

Factsheet

Bellevue Funds (Lux) | Share class I EUR

Investment Company with Variable Capital (SICAV) according to Luxembourg Laws – UCITS

Marketing communication / Financial promotion - For professional investors: AT, CH, DE, DK, ES, GB, HK, IT, LU, NL, PT, SG

Investment focus

The fund's aim is to achieve capital growth in the long term, is actively managed and invests globally at least two-thirds of the portfolio in companies whose business activities have a strong focus on the digitalization of the healthcare sector. A global network of experts spanning scientific and industrial fields support the Management Team in forming opinions. The selection of portfolio companies is bottom-up. The fund takes ESG factors into consideration while implementing the aforementioned investment objectives.

Rolling 12-month-performance

Source: Bellevue Asset Management, 30.06.2025; all figures in EUR %, total return / BVI-methodology

Past performance is not a reliable indicator of future results and can be misleading. As the fund is denominated in a currency that may differ than an investor's base currency, changes in the rate of exchange may have an adverse effect on prices and incomes. Performance is shown net of fees and expenses for the relevant share class over the reference period. All performance figures reflect the reinvestment of dividends and do not take into account the commissions and costs incurred on the issue and redemption of shares, if any. Individual costs are not taken into account and would have a negative impact on the performance. With an investment amount of EUR 1,000 over an investment period of five years, the investment result in the first year would be reduced by the front-end load of up to EUR 50 (5%) as well as by additional individual custody charges. In subsequent years, the investment result would also be reduced by the individual custody account costs incurred. The reference benchmark of this class is used for performance comparison purposes only (dividend reinvested). The funds is actively managed. No benchmark is directly identical to a fund, thus the performance of a benchmark is not a reliable indicator of future performance of the fund to which it is compared. There can be no assurance that a return will be achieved or that a substantial loss of capital will not be incurred.

Market review

Global stocks delivered another good return in June (MSCI World Net Index +4.5%). Stock markets headed north thanks to a temporary easing of geopolitical tensions and weaker-than-expected inflation data led bond yields in the US lower. 10-year US Treasury yields declined by 17 bps to 4.2%. Lower bond yields gave growth stocks in particular a boost but also extended the dollar's weakness (DXY dollar index -2.5%). Against this backdrop the non-cyclical, broader healthcare sector (MSCI World Healthcare Net +1.4%) performed as expected. The Bellevue Digital Health Fund (+1.5%) also closed the month in positive territory.

24 of the 34 stocks in the fund's portfolio made a positive contribution to performance in June. There was hardly any relevant company news flow, given that the latest quarterly reporting season had just ended the month before. Top performance drivers were 10X Genomics (+21.5%), Illumina (+16.0%), Phreesia (+16.2%), Natera (+7.1%), TransMedics (+5.4%), Align (+4.6%) and Veeva (+3.0%).

The life sciences tools (LST) companies 10X Genomics and Illumina benefited from initial positive outcomes in the ongoing negotiations between the White House and the National Institutes of Health (NIH), the leading US federal agency for biomedical health research. Phreesia marched higher, fueled by its strong first-quarter results. As in preceding quarterly earnings announcements, Phreesia met expectations at the top line, clearly beat expectations with respect to operating profit and, consequently, management raised its guidance for fiscal year 2026 (ending in January 2026).

Performance detractors included Penumbra (-3.9%), Exact Sciences (-3.6%), Insulet (-3.3%), Intuitive Surgical (-1.6%), Kestra (-26.4%) and Omada (-3.7%). Penumbra was weak after the FDA approved Medtronic's Liberant, a peripheral catheter-based thrombectomy device for treating venous vascular thrombosis. An announcement from the CMS (Centers for Medicare & Medicaid Services) led to some volatility at the end of the month: The CMS has proposed that insulin pumps be subject to competitive bidding and that pump costs be reimbursed on a monthly basis only. With its unique Omnipod 5 patch pump, Insulet is in a better position than all other insulin pump manufacturers. We assume that the objective behind the CMS' proposed rule change is, as already observed in China, to lower the profit margins of distributors ("middlemen"). Intuitive Surgical experienced a slight correction after Restore Robotics announced the commercial launch of remanufactured robotic instruments (scissors) for da Vinci surgical robotic systems (FDA clearance received in March 2025). We believe the risks associated with remanufactured instruments are currently low and should be well-contained over the long term. Kestra went public in March and was hit by profit-taking during the month under review, while trading in Omada after its June IPO was marked by high volatility. We consider both companies very promising investments whose weightings in the portfolio could increase over time. All performance data is in USD / B shares.

Positioning & outlook

Looking at the fundamentals, digital health companies are on a stable, above-average growth trajectory which is expected to be sustained throughout 2025. This scenario is supported by above-average growth in surgical procedure volumes and in hospital capital expenditure.

The approval and subsequent launch of relevant new products will continue to bolster sales growth, too. Examples here are the new da Vinci 5 robotic surgical system from Intuitive Surgical; Veeva's Vault CRM Suite for highly efficient marketing of medicines; Dexcom's two continuous blood glucose sensors Stelo and G7; Procept BioRobotics' Hydros robotic system for removal of prostate tissue in males with prostate cancer; Insulet's Omnipod 5 automated insulin delivery system; Penumbra's computer-assisted vacuum thrombectomy system Thunderbolt; and Globus Medical's Excelsius Flex, a surgical robotic navigation system.

We expect some tailwind for our investment solution in 2025: In addition to innovation as the key driver of value, other factors such as attractive valuation levels (price/sales multiples are near historical lows) and an anticipated increase in both M&A and IPO activity are likewise sound arguments for investing in the Bellevue Digital Health (Lux) Fund.

Risk and return profile acc. to SRI

The Fund's investment objective is to generate attractive and competitive capital growth in the long term. It is therefore particularly suited to investors with an investment horizon of at least 5 years who want to selectively diversify their portfolio with investments in companies whose business activities have a strong focus on the digitalization of the healthcare sector and who are willing to accept the equity risk typical of this sector.

We have rated this product as risk class 6 on a scale of 1 to 7, with 6 being the second highest risk class. The risk of potential losses from future performance is considered high. In the event of very adverse market conditions, it is very likely that the ability to execute your redemption request will be impaired. The calculation of the risk and earnings profile is based on simulated/historical data, which cannot be used as a reliable indication of the future risk profile. The classification of the fund may change in future and does not constitute a guarantee. Even a fund classed in category 1 does not constitute a completely risk-free investment. There can be no guarantee that a return will be achieved or that a substantial loss of capital will not be incurred. The overall risk exposure may have a strong impact on any return achieved by the fund or subfund. For further information please refer to the fund prospectus or PRIIP-KID.

Liquidity risk

The fund may invest some of its assets in financial instruments that may in certain circumstances reach a relatively low level of liquidity, which can have an impact on the fund's liquidity.

Risk arising from the use of derivatives

The fund may conclude derivatives transactions. This increases opportunities, but also involves an increased risk of loss.

Currency risks

The fund may invest in assets denominated in a foreign currency. Changes in the rate of exchange may have an adverse effect on prices and incomes.

Operational risks and custody risks

The fund is subject to risks due to operational or human errors, which can arise at the investment company, the custodian bank, a custodian or other third parties.

Awards

Benefits

- Demographic changes and an aging general population demand greater efficiency and cost-effectiveness.
- New technologies conquer the healthcare sector.
- Portfolio consisting of high-quality growth stocks showing double-digit revenue growth.
- Regulation and stringent quality requirements limit the technological risk.
- Bellevue – Healthcare pioneer since 1993 and today one of the biggest independent investors in the sector in Europe.

Inherent risks

- The fund actively invests in equities. Equities are subject to price fluctuations and so are also exposed to the risk of price losses.
- The fund invests in foreign currencies, which means a corresponding degree of currency risk against the reference currency.
- The fund may invest a proportion of its assets in financial instruments that might under certain circumstances have a relatively low level of liquidity, which can in turn affect the fund's liquidity.
- Equities linked to technology and/or digitization can be subject to higher-than-average fluctuations in value.
- The fund may engage in derivatives transactions. The increased opportunities gained come with an increased risk of losses.

You can find a detailed presentation of the risks faced by this fund in the "Special Investment Risks" section of the sales prospectus.

Please refer to the specific ESG Fund Disclosure and ESG Factsheet for all the characteristics or objectives and employed ESG strategies of the promoted fund.

Important information

This marketing communication relates to Bellevue Funds (Lux) (hereinafter the "Fund"), an investment company with variable capital "société à capital variable" (SICAV) under the current version of the Law of the Grand Duchy of Luxembourg of 10 August 1915 on commercial companies ("Law of 1915") and is authorized under Part I of the Law of 17 December 2010 relating to undertakings for collective investment ("Law of 2010") as an undertaking for collective investment (UCITS). Bellevue Digital Health is a subfund of Bellevue Funds (Lux).

This marketing communication is issued by Bellevue Asset Management AG, which is an authorized asset manager subject to the supervision of the Swiss Financial Market Supervisory Authority (FINMA) and acts as an Investment Manager of the Fund. The Prospectus, statutes, the annual and half-yearly report, the share prices as well as the Key Information Document (PRIIP-KID) and further information about the Fund can be obtained free of charge in English and German from the management company of the Fund, Bellevue Asset Management AG, Theaterstrasse 12, CH-8001 Zürich, from the representative, paying, facilities and information agents mentioned below or online at www.bellevue.ch. The Key Information Document (PRIIP-KID) is available free of charge in the languages of the countries of distribution www.fundinfo.com.

This document is neither directed to, nor intended for distribution or use by, any person or entity who is a citizen or resident of any locality, state, country or jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation. It is particularly not intended for US persons, as defined under Regulation S of the U.S. Securities Act of 1933, as amended. The information and data presented in this document are not to be considered as an offer to buy, sell or subscribe to any securities or financial instruments. The information, opinions and estimates contained in this document reflect a judgment at the original date of release and are subject to change without notice. This information pays no regard to the specific or future investment objectives, financial or tax situation or particular needs of any specific recipient and in particular tax treatment depends on individual circumstances and may be subject to change. This document is not to be relied upon in substitution for the exercise of independent judgment. Before making any investment decision, investors are recommended to ascertain if this investment is suitable for them in the light of their financial knowledge and experience, investment goals and financial situation, or to obtain specific advice from an industry professional. The details and opinions contained in this document are not to be considered as recommendation or investment advice. Every investment involves risk, especially with regard to fluctuations in value and return, and investors' capital may be at risk. If the currency of a financial product is different from your reference currency, the return can increase or decrease as a result of currency fluctuations. Past performance is no indicator for the current or future performance. The performance data are calculated without taking account of commissions and costs that result from subscriptions and redemptions. Commissions and costs have a negative impact on performance. For more information about the associated costs, please refer to the related costs and fees section of the prospectus. Any benchmarks/indices cited herein are provided for information purposes only. No benchmark/index is directly comparable to the investment objectives, strategy or universe of the subfund. The performance of a benchmark shall not be indicative of past or future performance of the subfund. Financial transactions should only be undertaken after having carefully studied the current valid prospectus and are only valid on the basis of the latest version of the prospectus and available annual and half-yearly reports. Please take note of the risk factors.
