### SPECIFIC RISKS

Emerging and Developing Markets Risk, Operational Risk, Leverage Risk, Liquidity Risk, Currency Risk, Default Risk, Derivative and Counterparty Risk

Further information on the fund's potential risks can be found in the prospectus or in the Key Investor Information Documents or Key Information Documents available on [www.ubp.com](http://www.ubp.com). Any capital invested may be at risk and investors may not get back some or all of their original capital.

### ABOUT THE FUND

The Fund investment objective is to achieve medium to long-term capital growth from attractive risk-adjusted returns that exhibit low correlation with traditional asset classes. The Fund will aim to provide a return to investors by entering into an unfunded total return swap (the "Portfolio Total Return Swap"). To compensate some of the Portfolio Total Return Swap funding costs the Fund may either i) invest in short-term government debt instruments or ii) enter into a total return swap (the "Funding Swap") of which the economic interest will be transferred to an approved counterparty. The approved counterparty in respect of the Portfolio Total Return Swap and the Funding Swap will be Morgan Stanley or any other affiliate or subsidiary entities of Morgan Stanley approved by the Company as an eligible counterparty. A total return swap is a bilateral financial transaction where the counterparties swap the total return of a single asset or basket of assets in exchange for periodic cash flows.

The Fund is actively managed and not with a reference to a benchmark. The Fund will be exposed to the economic performance of a basket of financial derivative instruments ("FDI") as determined by the Portfolio Manager. The Portfolio Manager will use quantitative techniques such as systematic macro, short term and momentum strategies in selecting positions. The Fund will gain, through the Portfolio Total Return Swap, exposure to the economic performance of forward foreign exchange contracts (deliverable and non-deliverable), bond futures contracts, interest rate futures contracts, equities index futures contracts, currency options, bond swaps, interest rate swaps, equity swaps, currency swaps and credit default swaps in exchange for a floating rate return corresponding to the funding cost which will be paid by the Fund.

The Fund, through the Funding Swap may transfer the economic interest of a basket of securities in which the Fund is invested in exchange for a floating rate of return. This may include equities and equity-related securities such as common stocks, preferred stocks, depository receipts issued by companies worldwide, collective investment schemes and exchange-traded funds. The Funds exposure to CIS (including exchange-traded funds) will not exceed 10% of its NAV. The Fund does not employ geographical, industry or sector focus in relation to the asset classes to which the Fund is exposed. The Funds exposure to emerging markets may exceed 20% of the Net Asset Value (NAV) of the Fund.

Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).

GLOSSARY

**Benchmark**  
Index used as basis for measuring the performance of an investment fund. Also called  
reference index or comparison index.

**Derivatives**  
Derivatives are financial instruments whose prices depend on the price movements in a  
reference variable, known as the underlying. Underlying assets may be shares, equity  
indices, government bonds, currencies, interest rates, commodities like wheat and gold, or  
also swaps. Derivative financial instruments may be unconditional forward transactions or  
they may be options. They are traded either on futures and options exchanges on  
standardised terms, or over-the-counter (OTC) on freely negotiated terms. Changes in the  
price of the underlying lead in certain situations to considerably higher price  
fluctuations in the derivative. Derivatives can be used to hedge against financial risks,  
to speculate on price changes (trading) or to take advantage of price differences between  
markets (arbitrage).

**Duration**  
Duration is the average time to payout. This key figure is used to measure the influence  
of interest rate movements on the price of a bond or bond fund. Duration is defined in  
years (e. g. 3-year duration means that the value of a bond would increase by 3% if  
interest rates fall by 1% and vice versa).

This document may refer to the past performance of investment interests. **Past performance is not a guide to current or future results.** The value of investment interests can fall as well as  
rise. Any capital invested may be at risk and investors may not get back some or all of their original capital. Any performance data included in this document does not take into account fees,  
commissions, and expenses charged on issuance and redemption of securities, nor any taxes that may be levied. Changes in exchange rates may cause increases or decreases in investors'  
returns. All statements other than statements of historical fact in this document are "forward-looking statements". Forward-looking statements do not guarantee future performances. The  
financial projections included in this document do not constitute forecasts or budgets; they are purely illustrative examples based on a series of current expectations and assumptions which  
may not eventuate. The actual performance, results, financial conditions and prospects of an investment interest may differ materially from those expressed or implied by the forward-looking  
statements in this document as the projected or targeted returns are inherently subject to significant economic, market and other uncertainties that may adversely affect performance. UBP also  
disclaims any obligation to update forward-looking statements, as a result of new information, future events or otherwise. The contents of this document should not be construed as any form of

in this document may be recorded. UBP will assume that callers to this number consent to this recording.  
Pursuant to Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (the "Disclosures  
Regulation" or "SFDR"), funds are required to make certain disclosures. Funds falling under the scope of Article 6 of the SFDR are those which have been deemed not to pursue an investment  
approach that explicitly promotes environmental or social characteristics or aims at sustainable investment. The investments underlying such financial products do not take into account the EU  
criteria for environmentally sustainable economic activities. Notwithstanding this classification, the Investment Managers may take account of certain sustainability risks as further described in  
the fund's prospectus. Funds falling under the scope of Articles 8 or 9 of the SFDR are those subject to sustainability risks within the meaning of the SFDR. The sustainability risks and Principal  
Adverse Impacts (PAIs) as stipulated in the SFDR are described in the prospectus. In addition, unless otherwise specified, all funds apply the UBP Responsible Investment policy, which is  
available on <https://www.ubp.com/en/investment-expertise/responsible-investment>  
UBP relies on information and data collected from third-party ESG data providers (the "ESG Parties"). Although UBP applies a proven process for selecting such ESG Parties, this data may

**High-yield bond**  
Bonds with high interest rates and high risk exposure. The issuers of such securities are  
often companies with a low credit rating.

**High-yield fund**  
A fund for high-yield bonds (i.e. bonds with low credit ratings).

**Investment grade**  
A rating provides information about the creditworthiness of a debtor. The higher the  
rating, the less likely the debtor is to default. A distinction is made between  
high-quality (investment grade) and speculative bonds (high-yield or junk bonds). For  
investment-grade bonds, Standard & Poor's issues ratings from AAA to BBB, while  
Moody's ratings range from Aaa to Baa.

**Credit default swap (CDS)**  
A credit default swap (CDS) is a kind of insurance against the risk of credit default.  
Upon conclusion of a credit default swap agreement, the protection seller pledges himself  
to pay compensation to the protection buyer if a specified credit event occurs (eg default  
or late payment). In return, the protection seller receives a premium. The amount of the  
CDS premium depends primarily on the creditworthiness of the reference debtor, the  
definition of the credit event and the maturity of the contract.
