

COMGEST ATTRIBUTES

- Quality Growth philosophy
- Focus on long-term EPS growth
- Team-based approach
- Broad partnership structure

INVESTMENT POLICY

The objective of the Sub-Fund ("the Fund") is to increase the value of the Fund (capital appreciation) over the long term. The Fund intends to achieve this objective primarily through investment in a portfolio of high-quality, long-term growth mid and small-cap companies headquartered or carrying out their predominant activities in European Union member states or in the UK.

The Fund is actively managed. The index is provided for comparative purposes only.

The Fund is aimed at investors with a long-term investment horizon (typically 5 years or more).

RISK PROFILE

The indicator represents the risk profile presented in the PRIIPs Key Information Document. The indicator assumes you keep the product for 5 years otherwise the actual risk can vary significantly.

CUMULATIVE PAST PERFORMANCE (REBASED TO 100)**ROLLING PERFORMANCE (%)**

Performance data expressed in EUR. Returns may increase or decrease as a result of exchange rate fluctuations. Index: MSCI Europe Mid Cap - Net Return. The index is used for comparative purposes only and the Fund does not seek to replicate the index.

Past performance does not predict future returns.

Performance figures are calculated net of investment management fees, administrative fees and all other fees with the exception of sales charges. If taken into account, sales charges would have a negative impact on performance.

The cumulative graph and "Since Inception" data may refer to the last relaunch date of the share class which may differ from its actual inception date. Calendar year past performance is only shown for years for which a full calendar year of past performance is available.

FUND COMMENTARY

European small- and mid-cap equities delivered strong overall returns in the first half of 2025, though this headline performance masked a significant divergence between the two quarters.

In the first quarter, returns were concentrated in a narrow set of cyclical sectors - namely defence, industrials and financials - driven by fiscal stimulus announcements, ongoing geopolitical tensions and the continued effects of elevated interest rates. These sectors generated outsized gains, skewing index performance and creating headwinds for quality growth strategies with lower exposure to these areas.

The second quarter marked a notable shift in market dynamics. Investor sentiment improved, and performance broadened across sectors and styles, particularly among companies with domestic demand exposure. European small- and mid-cap equities recorded one of their strongest quarterly performances in recent years. The portfolio slightly outperformed the reference index in the second quarter despite its underweight in industrials and financials.

Relative valuation also played a role. After several years of underperformance relative to both European large caps and US equities, small- and mid-cap valuations in Europe reached historically attractive levels, prompting renewed investor interest. At the same time, earnings expectations were revised downward across European equities in H1'25, as management teams responded cautiously to ongoing macroeconomic uncertainty and FX volatility, especially with the euro strengthening relative to the US dollar.

While we underperformed the reference index year-to-date, this was driven almost entirely by the Q1'25 concentration effect and the portfolio's underexposure to industrials and financials.

Belimo, a Swiss leader in heating, ventilation and air conditioning (HVAC) control devices, delivered strong returns after management raised its full-year 2025 guidance, citing robust demand for liquid cooling solutions in data centres across the US and APAC, as well as accelerating retrofit activity in Europe. The company now expects FY25 revenue growth of 15-20% (up from >10%) and an EBIT margin above 20% (versus 18-20% previously). Scout24, Germany's leading digital marketplace for real estate, also performed well, supported by consistently strong execution. The company reported Q1 revenue growth of +16%, with adjusted EBITDA and EPS both up +18%, tracking ahead of full-year expectations. The Italian industrial and medical gases company SOL Group posted a solid Q1 update, with revenue up +13%, a particularly strong result given the continued softness in European industrial production.

Vitrolife, a leader in IVF technologies, was among the main detractors, with the share price impacted by ongoing litigation in the US related to PGT-A testing, as well as a weaker start to the year in key markets like China, where birth rates were notably subdued. Amplifon, the leading hearing aids retailer, underperformed amid continued softness in core European markets. The company's full-year guidance relies on a pick-up in France, supported by the anniversary of the hearing care reform, but this inflection has yet to materialise. Bakkafrøst, the Faeroese salmon producer, also lagged, as earnings expectations were revised down due to oversupply from Norwegian salmon producers, which weighed on prices and pressured near-term profitability.

During the first half of the year, we initiated new positions in Volution, InterContinental Hotels, Symrise and Straumann. Symrise offers an attractive defensive growth profile, supported by its exposure to resilient end-markets. The company is also working to close the growth and margin gap with Givaudan. Straumann is a global leader in dental implants, with a strong track record of market share gains across both premium and value segments. We exited Equasens, Stratec, Soitec and Wizz Air on signs of deteriorating business quality and took partial profits on Nemetschek, Belimo, Games Workshop, Scout24 and Jeronimo Martins following strong year-to-date performance. Proceeds were allocated to Sage, Stevanato, Robertet and Sartorius Stedim where we saw attractive valuations.

The first half of 2025 was marked by elevated volatility - both at a stock level and in the broader macroeconomic environment. Announcements around fiscal stimulus, shifting US trade policy, geopolitical tensions and currency swings created a challenging backdrop and significantly reduced market visibility. These dynamics also led to a sharp style rotation towards value sectors.

In this environment, company fundamentals matter more than ever. Management teams are rightly focused on what they can control: execution, discipline around strategic long-term goals and risk mitigation. We take the same approach. We remain focused on building a high-conviction portfolio of quality growth businesses - companies with strong competitive advantages, idiosyncratic growth drivers and a proven ability to deliver sustainable earnings growth across changing macro scenarios. Many of our holdings benefit from structural pricing power and differentiated products, supported by intangible assets such as strong brands, distribution scale or proprietary technologies. These attributes help mitigate external risks, including the potential impact of tariffs and FX volatility.

Looking forward, we remain constructive. The expected five-year earnings CAGR of the portfolio remains in the double digits - anchored in fundamentals, not market narratives. While we continue to explore new opportunities across sectors, our process remains grounded in long-term discipline. We avoid chasing momentum and instead focus on companies that can compound value consistently and profitably through the cycle.

The views expressed in this document are valid at the time of publication only, do not constitute independent investment research and should not be interpreted as investment advice. The reference to specific companies does not constitute a recommendation to invest directly in these securities. Allocation is subject to change without notice. Remember that past performance does not predict future returns.

RISKS

This Fund has the following core inherent risks (non-exhaustive list):

- Investing involves risk including possible loss of principal.
- The value of all investments and the income derived therefrom can decrease as well as increase.
- There is no assurance that the investment objective of the Fund will be achieved.
- To the extent that the Fund is invested in or denominated in a currency other than yours, the cost and return in your currency may increase or decrease due to exchange rate fluctuations.
- A more detailed description of the risk factors that apply to the Fund is set out in the Prospectus.

PLEASE NOTE THAT THE DATA SHOWN BELOW IS THE OUTCOME OF OUR INVESTMENT PHILOSOPHY AND STOCK SELECTION. THESE METRICS ARE NOT ALL SPECIFICALLY TARGETED BY COMGEST BUT MAY BE ADDRESSED AS PART OF OUR RESPONSIBLE INVESTMENT PROCESS.

RESPONSIBLE INVESTMENT APPROACH

We believe a responsible approach to environmental, social and governance issues has a positive impact on a company's growth over the long term. The assessment of ESG factors is part of our fundamental analysis. Comgest implements a three-pronged responsible investment strategy: Integration / Active Ownership / Partnership.

MAIN GROUP-WIDE EXCLUSIONS*

Thermal coal: Mining & electricity production
Tobacco: Producers & distributors
Controversial weapons
Norm-based exclusions: Severe violations
Controversial jurisdictions: High-risk jurisdictions & sanctions regime

* Further information on the exclusion policies and **applicable revenue thresholds** may be found in the Investment Manager's Responsible Investment Policy on the Comgest website at www.comgest.com/en/sustainability/esg

For more detailed information on ESG integration please consult our website: www.comgest.com/en/sustainability/esg

Active Share: The percentage of fund holdings that is different from the reference index holdings. A fund that has no holdings in common with the reference index will have an active share of 100%, and a fund that has exactly the same holdings as the reference index considered will have an active share of 0%.

ADR - American Depositary Receipt: A negotiable security that represents securities of a foreign company and allows that company's shares to trade in the financial markets of the United States.

Annualised: A figure converted into an annual rate. Figures covering a period of more than one year are averaged to present a figure for a 12-month period.

Bp(s) - Basis point(s): One basis point is equal to one hundredth of 1% (i.e. 0.01%).

BV - Book Value: The value of the company assets minus its liabilities.

CAGR - Compound Annual Growth Rate: The rate of return that would be required for an investment to grow from its beginning balance to its ending balance, assuming the profits were reinvested at the end of each year of the investment's lifespan.

CapEx - Capital Expenditure: The money invested by a company to acquire or upgrade fixed, physical, non-consumable assets such as property, plants, buildings, technology, or equipment.

Cash Flow: The net amount of cash and cash equivalents being transferred in and out of a company. Cash received signifies inflows, and cash spent signifies outflows.

CPI - Consumer Price Index: An index that measures the overall change in consumer prices based on a representative basket of goods and services over time. It is the metric often used to measure inflation.

DY - Dividend Yield: A ratio that shows how much a company pays out in dividends each year relative to its share price.

EBITDA - Earnings Before Interest, Taxes, Depreciation and Amortisation: Used to measure a company's core profitability and is calculated by adding interest, tax, depreciation and amortisation expenses to net income.

EBIT - Earnings Before Interest and Taxes: Used to measure a company's core profitability and is calculated by adding interest and tax expenses to net income.

EPS - Earnings Per Share: The profits of a company attributed to each share, calculated by dividing profits after tax by the number of shares. EPS serves as an indicator of a company's profitability.

FCF - Free Cash Flow: The cash generated by a company from its normal business operations after subtracting any money spent on capital expenditures.

GDP - Gross Domestic Product: The total market value of all the finished goods and services produced within a country's border in a specific time period.

GDR - Global Depositary Receipt: A certificate issued by a bank that represents shares in a foreign stock on two or more global markets. A GDR is similar to an American depositary receipt (ADR), except an ADR only lists shares of a foreign country in the markets of the United States.

LTM - Last 12 Months: LTM multiples are backward-looking and are based on historical performance.

Market Cap(italisation): A measure of a company's size, calculated by multiplying the total number of shares in issue by the current share price. Companies are commonly grouped according to size, such as small cap, mid cap, large cap or all cap. There is no consensus on the definition of these groupings and they may vary from portfolio to portfolio depending on the country of investment.

NAV - Net Asset Value: The current market value of the portfolio's assets minus the portfolio's liabilities.

NTM - Next 12 Months: NTM multiples are forward-looking and are based on projected performance.

Ongoing Charges: A fund's operational costs over a year. Ongoing Charges are calculated as a percentage of the average fund size over the year and include, for example, investment manager's fees, administration fees and custody costs.

Operating Margin: Measures how much profit a company makes on a dollar (or relevant currency) of sales after paying for variable costs of production, such as wages and raw materials, but before paying interest or tax.

Operating Profit: A company's gross income less operating expenses and other business-related expenses, such as wages, cost of goods sold (COGS) and depreciation.

Organic Growth: Growth a company achieves by increasing output and enhancing sales through the business' own operations and internal processes. This does not include profits or growth attributable to mergers, acquisitions, divestitures and foreign exchange but rather an increase in sales and expansion through the company's own resources.

Organic Sales: Sales generated from within a company that are a direct result of the company's existing operations and internal processes. Organic sales do not include the impacts of mergers, acquisitions, divestitures and foreign exchange.

P/B or P/BV - Price-to-Book Value Ratio: Measures the market's valuation of a company relative to its book value. P/B or P/BV is calculated by dividing the company's stock price per share by its book value per share.

P/E - Price-to-Earnings Ratio: A ratio used to value a company's shares. It is calculated by dividing the current market price by the earnings per share.

P/S - Price-to-Sales Ratio: A valuation ratio that compares a company's stock price to its revenues. It is an indicator of the value that financial markets have placed on each dollar of a company's sales or revenues.

PEG - Price/Earnings-To-Growth Ratio: A stock's price-to-earnings (P/E) ratio divided by the growth rate of its earnings for a specified time period. The PEG ratio is used to determine a stock's value while also factoring in the company's expected earnings growth.

PMI - Purchasing Managers' Index: An index of the prevailing direction of economic trends in the manufacturing and service sectors.

Reference Index: Index against which a fund's performance is compared.

ROE - Return On Equity: Measures financial performance and is calculated by dividing net income by shareholders' equity. ROE is a gauge of a company's profitability and how efficiently it generates those profits.

ROIC - Return On Invested Capital: Calculation used to assess a company's efficiency at allocating the capital under its control to profitable investments.

SME - Small- Or Medium-Sized Enterprise: A company, or companies considered as a group, that are neither very small nor very large and which employ fewer than a given number of employees. This number varies across countries.

Volatility: Measures the movements of an asset up and down over time. Volatility is generally considered to be a measure of risk.

Engagement: Proactive, targeted dialogue with companies or other industry stakeholders (e.g. policymakers, industry bodies) in order to make known areas of concern and to incite tangible, positive change to improve outcomes for stakeholders.

Environmental Factors: Issues related to pollution, climate change, energy efficiency, natural resource use, waste management, biodiversity and other environmental challenges and opportunities.

ESG - Environmental, Social and Governance: The three key factors when measuring the sustainability and ethical impact of an investment in a business or company.

GHG - Greenhouse Gases: Gases that trap heat in the atmosphere and warm the planet. The best known greenhouse gases are carbon dioxide, methane, nitrous oxide and fluorinated gases.

Governance Factors: Governance refers to a set of rules or principles defining rights, responsibilities and expectations between different stakeholders in the governance of corporations. Governance factors include a company's leadership, executive pay, audits, internal controls and shareholder rights.

Net Zero: Achieving a balance between emitting carbon and absorbing carbon from the atmosphere. This balance, or net zero, will be achieved when the amount of carbon added to the atmosphere is no more than the amount removed.

PAI - Principal Adverse Impact: A list of sustainability factors that firms need to take into account for their investment policies and decisions. These indicators relate to environmental and social topics.

Proxy Voting: A form of voting whereby a shareholder delegates their vote to another who votes on their behalf at company meetings. This allows the shareholder to exercise their right to vote without being physically present.

RI - Responsible Investment: The integration of environmental, social and governance factors (ESG) into the selection and management of investments.

Scope 1 Emissions: Emissions directly generated by a company, such as an airline emitting exhaust fumes.

Scope 2 Emissions: Emissions indirectly generated by a company, such as emissions from the electricity or energy used to heat and cool a company's office.

Scope 3 Emissions: All other indirect emissions that occur in the value chain of a company and are not already included within scope 2. These emissions are a consequence of the company's business activities but occur from sources the company does not own or control. For example, emissions from a company's employees commuting to work. Scope 3 emissions are often difficult to measure.

SFDR Classification: SFDR product classifications fall under three categories and aim to make the sustainability profiles of funds more comparable and easier to understand by investors.

SFDR - EU Sustainable Finance Disclosure Regulation: An EU regulation which aims to make the sustainability profile of funds more comparable and better understood by end-investors. The regulation requires firms to advise whether principal adverse impacts on sustainability factors are considered in their investment decision making process.

Social Factors: Factors that examine how a company communicates with employees, suppliers, customers, governments, regulators and the communities where it operates.

tCO₂e: Tonnes (t) of carbon dioxide (CO₂) equivalent. Carbon dioxide equivalent is a standard unit for counting greenhouse gas emissions regardless of whether they are from carbon dioxide or another gas, such as methane.

UNGC - UN Global Compact: A voluntary pact of the United Nations (UN) to encourage businesses and firms worldwide to adopt sustainable and socially responsible policies, and to report on their implementation.

UN Global Compact (UNGC) Principles: Ten principles defined as part of the UNGC framework to promote responsible investment. Companies, investors and other participants are called upon to align their strategies and operations with the principles in the areas of human rights, labor, the environment and anti-corruption.

Voting: A mechanism for active owners to influence companies, usually done with the aim of influencing a company's governance or operations. Public equity investors typically have the right to vote on company and shareholder resolutions at annual and extraordinary general meetings (AGMs and EGMs).
