

Nordea 2 - BetaPlus Enhanced Global Equity Fund (BP-EUR)

Any investment decision in the sub-funds should be made on the basis of the current prospectus and the Key Information Document (KID) or the Key Investor Information Document (KIID) for UK investors. Advertising Material

Investment objective

The fund uses a proprietary, quantitative investment process, aiming to outperform its benchmark with a low tracking error, no country/regional bets and limited sector active risk. Based on a systematic return forecast method which relies on risk premia or factors, the long only equity strategy finds stocks that have moved away from their intrinsic values. Actively managed. Benchmark used for performance comparison only. Risk characteristics of the fund's portfolio will bear resemblance to those of the benchmark.

**Return distribution (Since inception)****3 years rolling performances**

Source (unless otherwise stated): Nordea Investment Funds S.A. Period under consideration (unless otherwise stated): 30/04/2025 - 30/05/2025. Performance calculated NAV to NAV (net of fees and Luxembourg taxes) in the currency of the respective share class, gross income and dividends reinvested, excluding initial and exit charges as per 30/05/2025. Initial and exit charges could affect the value of the performance. **The performance represented is historical; past performance is not a reliable indicator of future results and investors may not recover the full amount invested. The value of your investment can go up and down, and you could lose some or all of your invested money.** If the currency of the respective share class differs from the currency of the country where the investor resides the represented performance might vary due to currency fluctuations.

Risk & Reward Profile (RRP)

The risk indicator assumes you keep the product for 5 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this Fund as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Fund's capacity to pay you. Be aware of currency risk. In some circumstances you will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. For more information on risks the fund is exposed to, please refer to the section "Risk Descriptions" of the prospectus. Other risks materially relevant to the PRIIP not included in the summary risk indicator:

Derivatives risk: Small movements in the value of an underlying asset can create large changes in the value of a derivative, making derivatives highly volatile in general, and exposing the fund to potential losses significantly greater than the cost of the derivative.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Glossary / Definition of Terms

Absolute contribution

Total contribution of a security or fund achieved over a specific period, it is not measured relative to a benchmark.

Alpha

The risk-adjusted excess return relative to the benchmark, resulting from portfolio active management. It reflects the portion of the excess return that is not explained by systemic risk.

Beta

A measurement of the volatility of returns relative to the overall market beta equal to one. A security with beta higher (lower) than one has greater (lower) risk relative to the broad market.

Commitment

Represented by the sum of notional, or the sum of the commitments of individual derivatives after netting and hedging.

Correlation

The degree to which two variables move together. The metric assumes values between -1 and 1. A positive (negative) correlation means that variables move in the same (opposite) direction(s). If there is no relationship between each other, the correlation will be close to zero.

Dividend Yield

Annual dividends per share divided by share price.

Forward Earning Per Share

Net earnings (12M forward) available to common shareholders divided by the weighted average number of common shares outstanding.

Forward Price to Earning Ratio

The ratio of share price to forecasted 12M earnings per share.

Fund VaR

The probability-based estimate of the minimum loss over a period of time (horizon), given a certain confidence level, presented as percentage of the assets under management of the fund.

Information ratio

A measure of risk-adjusted return that is defined as the excess annual return of the portfolio over its benchmark (active return) relative to the variability of that excess return (tracking error). It is used to assess the added value of the active management. The figures presented may differ from target values due to cut-off time discrepancies between the fund's Net Asset Value and its benchmark. This timing difference typically leads to a higher TE and, consequently, a lower IR, which may not accurately depict the risk profile of the fund's holdings.

Market Capitalisation

Total value of all company's outstanding shares at the current market price.

Maximum Drawdown

The largest loss measured from peak to trough until a new peak is attained. Note it only measures the size of the largest loss, without taking into consideration the frequency of large losses.

NAV

Net Asset Value, the total value of a fund's assets less its liabilities.

Ongoing charges

It is an estimate of the charges that excludes performance related fees and transaction costs including third party brokerage fees and bank charges on securities transactions.

Physical instruments

An item of economic, commercial or exchange value that has a material existence.

Price to book Ratio

A valuation ratio calculated as price per share divided by book value per share.

SFDR

Sustainable Finance Disclosure Regulation, a European legislation which applies to products manufactured in the EU.

Sharpe Ratio

A risk adjusted performance measure calculated as the portfolio's excess return relative to the risk-free rate divided by its volatility. The greater the ratio, the better its risk-adjusted performance has been.

Tracking error

The volatility of the difference between the returns of an investment and its benchmark. The lower the number, the closer the fund's historic performance has followed the benchmark performance. The figures presented may differ from target values due to cut-off time discrepancies between the fund's Net Asset Value and its benchmark. This timing difference typically leads to a higher TE and, consequently, a lower IR, which may not accurately depict the risk profile of the fund's holdings.

Volatility

A statistical measure of the fluctuations of a security's price. It can also be used to describe fluctuations in a particular market. High volatility is an indication of higher risk.

Morningstar

© 2025 Morningstar, Inc. All Rights Reserved as of 30/05/2025. The Morningstar Rating is an assessment of a fund's past performance — based on both return and risk — which shows how similar investments compare with their competitors. A high rating alone is insufficient basis for an investment decision. **Past performance is no guarantee of future results.**

Disclaimer

Nordea Asset Management is the functional name of the asset management business conducted by the legal entities Nordea Investment Funds S.A., Nordea Investment Management AB, and Nordea Funds Ltd and their branches and subsidiaries. The funds mentioned are part of Nordea 2, SICAV, an open-ended Luxembourg-based investment company. The prospectus, the Key Information Document (KID) and the Key Investor Information Document (KIID) for UK investors, and the annual and semi-annual reports are available electronically in English and/or in the local language of the market where the mentioned SICAV is authorised for distribution, without charge upon request from the management company Nordea Investment Funds S.A., 562, rue de Neudorf, P.O. Box 782, L-2017 Luxembourg, from the local representatives or information agents, or from our distributors as well as on nordea.lu. This material is intended to provide the reader with information on Nordea Asset Management specific capabilities, general market activity or industry trends and is not intended to be relied upon as a forecast or research. This material, or any views or opinions expressed herein, does not amount to an investment advice nor does it constitute a recommendation to buy, sell or invest in any financial product, investment structure or instrument, to enter into or unwind any transaction or to participate in any particular trading strategy. Unless otherwise stated, all views expressed are those of Nordea Asset Management. Views and opinions reflect the current economic market conditions, and are subject to change. While the information herein is considered to be correct, no representation or warranty can be given on the ultimate accuracy or completeness of such information. Prospective investors or counterparties should discuss with their professional tax, legal, accounting and other adviser(s) with regards to the potential effect of any investment that they may enter into, including the possible risks and benefits of such investment, and independently evaluate the tax implications, suitability and appropriateness of such potential investments. Please note that all funds and share classes might not be available in your country of jurisdiction. All investments involve risks; losses may be made. For details on risks associated with these funds, please refer to the prospectus and the relevant KID or KIID. The investments promoted concern the acquisition of units or shares in a fund, not in any given underlying asset such as shares of a company, as these are only the underlying assets owned by the fund.
