

Investment Objective

MAPFRE AM Good Governance Fund is a global equity fund whose objective is to preserve and grow capital by investing in companies with excellent corporate governance that trade at a discount to intrinsic value. The fund's strategy is based on evidence that companies with strong or improving corporate governance offer a superior risk-reward over the long-term. Specifically, the fund managers identify global companies with board structures that facilitate value creation, best-in-class financial performance, and alignment of incentives between the management team and shareholders. The fund managers incorporate corporate governance analysis into a comprehensive analysis of the company's fundamentals that applies value investing principles. The fund will invest at least 75% of its net assets in global equity securities, either directly in listed companies or through the use of equity derivatives, focusing on companies with strong corporate governance without geographic restrictions.
