**E.I. Sturdza Funds Plc**  
**Investment Manager's Report**  
**For the six month period ended 30 June 2022**

**Strategic China Panda Fund**

The Investment Manager's report has been compiled with the assistance of the Investment Adviser, LBN Advisers Limited (Discretionary adviser).

**FUND PERFORMANCE**

The Sub-Fund fell 14.8% for the period to 30 June 2022, underperforming its benchmark, the MSCI China NR USD Index, by 3.6%. The overweight in property was the major value detractor which alone took the Sub-Fund NAV down by 6.4%.

**MARKET OVERVIEW**

China stocks continued to struggle in the first half of 2022 after a negative year in 2021. Investors were caught off-guard by two black swan events. The outbreak of war between Ukraine and Russia in early 2022 was definitely the most unexpected. Food prices and commodities skyrocketed as a knee jerk reaction, with the price of oil jumping more than 70% at one point. This in turn spurred the US to quicken and steepen interest rate hikes as a means to rein in runaway inflation. High P/E growth stocks like technology, being the most sensitive to rate hikes, were significantly de-rated. City lockdowns in China on COVID resurgence was the other black swan. A nearly 3-month Shanghai lockdown was a big blow to the Chinese economy as economic activities in the Yangtze River Delta nearly halted. The auto industry was the major casualty as the region is the hub for the auto supply chain.

Under an adverse macro backdrop, the government announced a higher reserve requirement rate and interest rate cuts. The interest rate cut was symbolic as it was the first rate cut since this round of property tightening cycle. Home purchase limits in different cities/regions were also relaxed. However, property sales remained in the doldrums as city lockdowns and the increasing number of property developers running into financial difficulty had deterred home buying interest.

The regulatory storm on the internet sector was largely over after more than a year-long clampdown. Although news of scrutiny of online platform operators popped up from time to time, there were no new surprises. In fact, the government appeared to have become friendlier. For example, online video gaming licensing was resumed after an eight month freeze. Nevertheless, the delisting risk of ADRs (mostly internet companies) resurfaced. A large number of US-listed Chinese companies were put on a list liable to the Holding Foreign Companies Accountable Act and non-compliance with the act would subject them to delisting by 2024.

China's GDP growth in the first half of 2022 was lower than expected at 2.5%. City lockdowns dragged the second quarter growth to only 0.4% despite a decent 4.8% growth in the first quarter. The government's target to reach 5.5% GDP growth this year appears a tall target now. Retail sales, historically a major growth engine of China's GDP, remained weak with low single digit growth even after the lifting of lockdowns in June. The only bright spots were inflation which remained under control with CPI hovering around 2-3% and export, in which China continued to gain global market share as production in China remained relatively undisrupted compared to many other countries.

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Strategic China Panda Fund (continued)**

**PORTFOLIO STRATEGY**

The investment thesis of overweighting property related stocks was somewhat undermined by the surprise China lockdowns. The lockdown not only delayed property sales recovery but also drained the liquidity of many developers. With an increasing number of developers going into debt default, home buyers were more likely to adopt a wait-and-see attitude. It will take time before market confidence returns. As a result, the property exposure has been reduced, retaining a focus on those with the strongest balance sheets.

The Investment Adviser has begun rebuilding positions in the internet space as increasing value is seen in that sector. Sector valuation is reasonable after the big de-rating and there appears to be limited earnings downside risk after the big expectation reset. Policy wise, the government has also finally turned dovish.

The Investment Adviser remains positive on sportswear stocks due to their resilient growth amidst economic downturns, thanks to their market share gain from foreign brands. Macau gaming has been reintroduced into the portfolio as a re-opening trade. Although there is no timetable as to when travel restrictions for mainlanders will be removed, Macau gaming stocks are already trading at a distressed level, with limited downside risk, making now a good time to build on the position.

Environmental, Social and Governance (“ESG”) considerations are integrated in the investment process through a Responsible Investment Policy and the Sub-Fund is classified as an Article 8 fund in accordance with the Sustainable Finance Disclosure Regulation ((EU) 2019/2088) (commonly referred to as “SFDR”). Independence ESG information is provided by Sustainalytics, a leading independent ESG and corporate governance research, ratings and analytics firm, and the Investment Adviser takes this information into consideration when deciding to include positions in the portfolio. Ongoing active monitoring of the portfolio is in place to ensure compliance with the Responsible Investment Policy which is available from [www.ericsturdza.com](http://www.ericsturdza.com).

**MARKET OUTLOOK**

The worst should have been seen now that US rate hike fear, regulatory reset and China lockdown events have played out. Coupled with monetary easing and fiscal stimulus year-to-date, the economy is expected to recover gradually, although it is anticipated to be a V-shaped recovery. As long as China sticks to a zero-Covid policy, private investment and consumption will remain suppressed. The base case is that the zero-Covid policy will last at least until the end of 2022. Nevertheless, China has become more flexible in implementing this policy as shown by the recent relaxation of its travel policy, to shorten quarantine for international travelers from 21 to 10 days, which is a positive surprise. This is a first step taken towards integrating with the world. It is expected that vigorous Covid testing in the country will continue but city lockdowns are unlikely given the painful price paid in the recent Shanghai lockdown. Further, the government is expected to tone down the GDP growth target to 3-4% in 2022.

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Strategic China Panda Fund (continued)**

**MARKET OUTLOOK (continued)**

The Investment Adviser believes the inflection point may be close, after more than a year-long de-rating of the internet sector. Policy wise, Premier Li has vowed support for the healthy digitalization development while the regulator is reportedly closing the probe into Didi. Company wise, bellwethers like Meituan and Baba have reported better-than-feared first quarter earnings. Valuation is reasonable and earnings risk seems limited after the big expectation reset. The risk reward tradeoff has once again become attractive.

China and the US are in a completely opposite policy cycle. China has started easing with rate cuts since the fourth quarter last year while the US has just started hiking interest rates this year. Although China will not be immune if the US market corrects, downside risk for China equities should be limited as China has been ahead of the US in market de-rating since 2021. Today, MSCI China trades at 10.6x 2023 P/E, a big discount to 16x P/E for the S&P 500. From a global asset allocator's point of view, the risk reward profile of investing in China is attractive.

Investor worries have shifted from aggressive rate hikes to recession fears in the US. As such, commodity prices have softened from the highs earlier this year, same for the US 10-year treasury bond yield. The Investment Adviser is of the view that the strong US dollar is peaking and Renminbi should be stable, if not appreciating, in the next 12 months.

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Nippon Growth (UCITS) Fund**

The Investment Manager's report has been compiled with the assistance of the Investment Adviser, Evarich Asset Management (Non-discretionary adviser).

**FUND PERFORMANCE**

The net asset value per unit for the Sub-Fund on a Japanese yen basis went up 8.9% for the six months period ended 30 June 2022, while the TOPIX TR declined 4.8% over the same period. The large outperformance of the Sub-Fund versus the index was mainly due to sector positioning, with an overweighting in economic sensitive value sectors such as commerce (mainly trading companies), marine transportation, banks and steel, and an underweighting in technology and IT sectors such as electricals, services and precision instruments. An overweighting in energy-related sectors such as mining and oil was another positive factor. Four new names (Tokyo Steel, Denso, Nishimatsu Construction and Isetan Mitsukoshi Holdings) were added to the portfolio with one stock (Astellas Pharma) sold out.

The best five performers among the TSE 33 sectors were mining, utilities, oil, insurance and fishery & forestry, while the worst five performers were services, electricals, precision instruments, metal products and chemicals.

**MARKET OVERVIEW**

There were three major issues having a large impact on the global markets. The first was the new COVID variant – Omicron. New infections by Omicron remained high over the period, however the US and some European countries began to relax restrictions on economic activities, following evidence that Omicron is less serious than the Delta variant and as vaccination rates increase. In Japan the lifting of the emergency infection control measures was announced on 22 March, with a positive impact on the Japanese economy.

The second issue is the Ukraine crisis. Our hope that President Putin would not take military action against Ukraine was completely destroyed. It was reported that Russian troops started to attack military facilities, hospitals and schools indiscriminately. Many western companies decided to cease operations in Russia, such as production and sales activities. In turn, Mr. Putin said that Russia would find “legal solutions” to seize Russian-based assets from international groups that have decided to close their operations in the country on the back of Moscow's decision to invade Ukraine. At this stage, it will not be easy to find a solution that will satisfy both parties. It may take a considerably long time for Russia to return as a participant of international markets.

The third issue is inflation. US CPI jumped to a 40-year high in June, hitting 9.1% increase year-on-year, the fastest since November 1981. WTI crude oil price exploded from USD 75.2/bbl at the end of December 2021 to USD 105.8/bbl at the end of June 2022. The US 10-year bond yield shot up to 3.01% at the end of June from 1.51% at the end of December 2021. In Japan, core CPI rose from 0.5% to 2.2% in the first half of 2022, but 10-year JGB yield increased marginally from 0.07% to 0.23% due to the Bank of Japan's yield curve control (YCC) measure. However, JPY/USD weakened sharply from 115.1 to 135.7 over the same period.

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Nippon Growth (UCITS) Fund (continued)**

**MARKET OVERVIEW (continued)**

In the first half of 2022, high-tech sectors recorded the worst performance. Electricals declined 21.7% against the TOPIX of -6.1% with precision instruments down 17.5% while in the US, semiconductor's SOX Index declined 35.2% over the same period. On the fundamentals front, the bad news regarding the semiconductor sector began to take hold, as on 30 June 2022 Micron Technology (in the US) announced that net sales from June to August would decline to USD 7.2 billion, much lower than market consensus of USD 9.1 billion.

**PORTFOLIO STRATEGY**

The Sub-Fund continues to be overweight in economically sensitive sectors with cheap valuations such as trading companies, marine transportation, banking and steel, while defensive sectors such as foods, pharmaceuticals and utilities, and IT related sectors such as electricals, precision instruments and communications continue to be underweighted.

Environmental, Social and Governance ("ESG") considerations are integrated in the investment process through a Responsible Investment Policy and the Sub-Fund is classified as an Article 8 fund in accordance with the Sustainable Finance Disclosure Regulation ((EU) 2019/2088) (commonly referred to as "SFDR"). Independence ESG information is provided by Sustainalytics, a leading independent ESG and corporate governance research, ratings and analytics firm, and the Investment Adviser takes this information into consideration when deciding to include positions in the portfolio. Ongoing active monitoring of the portfolio is in place to ensure compliance with the Responsible Investment Policy which is available from [www.ericsturdza.com](http://www.ericsturdza.com).

**MARKET OUTLOOK**

The zero-Covid policy being adopted in China, coupled with the lockdowns in Shanghai had a large impact on the global and Japanese economies. Real GDP growth from April to June 2022 in China slowed down significantly to 0.4% year-on-year, following a moderate growth of 4.8% year-on-year between January and March. However, the lockdowns in Shanghai started to ease during June and on 31 May 2022 the Chinese government announced a large economic stimulus package, including infrastructure investment and a 50% tax cut for car purchases. The economist at Daiwa expects that Chinese GDP will grow 5.1% year-on-year in Q3 and increase further to 5.8% in Q4.

In Japan, industrial production in May 2022 declined 7.2% month-on-month, significantly lower than the market forecast of -0.3%. By sector, the main deteriorations were due to motor vehicles, electric machinery, information equipment and machinery. These declines likely reflect the strong impact from China's zero-Covid policy and lockdowns in Shanghai. The Japanese government estimates that industrial production in June would increase sharply by 12.0% month-on-month and rise by a further 2.5% month-on-month in July. On the contrary, retail sales in May increased 0.6%, the third consecutive monthly rise. In particular, department store sales rose sharply, with +55.3% year-on-year and +9.6% month-on-month.

**E.I. Sturdza Funds Plc**  
**Investment Manager’s Report (continued)**  
**For the six month period ended 30 June 2022**

**Nippon Growth (UCITS) Fund (continued)**

**MARKET OUTLOOK (continued)**

According to the Bank of Japan’s quarterly economic survey “Tankan”, the business conditions Diffusion Index (“DI”) for large manufacturers in June was at +9, down 5 points from the March survey. In contrast, the business conditions DI for large non-manufacturers recorded at +13, improving 4 points from the March survey. The outlook DI (three-month forward) for large manufacturers improved slightly, by 1 point. On the bright side of the survey, the FY2022 capex for large companies (all industries) is expected to rise by 18.6% year-on-year. This marks a strong upward revision from the March survey of +2.2%, the highest June level since records began in 1983. We think this likely reflects the economic reopening expectations, ongoing labour shortage and, more notably, the recent weakness of the JPY against the USD, which should encourage Japanese companies to return production facilities to Japan. In addition, foreign companies may be tempted to establish their facilities in this “low-cost” Japan.

On the political front, Mr. Shinzo Abe, Japan’s longest-serving prime minister, was assassinated on 8 July 2022 during a campaign speech for the Upper House election scheduled on 10 July. Japan was shocked by this as (1) we lost a great asset and (2) we are forced to recognize that the Japanese security system is very vulnerable to violence. Prime Minister Kishida, after the big victory in the Upper House election, is expected to reshuffle his cabinet in September or October, working to rebuild the strength of Japan on both the economy and society. The Investment Adviser believes that conditions are favourable for a substantial rise in the Japanese market for the coming few years.

Evarich Asset Management  
E.I. Sturdza Strategic Management Limited  
July 2022

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Strategic Europe Quality Fund**

The Investment Manager's Report has been compiled with the assistance of the Investment Adviser, Phileas Asset Management SAS (Discretionary adviser).

**FUND PERFORMANCE**

In the first half of 2022, the Sub-Fund posted a performance of -24.03% (B EUR Class) vs. -13.84% for the MSCI Europe Total Return Index.

Whilst stock selection was slightly disappointing, sector allocation was by far the most predominant drag on absolute and relative performance. The Sub-Fund's strategic positioning is geared towards quality compounders showcasing high returns on capital employed and solid long-term growth prospects. When bought at reasonable valuations, those are set to provide long-term performance tailwinds to the portfolio. This positioning entails certain assumed sector biases: the portfolio is typically largely underweight or absent of sectors such as Oil & Gas, Basic Resources, Telecoms, Utilities, Banks, and Insurance. All of those sectors were among the top performers for the period under review, amid a massive rotation towards value, largely driven by rising interest rates. Conversely, the Sub-Fund is typically overweight in sectors such as Technology, Personal & Household goods, Industrial Goods and Services which have over the years proven to provide fertile grounds for stock picking in Quality companies. As Value was favored over Quality, those sectors underperformed. The best contributors to absolute performance in the first half of the year were Edenred, Wolters Kluwer, Stellantis, MTU, and Compass, all in positive territory.

The largest detractors to absolute performance were Kingspan, Puma, S4 Capital, Saint Gobain, and Schneider.

**MARKET OVERVIEW**

As large monetary and fiscal stimulus that sought to offset Covid headwinds drove demand in 2020 and 2021, supply remained disrupted by the pandemic, creating a major supply/demand imbalance. From February 2022, this imbalance was compounded by the war in Ukraine: besides its horrendous casualties the conflict brought additional tensions to already beleaguered supply chains. Those two elements resulted in a sharp rise in inflation over the first half of 2022 with the US CPI ending the period at 9.1%.

Central banks and bond markets reacted accordingly sending long term interest rates higher with the US 10-year hovering around 3% at the end of the period. Equity markets were impacted by a very large and deep rotation: Fed tightening expectations drove the market out of high-Quality stocks (mostly long duration Growth stocks) into lower Quality stocks (mostly Value stocks). Multiple compression in the former bucket was massive, as stock prices declined amid largely unchanged or rising earnings expectations. From a sector perspective, dispersion was significant with typical Value sectors outperforming strongly.

**E.I. Sturdza Funds Plc**  
**Investment Manager’s Report (continued)**  
**For the six month period ended 30 June 2022**

**Strategic Europe Quality Fund (continued)**

**PORTFOLIO STRATEGY**

Against a market backdrop that provided little respite to the Sub-Fund given its strategic positioning, the Investment Adviser stuck to the investment philosophy.

Amid the sharp repricing that occurred during the period, the portfolio was positioned to buy several very high-quality growth names at what was deemed reasonable prices given the growth on offer. This led to new positions in the following companies: Sartorius, Adyen, ASML, Dassault Systemes, and Edenred. That growth bucket also saw several exits when actual results deviated from the initial investment thesis: positions were sold in Richemont, S4 Capital, and Logitech.

Among cyclicals, the portfolio was pivoted out of Stellantis into the much less disrupted Michelin. Profits were realised on MTU after reaching the target price and Kion and Legrand were exited, as it was believed their respective cycles were set to weaken.

Among Defensives, Diageo was sold, and Heineken added, a more affordable proposition with underrated pricing power and a better tailwind from reopening.

Environmental, Social and Governance (“ESG”) considerations are integrated in the investment process through a Responsible Investment Policy and the Sub-Fund is classified as an Article 8 fund in accordance with the Sustainable Finance Disclosure Regulation ((EU) 2019/2088) (commonly referred to as “SFDR”). Independence ESG information is provided by Sustainalytics, a leading independent ESG and corporate governance research, ratings and analytics firm, and the Investment Adviser takes this information into consideration when deciding to include positions in the portfolio. Ongoing active monitoring of the portfolio is in place to ensure compliance with the Responsible Investment Policy which is available from [www.ericsturdza.com](http://www.ericsturdza.com).

**MARKET OUTLOOK**

Towards the end of the period, markets started to take note of the likely impact of inflation and tightening of financial conditions on the economic cycle. Whilst the rise in interest rates weighed heavily on the relative performance of Quality stocks in the first half, the consequences of monetary tightening and high inflation on the economic cycle are yet to kick in. Though management by and large remain fairly optimistic when looking at their – more often than not – very short order books, those comments should be taken with caution. The Investment Adviser remains prudent and attaches greater importance to the recession signals sent by the bond market, historically a much better predictor of the economic cycle. In that environment, the market’s focus may well pivot from the level of the discount rate to the expected resilience of cash-flows that are being discounted. Should this occur, the strategic positioning of the Sub-Fund on Quality companies with strong earnings power will be vindicated.

Phileas Asset Management SAS  
E.I. Sturdza Strategic Management Limited  
July 2022

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Strategic Global Quality Fund**

The Investment Manager's report has been compiled with the assistance of the Investment Adviser, Lofoten Asset Management Limited (Discretionary Advisor).

**FUND PERFORMANCE**

During the first half of 2022, the A USD Class returned -16.49% compared to the MSCI World Total Return of -20.51%, representing an outperformance of 4.02%. The B USD class outperformed the index by 4.56% over the same period. This result is pleasing in the fact that the performance is substantially better than the index although still down quite a lot in absolute terms.

**MARKET OVERVIEW**

The equity markets as well as the bond markets fell sharply during the first six months of the year with the MSCI World down 20.5% and the S&P down by 20.6%, just shy of an official bear market. The combination of rising interest rates, rapidly increasing inflation, high energy prices as well as the war in Ukraine meant that investors have taken a cautious view of future world developments. The US dollar has rallied strongly (the DXY index is up 9.3%) during the first six months as investors sought the safe haven given the concerns about the euro (political risk) while the unchanged monetary policy of the Bank of Japan meant that the Yen remained weak.

**PORTFOLIO STRATEGY**

The Sub-Fund employs a bottom up stock selection picking strategy with a strong preference for high quality business models as evidenced by high margins at the operating level and/or return of capital employed ideally combined with visible revenue streams. The aim is to buy these types of companies at a discount to intrinsic value. Accordingly, the sector allocation is a consequence of the investment process rather than a driver of it. Typically, the portfolio will have a structural bias towards the sectors such as consumer staples, healthcare consumer discretionary, IT, media and support services while normally avoiding the commercial banks, insurance companies and commodity sectors.

The best three performing stocks during the first half of the year were McDonalds (+2.45% attribution), Visa (+1.0% attribution) and Fidelity National Information Services (0.84% attribution). McDonalds is executing well on its strategy of staying relevant to the consumer (simplification of the menu as well as quality improvements) with lessons learnt during the Covid period. However, McDonalds is a beneficiary of recessionary trends as people trade down when eating out and thus is normally very stable during difficult economic times. Visa is still very well positioned to benefit from the long term structural switch from cash to card as well as from physical to online shopping. Moreover, a large part of its business is related to travel (and cross border) and thus is benefitting from the re-opening post the Covid shutdowns. Lastly, but not least, its revenue streams are a function of the prices paid and thus benefits from inflation. Fidelity National Information also operates in the payments space with similar drivers to the card networks. Last year the stock was derated sharply given it is perceived as old technology with fears that it will not grow as fast in the future.

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Strategic Global Quality Fund (continued)**

**PORTFOLIO STRATEGY (continued)**

The Fidelity National Information stock is marginally down during the period under consideration. The Investment Manager takes the view that banks will still need to settle their payments for some time to come and Fidelity National Information together with its competitors such as Global Payments, offer a good solution to banks. Further consolidation should be expected in this subspace as economies of scale drives competitive advantage. The company should be able to post huge single digit revenue growth combined with teens earnings growth, currently trading on about 13x P/E – a substantial discount to the United States market.

On the negative side it is worth mentioning Meta (-0.5% attribution). Meta has derated during the period and in particular earlier on this year due to a combination of expected slowdown in revenue growth, increased competition from Tik-Tok and high levels of investment in the Meta space. At the time of writing the stock trades on about 14x P/E, which to the Investment Advisor is attractive. The online advertising sector is still expected to take market share from other forms of advertising as our world becomes more and more digital. We will need to watch carefully the competitive threat that it faces but it does operate four rather good franchises (Facebook, Instagram, Messenger and WhatsApp). The CEO Mark Zuckerberg is not liked by the investor community but owner driven business models are often able to take a somewhat longer term attitude to investing in the new business lines despite the short term pain that may cause. The jury is still out on the virtual reality world it is trying to develop but it has at least started to scale back the investment in this.

Environmental, Social and Governance (“ESG”) considerations are integrated in the investment process through a Responsible Investment Policy and the Sub-Fund is classified as an Article 8 fund in accordance with the Sustainable Finance Disclosure Regulation ((EU) 2019/2088) (commonly referred to as “SFDR”). Independence ESG information is provided by Sustanalytics, a leading independent ESG and corporate governance research, ratings and analytics firm, and the Investment Adviser takes this information into consideration when deciding to include positions in the portfolio. Ongoing active monitoring of the portfolio is in place to ensure compliance with the Responsible investment Policy which is available from [www.ericsturdza.com](http://www.ericsturdza.com).

**MARKET OUTLOOK**

The Investment Adviser struggles to be optimistic at the moment given the combination of rising interest rates, reduction in central bank balance sheets, wage pressures on companies, China Covid lock-downs as well as the horrifying war in Ukraine. It is highly likely that this war will last some time given Russia has no interest in not pursuing its aim of conquering all of Ukraine. It is now becoming clear that the Western economies will suffer greatly from the economic sanctions given that the Russian gas supply to Europe will most likely be cut off completely. Putin is also weaponizing the oil market. There exists the real risk of a major economic crisis in Europe this winter. The political leaders will have to choose between crises at home or giving up on Ukraine. In this environment the Investment Adviser will remain cautious in portfolio construction.

Lofoten Asset Management Limited  
E.I. Sturdza Strategic Management Limited  
July 2022

**E.I. Sturza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Strategic European Silver Stars Fund**

The Investment Manager's report has been compiled with the assistance of the Investment Adviser, Pascal Investment Adviser S.A. (Discretionary adviser).

**FUND PERFORMANCE**

The period under review covers the Sub-Fund's evolution from 1 January 2022 to 30 June 2022 and saw the net asset value per share of the A EUR class decrease by EUR 361.53 to EUR 1,762.03, a total net return of -17.02%. The Sub-Fund's benchmark, the MSCI Europe SMID NR EUR Index, decreased by 22.28% over the same period giving the Fund a +5.26% relative outperformance.

The -17.02% performance can be divided between -15.24% of gross portfolio performance and -1.79% of fees and other expenses.

On a quarterly basis the Sub-Fund reported the following returns versus the benchmark:

- Q1 : -6.87% vs. -9.67% i.e. +2.80% outperformance
- Q2 : -10.91% vs. -13.96% i.e. +3.05% outperformance

The largest individual stock contributors to performance during the period were Albioma (+2.93% contribution to performance), Ipsos (+0.87%) and Barco (+0.28%), while the top detractors were Just Eat Takeaway (-2.70%), RVRC (-2.49%) and Trigano (-2.26%).

Out of the 27 positions held by the Sub-Fund during the period, 7 were profitable and 20 made a loss. The profitable investments contributed +4.55% gross performance (+0.65% on average), whilst the unprofitable positions impacted the gross performance by -19.79% (-0.99% on average). Albioma, the single largest contributor, represents 64% of the positive gross contribution, whilst Just Eat Takeaway, the single largest detractor, represents 14% of the negative gross contribution.

The benchmark of the Sub-Fund prior to 1 January 2022 was the Stoxx Europe 600 EUR NR Index. From 1 January 2022 the benchmark was the MSCI Europe SMID NR EUR, and performance since inception is measured against a combination of these indices. Since inception, on 5 May 2015, the Sub-Fund's performance was +76.20% (+8.23% annualised) and compares favourably versus the combined benchmarks +14.94% performance (+1.97% annualised), translating into 61.26% outperformance.

**MARKET OVERVIEW**

Undoubtedly, this was a tough semester for European equities, finishing on a very bearish note. The Sub-Fund's benchmark was down 10.61% in June and 22.28% in the first half of 2022.

Since the beginning of the year, equity markets have had to face three major dislocations: repeated COVID-related lockdowns in China with supply chain and logistics implications, Russia's invasion of Ukraine, and persistently high headline inflation in the US and now also in Europe.

**E.I. Sturdza Funds Plc**  
**Investment Manager’s Report (continued)**  
**For the six month period ended 30 June 2022**

**Strategic European Silver Stars Fund (continued)**

**PORTFOLIO STRATEGY**

The Sub-Fund is positioned to deal with the macro position highlighted in the Macro Outlook on the following page.

As a truly active and fundamental manager, the Sub-Fund’s goal is not to buy the market as a whole, or a representative basket of stocks from it, but to carefully select 25 companies in a universe of 2,000 companies in Europe that the Investment Adviser believes are able to manoeuvre in the current environment, minimise the crisis impact from a cash perspective and benefit from the situation in either the short or long-term.

Environmental, Social and Governance (“ESG”) considerations are integrated in the investment process through a Responsible Investment Policy and the Sub-Fund is classified as an Article 8 fund in accordance with the Sustainable Finance Disclosure Regulation ((EU) 2019/2088) (commonly referred to as “SFDR”). Independence ESG information is provided by Sustainalytics, a leading independent ESG and corporate governance research, ratings and analytics firm, and the Investment Adviser takes this information into consideration when deciding to include positions in the portfolio. Ongoing active monitoring of the portfolio is in place to ensure compliance with the Responsible Investment Policy which is available from [www.ericsturdza.com](http://www.ericsturdza.com).

**MARKET OUTLOOK**

Today there is a large disconnect between the micro perception of the world from companies and the macro view from investors. At the BNP Paribas Exane CEO Conference held in mid-June, the message was that corporates remain confident they can navigate the inflationary environment well, with customer demand still buoyant with strong pricing power. While a handful of corporates were seeing early signs of a rough ride ahead, across all sectors the outlook was generally positive. Of the those attending 65 (79%) were upbeat, with 13 (16%) neutral and only four (5%) cautious.

While we have seen such disconnects before, our sense is that the gap between top-down macro and bottom-up company views are unusually wide this time around, blurring the picture even further. Experience from 2008-2009 unfortunately tells us that if today’s dislocations were to deteriorate further, the bottom-up view could rapidly converge with the top-down.

Of the three factors mentioned in the market overview, only one, Russia’s invasion, has the potential to deteriorate further. It could however have ripple effects on the two others.

From a market perspective however, there are indeed some positive points to be noticed:

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Strategic European Silver Stars Fund (continued)**

**MARKET OUTLOOK (continued)**

- The outlook is at its most pessimistic, especially with regards to European equities. The Bank of America Bull & Bear indicator has been stuck at 0 since 16<sup>th</sup> June.
- Valuations in some segments of the markets (e.g. Consumer Discretionary) have reached levels rarely, or never seen before.
- Contrary to the sell side, the buy side has already incorporated sizeable EPS cuts for 2022 and even more for 2023.
- Corporate balance sheets in Europe are extremely healthy after two years of strong cash generation.
- June showed the first signs of what looked like a capitulation, finally!

Conversely, however:

- The Central Banks put option is no longer there in the opinion of the Investment Adviser, as the “whatever it takes” is focused on controlling inflation. In that sense, the situation differs a lot from the bottom of March 2009.
- The capitulation in June took place without significant market volumes and panic, given what still appear to be limited outflows from investment funds. Quality companies are still priced 20% above March 2020 levels. In March 2020 some opportunities developed to deploy capital in names that normally do not match the strict 10% minimum free cash flow threshold imposed by the Investment Adviser.
- There is no visibility as to where and when inflation, and hence interest rates, should stabilise. A scenario like the 1970's is clearly not priced in at this point.
- Second round inflation effects are already driving salary inflation initially in the US, but also now in Europe.
- Interest rate levels have an immediate impact on equity valuations; paying 100x PE could be justified, or at least explained in a 1% interest environment. This is no longer the case today. This impact is felt in all asset classes with the end of the 60/40 portfolio model, which interestingly garnered little attention when the same happened on the way up.
- Finally, since Q3 2021, the rosy P&L picture is far from being translated into the cash flow statements for companies, with working capital (especially inventories) eating away at the reported earnings improvement.

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Strategic European Silver Stars Fund (continued)**

**MARKET OUTLOOK (continued)**

As suggested from this brief summary, it is the belief of the Investment Adviser that the next quarters will remain choppy and volatile. As such, the Investment Adviser remains prudent given the absence of visibility. The first half-year results season will be scrutinised to capture potential trends and patterns, notably around inventory levels and their impact on cash generation.

Whilst this summary may come across as negative and bearish, the Investment Adviser holds a more positive view. Fear and panic in the markets results in massive mis-pricing opportunities for those investors who are willing to do their own fundamental analysis. The last few months have been spent looking for names that can take advantage of the current situation. Similar to previous crisis periods, an extensive shopping list of companies has been built and is ready to be acted upon as soon as the opportunity presents itself.

July 2022

**E.I. Sturdza Funds Plc**  
**Investment Manager’s Report (continued)**  
**For the six month period ended 30 June 2022**

**Strategic Japan Opportunities Fund**

The Investment Manager’s report has been compiled with the assistance of the Investment Adviser, Rheos Capital Works Inc. (Non-discretionary adviser).

**FUND PERFORMANCE**

The A JPY Class declined -15.17% over the period, compared to the benchmark, the Topix Total Return JPY, which returned -6.09% over the same period. Both the stock selection and sector allocation detracted from return. Large overweight in IT detracted most from sector allocation perspective slightly offset by positive effect of underweight consumer discretionary. Stock selection in capital goods was a drag on return while offset by the positive selection effect in IT.

**MARKET OVERVIEW**

The period under review was dominated by Russia’s invasion of Ukraine, with Covid becoming a lessor concern. Key features of the period included rising energy costs, driven largely by the cost of oil, supply chain disruption, exacerbated further by the lockdown in Shanghai, and concerns over runaway inflation.

The Japanese Government decided to lift border restrictions for foreign, non-business visitors towards the end of the period, launching the re-opening trade.

The widening spread between the monetary policies of the US and Japan led to a further sharp weakening of JPY over the period. Due to the risk of inflation, the market started to discount valuations on the expectation of a corporate margin squeeze.

**PORTFOLIO STRATEGY**

With the easing of Covid restrictions, particular focus has been given to those companies that benefit from the reopening trade. Consideration is also made for providers of automation equipment to assist in the cost cutting measures sought by those impacted by the increasing pressure on margins.

Environmental, Social and Governance (“ESG”) considerations are integrated in the investment process through a Responsible Investment Policy and the Sub-Fund has been classified as an Article 8 fund in accordance with the Sustainable Finance Disclosure Regulation ((EU) 2019/2088) (commonly referred to as “SFDR”). Independence ESG information is provided by Sustainalytics, a leading independent ESG and corporate governance research, ratings and analytics firm, and the Investment Adviser takes this information into consideration when deciding to include positions in the portfolio. Ongoing active monitoring of the portfolio is in place to ensure compliance with the Responsible investment Policy which is available from [www.ericsturdza.com](http://www.ericsturdza.com).

On 30 June 2022 a shareholder notification was released advising of the decision to terminate the Sub-Fund with effect from 5 August 2022.

**For the six month period ended 30 June 2022**

**Strategic Bond Opportunities Fund**

The Investment Manager's Report has been compiled with the assistance of the Investment Adviser, Banque Eric Sturdza S.A. (Discretionary adviser).

**FUND PERFORMANCE**

For the six months ending 30 June 2022, the Sub-Fund had a total return of -9.25% (B USD Class) and since inception (14 December 2018), the performance has reached +2.77%. Due to an exceptional bear market in all fixed-income asset classes, the Sub-Fund has suffered during the first half of this year. In this extremely difficult environment, the Sub-Fund has been resilient, thanks to a low duration policy and a decrease in high-beta issuers, leading to the sale of its total exposure to Emerging Markets. Compared to its peers, the performance has been relatively positive as many funds in the same category delivered negative returns between -11% and -13%. The Sub-Fund's strategy has always been based on a mix of four different fixed-income markets, called "the four pillars". During the first half of 2022, these four pillars, represented by the below Fixed Income indices, delivered the following returns:

1. US Treasuries (Bloomberg US Treasury TR): -9.1%
2. USD Corporate Investment Grade (Bloomberg US Corporate Bond TR): -14.4%
3. USD Emerging Markets Investment Grade (Bloomberg EM USD Investment Grade TR): -16.7%
4. EUR non-Financials Hybrid bonds (CS European Corporate Hybrid TR): -18.4%

In this context, the performance of the Sub-Fund, -9.25%, is satisfactory in relative terms and the feedback from the main shareholders is good and encouraging.

**MARKET OVERVIEW**

During the first half of the year, the markets have been dominated by inflation fears and the war in Ukraine, pushing rates and corporate spreads to new highs. On the other hand, except in China, the evolution of the Covid pandemic was positive and this topic has increasingly become a minor concern, replaced by the escalation of the conflict in Ukraine. The main central banks decided to dramatically change their monetary policy, declaring war against inflation. The Fed was the most aggressive with three rate hikes over the period under review, +0.25bp in March, followed by +50bp in May and +0.75bp in June. At the same time, the US central bank implemented a Quantitative Tightening program in order to sharply reduce the size of its balance sheet. In Europe, the European Central Bank stayed reluctant to aggressively increase its key rate for three reasons: inflation is lower than in the US, growth is also lower, and peripheral spreads are at risk (Italy in particular). At the end of June 2022, market participants expect a recession in the US and a possible first rate cut in Q2 2023.

Over the period, the 2y US Treasury yield increased from 0.73% to 2.95% (+222bp), the 5y increased from 1.26% to 3.04% (+178bp), the 10y from 1.51% to 3.01% (+150bp) and the 30y from 1.90% to 3.18% (+128bp).

The US yield curve experienced a bear flattening but the only segment of the curve to be inverted at the end of June was the 5-10y.

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Strategic Bond Opportunities Fund (continued)**

**MARKET OVERVIEW (continued)**

In Europe, the 2y German yield increased from -0.62% to +0.65% (+127bp) while the 5y & 10y increased from -0.45% to +1.07% (+152bp) and -0.18% to +1.34% (+152bp), respectively. The deformation of the slope of the curve was totally different in Germany and in the US, reflecting the differences in the economies (inflation and growth) and in central bank behaviours.

On the credit side, the European iTraxx Main increased from 48 to 119bp (+71bp) while the US corporate CDX index increased from 49 to 101bp (+52bp). In the hybrid corporate universe, the CS European Corporate Hybrid climbed dramatically from 199 to 531bp (+332bp). Credit spreads have substantially widened during the semester and European corporates have suffered more than their peers denominated in USD due to the end of asset purchases programs by the European Central Bank.

In emerging markets, the Credit Default Swap Index (CDX) 10 year Emerging Market index climbed from 223 to 345bp (+122bp). Massive outflows, poor liquidity, growing uncertainties (both economic and political) continue to weigh on this asset class. China has not been spared by this crisis, being hit by the collapse of some sectors of the economy (property in particular) and by the pursuit of lockdowns due to a zero-Covid policy.

**PORTFOLIO STRATEGY**

The Sub-Fund size has decreased from USD 83 million to USD 52 million by the end of the first half of the year. In order to achieve NAV appreciation over time, the Sub-Fund's investment strategy is still based on four pillars: US Treasuries, USD High Grade Credit, USD High Quality Emerging markets, and EUR Bonds hedged in USD. The allocation to each pillar evolves over time according to our macro scenario and credit market trends. The credit and liquidity risks are monitored through an internal credit scoring model and dedicated liquidity risk analysis tools. The investment strategy implemented in the last few months, by reducing duration risk and replacing it with an increase of the exposure to Investment Grade credits and selling the whole exposure to Emerging Markets bore fruit in terms of relative performance against peers and bond indices. On 30 June 2022 the allocation was around 23% US Treasuries, 59% Investment Grade USD bonds, 0% USD Emerging Markets and 16% EUR denominated bonds hedged in USD (the remaining 2% being cash). The modified duration was reduced to 2.7 in March and April but increased during Q2 to reach 4.1 in June.

Since January 2020, Environmental, Social & Governance (ESG) considerations have been included in the investment process. ESG scorings and analysis are provided by Sustainalytics and these results are taken into account to invest or to exclude corporate issuers in the portfolio. Regular active monitoring of the portfolio is in place to ensure compliance with the Responsible Investment Policy, available at [www.ericsturdza.com](http://www.ericsturdza.com). For companies actively transitioning their business models (ex: energy sector), consideration is made for the ESG impacts in their respective sector and their improvements made for the future. At the end of the semester, the Sub-Fund was rated "4 Globes" by Morningstar, which is a major achievement.

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Strategic Bond Opportunities Fund (continued)**

**MARKET OUTLOOK**

The outlook is still focused on the macroeconomic situation. Inflation is still very high (9.1% in the US) but growth is negative. Recession is approaching rapidly and the excellent behavior of the labour market is, against all odds, a leading indicator of an imminent decline of the economy. The behavior of the Fed towards rate hikes and Quantitative Tightening are becoming less predictable as the US central bank will abandon forward guidance and become data dependent. Market participants are already forecasting a first rate cut in 2023.

In the US, the Treasury curve is expected to continue to inverse, through the 2-10y, then through the 5-30y. The Investment Adviser is prepared to increase slightly the duration in the second half of 2022 and the first step will be the abandonment of the duration overlay policy (short position in 10y note futures). The portfolio is expected to remain invested in high quality-low duration credits whilst reinvesting in Emerging Markets seems unlikely in the near term.

As a result, the Investment Adviser believes that the best strategy today is to invest in a selection of high quality corporate bonds, both in EUR and USD, favouring USD Investment Grade and keeping hybrid debt (both in EUR and USD). Increasing the duration slightly also remains an option, depending on market evolution and central banks behavior

Banque Eric Sturdza S.A.  
E.I. Sturdza Strategic Management Limited  
July 2022

**E.I. Sturza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Sturza Family Fund**

The Investment Manager's Report has been compiled with the assistance of the Investment Adviser, Banque Eric Sturza S.A. (Discretionary adviser).

**FUND PERFORMANCE**

During the second half of 2022, the Sub-Fund returned -11.88% (SI USD Class) compared to its composite benchmark return of -14.59%. The composite benchmark comprises the MSCI World Net Dividends Index (60%), Bloomberg US Aggregate Gov/Credit Total Return Value Unhedged USD (20%) and the Secured Overnight Financing Rate (20%). The largest equity contributor to performance was Activision Blizzard (takeover), followed by Albioma (tactical trade on a takeover), Deutsche Boerse, Centene and UnitedHealth. Contrary to a typical allocation fund, the equity book was the defining contributor to performance as the fixed-income book held relatively well by having adjusted its interest rate sensitivity drastically ahead of 2022 (-0.56% contribution). On the detractors side for the equity book, Meta was the largest detractor over the period followed by Worldline, Keyence, Microsoft and S&P Global – all companies caught in the valuation compression especially biting for secular growth profiles.

The first half of 2022 was thus unique in both the correlation of fixed-income and equities, both impacted by the rising cost of capital from an extremely low base, resulting in the worst start of a year in decades for a typical “balanced” portfolio. The Sub-Fund's conservative positioning on the fixed-income side was a positive differentiator and the result of an allocation decision taken in 2021, to protect against such a potential risk. With the equity book being focused on quality secular growth, the performance remains relatively positive given the context of dramatic drawdowns in the most highly valued growth stocks, where year-to-date corrections have been significantly above the overall index return. The deliberated avoidance of the most highly priced growth area contributed to protecting the Sub-Fund from significant losses, even as many of the Sub-Fund's “quality” equities were not spared given the embedded duration provided by their long-term growth profiles. Measures were taken by the Investment Adviser to adjust the portfolio throughout the year, including the purchase of protective put options on the market, contributing positively to the overall performance (+0.37% net contribution for index option strategies).

**MARKET OVERVIEW**

The performance in the first half of 2022 was largely the result of a dramatic deterioration of the inflation picture globally, and a catch-up by the Federal Reserve having to adjust its interest rate policy accordingly. The thesis of a transitory inflation dynamic morphed into a more entrenched increase in overall price levels requiring the US central bank to increase interest rates drastically, resetting the cost of capital higher and providing to the market a sense of loss of control. Higher expectations of future interest rates mechanically repriced the cost of capital and thus impacted asset prices across the board, with a particular deleterious effect on long-term investments such as secular growth companies or long-dated fixed income. Naturally, the war in Ukraine was another key factor in the first half of 2022, exacerbating both inflation on the raw materials side given shortages and further supply chain issues, on top of an uncertainty premium being built in by the market. The necessity for the Federal Reserve to now slow down an economy seen as overheating transformed the narrative from a soft normalization of monetary policy to the engineering of a recession, reshaping once again expectations towards a stagflationary environment, especially negative for most traditional asset classes.

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Sturdza Family Fund (continued)**

**PORTFOLIO STRATEGY**

The strategy's aim is to achieve NAV appreciation over time by selecting companies with a positive track record of persistent growth throughout varying cycles, but which have attributes that are underappreciated by the market based on a wide set of fundamental valuation metrics. The strategy also allows for a reduction in the overall portfolio volatility and risk profile with a complimentary selection of fixed income instruments.

The Sub-Fund aims to select companies which exhibit high levels of price and earnings momentum, at prices which are deemed undervalued compared to their growth prospects. A central tenet of the strategy is to focus on the discrepancy between the market's valuation of a company's growth profile and both its actual and potential growth. The process makes full use of both quantitative screens and fundamental analyses to select the most attractive companies within the mandate's universe, whilst aiming to maintain a portfolio of at least 45 stocks, which exhibits sectoral diversification. The Sub-Fund can be described as following a bottom-up selection process with top-down-conscious portfolio construction. The strategy's goal is to achieve superior yet stable NAV appreciation over long periods of time by also selecting de-correlated fixed income instruments such as US Treasuries. By doing so, the overall portfolio risk/tolerance is reduced and should enable investors to better weather tough periods of volatility and uncertainty whilst continuously being exposed to best in class growth companies.

Environmental, Social and Governance ("ESG") considerations are integrated in the investment process through a Responsible Investment Policy and the Sub-Fund is classified as an Article 8 fund in accordance with the Sustainable Finance Disclosure Regulation ((EU) 2019/2088) (commonly referred to as "SFDR"). Independence ESG information is provided by Sustainalytics, a leading independent ESG and corporate governance research, ratings and analytics firm, and the Investment Adviser takes this information into consideration when deciding to include positions in the portfolio. Ongoing active monitoring of the portfolio is in place to ensure compliance with the Responsible investment Policy which is available from [www.ericsturdza.com](http://www.ericsturdza.com).

**MARKET OUTLOOK**

Financial markets have been supported by trillions of additional liquidity provided by central banks and trillions more in support from government programs to citizens and businesses since the Covid outbreak. With hindsight, this participated in creating serious inflationary imbalances which the world is grappling with today, especially as years of underinvestment in commodity extraction and logistics have limited spare capacity while geopolitics exacerbate supply issues. With recent inflation numbers continuing their steady rise even as economic activity indicators deteriorate, the potential for a stagflationary period is being increasingly priced by the market. Companies with low pricing power are shown to be at serious risk of margin compression, exacerbating what started as "merely" an adjustment of the cost of capital and hence multiples, now towards both a re-rating on lower earnings, lower fair valuations, and a risk premium on top.

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Sturdza Family Fund (continued)**

**MARKET OUTLOOK (continued)**

The current mix should create opportunities for longer-term investors, although the volatility of the market and the complexity of the situation render short-term timing bets especially treacherous. The Investment Adviser believes that the slowdown of the US economy should eventually cap interest rates, while the uncertainty as measured by credit spreads allows for attractive compensation on the corporate fixed-income side, providing opportunities in this segment in future months. On the equities side, the focus remains on investing and reinvesting in strong franchises with pricing power, sticky products and services, and reasonable valuations, for long-term compounding opportunities. The current context, in our view, continues to call for a defensive posture overall while maintaining the ability to allocate capital on weakness in the highest quality opportunities available. Volatile markets also allow the extraction of attractive premiums on option writing strategies, providing the Sub-Fund with disciplined reinvestment mechanisms into quality companies.

The team will continue to review its allocation and portfolio construction dynamically, in order for it to retain an attractive risk-reward profile and be in the position to seize strong investment opportunities going forward with an eye on long-term compounding.

Banque Eric Sturdza S.A.  
E.I. Sturdza Strategic Management Limited  
July 2022

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Sustainable Finance Disclosure Regulation (“SFDR”)**

**Introduction**

Level 1 of the Sustainable Finance Disclosure Regulation EU 2019/2088 (“SFDR”) came into force on 10 March 2021, and all sub-funds of E.I. Sturdza Funds Plc (the “Company”) are classified as Article 8 funds, promoting environmental or social characteristics.

Environmental, Social and Governance (“ESG”) considerations are integrated in the investment process through a Responsible Investment Policy and two pillar framework. The Investment Manager's Responsible Investment Policy is available to view at [www.ericsturdza.com](http://www.ericsturdza.com).

**First pillar: Ensure adherence to an established exclusion list of industries that are prohibited for investment:**

The Investment Manager's established exclusion list prohibits investment in companies that are involved in the transport or sale of controversial weapons. The other companies included in the exclusion list are those where more than 10% of their revenues are derived from: thermal coal, oil sands, arctic oil and gas exploration, shale energy, small arms, predatory lending, whaling, tobacco products or adult entertainment. The Investment Manager and Investment Adviser's have engaged with Sustainalytics, a global leader in ESG, corporate governance research and risk ratings, (the “Provider”), to monitor the product involvement of underlying companies. The established exclusion list is reviewed periodically unless a specific event necessitates an out-of-cycle review.

**Second pillar: The Investment Manager will work closely with each Investment Adviser to ensure that ESG risks and considerations are integrated into the relevant Sub-Fund's investment process:**

In addition to using traditional financial metrics when selecting portfolio constituents, ESG factors are incorporated into the investment decision making process, with a focus on investments in companies that have either fully adopted sustainable practices, or those that are actively transitioning their business models to more sustainable practices.

In order to evaluate the ESG risks of companies, the Investment Manager and Investment Advisers have access to externally sourced ESG research from the Provider. Risk ratings from the Provider are categorised across five risk levels, from negligible to severe and provide detailed analysis of each environmental, social and governance risk at a company level. Each established investment position is monitored, and the Investment Manager has established an ESG Committee to maintain risk oversight. If a company is rated high or severe the ESG Committee will engage with the Investment Adviser to understand the business case for holding the position. With regards to companies with a severe risk rating, the ESG Committee requires the Investment Adviser to justify in writing why they are holding this position (such as instances where the investee company is actively transitioning to more sustainable practices). Depending on the outcome of this discussion, the Investment Manager has the authority to require the Investment Adviser to divest within a reasonable time frame.

In addition to the above, the Investment Manager encourages Investment Advisers to use voting rights in order to ensure a culture of strong corporate governance. The Investment Manager aims to vote on all of its proxies and utilises a leading voting services provider to assist with this.

**E.I. Sturdza Funds Plc**  
**Investment Manager's Report (continued)**  
**For the six month period ended 30 June 2022**

**Sustainable Finance Disclosure Regulation (“SFDR”) (continued)**

**Other considerations**

In addition to monitoring ESG risks, the Investment Manager expects the Investment Adviser to actively engage with the underlying companies. When assessing the governance practices of companies, each Investment Adviser should be able to satisfy itself that the companies follow good practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance. The Investment Manager also emphasises the importance of using its voting rights in order to ensure a culture of strong corporate governance. The Investment Manager aims to vote on all of its proxies and utilises a leading voting services provider to assist with this. Voting records are available on the Investment Manager's website at [www.ericsturdza.com/about-us/proxy-voting/](http://www.ericsturdza.com/about-us/proxy-voting/).

The Investment Manager monitors the social and environmental characteristics through actively monitoring all portfolios on a regular basis to ensure compliance with its responsibilities as a signatory to the UN Principles for Responsible Investment and under its own defined objectives outlined in its Responsible Investment Policy. The Investment Manager is also a member of the Institutional Investors Group on Climate Change (IIGCC), a European membership body for investor collaboration on climate change. Under this obligation, the Investment Manager intends to monitor the carbon footprint of each portfolio using data from the Provider, and to encourage the Investment Adviser to engage with the underlying companies on strategies to improve their carbon footprint and to reduce/mitigate climate-related risks.

Further details on the integration of SFDR and how the requirements issued by the French authorities (AMF position DOC-2020-03) are complied with, are outlined in each Sub-Fund supplement in the Prospectus, available at [www.ericsturdza.com](http://www.ericsturdza.com).

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements**  
**For the six month period ended 30 June 2022**

**1. General information**

E.I. Sturdza Funds Plc (the “Company”) is an open-ended umbrella investment company with variable capital and segregated liability between Sub-Funds, incorporated in Ireland on 27 August 2008 under the Companies Act 2014 with registration number 461518. The Company has been authorised by the Central Bank of Ireland (“Central Bank”) as an Undertaking for Collective Investment in Transferable Securities (“UCITS”) pursuant to the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank’s UCITS Regulations”).

As at 30 June 2022, the Company had 8 active Sub-Funds (31 December 2021: 8 active Sub-Funds).

The 8 active Sub-Funds of the Company are: Strategic China Panda Fund (“SCPF”), Nippon Growth (UCITS) Fund (“NGUF”), Strategic Europe Quality Fund (“SEQF”), Strategic Global Quality Fund (“SGQF”), Strategic European Silver Stars Fund (“SESSF”), Strategic Japan Opportunities Fund (“SJOF”), Strategic Bond Opportunities Fund (“SBOF”) and Sturdza Family Fund (“SFF”).

The Bank of New York Mellon SA/NV, Dublin Branch serves as depositary (the “Depositary”) to the Company.

**2. Significant accounting policies**

These interim financial statements are prepared in accordance with International Financial Reporting Standards (“IFRS”) as adopted by the European Union (“EU”), issued by the International Accounting Standards Board (IASB), and interpretations issued by the International Financial Reporting Interpretations Committee of the IASB. Specifically, these interim financial statements are prepared in accordance with IAS (International Accounting Standard) 34: Interim Financial Reporting.

These interim financial statements are also prepared in accordance with the Companies Act 2014 and the Central Bank’s UCITS Regulations.

The comparative figures for the Statement of Financial Position relate to the year ended 31 December 2021. The comparative figures for the Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and Statement of Cash Flows relate to the period from 1 January 2021 to 30 June 2021.

For the purpose of aggregating the interim financial statements of the Sub-Funds, the Statement of Financial Position figures for the Strategic China Panda Fund, Nippon Growth (UCITS) Fund, Strategic Global Quality Fund, Strategic Japan Opportunities Fund, Strategic Bond Opportunities Fund and Sturdza Family Fund have been translated to EUR at the exchange rates ruling at the period end, while the Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and Statement of Cash Flows have been translated at the average exchange rates for the period. The resulting gain or loss that arises at Company level has no effect on the Net Asset Value per share attributable to the individual Sub-Funds.

These interim financial statements are prepared on a going concern basis. The accounting policies applied in these interim financial statements are the same as those applied in the Company’s financial statements as at and for the year ended 31 December 2021. These interim financial statements should be read in conjunction with the year end financial statements.

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**2. Significant accounting policies (continued)**

**Standards, amendments and interpretations that are effective 1 January 2022 and have been adopted by the Company**

**IFRS 9 Financial Instruments - Fees in the '10 per cent' test for derecognition of financial liabilities**

As part of its 2018-2020 annual improvements to IFRS standards process, the IASB issued an amendment to IFRS 9. The amendment clarifies the fees that an entity includes when assessing whether the terms of a new or modified financial liability are substantially different from the terms of the original financial liability. These fees include only those paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf.

The amendment is effective for annual reporting periods beginning on or after 1 January 2022, with earlier adoption permitted. The Company must apply the amendments to financial liabilities that are modified or exchanged on or after the beginning of the annual reporting period in which the entity first applies the amendment.

The amendments did not have a have a material impact on the Company's financial statements.

**Amendments to IAS 1: Classification of Liabilities as Current or Non-current**

In January 2020, the IASB issued amendments to paragraphs 69 to 76 of IAS 1 to specify the requirements for classifying liabilities as current or non-current. The amendments clarify:

- What is meant by a right to defer settlement
- That a right to defer must exist at the end of the reporting period
- That classification is unaffected by the likelihood that an entity will exercise its deferral right
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification.

The amendments are effective for annual reporting periods beginning on or after 1 January 2023 and must be applied retrospectively. The amendments did not have a material impact on the Company's financial statements.

There are no other standards, interpretations or amendments to existing standards that are effective that is expected to have a significant impact on the Company.

**Standards, amendments and interpretations in issue that are not yet effective and have not been early adopted by the Company**

There are no new standards, interpretations or amendments to existing standards that are not yet effective that are expected to have a significant impact on the Company.

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**3. Financial assets and liabilities at fair value through profit or loss**

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**3. Financial assets and liabilities at fair value through profit or loss (continued)**

*Fair Value Measurement*

IFRS 13, Fair Value Measurement, requires disclosure of financial instruments based on a fair value hierarchy that prioritises the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements).

The three levels of the fair value hierarchy are described as follows:

- Level 1            Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date;
- Level 2            Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active; and
- Level 3            Inputs that are unobservable.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgment by the Company. The Company considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Company's perceived risk of that instrument.

*Investments*

Investments whose values are traded based on quoted market prices in active markets, and are therefore classified within level 1, include active traded listed equities, certain U.S. government and sovereign obligations and certain money market securities. The Company does not adjust the quoted price for such instruments, even in situations where the Company holds a large position and a sale could reasonably impact the quoted price.

Investments that trade in markets that are not considered to be active, but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**3. Financial assets and liabilities at fair value through profit or loss (continued)**

*Investments (continued)*

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently or not at all. When observable prices are not available for these securities, the Directors use one or more valuation techniques (e.g. the market approach or the income approach) for which sufficient and reliable data is available. Within level 3, the use of the market approach generally consists of using comparable market transactions, while the use of the income approach generally consists of the net present value of estimated future cash flows, adjusted as appropriate for liquidity, credit, market and/or other risk factors.

*Derivative instruments*

Derivative instruments can be exchange-traded or privately negotiated over-the-counter ("OTC"). Exchange-traded derivatives, such as futures contracts and exchange traded options contracts, are typically classified within level 1 or level 2 of the fair value hierarchy depending on whether or not they are deemed to be actively traded.

OTC derivatives, such as generic forward contracts, have inputs which can generally be corroborated by market data and are therefore classified within level 2. In instances where models are used, the value of an OTC derivative depends upon the contractual terms of, and specific risks inherent in the instrument as well as the availability and reliability of observable inputs. Such inputs include market prices for reference securities, yield curves, credit curves, measures of volatility, prepayment rates and correlations of such inputs.

The fair value hierarchy for the Company's assets and liabilities not measured at fair value is level 1 for cash and cash equivalents and level 2 for subscriptions receivable, redemptions payable, due to/from broker and short-term receivables and payables. The fair value of these instruments is not disclosed as their carrying value is an approximation of the fair value given the short-term nature of these instruments.

**4. Fees and other expenses**

**Other expenses**

The other expenses figure included in the Statement of Comprehensive Income includes tax advisory fees, administrator ancillary services fees, directors' insurance, listing fees, regulatory fees, establishment costs, bank charges, broker fees and research fees.

**Management Company fees**

On 1 October 2021, Eric Sturdza Management Company S.A. was appointed as the management company (the "Management Company"). The Management Company is entitled to receive an annual fee from the relevant Sub-Fund. This fee will not exceed 0.05% of the Net Asset Value of the Sub-Fund and will be incurred by the Sub-Fund. For the period ended 30 June 2022, the actual fee charged to each Sub-Fund was 0.05% of the Net Asset Value of the Sub-Fund, on a monthly basis. Also, the Management Company shall be entitled to be reimbursed by the relevant Sub-Fund for reasonable out of pocket expenses properly incurred and any VAT on all fees and expenses payable to or by it. The Management Company fees will be calculated and accrued at each valuation point and are payable monthly in arrears. The Management Company fees may be waived or reduced by the Management Company.

During the period, the Company recognised Management Company fees of EUR 205,343 (30 June 2021: EUR Nil) of which EUR 31,495 was payable at period end (31 December 2021: EUR 40,309).

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**4. Fees and other expenses (continued)**

**Investment Manager fees**

The Investment Manager is entitled to a fee payable out of the assets of the relevant Sub-Fund. An annual fee is accrued at each Valuation Point and payable monthly in arrears at the following rates:

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**4. Fees and other expenses (continued)**

**Performance fees (continued)**

The Performance Fee is calculated for each individual share tranche subscribed as at a relevant Valuation Point. For each subsequent subscription, the subscription amount is treated as a separate share tranche.

Performance Fees for the period ended 30 June 2022 amounted to EUR 1,929,021 (30 June 2021: EUR 3,230,338) of which EUR 2,534,759 was payable at period end (31 December 2021: EUR 1,282,626).

**Investment Advisers' fees**

All fees payable to any appointed Investment Adviser shall be paid by the Investment Manager out of the remuneration it receives pursuant to the terms of the Investment Management Agreement.

**Administrator's fees**

SS&C Financial Services (Ireland) Limited ("SS&C") serves as Administrator of the Company and is entitled to a minimum fee per month of USD 166,667 per month, increasing to USD 183,333 per month, over a 25 month period, from 1 October 2021 (the "Monthly Minimum Fee"). The Monthly Minimum Fee is applied when the calculated basis point fee is less than the minimum. The minimum fee applies to the total net assets of related group entities which are also administered by SS&C. The Monthly Minimum Fee which applies to E.I. Sturdza Funds Plc, for the period ended 30 June 2022 is USD 721,961 (period ended 30 June 2021: USD 760,530).

Fees are calculated for each tier of assets multiplied by the appropriate basis point figure as per the below table. Further fees may be payable to the Administrator in consideration of ancillary services rendered to the Company and its Sub-Funds, which fees will be at normal commercial terms.

The fees of the Administrator will be paid out of the assets of the relevant Sub-Fund.

Description	Fee
First USD 3 billion of aggregate net assets	10 basis points
Next USD1 billion of aggregate net assets	7 basis points
Next USD1 billion of aggregate net assets	6 basis points
Next USD1 billion of aggregate net assets	4 basis points
All additional aggregate net assets above USD 6 billion	3 basis points

The Administrator's fees for the period ended 30 June 2022 amounted to EUR 623,967 (30 June 2021: EUR 630,303) of which EUR 76,410 was payable at period end (31 December 2021: EUR 104,748).

**Depository fees**

The Depository is entitled to an annual fee equal to a percentage of the Net Asset Value of each Sub-Fund or Share Class, subject to a maximum rate of 2.3 basis points (0.023%) per annum.

Further fees may be payable to the Depository in consideration of ancillary services rendered to the Company and its Sub-Funds, which fees will be at normal commercial terms.

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**4. Fees and other expenses (continued)**

**Depositary fees (continued)**

The fees of the Depositary will be paid out of the assets of the relevant Sub-Fund.

The Depositary fees for the period ended 30 June 2022 amounted to EUR 213,741 (30 June 2021: EUR 265,322) of which EUR 64,614 was payable at period end (31 December 2021: EUR 84,391).

**Directors' fees**

The Articles of Association authorise the Directors to charge a fee for their services at a rate determined by the Directors. The Directors shall receive a fee for their services up to a total aggregate maximum fee of EUR 400,000 per annum, or such other amount as may from time to time be disclosed in the annual report of the Company. Any increase above the maximum permitted fee will be notified in advance to shareholders. Each Director may be entitled to special remuneration if called upon to perform any special or extra services to the Company. All Directors will be entitled to reimbursement by the Company of expenses properly incurred in connection with the business of the Company or the discharge of their duties.

The Directors' fees for the period ended 30 June 2022 amounted to EUR 81,219 (30 June 2021: EUR 116,633) of which EUR 45,545 was payable at period end (31 December 2021: EUR 60,747).

**Consulting fees**

Up to 1 October 2021, the Company had appointed MJ Hudson (formerly Bridge Consulting up to 1 October 2021) to provide services to assist the Directors in carrying out the management functions specified by the Central Bank. MJ Hudson received an annual fee for governance services of no more than EUR 75,000 plus VAT, payable out of the assets of the Company, accrued at each valuation point and payable quarterly in arrears. The consulting fees paid in the period ended 30 June 2021 amounted to EUR 35,685, included within Consulting fees in the Statement of Comprehensive Income.

From 1 October 2021, there are no separate consulting fees to be charged as a result of the appointment of Eric Sturdza Management Company S.A as the Management Company. All fees relating to the services of the Eric Studza Management Company is disclosed in Note 4 under Management Company fees and is included in the Statement of Comprehensive Income as 'Management Company fees'.

**Legal fees**

The Company has appointed Dillon Eustace as Irish legal adviser. The Legal fees for the period ended 30 June 2022 amounted to EUR 79,976 (30 June 2021: EUR 35,307), included within Legal and other professional fees in the Statement of Comprehensive Income.

**Company secretarial fees**

The Company has appointed Sanne Corporate Administration Services Ireland Limited as company secretary. The company secretarial fees for the period ended 30 June 2022 amounted to EUR 16,119 (30 June 2021: EUR 6,805), included within Legal and other professional fees in the Statement of Comprehensive Income.

The following exchange rates were used to translate the assets and liabilities of the Sub-Funds: Nippon Growth (UCITS) Fund and Strategic Japan Opportunities Fund into Japanese Yen (“JPY”), their functional currency, as at 30 June 2022 and 31 December 2021:

<b>Currency</b>	<b>30 June 2022</b>	<b>31 December 2021</b>
EUR	0.0070	0.0076
USD	0.0074	0.0087

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**6. Derivatives**

The Company engages in transactions in derivative financial instruments for the purpose of efficient portfolio management. Sub-Fund's may also use derivative financial instruments in order to achieve their investment objective. Such instruments include futures contracts, forward foreign exchange contracts and options contracts. Forward foreign exchange contracts are entered into for speculative purposes or to hedge the Company's currency risk. Futures contracts are entered into for speculative purposes or to hedge the Company's market risk. The derivative counterparty for forward foreign exchange contracts is The Bank of New York Mellon and for options contracts is ADM Investor Services International Limited.

*Forward foreign exchange contracts and futures contracts*

Forward foreign exchange contracts and futures are commitments either to purchase or sell a designated financial instrument, currency, commodity or an index at a specified future date for a specified price and may be settled in cash or another financial asset. Forward foreign exchange contracts are individually traded over-the-counter contracts and result in credit exposure to the counterparty.

Forward foreign exchange contracts result in exposure to market risk based on changes in market prices relative to contracted amounts. Market risks arise due to the possible movement in foreign currency exchange rates, indices, and securities' values underlying these instruments. In addition, because of the low margin deposits normally required in relation to notional contract sizes, a high degree of leverage may be typical of a futures or forward trading account. As a result, a relatively small price movement in an underlying of a futures or forward contract may result in substantial losses to the Company. Forward foreign exchange contracts are generally traded over-the-counter and therefore are subject to greater liquidity risk.

If prices fluctuate during a single day's trading beyond those limits, the Company could be prevented from promptly liquidating unfavourable positions and thus could be subject to substantial losses.

Notional amounts are the underlying reference amounts to stock exchange indices, equities and foreign currencies upon which the fair value of the forward foreign exchange and futures contracts traded by the Company are based. While notional amounts do not represent the current fair value and are not necessarily indicative of the future cash flows of the Company's derivative contracts, the underlying price changes in relation to the variables specified by the notional amounts affect the fair value of these derivative financial instruments.

*Options contracts*

The Company may purchase and sell put and call options through listed exchanges and OTC markets. Options purchased by the Company provide it with the opportunity to purchase or sell the underlying asset at an agreed-upon value either on or before the expiration of the option. The options may be traded on recognised exchanges and OTC markets and are valued by reference to last traded price or quoted prices, respectively.

21 January 2022	Strike Price: 180	Put Option on Walt Disney Co/The	30 Contracts

As at 30 June 2022 and 31 December 2021, the Investment Manager considered the residual risk inherent in holding option positions to be insignificant. The options held represented a hedge within the portfolio to the risk factor exposures to which the Sturdza Family Fund was exposed. As a consequence, the Investment Manager considered these option positions to be covered option positions.

(iii) *Futures contracts*

As at 30 June 2022, the Company maintained exposure to the following futures position within the portfolio of the Strategic Bond Opportunities Fund:

21 September 2022	Bond Future: US 10-year Note	30 Contracts
-------------------	------------------------------	--------------

The Company did not hold any futures position as at 31 December 2021.

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**7. Net gain/(loss) from efficient portfolio management techniques (continued)**

The securities lending income is included under Other income in the Statement of Comprehensive Income.

The details of securities loaned and related collateral balances at period end are disclosed in the reporting requirements in respect of the Securities Financing Transactions Regulation section of the Interim Report.

**8. Overdraft facility**

The Company has an overdraft facility with The Bank of New York Mellon.

The Bank of New York Mellon offers each Sub-Fund an overdraft facility of up to 10% of the net asset value of the Sub-Fund. Interest is charged on the drawn facility at The Bank of New York Mellon's overdraft rate.

An overdraft is only available when due to timing (e.g. for monies in transit) or where there are sufficient funds available in other currencies to cover the overdraft.

The Bank of New York Mellon maintains security over any overdrawn amounts from the assets in the account of the Sub-Fund.

**9. Related parties and connected persons**

*(i) Related parties*

The below table provides an analysis of related party transactions for the period ended 30 June 2022:

<b>Name</b>	<b>Relationship</b>	<b>Transaction type</b>	<b>Fees paid</b>

None of the Directors hold any disclosable interest in the Company.

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**9. Related parties and connected persons (continued)**

*(ii) Connected persons*

In accordance with the requirements of the Central Bank UCITS Regulations, all transactions carried out with the Company by the management company or depositary and the delegate or sub-delegates of such management company or depositary (excluding any non-group company sub-custodians appointed by the depositary) and any associated or group companies of such management company, depositary, delegate or sub-delegate (“connected persons”) must be carried out as if negotiated at arm’s length and be in the best interests of shareholders. The Directors of the Management Company are satisfied that there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out in paragraph 1 of the Central Bank UCITS Regulations are applied to all transactions with connected persons and transactions with connected persons entered into during the period complied with the obligations set out in the Central Bank UCITS Regulations.

**10. Soft commission arrangements and research fees**

Soft commission arrangements have been entered into by the Company with brokers in respect of which certain goods and services used to support the investment decision process were received. As at 30 June 2022, the Company had a Commission Sharing Agreement with CIMB, with respect to the Strategic China Panda Fund.

The Investment Manager has also entered into soft commission arrangements with brokers to support the investment decision process. The Investment Manager does not make direct payment for these services but does transact with the brokers on behalf of the Company and commission is paid on these transactions. The Investment Manager considers these arrangements are to the benefit of the Company and has satisfied itself that it obtains best execution on behalf of the Company and the brokerage rates are not in excess of customary institutional full service brokerage rates. As at 30 June 2022, the Investment Manager had a Commission Sharing Agreement with Virtu Financial Inc., with respect to the Sturdza Family Fund.

In accordance with the requirements of MiFID II, soft commission arrangements were no longer permitted in respect of the Strategic Global Quality Fund. As such, the Strategic Global Quality Fund arranged for research costs to be paid to a research payment account at a rate not exceeding 5 basis points per annum of the average Net Asset Value of the Sub-Fund.

Up to 31 October 2021, the Strategic Europe Quality Fund was also not permitted to enter into commission sharing agreements, due to MiFID II, and arranged for research costs to be paid to a research payment account at a rate not exceeding 5 basis points per annum of the average Net Asset Value of the Sub Fund. From 1 November 2021, following the change in Investment Adviser, the Strategic Europe Quality Fund was no longer required to pay research costs.

As at 30 June 2022, the Strategic China Panda Fund held the below balance in accordance with the Commission Sharing Agreement:

CIMB

HKD 1,042,085 (31 December 2021: HKD 917,289)

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**10. Soft commission arrangements and research fees (continued)**

As at 30 June 2022, the Sturdza Family Fund held the below balance in accordance with the Commission Sharing Agreement:

Virtu Financial Inc. USD 28,705 (31 December 2021: USD 33,613)

The Strategic Europe Quality Fund and the Strategic Global Quality Fund recognised research fees of EUR 10,715 (31 December 2021: EUR128,252) and USD Nil (30 December 2021: USD 28,485), respectively, for the period ended 30 June 2022. Research fees are included within Other expenses in the Statement of Comprehensive Income.

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**12. Distributions**

The Directors are empowered to declare and pay distributions on any class of shares in the Company.

For the Strategic China Panda Fund it is intended that dividends, if declared, would be declared for the AD GBP Class on an annual basis in line with the completion of the preparation of the audited financial statements. It is not the current intention of the Directors to distribute dividends to shareholders in any of the other share classes of the Sub-Fund.

For the Nippon Growth (UCITS) Fund it is intended that dividends, if declared, would be declared for the AD JPY Class on a semi-annual basis in line with the completion of the audited and interim financial statements. It is not the current intention of the Directors to distribute dividends to shareholders in any of the other share classes of the Sub-Fund.

For the Strategic Europe Quality Fund it is intended that dividends, if declared, would be declared for the BD EUR Class on a semi-annual basis in line with the completion of the audited and interim financial statements. It is not the current intention of the Directors to distribute dividends to shareholders in any of the other share classes of the Sub-Fund.

For the Strategic Bond Opportunities Fund it is intended that dividends, if declared, would be declared for the AD EUR Class on a semi-annual basis in line with the completion of the audited and interim financial statements. It is not the current intention of the Directors to distribute dividends to shareholders in any of the other share classes of the Sub-Fund.

For the Strategic Global Quality Fund, Strategic European Silver Stars Fund, Strategic Japan Opportunities Fund and Sturdza Family Fund it is not the current intention of the Directors that dividends be recommended for payment to shareholders in any of the share classes of the Sub-Funds.

There were no dividends declared and paid during the period ended 30 June 2022.

The dividends declared and paid during the period ended 30 June 2021 follows.

<b>Sub-Fund</b>	<b>Share Class</b>	<b>Date</b>	<b>Dividend per share</b>	<b>Gross amount</b>
Strategic China Panda Fund	AD GBP Class	14 May 2021	GBP 9.47	GBP 1,741
Strategic Bond Opportunities Fund	AD EUR Class	14 May 2021	EUR 27.52	EUR 11,881

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**13. Taxation**

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. As such, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a “chargeable event”. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (a) a shareholder who is neither an Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; and
- (b) certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations and the Company is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct.

Dividends, interest and capital gains (if any) received on investments made by the Sub-Funds may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Sub-Funds or its shareholders. Income that is subject to such tax is recognised gross of the taxes and the corresponding withholding tax is recognised as withholding tax expense in the Statement of Comprehensive Income.

IFRIC 23, Uncertainty over income tax treatments, was adopted by the Company on 1 January 2019. The Directors have concluded that IFRIC 23 did not have a material impact on the Company’s financial statements.

**14. Significant matters arising during the period**

The benchmarks for SFF and SESSF were changed effective from 1 January 2022 and advance notification to shareholders was provided on 13 December 2021.

- Change in composite benchmark of SFF, made up of three indices comprising MSCI World Net Total Returns index (60%), Bloomberg US Aggregate Gov/Credit TR Value Unhedged USD (20%) and the Secured Overnight Financing Rate (20%).
- Change in benchmark of SESSF to MSCI Europe Net Total Return.

On 30 January 2022, the Strategic Global Quality Fund launched the C EUR Class.

On 24 February 2022, the Nippon Growth (UCITS) Fund, B JPY Class, was re-activated after being dormant.

Gavin Farrell resigned with effect from 31 March 2022

The Nippon Growth (UCITS) Fund A CHF class was launched on 8 April 2022 while the Nippon Growth (UCITS) Fund A EUR was re-activated on 19 May 2022 after being dormant since 14 October 2021.

**E.I. Sturdza Funds Plc**  
**Notes to the Financial Statements (continued)**  
**For the six month period ended 30 June 2022**

**4. Significant matters arising during the period (continued)**

Russia invaded Ukraine in February 2022, having far reaching global social and economic consequences. The Company has no direct exposure to either the Ukrainian or Russian economies however, the ongoing conflict will continue to impact financial markets, the implications of which will be actively monitored and assessed by the Directors, Manager and Investment Manager.

There have been no other significant events during the period.

**15. Events since the period end**

The Strategic Japan Opportunities Fund has terminated with effect from 5 August 2022.

There have been no other significant events that happened since the period end.

**16. Approval of the interim financial statements**

The interim financial statements were approved and authorised for issue by the Board of Directors on 22 August 2022.

#### 3. Publications

The Articles of Association of the Company, the Prospectus, the Supplements and Key Investor Information Documents for each Sub-Fund and the annual and semi-annual reports of the Company can be obtained, free of charge from the Swiss Representative and Paying Agent, UK Facilities Agent, French Centralising Correspondent, German Paying Agent and Information Agent, Austrian Paying Agent, Information Agent and Tax Representative, Swedish Paying Agent, Spanish Representative, Italian Paying Agent, Luxembourg Paying Agent, the Distributor and the Administrator.

**E.I. Sturdza Funds Plc**  
**Reporting requirement in respect of the**  
**Securities Financing Transactions Regulation**  
**For the six month period ended 30 June 2022**

E.I. Sturdza Funds Plc (the “Company”) is subject to the Securities Financing Transactions Regulation (the “SFTR”) as at 30 June 2022. The SFTR introduces mandatory reporting for securities financing transactions (“SFTs”) and sets minimum disclosure and consent requirements on the re-use of collateral, with the aim of reforming shadow banking and improving transparency in the SFT market. The SFTR was formally adopted by the EU on 25 November 2015 and came into force on 13 January 2017. An SFT consists of any transaction that uses assets belonging to a counterparty to generate financing means and is comprised of the following:

- repurchase transactions;
- securities or commodities lending, securities or commodities borrowing;
- any transaction having an equivalent economic effect, in particular a buy/sell-back or sell/buy-back transaction; and
- margin lending transaction.

Article 2 of the SFTR covers the following entities:

- Counterparties to an SFT that are established:
  - in the EU, including all of its branches irrespective of where they are located (i.e., non-EU branches); or
  - outside the EU if the SFT is concluded in the course of the operations of an EU branch of that counterparty.
- UCITS funds and their management companies irrespective of where they are established;
- AIFMs authorised or registered in accordance under AIFMD irrespective of where their AIFs are established; and
- in relation to the Re-use Obligation only, counterparties established outside the EU, in either of the following circumstances:
  - the re-use is effected in the course of the operations of an EU branch; or
  - the re-use concerns financial instruments provided as collateral by a counterparty established in the EU or an EU branch of a third country entity (i.e. a non-EU entity re-uses an EU entity’s collateral).

The SFTR also covers Total Return Swap (“TRS”) transactions. The Company did not transact in TRSs during the period.

During the period ended 30 June 2022, the Company on behalf of the Strategic China Panda Fund, Nippon Growth (UCITS) Fund, Strategic Europe Quality Fund, Strategic Global Quality Fund, Strategic European Silver Stars Fund, Strategic Japan Opportunities Fund and Sturdza Family Fund entered into securities lending transactions through a securities lending program entered into with The Bank of New York Mellon SA/NV, Dublin Branch (the “Depositary”) and The Bank of New York Mellon (the “Bank”), a related party to the Depositary, effective 14 August 2017. The Bank acts as the securities lending agent for the Company. The Company is allowed to lend securities with a value of up to 15% of the net asset value of each Sub-Fund, per borrower. The Company received collateral in the form of government securities, equity securities, certificates of deposit and cash against the loaned securities.

**E.I. Sturdza Funds Plc**  
**Reporting requirement in respect of the**  
**Securities Financing Transactions Regulation (continued)**  
**For the six month period ended 30 June 2022**

**Global data**

The following table reflects the amount of securities on loan as a proportion of total lendable assets (excluding cash and cash equivalents) of each Sub-Fund (presented in each of the Sub-Fund's functional currency) as at 30 June 2022:

Sub-Fund	Sub-Fund's functional currency	Total lendable assets (excluding cash and cash equivalents)	Fair value of securities on loan	% of securities on loan
SCPF	USD	106,805,950	3,580,770	3.35%
NGUF	JPY	6,449,130,999	369,861,000	5.74%
SEQF	EUR	119,589,040	24,313,719	20.33%

**Aggregate transaction data for each type of SFT**

To ensure credit quality is maintained there are restrictions in place over the collateral accepted. Sovereign Debt obligations are only accepted from USA, Canada, Austria, Belgium, Denmark, Finland, France, Germany, Netherlands, Norway, Sweden, Switzerland, United Kingdom, Luxembourg, Australia, Hong Kong, Japan, Singapore and New Zealand. Debt obligations are only accepted when issued by the following supranational issuers: European Bank for Reconstruction and Development; European Investment Bank; European Union; Inter-American Development Bank; International Bank for Reconstruction and Development; and the International Finance Corporation. Equity securities must be listed on one of the following exchanges: AEX 25 (Netherlands); CAC 40 (France); DAX 30 (Germany); Euro 50 (Eurozone); FTSE 100 (United Kingdom); Nikkei 225 (Japan); SMI 23 (Switzerland) or S&P 500 (USA).

**E.I. Sturdza Funds Plc**  
**Reporting requirement in respect of the**  
**Securities Financing Transactions Regulation (continued)**  
**For the six month period ended 30 June 2022**

**Aggregate transaction data for each type of SFT (continued)**

All Sub-Funds are subject to the securities lending program entered into with the Depository, which allows for The Bank of New York Mellon (the “Lending Agent”) to utilise applicable Settlement Systems. These Settlement Systems may be any securities depository or clearing agency authorised to act as a securities depository or clearing agency. During the period, the Sub-Funds utilised tri-party and bilateral agreements where collaterals held were securities and reinvested cash collateral in overnight reverse repurchase agreements.

**Data on return and cost for each type of SFTs**

The following table reflects the data on cost and return for each type of SFT between the Sub-Funds and the Lending Agent, in absolute terms, and as a percentage of overall returns generated by that type of SFT (presented in each of the Sub-Fund’s functional currency) for the period ended 30 June 2022:

Sub-Fund	Sub-Fund’s functional currency	Earned by the Sub-Funds	As a % of Total Return	Earned by the Lending Agent*	As a % of Total Return*	Total Return
SCPF	USD	9,422	70%	4,038	30%	13,460
NGUF	JPY	456,055	70%	195,452	30%	651,507
SEQF	EUR	10,514	70%	4,506	30%	15,020
SGQF	USD	2,940	70%	1,260	30%	4,200
SESF	EUR	15,147	70%	6,492	30%	21,639
SJOF	JPY	609,968	70%	261,415	30%	871,383
SFF	USD	4,586	70%	1,965	30%	6,551

\*The 30% fee paid to the Lending Agent is considered to be the cost of entering into securities lending transaction as per Securities Lending Agreement. The Sub-Funds recognised the securities lending income net of Lending Agent’s fee.

E.I. Sturdza Strategic Management Limited and The Bank of New York Mellon act as the Investment Manager and Lending Agent, respectively, for all the Sub-Funds as at and for the period ended 30 June 2022.
