

PMI - Purchasing Managers' Index: An index of the prevailing direction of economic trends in the manufacturing and service sectors.

Reference Index: Index against which a fund's performance is compared.

ROE - Return On Equity: Measures financial performance and is calculated by dividing net income by shareholders' equity. ROE is a gauge of a company's profitability and how efficiently it generates those profits.

ROIC - Return On Invested Capital: Calculation used to assess a company's efficiency at allocating the capital under its control to profitable investments.

SME - Small- Or Medium-Sized Enterprise: A company, or companies considered as a group, that are neither very small nor very large and which employ fewer than a given number of employees. This number varies across countries.

Volatility: Measures the movements of an asset up and down over time. Volatility is generally considered to be a measure of risk.

Engagement: Proactive, targeted dialogue with companies or other industry stakeholders (e.g. policymakers, industry bodies) in order to make known areas of concern and to incite tangible, positive change to improve outcomes for stakeholders.

Environmental Factors: Issues related to pollution, climate change, energy efficiency, natural resource use, waste management, biodiversity and other environmental challenges and opportunities.

ESG - Environmental, Social and Governance: The three key factors when measuring the sustainability and ethical impact of an investment in a business or company.

GHG - Greenhouse Gases: Gases that trap heat in the atmosphere and warm the planet. The best known greenhouse gases are carbon dioxide, methane, nitrous oxide and fluorinated gases.

Governance Factors: Governance refers to a set of rules or principles defining rights, responsibilities and expectations between different stakeholders in the governance of corporations. Governance factors include a company's leadership, executive pay, audits, internal controls and shareholder rights.

Net Zero: Achieving a balance between emitting carbon and absorbing carbon from the atmosphere. This balance, or net zero, will be achieved when the amount of carbon added to the atmosphere is no more than the amount removed.

PAI - Principal Adverse Impact: A list of sustainability factors that firms need to take into account for their investment policies and decisions. These indicators relate to environmental and social topics.

Proxy Voting: A form of voting whereby a shareholder delegates their vote to another who votes on their behalf at company meetings. This allows the shareholder to exercise their right to vote without being physically present.

RI - Responsible Investment: The integration of environmental, social and governance factors (ESG) into the selection and management of investments.

Scope 1 Emissions: Emissions directly generated by a company, such as an airline emitting exhaust fumes.

Scope 2 Emissions: Emissions indirectly generated by a company, such as emissions from the electricity or energy used to heat and cool a company's office.

Scope 3 Emissions: All other indirect emissions that occur in the value chain of a company and are not already included within scope 2. These emissions are a consequence of the company's business activities but occur from sources the company does not own or control. For example, emissions from a company's employees commuting to work. Scope 3 emissions are often difficult to measure.

SFDR Classification: SFDR product classifications fall under three categories and aim to make the sustainability profiles of funds more comparable and easier to understand by investors.

SFDR - EU Sustainable Finance Disclosure Regulation: An EU regulation which aims to make the sustainability profile of funds more comparable and better understood by end-investors. The regulation requires firms to advise whether principal adverse impacts on sustainability factors are considered in their investment decision making process.

Social Factors: Factors that examine how a company communicates with employees, suppliers, customers, governments, regulators and the communities where it operates.

tCO₂e: Tonnes (t) of carbon dioxide (CO₂) equivalent. Carbon dioxide equivalent is a standard unit for counting greenhouse gas emissions regardless of whether they are from carbon dioxide or another gas, such as methane.

UNGC - UN Global Compact: A voluntary pact of the United Nations (UN) to encourage businesses and firms worldwide to adopt sustainable and socially responsible policies, and to report on their implementation.

UN Global Compact (UNGC) Principles: Ten principles defined as part of the UNGC framework to promote responsible investment. Companies, investors and other participants are called upon to align their strategies and operations with the principles in the areas of human rights, labor, the environment and anti-corruption.

Voting: A mechanism for active owners to influence companies, usually done with the aim of influencing a company's governance or operations. Public equity investors typically have the right to vote on company and shareholder resolutions at annual and extraordinary general meetings (AGMs and EGMs).
