## WHO WE ARE

Founded in 1964, Alger is recognized as a pioneer of growth-style investment management. Privately-owned and headquartered in New York City, Alger can help "Unlock Your Growth Potential" through a suite of growth equity separate accounts, mutual funds, ETFs, and privately offered investment vehicles. Alger's investment philosophy, discovering companies undergoing Positive Dynamic Change, has been in place for over 60 years.

## MULTI-MANAGER APPROACH

Investors can access two premier growth equity managers through this multi-manager approach. These are proven teams with complementary approaches combined into a single strategy.

 WEATHERBIE CAPITAL

- Founded in 1964
- Growth equity pioneer
- Investing in dynamic change
- Founded in 1995; acquired by Alger in 2017
- Growth equity specialists
- Investing in Smaller Companies

## PROCESS

### RESEARCH

Our fundamental, bottom-up research incorporates detailed financial analysis and field research as the Investment Teams proactively look for new investment ideas.

### DIALOGUE

Before ideas enter into a portfolio, Portfolio Managers test the conviction of the Analyst to ensure the new idea is worthy of a place in the portfolio. This dialogue continues if additional research is needed.

### PORTFOLIO CONSTRUCTION

Each discrete portfolio management team constructs a portfolio of the best growth-oriented long and short ideas in their respective universe. The combined portfolio is a diversified portfolio of long/short equities up and down the market cap spectrum.

### MONITORING

The Portfolio Managers regularly discuss the overall portfolio, optimal gross and net exposures, individual positions and allocation of portfolio assets.

### RISK MANAGEMENT

Risk Management is a critical component to the success of a long/short strategy. We continuously monitor and manage risk at the industry, sector and overall portfolio level using qualitative and quantitative methods.

## Performance shown is net of fees and expenses.

The performance data quoted represents past performance, which is not an indication or a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Fund returns include change in share price and reinvested distributions, as applicable, and do not reflect the deduction of any applicable taxes. Returns are calculated in U.S. dollars.

Only periods greater than 12 months are annualized.

**Risk Disclosures** - Investing in the stock market involves risks, including the potential loss of principal. Growth stocks may be more volatile than other stocks as their prices tend to be higher in relation to their companies' earnings and may be more sensitive to market, political, and economic developments. A significant portion of assets may be invested in securities of companies in related sectors, and may be similarly affected by economic, political, or market events and conditions and may be more vulnerable to unfavorable sector developments. Options and short exposure, gained through financial derivative instruments, including contracts for difference, could increase market exposure, magnifying losses and increasing volatility. Issuers of convertible securities may be more sensitive to economic changes. Investing in companies of small capitalizations involves the risk that such issuers may have limited product lines or financial resources, lack management depth, or have limited liquidity. Leverage increases volatility in both up and down markets and its costs may exceed the returns of borrowed securities. Foreign securities involve special risks including currency fluctuations, inefficient trading, political and economic instability, and increased volatility. Active trading may increase transaction costs, brokerage commissions, and taxes, which can lower the return on investment. At times, cash may be a larger position in the portfolio and may underperform relative to equity securities. This material is not meant to provide investment advice and should not be considered a recommendation to purchase or sell securities.

Alger pays compensation to third party marketers to sell various strategies to prospective investors. Market capitalization and sector allocation are inclusive of cash but cash is not displayed in the chart. Top holdings are inclusive of cash but cash is not displayed as a top holding.

Risk metrics are statistical measures designed to show the expected risk for a portfolio and are not a measure of performance. Risk Metrics are sourced from Morningstar, an independent source, and include the impact of cash. Fred Alger Management, LLC, makes no representation that Morningstar is complete, reliable, or accurate.

**ROE** takes the weighted median of the holdings' return on equity which is calculated as net income divided by shareholders' equity. **R-Squared** reflects the percentage of a portfolio's movements that can be explained by movements in its benchmark. **Sharpe Ratio** was calculated as the portfolio's rate of return less the 3 month T-Bill's rate of return relative to the portfolio's standard deviation less the 3 month T-Bill's standard deviation for the period. Certain products may be subject to restrictions with regard to certain persons or in certain countries under national regulations applicable to such persons or countries. **NOTABLY, THIS INFORMATION IS EXCLUSIVELY INTENDED FOR PERSONS WHO ARE NOT U.S. PERSONS, AS SUCH TERM IS DEFINED IN REGULATIONS OF THE U.S.**

**SECURITIES ACT OF 1933, AS AMENDED AND WHO ARE NOT PHYSICALLY PRESENT IN THE UNITED STATES.** See the country specific disclosures for information regarding the Funds registration and the availability of the prospectus containing all necessary information about the product, the costs, and the risks which may occur. Characteristics are sourced from FactSet, an independent source, using all available data. Fred Alger Management, LLC, makes no representation that FactSet is complete, reliable, or accurate. With the exception of active share, the calculation excludes cash. Equity Holdings for the referenced product represents individual securities held, excluding private placements, private equity, rights, warrants, options, other derivatives, cash or cash equivalents and securities where the total market value in the portfolio is less than one dollar. A list of all holdings can be found at [www.alger.com](http://www.alger.com) for the applicable fund or composite. P/E Ratios were calculated using a weighted harmonic average, excluding companies with negative earnings. Sales Growth and EPS Growth rates were calculated using a weighted median. **Earnings per share (EPS)** is the portion of a company's earnings or profit allocated to each share of common stock. **Sales Growth** is a measure of the estimated sales growth rate of a company over the next 12-months.

**Gross exposure** equals the value of both a fund's long positions and short positions. **Net exposure** equals the value of the long positions less its short positions. Fred Alger Management, LLC has changed its methodology as of May 31, 2019 for classifying long put positions as short positions. Previously, such option positions had been treated as long positions. For purposes of calculating Exposure, an option's delta adjusted exposure will be used. Delta adjusted exposure represents the expected amount an option price will change if an option's underlying reference security changed by \$1. The formula for calculating delta adjusted exposure is the number option contracts multiplied by 100 (option multiplier) and multiplied by both the underlying security price and the option's delta (ranges from -1 to 0 for put options and 0 to 1 for call options based on whether option is in- or out-of-the-money). **Each Fund is exposed to several types of risks. Please read the Fund's Key Investor Information Document ("KIID") and the prospectus for more information.** Any of the Fund's short

exposure ordinarily would be expressed through a total return swap ("TRS"), which might significantly affect the Fund's performance. Note that in addition to market risk, a TRS subjects the Fund to counterparty risk. For a more detailed description of risks that a TRS poses to the Fund, please refer to the Prospectus. Class A EU shares are subject to a maximum front-end sales charge of up to 6.00%. Class A EUH shares are subject to a maximum front-end sales charge of up to 6.00%.

Effective June 13, 2022, the secondary benchmark displayed was changed from the HFRI Equity Hedge (Total) Index – EUR to the HFRI Equity Hedge (Total) Index. Index performance does not reflect deductions for fees, expenses, or taxes. The HFRI Equity Hedge (Total) Index ("HFRI") publishes equally weighted monthly performance based on a number of hedge funds reporting to create a composite, net of fees. HFRI constituents may change without notice. HFRI, therefore, may have possibly lower risk, and differ in asset allocation, portfolio structure, and holdings. Unlike asset-weighting, the equal-weighting of HFRI presents a more general picture of performance of the hedge fund industry. Any bias towards the larger funds potentially created by alternative weightings is greatly reduced, especially for strategies that encompass a small number of funds. HFRI returns are as of the date shown based on the initial provided information and are subject to change. Please visit [www.alger.com](http://www.alger.com) for the most recent return information. Performance data for the HFRI Equity Hedge (Total) Index is only available on a month-end basis. As a result, since inception performance data for the index is as of the month end prior to the Fund's inception date if the Fund's inception date is on or prior to the 15th or is as of the Fund's inception month end if the Fund's inception date is after the 15th of the month. Investors cannot invest directly in any index. **The performance data quoted represents past performance, which is not an indication or a guarantee of future results.**
