OVERVIEW OF THE MANAGEMENT OFFER

Sextant 2027

ISIN code	Allocation of distributable income	Currency	Eligible investors	Minimum initial subscription [1] [2]	Fixed management fees	Variable management fees	Sub fee	Redem fee	Initial NAV
FR001400BM80 Share AD	Accumulation and/or Distribution	EUR	All subscribers.	100 €	1.20% (incl. tax) maximum	None	0.0%	0.0%	100.00 €
FR001400BM98 Share A	Accumulation	EUR	All subscribers.	100 €	1.20% (incl. tax) maximum	None	0.0%	0.0%	100.00 €

FR001400BMA2 Share ID	Accumulation and/or Distribution	EUR	All subscribers, especially for: - institutional investors having received prior approval from the management company, or - marketing networks having received prior approval from the management company, or - distributors and/or intermediaries having received prior approval from the management company and providing: • independent advice within the meaning of MiFID 2 • individual management under mandate.	100,000 €	0.60% (incl. tax) maximum	None	5.0%	0.0%	1,000.00 €
FR001400BMB0 Share I	Accumulation	EUR	All subscribers, especially for: - institutional investors having received prior approval from the management company, or - marketing networks having received prior approval from the management company, or - distributors and/or intermediaries having received prior approval from the management company and providing: • independent advice within the meaning of MiFID 2 • individual management under mandate.	100,000 €* 	0.60% (incl. tax) maximum	None	5.0%	0.0%	1,000.00 €
FR001400BMC8 Share Z	Accumulation and/or Distribution	EUR	The management company, employees of the management company and subscribers referred to under the heading 'Subscribers concerned'	100 €	None	None	0.0%	0.0%	100.00 €

* Share I :

* With the exception of the Management Company which can subscribe just one share.

[1] The Management Company or any other entity belonging to the same group is exempt from the obligation to subscribe the initial minimum.

[2] Subsequent subscriptions may be made in shares or decimal shares, as the case may be.

For each share category, the Management Company reserves the right not to activate it and consequently to delay its commercial launch. The Sub-fund's first subscription period was initially set to last from the creation date to April 17th 2024. The first subscription period has been extended until December 31st 2025. From that date, the only subscriptions that can be made must be preceded by a same-day redemption of the same number of shares for the same asset value by the same shareholder. The subscription period may be shortened following a decision of the Management Company. The Management Company may decide to reopen subscription periods at a later date, giving shareholders one month's notice.

During the subscription period described above, subscriptions may be suspended if the iTraxx Europe Crossover index averages less than 200bps over a 20-day rolling period (with a tolerance of plus or minus 20%); conversely, subscriptions will be authorised if the iTraxx Europe Crossover index averages more than 200bps over a 20-day rolling period (with a tolerance of plus or minus 20%). The suspension or resumption of subscriptions will take place within three trading days of this threshold being passed (with 10% tolerance on either side). This information will be available on the Management Company's website.

[1] The Management Company or any other entity belonging to the same group is exempt from the obligation to subscribe the initial minimum.

[2] Subsequent subscriptions may be made in shares or decimal shares, as the case may be.

F shares of the Sextant Quality Focus Sub-Fund open on 31 December 2024. At the end of this period, the Management Company will no longer accept

new subscriptions in this share category. However, Amiral Gestion reserves the right to extend the marketing of this unit for an indefinite period of time after amendment of this document.

The Sub-fund has different share categories. These share categories differ in particular with regard to their nominal value, management fees, subscription/redemption fees and the distribution network for which they are intended. These differences are explained by the fact that A shares are mainly intended to be distributed by partners of the Management Company, third-party management companies or subscribed directly by investors.

N shares are (i) reserved for marketing networks that received prior approval from the Management Company, or (ii) to distributors and/or intermediaries who received prior approval from the Management Company and providing (a) independent advice as defined by MiFID2 regulations or (b) individual management under mandate. Z shares are reserved for the Management Company, employees and persons described in the section "Subscribers concerned". F shares are reserved for founder shareholders having subscribed within the time limit specified under the description of shares, intended for all subscribers having received prior agreement from the Management Company.

Lastly, I shares are mainly intended for institutional investors having received prior agreement from the Management Company and SI shares are mainly intended for institutional investors whose initial subscription is very high and who have received prior agreement from the Management Company.

[2] Subsequent subscriptions may be made in shares or decimal shares, as the case may be.

F shares of the Sextant Optimal Income sub-fund open for 12 months from the date on which the sub-fund is created. At the end of this period, the management company will no longer accept new subscriptions. However, Amiral Gestion reserves the right to extend the marketing of this unit for an indefinite period of time after amendment of this document.

Category of share(s)

The Sub-fund has different share categories. These share classes differ in terms of their nominal value, management fees, subscription/redemption fees and the distribution network(s) for which they are intended. These differences can be explained by the fact that A shares are mainly intended to be distributed by partners of the management company, third-party management companies or subscribed directly by investors. N shares are reserved for (i) marketing networks that have received prior approval from the management company, or (ii) distributors and/or intermediaries that have received prior approval from the management company and provide (a) independent advice within the meaning of MiFID2 regulations or (b) individual management under mandate. F shares, for founding shareholders who have subscribed within the period specified in the share description, and for institutional investors who have received prior approval from the management company. "I" shares are open to all subscribers, and are more particularly intended for institutional investors who have received prior approval from the Management Company and whose minimum initial subscription is 1,000,000 euros (except for the management company, which may subscribe for 1 unit).

Finally, for each share category, the management company reserves the right not to activate it and therefore to delay its commercial launch.

DATE AND FREQUENCY OF THE NET ASSET VALUE

The net asset value is calculated every working day (D), with the exception of public holidays in France and/or days on which the Paris stock exchange is closed, in which case it is calculated on the previous business day.

It is calculated on D+1.

The latest net asset value is available to shareholders:

- at the offices of the Management Company
- by calling +33 (0)1 47 20 78 18.

PLACE AND PROCEDURES FOR OBTAINING INFORMATION ON THE UCITS (PROSPECTUS/ANNUAL REPORT/HALF-YEARLY REPORT)

The latest annual report, the latest periodic statement and the latest net asset value are sent within 8 working days on written request from the shareholder to:

AMIRAL GESTION, 103 rue de Grenelle - 75007 Paris

Additional explanations may also be obtained if necessary from:

Benjamin BIARD - Tél: +33 (0) 1 40 74 35 61 - E-mail: bb@amiralgestion.com

The AMF website www.amf-France.org contains additional information on the list of regulatory documents and all the provisions relating to investor protection.

III - FUND OPERATION AND MANAGEMENT

GENERAL CHARACTERISTICS

1. Characteristics of equities

Currency	The shares are denominated in euros.
----------	--------------------------------------

Nature of the rights attached to the class of shares	Under French law, a SICAV is a co-ownership of transferable securities (joint ownership) in which the rights of each co-owner are expressed in shares and each share corresponds to a fraction of the SICAV's assets. Each shareholder therefore has co-ownership rights and voting rights over the Fund's assets in proportion to the number of shares they hold. Each share gives the right, in the ownership of the company's assets and in the sharing of the profits, to a share proportional to the fraction of the capital held in the UCI.
Procedures for maintaining liabilities and registering them	The SICAV's liabilities, and therefore the individual rights of each shareholder, are kept by the custodian, CACEIS BANK. The administration of the shares is carried out by EUROCLEAR France. The custodian also keeps the registers of registered shares
Vote	The voting rights attached to the securities held by the fund are exercised by the Management Company, which alone is empowered to take decisions in accordance with the regulations in force. Each share in the Fund entitles its holder to one single vote at the Fund's General Meetings. Any shareholder may participate in the meetings, personally or by proxy, upon proof of identity and ownership of his or her shares, either by registration in the name of the shareholder or by depositing his or her bearer shares or certificate of deposit at the places mentioned in the meeting notice; the period during which these formalities must be completed expires two days before the meeting date. The Management Company's voting policy is available on the company website, in accordance with the AMF's General Regulation. The report on the exercise of voting rights by the Management Company is available to unitholders on the Management Company's website (www.amiralgestion.com).
Form and decimalisation of shares	The shares issued have the legal nature of bearer securities or pure registered shares (for the SEXTANT ASIA EX-JAPAN Sub-Fund). Subscriptions and redemptions are accepted in thousandths of shares. The shares are in bearer or pure registered form (for the SEXTANT ASIA EX-JAPAN Sub-Fund). Any request for subscription of registered shares will be subject to prior approval by the Management Company and will be subject to an annual subscription and monitoring fee of €5,000 per year. Employees of Amiral Gestion, its branches and subsidiaries subscribing to registered shares are exempt from fees. The shares are denominated in euros and decimated into thousandths of shares, with the exception of the SEXTANT PME and SEXTANT ENTREPRENEURS EUROPE Sub-Funds which are decimated into ten thousandths of shares.

2. Balance sheet date

Closing date	
--------------	--

3. Information on the tax system

Tax dominant	The SEXTANT SICAV can be used as a support for unit-linked variable capital life insurance contracts. The SEXTANT PEA, SEXTANT France ENGAGEMENT, SEXTANT CLIMATE TRANSITION EUROPE, SEXTANT ENTREPRENEURS EUROPE and SEXTANT PME sub-funds are PEA-eligible.
At the SICAV level	The SICAV is subject to the general rules applicable to undertakings for collective investment. It is not subject to corporate income tax. The tax treatment of shareholdings, gains or losses realised when shares are redeemed, and dividends distributed by the SICAV (on distribution shares) depends on the securities tax provisions applicable to each shareholder. These provisions may vary depending on the shareholder's jurisdiction of residence for tax purposes and the jurisdiction of the transactions carried out as part of the management of the Fund. If shareholders are in any doubt about their tax situation, they are invited to consult an adviser to find out about the specific tax treatment that will apply to them before subscribing to shares in the SICAV. The Management Company accepts no liability whatsoever in respect of the tax consequences which may arise for any investor as a result of a decision to purchase, hold, sell or redeem Shares in the Fund. The Fund may be used as a support for unit-linked life insurance or capitalisation contracts.
At the shareholder level	Capital gains and losses are taxed directly in the hands of the shareholders, according to the rules of tax law. In accordance with the principle of transparency, the tax authorities consider that the shareholder is the direct holder of a fraction of the financial instruments and cash held in the SICAV. In principle, the tax system applicable is that for capital gains on securities in the shareholder's country of residence, according to the rules appropriate to the shareholder's situation (natural person, legal entity subject to corporation tax, supplementary pension institution, other cases, etc.). The rules applicable to French resident shareholders are set out in the General Tax Code. The tax regime applicable to the subscription and redemption of shares issued by the Fund depends on the tax provisions applicable to the investor's particular situation and/or the Fund's investment jurisdiction. As the SICAV has several sub-funds, a switch from one sub-fund to another, consisting of a redemption followed by a subscription, constitutes a sale for valuable consideration liable to generate a taxable capital gain. If investors are unsure of their tax position, they should seek professional advice. Depending on the circumstances, this process may be invoiced by the investor's adviser and will under no circumstances be borne by the Fund or the Management Company.

2. Classification

International bonds and other debt securities

3. Delegation of financial management

Non applicable

4. Management objective and investment strategy

4.1 Management objective

SEXTANT 2027 is a sub-fund that seeks to achieve a performance net of costs and estimated default risk calculated by the Management Company, annualised, equal to the November 2027 German Euro Bond rate +200bps, i.e. 3.37% annualised on the basis of 6 June 2022 conditions. This return shall be achieved by investing chiefly in bonds issued by state and semi-state companies and financial institutions.

These investments are not subject to any rating constraints. The Management Company stresses that there is a risk the financial situation of issuers may be weaker than expected; that unfavourable conditions (e.g. more numerous defaults, lower recovery rate) could have a negative impact on the Sub-Fund's performance. The management objective may not therefore be reached. The Sub-Fund seeks to profit from attractive actuarial yields on bonds issued by state or semi-state bodies.

4.2 Benchmark index

The Sub-Fund will not be managed with reference to a benchmark, which could result in poor comprehension on the part of the investor. It therefore has no benchmark

4.3 Investment strategy

❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE

1. Eligible strategies:

The Sub-Fund's investment strategy is based mainly on a holding or buy-and-hold policy (acquisition of securities with the intention of holding them in the portfolio until the first date of final maturity or early redemption following a decision by the issuer or holder). However, the Management Company reserves the right to actively manage the portfolio, for example, but without limitation, by selling a security, purchasing a new security, for one or more bonds in the portfolio, in the event of early redemption, OST (securities operations), or a change in the issuer's credit profile towards a deterioration or, on the contrary, an improvement such that the bond is no longer of interest.

To construct his portfolio, the manager carries out his own qualitative analysis of bonds. It also relies on the ratings of the rating agencies without relying exclusively and mechanically on them.

When the bonds in the portfolio gradually reach maturity and are redeemed, the Management Company may reinvest:

- in bonds with a maturity (final, or redemption options at the option of the holder) of no more than 31 December 2027,
- in debt securities (maximum maturity 31 December 2027) or money market instruments up to 100% of the sub-fund's assets.
- the sub-fund's net assets may be exposed up to 10% in contingent convertible securities in order to diversify the portfolio and increase yield, while controlling exposure.
- up to 10% of the sub-fund's net assets may be invested in bonds with a final maturity of more than 31 December 2027, provided that the option to redeem at the issuer's option can be exercised before 31 December 2027

Once the portfolio has been built up, the Management Company may carry out arbitrages aimed at improving the portfolio's rate of return, as indicated above.

During the sub-fund's launch period, the manager may invest the total net assets in money market instruments. In that case, the Management Company shall charge no management fees and shall pay the Sub-Fund's external management fees. The sub-fund may also be liquidated if anticipated subscriptions during the subscription period fall below the aforementioned threshold.

After 31 December 2027, if market conditions permit and after approval by the Autorité des Marchés Financiers, the sub-fund's strategy will be renewed for a further carry period. Otherwise, the Sub-Fund will be dissolved or merged with another fund, or modified with the approval of the AMF. The Management Company reserves the right, provided the AMF agrees, to liquidate the Sub-Fund at any time if the expected performance for the remaining period is close to that of the money market for that period.

The Sub-Fund's first subscription period was initially set to last from the creation date to 17 April 2024. The first subscription period has been extended until 31 Dec 2024. From that date, the only subscriptions that can be made must be preceded by a same-day redemption of the same number of shares for the same asset value by the same shareholder. The subscription period may be shortened following a decision of the Management Company. The Management Company may decide to reopen subscription periods at a later date, giving shareholders one month's notice.

During the subscription period described above, subscriptions may be suspended if the iTraxx Europe Crossover index averages less than 200bps over a 20-day rolling period (with a tolerance of plus or minus 20%); conversely, subscriptions will be authorised if the iTraxx Europe Crossover index averages more than 200bps over a 20-day rolling period (with a tolerance of plus or minus 20%). The suspension or resumption of subscriptions will take place within three trading days of this threshold being passed (with 10% tolerance on either side). This information will be available on the Management Company's website.

Information on the sensitivity range within which the Sub-Fund is managed is shown in the table below:

Interest rate sensitivity range within which the sub-fund is managed		Geographical zone of the issuers of the securities	Currency of denomination of the securities in which the fund invests	Range of exposure corresponding to the zone
0– 5	Developed countries *	The main currencies used will be: EUR, USD, GBP, SGD and, on an ancillary basis, the other currencies corresponding to the specified geographical area. The sub-fund's total exposure to currency risk shall not exceed 10% of its net assets.		From 0% to 100% maximum
	Emerging countries **			From 0% to 30% maximum

* Developed countries are considered to be those countries included in the "MSCI World Index" and listed on the website: <https://www.msci.com/world>; all other countries are considered to be emerging countries (excluding OECD countries); the exposure range is relative to net assets excluding cash and UCIs.

The Fund's sensitivity to credit spreads may vary significantly from the sensitivity range. The sensitivity range narrows over time.

2. Processus de Sélection :

The selection of bonds is based on an internal fundamental analysis of the risk of each issuer. Risk analysis takes into consideration:

- the cyclical nature and operational risks of the business;
- the company's past results and reputation;
- regular generation of cash (or equity for financial institutions);
- the reasonableness of the debt ratios (net debt/Ebitda, gearing) in relation to the business line, working capital requirements and any tangible and transferable assets held by the issuer;
- the issuer's resources and liquidity requirements and debt structure;
- the quality of its shareholder base.

Extra-financial approaches applicable to the sub-fund:

The sub-fund's extra-financial approach is not backed by a specific sustainable benchmark, but it promotes environmental and social characteristics while ensuring good corporate governance practices via a combination of extra-financial approaches, including:

- Tracking the portfolio's average external ESG score relative to the average external ESG score of its benchmark index (Main source¹: MSCI ESG Rating). The benchmark used to compare ESG performance is an index that is consistent with the Sub-Fund's investment strategy and comprises around 3,470 stocks: the Global HY (LG30TRUU Index)
- Compliance with the Sub-Fund's sector exclusion policy: thermal coal, tobacco, controversial weapons, civil firearms, pornography, non-conventional fossil fuels with the exception of North American shale oil and gas. The criteria, thresholds and procedures for applying this due diligence and exclusion policy are specified in the Amiral Gestion sector policy applicable to the Sub-fund. This policy is available on the Amiral Gestion website: <https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>
- The compliance with the normative exclusion policy: exclusion/non-investment in issuers that violate the principles of the United Nations Global Compact and/or the OECD Guidelines for Multinational Enterprises, after internal verification and confirmation of non-compliance by the Controversies Monitoring Committee. Monitoring of companies with Sustainalytics Watchlist status, and whose status is confirmed by the Controversies Monitoring Committee following an internal review.
- Exclusion/non-investment in issuers exposed to severe controversies, i.e. level 5 according to the Sustainalytics severity scale and research confirmed following an internal review by the Controversies Monitoring Committee. Particular attention is also paid to controversies relating to climate change, biodiversity, fundamental human rights and fiscal responsibility

.In addition, when the portfolio invests in UCITS (excluding cash management), the company will, wherever possible, give preference to UCITS with the same SFDR classification as that of the Sub-Fund.

These extra-financial approaches are described in more detail in the Sub-Fund's pre-contractual Appendix 2 SFDR.

Part verte - Taxonomie européenne

The principle of "cause no significant harm" applies only to investments underlying the financial product that take into account the European Union's criteria for environmentally sustainable economic activities.

The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

Sustainable Investment

The Sub-Fund does not have an investment strategy focused on a sustainable investment objective within the meaning of the Disclosure SFDR regulations and has not set a minimum sustainable investment share to date. The sub-fund therefore undertakes to invest at least 0% of its assets in sustainable investments.

Please see the pre-contractual Appendix 2 of the SFDR RTS for information about the criteria used by Amiral Gestion to determine the share of sustainable assets held in the portfolio.

SFDR DNSH² and consideration of Key Adverse Impacts³

The Sub-Fund implements several complementary DNSH schemes to ensure that its investments do not cause significant environmental and social harm. These include: i) a set of investment rules for the whole portfolio (sectoral and normative exclusions and controversies; attention to Principal Adverse Impacts); ii) stricter requirements for sustainable investments; iii) monitoring of governance practices by tracking "G" ratings and controversies, which in some cases may lead to dialogue with the company. These mechanisms are described in the Sub-Fund's pre-contractual SFDR Appendix 2.

Within the scope of DNSH, the Sub-Fund has, since 31.12.2022, notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) of its investments on sustainability factors, in order to identify and to take appropriate action. The Sub-Fund thus follows 14 mandatory SFDR PAI indicators and 2 additional indicators selected from the list of optional PAI from Appendix 1 of the SFDR RTS.

Amiral Gestion's "PAI" policy, including details of the sources and methods used to take each indicator into account, is available on its website, in the "Responsible Investment" section: <https://www.amiralgestion.com/fr/investissement-responsable/The> metrics and information on how the main negative impacts have been taken into account will be published annually in the Sub-Fund's periodic "SFDR Appendix 4" document, for the first time in 2024 for the 2023 financial year.

This combination of extra-financial approaches, described in detail in the pre-contractual appendix 2 of the SFDR RTS (available in the appendix to this prospectus or on the Amiral Gestion website: <https://www.amiralgestion.com/fr/nos-fonds-sextant>), classifies the sub-fund in the "Article 8" category according to the classification of the so-called "SFDR Disclosure" regulation.

¹ *Mainly MSCI ESG and, failing that, the ESG Performance Score of the Admiral benchmark derived from Ethifinance's Gaïa database to complete the coverage if necessary*

² *DNSH = Do No Significant Harm*

³ *Principal adverse impacts ("PAI"), are defined as the impacts of investment decisions that result in significant or potentially significant adverse effects on sustainability factors (environmental, social and labour issues, respect for human rights and the fight against corruption and bribery).*

♣ ELIGIBLE ASSETS

Shares

The Sub-Fund is not intended to be exposed to equities. However, it may have exposure to equities up to a maximum of 10% of net assets, as a result of investments in convertible bonds or restructuring of classic bonds.

Debt securities and money market instruments

The Sub-fund may invest up to 100% of its net assets in bond securities and in money-market instruments. These may be fixed-rate and/or floating-rate bonds, convertible or not, issued by an OECD-member country, a private, public or semi-state body, with no restriction in terms of rating.

Net exposure to forex risks will remain below 10% of net assets.

As the Sub-fund is managed on a discretionary basis, the allocation will be unconstrained in principle.

The Sub-fund may also invest in securities that are assimilated to bonds i.e. allowing access to the issuer's capital (e.g. convertible bonds, bonds with warrants attached, participation securities). These securities may not be Investment Grade or may be unrated. They will be subject to financial analysis by the Management Company comparable to that carried out for equities.

The Sub-fund may invest up to 100% of the net assets in speculative (i.e. "high yield") bonds, i.e. securities with a rating below BBB- according to Standard & Poor's or securities considered of equivalent quality according to the analysis carried out by the Management Company.

The Management Company conducts its own analysis of the yield/risk profile of securities (profitability, credit, liquidity, maturity). Thus, the acquisition, retention or disposal of a security (particularly in the event of a change in the security's rating) will not be based exclusively on ratings supplied by the main rating agencies, but will be mainly based on the Management Company's own analysis of credit risks and market conditions.

The Sub-fund may invest in all types of bonds, regardless of currency or credit rating.

No constraints are imposed on the duration, sensitivity and split between private and public debt of the securities selected as long as the overall sensitivity of the sub-fund is between 0 and 5.

The Sub-fund also invests in money market instruments, in particular negotiable debt securities (certificates of deposit, commercial paper, negotiable medium-term notes) denominated in euros with a maximum maturity of twelve months: the short-term securities used shall have a minimum rating (Standard & Poor's A3 / Moody's P-3 / Fitch Ratings F3) or shall be deemed equivalent according to the analysis of the Management Company.

Nevertheless, the manager will favour the investment of cash in money market or short-term money market UCITS/AIFs.

Investments in securities of other UCITS, AIFs and/or investment funds

The Sub-Fund may invest up to 10% of its assets in securities of other French or European UCITS or AFIs or investment funds, foreign funds (holding no more than 10% of the units of foreign UCITS or AFIs) that meet the criteria set out in Article R.214-13 of the French Monetary and Financial Code, mainly for cash investments via money market UCITS/AFIs and short-term money market UCITS/FIAs, as well as in UCITS/AFIs classified as equities or bonds that are compatible with the management of the sub-fund.

These UCIs and investment funds may be managed by the Management Company.

The compartment will never invest in FCPR (Fonds Communs de Placement à Risques) or similar funds, or in securitisation vehicles.

Derivatives and securities with embedded derivatives

In order to achieve its management objective, the Sub-fund will only use simple forward financial instruments whose resulting commitment may be valued using the commitment method.

- Nature of intervention markets:

These instruments will be traded on regulated, organised or over-the-counter markets in the euro zone and internationally.

Transactions involving derivatives (purchase or sale of call or put options on equities, interest rates, indices or currencies, and purchase or sale of futures, forward exchange contracts or swaps on equities, interest rates, indices or currencies) and securities containing derivatives shall be carried out at the manager's discretion in order to partially hedge the Sub-fund against unfavourable trends in equity, bond, index. The manager may also trade in credit derivatives (credit default swaps). There will be no overexposure.

Securities with complex derivatives attached: the Sub-fund may have recourse to securities with Cocos attached, to a maximum of 10% of net assets.

Option strategies: depending on its expectations, the Management Company may buy or sell options on equity markets. For example, if the Company expects a sharp rise in share prices, it may buy calls; if it thinks the market will rise slowly and implicit volatility is high, it may sell puts. On the other hand, if the Company expects a sharp fall in share prices, it may buy puts. Lastly, if it believes the market can rise no further, it may sell calls. The manager can combine these different strategies. The overall exposure of the Sub-fund to the equity market, including exposure induced by the use of derivatives, will not exceed 10%.

Credit derivatives:

Credit allocation is at the discretion of the Management Company.

The credit derivatives used are CDS indices (CDX or iTraxx type) and single issuer CDSs. Single-issuer CDSs may be used subject to the standardisation of the contract and the information available on the markets concerning the underlying entity. Similarly, index CDSs will be subject to the liquidity and accessibility of the index.

These credit derivatives are used for hedging purposes through the purchase of protection:

- in order to limit the risk of capital loss on certain issuers (present in the portfolio)
- in order to benefit from an anticipated deterioration in the creditworthiness of an issuer or a basket of issuers not present in the portfolio that is greater than that of an exposure present in the portfolio.

and for exposure purposes by selling protection:

- to the credit risk of an issuer
- to the credit risk of CDS indices

As CDS may be used for exposure to credit risk or to hedge the portfolio's credit risk, the use of indices for this purpose could give rise to transactions which, on a line-by-line basis, could be likened to arbitrage (hedging of the portfolio's overall credit risk by issuers, parent companies, subsidiaries or other entities not present in the portfolio). The percentage of the Sub-fund's assets corresponding to the use of credit derivatives is between 0% and 20%.

Deposits and cash

The Sub-fund may use deposits to optimise the management of the Sub-fund's cash and to manage the different subscription/redemption value dates of the underlying UCIs. These transactions are carried out within the regulatory limits. The Sub-fund may hold cash on an ancillary basis up to a limit of 10% Net assets in particular to cover share redemptions by investors. However, in order to protect the interests of investors, the cash holding threshold may be raised to 20% when justified by exceptional market conditions.

The lending of cash is prohibited.

Cash Borrowings

The Sub-fund may borrow cash, particularly as a result of investment/disinvestment or subscription/redemption transactions. Although it is not intended to be a structural cash borrower, the Sub-fund may find itself in a debit position as a result of transactions linked to its cash flows (ongoing investments and divestments, subscriptions/redemptions, etc.) and may therefore temporarily borrow up to a maximum of 10% of the Sub-fund's net assets.

Temporary acquisition and sale of securities:

None

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

Non applicable

7. Special cases of UCIs with sub-funds

Non applicable

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk	The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.
Discretionary management risk	The discretionary management style is based on anticipating trends in the financial markets. The Fund's performance will depend on the issuers selected and the asset allocation defined by the manager. There is a risk that the Management Company will not select the best-performing securities and that the net asset value of the Fund will therefore fall.
Equity market risk	Degree of exposure to equity risk: 0% to 10%. Fluctuations in equity markets may lead to significant changes in net assets, which may have a positive or negative impact on the net asset value of the Fund. The fall in share prices corresponds to market risk
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk. Exposure to currency risk in currencies other than those of the eurozone or the European Union will remain incidental.
Credit risk	The Fund may invest in fixed income products. Credit risk is the potential risk of issuer default or credit downgrade, which may lead to a fall in net asset value.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.
Risks associated with investing in speculative and/or unrated and/or subordinated (excluding CoCos) and/or hybrid and/or perpetual securities	The Fund may invest in bonds with these characteristics. With this type of paper, (i) market movements are more pronounced, both upwards and downwards, and (ii) the risk of payment default resulting in the permanent loss of all or part of the amounts invested is higher. This will be reflected in the Fund's evolving net asset value.

Contingent bonds risk	<p>CoCos are hybrid securities whose main purpose is to enable the issuing bank or financial company to be recapitalised in the event of a financial crisis. These securities have loss-absorption mechanisms, described in their issue prospectuses, which are generally activated if the issuer's capital ratio falls below a certain "trigger" level. The trigger is firstly mechanical: it is generally based on the CET1 (Common Equity Tier 1) accounting ratio in relation to risk-weighted assets. To compensate for the discrepancy between book values and financial reality, there is a discretionary clause allowing the supervisor to activate the loss-absorption mechanism if it considers that the issuing institution is in a situation of insolvency. CoCos are therefore subject to specific risks, including subordination to precise trigger criteria (e.g. deterioration in the equity ratio,) conversion into shares, loss of capital or non-payment of interest. The use of subordinated bonds, particularly Additional Tier 1 bonds, exposes the fund to the following risks:</p> <ul style="list-style-type: none"> - triggering of contingent clauses: if a capital threshold is crossed, these bonds are either exchanged for shares or undergo a capital reduction, potentially to 0. - cancellation of coupon: Coupon payments on this type of instrument are entirely discretionary and can be cancelled by the issuer at any time, for any reason, with no time constraints. - capital structure: unlike traditional secured debt, investors in this type of instrument can suffer a loss of capital without the prior bankruptcy of the company. In addition, the subordinated creditor will be repaid after the ordinary creditors, but before the shareholders. - Callable perpetuals: These instruments are issued as perpetual instruments, callable at predetermined levels only with the approval of the competent authority - valuation / yield: The attractive yield on these securities can be seen as a complexity premium.
Liquidity risk	Liquidity risk measures the difficulty that the fund may have in selling certain assets within a short timeframe in order to meet the need to raise cash or deal with a fall in their market value. Please note that over-the-counter markets do not offer immediate liquidity or enable assets to be sold at the price expected by the Fund.
Risk associated with the use of derivatives	The use of derivatives can lead to significant variations in the net asset value over short periods, both upwards and downwards.
Specific risk associated with subordinated debt securities	<p>A debt is said to be subordinated when its repayment depends on the initial repayment of other creditors (preferred creditors, unsecured creditors). The subordinated creditor will therefore be repaid after the ordinary creditors, but before the shareholders. The interest rate on this type of debt will be higher than on other debt. In the event of the triggering of one or more clauses provided for in the issue documentation for the said subordinated debt securities and, more generally in the event of a credit event affecting the issuer concerned, there is a risk that the net asset value of the Fund will fall. The use of subordinated bonds may expose the Fund to the risks of coupon cancellation or deferral (at the sole discretion of the issuer), uncertainty over the redemption date, or valuation/return (the attractive yield of these securities may be considered a complexity premium).</p>
Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none"> 1) lower revenues; 2) higher costs; 3) damage or depreciation in asset value; 4) higher cost of capital; 5) reputational risks and 6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Lgal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

The "AD" and "A" units are intended for all subscribers. However, due to the high risk associated with an investment in fixed income products, this sub-fund is intended above all for investors ready to bear the strong variations inherent in fixed-income markets and with a minimum investment horizon of three years.

"Z" units are reserved exclusively for:

- the Management Company (including as part of its discretionary management activity)

- the staff of the Management Company (permanent employees and managers) and their spouses (not legally separated), parents and children
- the FCPEs intended for the staff of the Management Company
- life insurance or capitalisation companies for the equivalent value of the amount invested in a unit of account representing the Z units of the Sub-Fund within a life insurance or capitalisation contract taken out by a member of the Management Company's staff, or their unmarried spouse, parents and children

"ID" and "I" units are for all subscribers, but are especially intended for:

- institutional investors who have received prior approval from the Management Company and whose minimum initial subscription is 100,000 euros (except for the Management Company, which may subscribe for 1 unit), or to
- marketing networks with the prior consent of the Management Company, or to
- distributors and intermediaries with the prior consent of the Management Company, or to
- distributors and intermediaries who have received prior authorisation from the Management Company and who provide:
 - an independent advisory service within the meaning of MiFID2
 - individual management under mandate regulations

SEXTANT 2027 may be used as a vehicle for unit-linked life insurance policies or capitalisation policies.

11.2 Minimum recommended investment period

until 2027-12-31

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the issuer selection process and the determination of issuers' weight in the portfolio. The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future 5 years cash requirements and your risk aversion. It is also advisable to diversify investments sufficiently to avoid excessive exposure to this Fund risk. In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

Methods for determining amounts available for distribution :

In accordance with article L.214-17-2 of the French Monetary and Financial Code, the sums distributable by the UCITS are made up of:

1. Net income plus retained earnings plus or minus the balance of the income adjustment account;
2. Realised capital gains, net of expenses, less realised capital losses, net of expenses, recorded during the fiscal year, plus net capital gains of the same nature recorded during previous fiscal years that have not been distributed or capitalised, less or increased by the balance of the capital gains adjustment account.

Allocation of distributable income : Accumulation and/or Distribution following the decision taken by the General Meeting of Shareholders

13. Distribution frequency

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares).

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR001400BM80 Share AD	100 €	100 €
FR001400BM98 Share A	100 €	100 €
FR001400BMA2 Share ID	1000 €	100,000 €
FR001400BMB0 Share I	1000 €	100,000 € *
FR001400BMC8 Share Z	100 €	100 €

* Share I :

* With the exception of the Management Company which can subscribe just one share.

Subscriptions are accepted either in number of shares (expressed in thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in thousandths of shares).

Initial subscriptions may be made in cash and/or in kind (by contribution of transferable securities) subject to the prior agreement of the Management Company.

Methods of transmitting subscription requests

Subscription and redemption requests are centralised the day before the valuation day before 11:00 with the custodian: CACEIS BANK. , whose registered office is located at 89-91 rue Gabriel Péri – 92120 Montrouge RCS Nanterre.

Postal addresses of offices: CACEIS BANK.

They are executed on the basis of the next net asset value calculated on the basis of the closing price on the day on which the requests are centralised. Subscription and redemption requests received after 11:00 are processed on the basis of the net asset value calculated according to the method described above. The relevant payments will be made 2 business days after the valuation.

In the event of a public holiday or stock market closure, it will be calculated on the previous business day.

Shareholders' attention is drawn to the fact that orders transmitted to marketers other than the institutions mentioned above must take account of the fact that the order centralisation cut-off time applies to the said marketers with regard to CACEIS BANK.

Consequently, these marketers may apply their own cut-off time, earlier than that mentioned above, in order to take account of their deadline for transmitting orders to CACEIS BANK.

Orders are centralised in accordance with the table below:

D-1 business day	Day on which the NAV is established (D)	D+1 to D+3	D+2 business days	D+2 business days
Daily reception of orders and centralisation ^{Daily} before 11:00 (Paris time) of subscription* and redemption orders.	Orders are executed no later than day D	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions D-1 before 4pm

**Unless otherwise agreed with your financial institution.*

The Management Company monitors liquidity risk by Sub-Fund in order to ensure an appropriate level of liquidity for each Sub-Fund, particularly with regard to the risk profile, investment strategies and redemption policies in force for the funds. An analysis of the liquidity risk of the Sub-Fund## is carried out to ensure that the investments and funds have sufficient liquidity to honour the redemption of unitholders under normal and extreme market conditions. The Management Company has set up a liquidity management system and tools to ensure that investors are treated fairly.

The first subscription period for the Sub-Fund was from inception to 17 April 2024. The first subscription period has been extended until 31 Dec 2024. From that date, the only subscriptions that can be made must be preceded by a same-day redemption of the same number of shares for the same asset value by the same shareholder. The subscription period may be shortened following a decision of the Management Company. The Management Company may decide to reopen subscription periods at a later date, giving shareholders one month's notice.

During the subscription period described above, subscriptions may be suspended if the iTraxx Europe Crossover index averages less than 200bps over a 20-day rolling period (with a tolerance of plus or minus 20%); conversely, subscriptions will be authorised if the iTraxx Europe Crossover index averages more than 200bps over a 20-day rolling period (with a tolerance of plus or minus 20%). The suspension or resumption of subscriptions will take place within three trading days of this threshold being passed (with 10% tolerance on either side). This information will be available on the Management Company's website.

The Sub-Fund has not implemented a redemption cap mechanism (known as "Gates") so in the event of exceptional circumstances, the absence of a redemption cap mechanism may result in The UCITS being unable to honour redemption requests and thus increase the risk of a complete suspension of subscriptions and redemptions on The UCITS.

The Sub-Fund implements several complementary DNSH schemes to ensure that its investments do not cause significant environmental and social harm.

16. Fees and commissions

16.1 Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid To the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
Subscription fee not earned To the Sub-Fund	Net asset value x number	AD	None
		A	None
		ID	5.00%
		I	5.00%
		Z	None
Subscription fee earned To the Sub-Fund	Net asset value x number	AD	None
		A	None
		ID	None
		I	None
		Z	None
Redemption fee not earned To the Sub-Fund	Net asset value x number	AD	None
		A	None
		ID	None
		I	None
		Z	None
Redemption fee earned To the Sub-Fund	Net asset value x number	AD	None
		A	None
		ID	None
		I	None
		Z	None

Subscription and redemption fees are not subject to VAT.

Exemptions:

It is possible to proceed, free of commissions, with simultaneous redemptions/subscriptions on the basis of the same net asset value for a zero balance transaction volume.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)
Financial management fees	Net asset	AD	1.20% (incl. tax) maximum
		A	1.20% (incl. tax) maximum
		ID	0.60% (incl. tax) maximum
		I	0.60% (incl. tax) maximum
		Z	None
Operating Expenses and other services (flat-rate assessment of costs detailed below)	Net asset	Applied to the Fund	0.05% incl. tax maximum (Any excess is borne by the Management Company) ¹
indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	Accessories
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	AD A ID I Z	None

¹ The fixed maximum rate may be charged even if the actual fees are lower than it, and conversely, if the actual fees exceed the displayed rate, the excess beyond this rate will be borne by the Management Company

Detail of operating expenses and other services:

Operating expenses and other services include:

- Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);
 - Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);
 - Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and

messaging functions of Bloomberg).

(iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.

(v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring breaches of thresholds, exceeding ratios etc.).

(vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-financial constraints arising from specific client requests and specific to the UCITS).

(vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French Monetary and Financial Code,
- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

In the case of a 100% bond sub-fund, the related research costs are borne by the management company.

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

Swing Pricing NAV adjustment method with trigger threshold

In order not to penalise shareholders who remain in the Sub-Fund, an adjustment factor will be applied to those who subscribe or redeem significant amounts of the Sub-Fund's assets, which is likely to generate costs for holders entering or leaving the Sub-Fund that would otherwise be charged to shareholders present in the Sub-Fund. Thus, if on any NAV calculation day the total number of net subscription/redemption orders from investors for all of the Sub-Fund's share categories exceeds a threshold predetermined by the Management Company and determined on the basis of objective criteria as a percentage of the Sub-Fund's net assets, the NAV may be adjusted upwards or downwards to take into account the readjustment costs attributable to the net subscription/redemption orders respectively. The NAV of each share category is calculated separately, but any adjustment has an identical percentage impact on the overall NAV of each share category of the Sub-Fund.

The cost and trigger threshold parameters are determined by the Management Company and reviewed periodically, but this period may not exceed six months. These costs are estimated by the Management Company on the basis of transaction costs, buy/sell ranges and any taxes applicable to the Sub-Fund.

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and assesses them periodically to ensure the quality of the services provided. Consequently, it is also not possible to predict exactly how often the Management Company will have to make such adjustments, which may not exceed 2.5% of the NAV. Investors are informed that the volatility of the NAV of the Sub-fund may not reflect only the volatility of the securities held in the portfolio due to the application of swing pricing.

Non applicable

4. Management objective and investment strategy**4.1 Management objective**

SEXTANT PEA is a dynamic sub-fund that seeks to optimise performance through a selection of securities whose registered office is in the European Union and whose core investment is in France. Its objective is to outperform the MSCI France Small Cap Gross Total Return, dividends reinvested (TR) over the recommended investment period.

The sub-fund also aims to build up a portfolio of companies displaying good sustainability practices, in particular by adopting an ESG rating improvement approach and by setting a minimum sustainable investment component. It also undertakes to pay particular attention to companies that actively contribute to the fight against global warming and limit their activities' impact on biodiversity.

It should be noted that the manager cannot enter into any performance obligation. The above-mentioned objective is based on the management company's market assumptions and does not under any circumstances constitute a promise of return or performance of the Sub-fund.

4.2 Benchmark index

MSCI France Small Cap Gross, dividends reinvested (TR).

The MSCI France Small Cap Gross Total Return (Bloomberg ticker: MSDEFRSG), dividends reinvested (TR), includes French small-cap stocks. This indicator is calculated in euros and dividends reinvested. The benchmark is administered by MSCI Limited, a registered administrator pursuant to Article 34 of Regulation (EU) 2016/1011 and listed in the register of benchmark administrators maintained by ESMA. Further information on the benchmark index is available on the Euronext website at <https://live.euronext.com/en/products-indices/index-rules>.

Investors should note that, as the management style (see below) is discretionary, the composition of the portfolio will never seek to replicate the composition of the benchmark index, either geographically or by sector.

4.3 Investment strategy**❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE**

To achieve its management objective, the SEXTANT PEA sub-fund will invest in securities whose registered office is in the European Union, with a core investment in France, and whose market capitalisation is between €500 million and €10 billion. The remainder of the assets may be invested in companies with a market capitalisation of less than €500 million or more than €10 billion.

SEXTANT PEA is based on a rigorous selection of securities, obtained after an internal fundamental analysis by the management company, the main criteria of which are :

- the quality of the company's management
- the quality of its financial structure
- the visibility of the company's future results
- the business's growth prospects
- the company's policy towards its minority shareholders (transparency of information, dividend distribution....)
- and, to a lesser extent, the speculative aspect of the value linked to a special situation (takeover bids, public exchange offers, squeeze-outs and their equivalents in the countries concerned)

.As far as possible, the management team meets directly with the companies in which the sub-fund invests or is likely to invest.

Investment decisions then depend essentially on the existence of a " margin of safety " made up of the difference between the market

value of the company as assessed by the managers and its market value (market capitalisation). In this sense, it is possible to speak of "value investing".

The lines are set up with a long-term holding objective (more than two years).

The portion of assets not invested in equities due to a lack of opportunities with a sufficient safety margin is invested in fixed income products, is invested in fixed income products.

The Sextant PEA sub-fund may be managed in sub-portfolios. This management method is specific to Amiral Gestion. It is based on the free decision-making of each manager-analyst and relies on collective expertise. The Sub-fund's assets are divided into several sub-portfolios, each of which is managed independently by one of the team's manager-analysts. All the investment cases issued are studied, debated and analysed as a group.

At the end of this process, everyone is free to decide whether or not to invest in their sub-portfolio according to their own convictions, or to follow the ideas of another manager. A coordinating manager ensures that investments are consistent with the sub-fund's strategy.

Extra-financial approaches applicable to the sub-fund

The sub-fund's extra-financial approach is not backed by a specific sustainable benchmark, but it does promote environmental and social characteristics. For information purposes, the fund has been awarded the SRI label, which means that it complies with SRI constraints. It monitors good corporate governance practices via a combination of extra-financial approaches, the main elements of which are as follows:

- The average ESG score of the portfolio is calculated and compared with that of its universe. For information purposes, as at November 2024, the ESG universe is made up of 678 stocks. The ESG score is represented by the ESG Performance Score, which is derived from our fundamental analysis of qualitative ESG criteria based on double materiality.
- A minimum of 90% of the companies in the portfolio are thus covered by the ESG Performance Score; the maximum 10% not covered is intended to take account of exceptional cases where immediate coverage is not possible (small caps for which ESG information is not available, IPOs, etc.).
- The ESG rating improvement approach is applied, which consists of committing to the fact that the average ESG performance rating of the portfolio will be significantly higher than the average ESG performance rating of the initial investment universe after eliminating the worst 30% of stocks on the basis of the ESG rating and all the exclusions applied by the sub-fund.
- A commitment to better performance of the portfolio compared to its initial investment universe[1] on two environmental climate PAIs: (i) PAI 7: Biodiversity : share of issuers having activities and operations on sites or near sites identified as sensitive sites in terms of biodiversity (%); (ii) PAI 3: Carbon intensity (tCO₂eg/€m turnover).
- Taking climate issues into account, with a commitment that by 1 January 2026 at the latest: (i) 15% of issuers with a high climate impact in the portfolio have a climate transition plan that is credible in terms of the climate objectives set by the Paris Agreement; (ii) 20% of issuers with a high climate impact in the portfolio under reinforced monitoring and not presenting a credible transition plan are subject to a commitment initiative encouraging them to adopt a credible transition plan within a maximum of 3 years.
- A shareholder engagement approach: the Sextant PEA sub-fund applies the Amiral Gestion Voting Policy and Policy on engagement and dialogue with issuers: both are available on the Amiral Gestion website in the 'Responsible Investment' section or directly via the following link: <https://www.amiralgestion.com/en/responsible-investment>
- The sub-fund and the universe comply with Amiral Gestion's Sustainability and Responsible Investment Policy (in particular sector and normative exclusions and on the basis of the seriousness of controversies). This Policy is available on the Amiral Gestion website, in the "Responsible Investment" section, or directly via the following link: <https://api.amiralgestion.com/documents/permalink/2400/doc.pdf>

Furthermore, when the portfolio invests in UCIs, the company will, whenever possible, give preference to UCIs with the same SFDR classification as that of the Sub-Fund and which have been awarded the SRI label. These extra-financial approaches are described in more detail in the Sub-Fund's pre-contractual SFDR Appendix 2.

More detailed information on the methodologies applied is also available in the Methodology Note applicable to SRI-labelled funds, available online in the "Responsible Investment" section.

Part verte - Taxonomie européenne

The principle of "cause no significant harm" applies only to investments underlying the financial product that take into account the European Union's criteria for environmentally sustainable economic activities.

The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

Investissement durable

The sub-fund undertakes to invest at least 30% of its assets in sustainable investments.

Please refer to the pre-contractual appendix 2 of the SFDR RTS for the criteria used by Amiral Gestion to determine the proportion of sustainable investments within the portfolio.

DNSH² SFDR and consideration of Key Negative Impacts³

The Sub-Fund implements several complementary DNSH schemes to ensure that its investments do not cause significant environmental and social harm. These include: i) a set of investment rules for the whole portfolio (sectoral and normative exclusions and controversies; attention to Principal Adverse Impacts); ii) stricter requirements for sustainable investments; iii) monitoring of governance practices by tracking "G" ratings and controversies, which in some cases may lead to dialogue with the company. These mechanisms are described in the Sub-Fund's pre-contractual SFDR Appendix 2.

Within the scope of DNSH, the Sub-Fund has, since 31.12.2022, notably committed to monitoring and taking into consideration the

Principal Adverse Impacts (PAIs) of its investments on sustainability factors, in order to identify and to take appropriate action. The Sub-Fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

Amiral Gestion's "PAI" policy, including details of the sources and methods used to take each indicator into account, is available on its website, under the "Responsible Investment" heading: [https://www.amiralgestion.com/fr/investissement-responsable/The metrics and information on how the main negative impacts have been taken into account will be published annually in the Sub-Fund's periodic "Appendix 4 SFDR" document, for the first time in 2024 for the financial year 2023.](https://www.amiralgestion.com/fr/investissement-responsable/The metrics and information on how the main negative impacts have been taken into account will be published annually in the Sub-Fund's periodic \)

This combination of extra-financial approaches, described in detail in the pre-contractual appendix 2 of the SFDR RTS (available as an appendix to this prospectus or on the Amiral Gestion website: <https://www.amiralgestion.com/fr/nos-fonds-sextant>), classifies the sub-fund in the "Article 8" category according to the classification of the so-called "Disclosure - SFDR" regulation.

¹ Not removed from the 30% of stocks with the lowest ratings, as for the commitment to the ESG rating in the improvement approach described above

² DNSH = Do No Significant Harm

³ Principal adverse impacts (PAIs) are defined as the impacts of investment decisions that result in significant or potentially significant adverse impacts on sustainability factors (environmental, social and labour issues, respect for human rights and the fight against corruption and bribery).

♣ ELIGIBLE ASSETS

Shares

SEXTANT PEA invests 75% of its net assets in equities whose registered office is in the European Union or the European Economic Area (making them eligible for the PEA). The minimum exposure to equities is 60% of net assets. The proportion invested in equities depends exclusively on the investment opportunities presented to the managers on a case-by-case basis and not on macro-economic considerations, irrespective of market capitalisation or sector.

Debt securities and money market instruments

The sub-fund may invest up to 25% of its net assets in bonds and money market instruments.

Investments in money market instruments are denominated in Euros and have a maximum maturity of twelve months. They will have a minimum rating (Standard & Poor's A3 / Moody's P-3 / Fitch Ratings F3) or, where they are not rated, must be deemed equivalent according to the Management Company's analysis. However, the Management Company prefers to invest cash in "money market" or "short-term money market" UCITS/ AIFs, up to a limit of 10% of the net assets.

The sub-fund also reserves the right to invest in all bond securities, regardless of currency or credit rating, including convertible bonds and "high yield" bonds (i.e. those with a non-investment grade credit rating).

Investments in 'high yield' bonds (BBB- rating) will remain incidental, i.e. less than 10% of net assets.

As regards fixed-income securities, the management company carries out its own credit and market risk analysis when selecting securities on acquisition and during their lifetime. It therefore does not rely exclusively on ratings provided by rating agencies.

Investments in securities of other UCITS, AIFs and/or investment funds

The Sub-fund may invest up to 10% of its net assets in securities of other French or European UCITS or AIFs, in particular for cash investments; these will be "standard money market" UCITS/AIFs and "short-term money market" UCITS/AIFs. "These may be dynamic money market UCITS/AIFs employing alternative management strategies. On an ancillary basis, the Sub-fund may invest in UCITS/AIFs classified as equities or bonds that are compatible with the management policy of the Sub-fund. These UCIs and investment funds can be managed by Amiral Gestion.

The Sub-fund may invest up to 5% of its net assets in foreign investment funds and AIFs other than general purpose funds (FCPRs, etc.) that meet the criteria set out in Article R.214-13 of the French Monetary and Financial Code. The Sub-fund may invest in shares of another Sub-fund of the same UCITS.

Derivatives and securities with embedded derivatives

Derivative products

Derivative products Transactions involving derivatives (purchases or sales of call or put options on equities, indices, interest rates or currencies, and purchases or sales of futures, forward exchange contracts or swaps on equities, indices, interest rates or currencies) and securities that are part of derivatives shall be carried out in order to expose or partially hedge the Sub-fund against favourable or unfavourable trends in equities, indices, interest rates and currencies.

There will be no overexposure. These instruments will be traded on regulated and/or organised or over-the-counter markets

Futures (contracts on financial instruments) relating to commodity indices will be carried out in compliance with the 5/10/20/40 ratio.

In the case of single-subordinate derivatives whose security is taken into account for transparency purposes in the quantitative criteria of the SRI label, it is specified that the temporary nature of the use of derivatives as exposure is understood to be for a period of 12 months.

This same rule (i.e. a period of 12 months) applies to index derivatives which have demonstrated a significant level of compliance with the quantitative standards and government provisions of the SRI label.

Optional strategies :

Depending on the manager's expectations, he will have to sell or buy equity options. For example, if he anticipates a sharp rise in the market, he may buy calls; if he thinks the market will rise slowly and that implied volatility is high, he may sell puts. On the other hand, if he expects the market to fall sharply, he will buy puts. Finally, if he thinks the market can no longer rise, he will sell calls. The manager may combine these different strategies.

Securities with embedded derivatives:

The sub-fund may hold products incorporating derivatives (preferential rights/warrants, warrants, convertible bonds, EMTNs and, more generally, all puttable/callable products) as part of its equity portfolio management:

- when these securities are detached from the shares held in the portfolio;
- when it is more advantageous to acquire shares by purchasing and then exercising these securities (e.g. participation in a capital increase by first purchasing Preferential Subscription Rights on the market).

Deposits and cash

The Sub-fund may use deposits to optimise the management of the Sub-fund's cash and to manage the different subscription/redemption value dates of the underlying UCIs. It may invest up to 20% of its net assets in deposits placed with a single credit institution.

The sub-fund may hold cash on an ancillary basis, in particular to cover share redemptions by investors. The cash holding threshold may be raised to 20% of net assets when justified by exceptional market conditions.

Cash lending is prohibited.

Cash Borrowings

The Sub-fund may borrow cash. Although it is not intended to be a structural cash borrower, the Sub-fund may be in a debit position as a result of transactions linked to its paid-in flows (ongoing investments and divestments, subscriptions/redemptions, etc.), up to a limit of 10% of the net assets.

Temporary acquisition and sale of securities:

None

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

Non applicable

7. Special cases of UCIs with sub-funds

The sub-fund may invest up to 10% of its net assets in shares of another sub-fund of the same UCI.

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk	The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.
Discretionary management risk	The discretionary management style is based on anticipating trends in the financial markets. The Fund's performance will depend on the issuers selected and the asset allocation defined by the manager. There is a risk that the Management Company will not select the best-performing securities and that the net asset value of the Fund will therefore fall.
Equity market risk	Fluctuations in equity markets may lead to significant changes in net assets, which may have a negative impact on the performance of the Fund. The net asset value of the fund may fall significantly.
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk.
Risk related to the size of the capitalisation of the selected securities	The Fund may invest in small- and mid-cap markets, as the volume of securities listed on the stock exchange is reduced, and market movements are therefore more pronounced on the downside and faster than in large-cap markets. The fund's net asset value may therefore fall more quickly and more sharply.
Credit risk	The Fund may invest in fixed income products. Credit risk is the potential risk of issuer default or credit downgrade, which may lead to a fall in net asset value.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.
Counterparty risk	This is the risk associated with the Fund's use of over-the-counter financial futures instruments. These transactions, entered into with one or more eligible counterparties, potentially expose the Fund to a risk of default by one of its counterparties, which could lead to an event of default that would no longer allow the Fund to honour its commitments under these transactions.
Risk associated with the use of derivatives	The use of derivatives can lead to significant variations in the net asset value over short periods, both upwards and downwards.
Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none"> 1) lower revenues; 2) higher costs; 3) damage or depreciation in asset value; 4) higher cost of capital; 5) reputational risks and 6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Lgal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

"A" shares are open to all subscribers. However, due to the high risk associated with an investment in equities, this sub-fund is intended primarily for investors who are prepared to withstand the sharp fluctuations inherent in the equity markets and who have a minimum investment horizon of five years.

"L" shares are reserved for to insurance companies and their distribution networks that have received prior approval from the management company.

Z shares are reserved exclusively for:

- the management company
- the management company's staff (permanent employees and managers) and their unmarried spouses, parents and children,
- FCPEs for employees of the Management Company
- life insurance or capitalisation companies for the equivalent value of the amount that would be invested in a unit of account

representing the Z shares of the sub-fund within a life insurance or capitalisation contract taken out by a member of staff of the management company, as well as their unmarried spouses, parents and children.

SEXTANT PEA may be used as a vehicle for unit-linked variable capital life insurance contracts.

11.2 Minimum recommended investment period

5 years

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the valuation models through the Beta used to define the weighted average cost of capital (WACC) for equity management and to the issuer selection process and the determination of issuers' weight in the portfolio for bond management.

The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future 5 years cash requirements and your risk aversion. It is also advisable to diversify investments sufficiently to avoid excessive exposure to this Fund risk.

In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

Allocation of distributable income : Accumulation

13. Distribution frequency

Non applicable

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares).

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR0010286005 Share A	1000 € *	None
FR0010373217 Share Z	100 €	None
FR001400T0H7 Share L	100 €	1 share(s)
FR001400UFI9 Share SI	100 €	15,000,000 €

Subscriptions are accepted either in number of shares (expressed in thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in thousandths of shares).

How to submit subscription requests

Subscription and redemption requests are centralised each day of valuation before 11:00 with the custodian: CACEIS BANK, whose registered office is located at 89-91 rue Gabriel Péri – 92120 Montrouge RCS Nanterre.

Postal addresses of offices: CACEIS BANK.

They are executed on the basis of the next net asset value calculated on the basis of the closing price on the day on which the requests are centralised. Subscription and redemption requests received after 11:00 are processed on the basis of the net asset value calculated according to the method described above. The relevant payments will be made 2 business days after the valuation.

In the event of a public holiday or stock market closure, it will be calculated on the previous business day.

Shareholders' attention is drawn to the fact that orders transmitted to marketers other than the institutions mentioned above must take into account the fact that the order centralisation cut-off time applies to said marketers vis-à-vis CACEIS BANK

Consequently, these marketers may apply their own cut-off time, earlier than that mentioned above, in order to take account of their deadline for transmitting orders to CACEIS BANK.

Orders are centralised in accordance with the table below:

D business day	Day on which the NAV is established (D)	D+1 to D+3	D+2 business days	D+2 business days
Daily reception of orders and centralisation Daily before 11:00 (Paris time) of subscription* and redemption orders.	Orders are executed no later than day D	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions D-1 before 4pm

**Unless otherwise agreed with your financial institution.*

The Management Company monitors liquidity risk by Sub-Fund in order to ensure an appropriate level of liquidity for each Sub-Fund, particularly with regard to the risk profile, investment strategies and redemption policies in force for the funds. An analysis of the liquidity risk of the Sub-Fund## is carried out to ensure that the investments and funds have sufficient liquidity to honour the redemption of unitholders under normal and extreme market conditions. The Management Company has set up a liquidity management system and tools to ensure that investors are treated fairly.

The sub-fund has introduced a redemption cap mechanism (known as a "gate") as described below:

Redemption Capping Mechanism ("gate"):

The Management Company has implemented a liquidity management mechanism known as a "gate" or "redemption capping" to protect its investors. This mechanism allows, if necessary, the capping of redemptions when the redemption threshold objectively established by the Management Company is reached. The redemption threshold set by the Management Company for this Sub-Fund is 10% of the net assets. To determine the level of this threshold, the Management Company takes into account the frequency of calculating the net asset value of the UCITS, the investment orientation of the Sub-Fund, and the liquidity of its assets.

The trigger threshold for the gates corresponds to the ratio between:

- - the observed difference, on the same consolidation date, between the number of shares in the Sub-Fund for which redemption is requested or the total amount of these redemptions, and the number of shares in the Sub-Fund for which subscription is requested or the total amount of these subscriptions; and
- the net assets of the fund or the total number of units in the sub-fund.

In the event of triggering the gate, the Management Company reserves the right to spread redemptions over several net asset values. The capping of redemptions can be triggered, at the discretion of the Management Company, only in the case of exceptional market circumstances and if the interests of investors so require.

When redemption requests exceed the triggering threshold, and if liquidity conditions permit, the Management Company may decide to honour redemption requests beyond this threshold, thus partially or fully executing orders that may be blocked. Unexecuted redemption requests at a net asset value will be automatically carried over to the next consolidation date and executed on the next net asset value date. They cannot be revoked by the unit holders or shareholders.

For example, if the total redemption requests for shares represent 5% of the net assets of the Sub-Fund while the triggering threshold is set at 10% of the net assets, the Sub-Fund may decide to honour redemption requests up to 8% of the net assets (thus executing 80% of redemption requests) and thereby carry over the balance of unexecuted redemptions to the next consolidation.

The maximum duration of the redemption capping mechanism is set at 20 net asset values over 3 months for a UCITS with a daily valuation frequency .

Notification Procedures for Unit holders:

In the event of activating the "gate" mechanism, Sub-Fund investors will be informed by any means through the website <https://www.amiralgestion.com/fr>.

Sub-Fund investors whose redemption orders have not been executed will be informed promptly and in a special manner.

Treatment of Unexecuted Orders:

During the period of application of the "gate" mechanism, redemption orders will be executed in the same proportions for UCITS unit holders who have requested redemption at the same net asset value. The redemption orders thus carried over will not have priority over subsequent redemption requests. Unexecuted and automatically carried-over redemption orders cannot be revoked by UCITS unit holders.

Exemption from the "gates" mechanism:

Subscription and redemption transactions, for the same number of shares, based on the same net asset value and for the same investor or economic beneficiary (known as round-trip transactions), are not subject to a "gate."

This exclusion also applies to the transition from one class of shares to another class of shares, at the same net asset value, for the same amount and for the same investor or economic beneficiary.

16. Fees and commissions

16.1 Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid To the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
Subscription fee not earned To the Sub-Fund	Net asset value x number	A	2.00%
		Z	None
		L	2.00%
		SI	None
Subscription fee earned To the Sub-Fund	Net asset value x number	A	None
		Z	None
		L	None
		SI	None
Redemption fee not earned To the Sub-Fund	Net asset value x number	A	1.0%
		Z	None
		L	1.0%
		SI	None
Redemption fee earned To the Sub-Fund	Net asset value x number	A	None
		Z	None
		L	None
		SI	None

Subscription and redemption fees are not subject to VAT.

Exemptions:

It is possible to proceed, free of commissions, with simultaneous redemptions/subscriptions on the basis of the same net asset value

for a zero balance transaction volume.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)
Financial management fees	Net asset	A	2.2% (incl. tax) maximum
		Z	None
		L	1.4% (incl. tax) maximum
		SI	0.7% (incl. tax) maximum
Operating Expenses and other services (flat-rate assessment* of costs detailed below)	Net asset	Applied to the Fund	0.1% (incl. tax) maximum ¹
indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	None
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	A	15% (inclusive of tax) of the performance of the sub-fund's A share in excess of the benchmark index per calendar year
		Z	None
		L	15% (inclusive of tax) of the performance of the sub-fund's L share in excess of the benchmark index per calendar year
		SI	15% (incl. tax) of the sub-fund's SI shares' performance above it's benchmark by calendar year.

* Effective from 01/01/2025

1

Detail of operating expenses and other services:

Operating expenses and other services include:

- Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);

- Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);
- Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and messaging functions of Bloomberg).

(iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.

(v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring breaches of thresholds, exceeding ratios etc.).

(vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-financial constraints arising from specific client requests and specific to the UCITS).

(vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French Monetary and Financial Code,
- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

Performance fee calculation methods (A, L, SI shares)

Variable management fees are deducted, for the benefit of the management company according to the following methods: performance fee.

The performance fee is based on the comparison between the performance of the sub-fund's A, L and SI shares and the benchmark threshold, over the financial year.

The performance of the sub-fund is calculated on the basis of changes in the net asset value:

- if, over the year, the performance of the sub-fund's A, L and SI shares is positive and higher than its benchmark index, the variable portion of the management fees will represent 15% (inclusive of tax) of the difference between the sub-fund's performance and the benchmark threshold.
- if, over the year, the performance of the sub-fund's A, L and SI shares is negative or lower than its benchmark index, the variable portion will be nil.

The performance fee is calculated on the basis of the net assets on which the performance was achieved as well as the subscriptions and redemptions made in the sub-fund. This method involves comparing the assets of the A, N or I share of the Sextant PEA sub-fund with the assets of a sub-fund following the benchmark threshold by applying the same subscription and redemption flows.

- If, during the financial year, the performance of the A, L and SI shares of the sub-fund since the beginning of the financial year is positive and greater than the benchmark threshold calculated over the same period, this outperformance will be subject to a provision for variable management fees when calculating the net asset value.
- In the event of underperformance of the sub-fund's A, L and SI shares relative to the benchmark threshold or a negative performance between two net asset values, any provision made previously will be readjusted by a reversal of the provision. Reversals of provisions are capped at the amount of previous allocations.
- This variable component will only be paid definitively at the end of the financial year if the performance of the sub-fund's A, L and SI shares over the year is positive or above the benchmark threshold.
- In the event of share redemption, if there is a provision for variable management fees, the portion proportional to the shares redeemed is paid immediately to the management company.

These fees (fixed and, where applicable, variable portions) are charged directly to the sub-fund's income statement.

Any underperformance of the sub-fund in relation to the benchmark will be deducted from the income statement. Any underperformance of the sub-fund relative to the benchmark index is offset before performance fees become payable. To this end, a catch-up period of five years has been set. If, during the catch-up period, a new underperformance is observed, this will trigger a new catch-up period of 5 years from the date of the observation in respect of this underperformance. Finally, if the underperformance has not been caught up after five years, it is no longer taken into account for the sixth year.

Illustration:

Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment	Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment
Year 1	5	0	Yes	Year 7	5	0	Yes

Year 2	0	0	No	Year 8	-10	-10	No
Year 3	-5	-5	No	Year 9	2	-8	No
Year 4	3	-2	No	Year 10	2	-6	No
Year 5	2	0	No	Year 11	2	-4	No
Year 6	5	0	Yes	Year 12	0	0*	No

Illustration Notes:

*The underperformance to be compensated in year 12 is reset to 0 and not -4 due to the application of the catch-up period of 5 years from year 8.

Past performance of the sub-fund is available on the Amiral Gestion website.

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and evaluates them periodically to ensure the quality of the services provided. Research fees are included in the transaction fees and are deducted from the Fund for each transaction.

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

2. Classification

International equities

3. Delegation of financial management

Non applicable

4. Management objective and investment strategy**4.1 Management objective**

SEXTANT TECH is a dynamic sub-fund that seeks to outperform its benchmark (50% MSCI Europe Net Total Return index + 50% MSCI ACWI index), through a selection of technology and assimilated securities, largely issued within the European Union, but not excluding the rest of the world. Performance is net of management fees.

4.2 Benchmark index

Investors' attention is drawn to the fact that, as the management style (see below) is discretionary, the composition of the Sub-Fund will never seek to reproduce the composition of a benchmark, either geographically or by sector. However, the MSCI Europe Net Total Return (dividends reinvested)" (ticker bloomberg : M72U) and the MSCI ACWI (Bloomberg ticker : M1WD) in euros may be used as a performance indicator. The benchmark refers to dividends reinvested.

The MSCI Europe Net Total Return index (dividends reinvested) is an index representing large- and mid-cap companies in the developed European markets. The Benchmark Indicator includes only stocks from European countries and aims to include 85% of the free float-adjusted market capitalisation of each country in the index and of each European industry group.

L MSCI ACWI (All Country World Index- ticker bloomberg MXWD Index) is a global stock market index covering most of the world's mid- and large-cap countries, both emerging (24 countries) and developed (23 countries). It is a market capitalisation weighted index developed by the US listed financial company MSCI Inc.

As at the date of this prospectus, the administrator of these benchmark indices is listed in the register of administrators and benchmark indices maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used, describing the measures to be implemented in the event of substantial changes to an index or cessation of supply of that index.

4.3 Investment strategy**❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE**

In order to meet its management objectives, the Sextant Tech Sub-fund invests in equities issued around the world, but mainly ones issued in Europe or in companies headquartered in Europe.

Positions are acquired with a long-term retention objective (greater than two years). To enter the Amiral Tech Universe, a company must pass the eligibility filters (innovation, R&D, market, etc.) and be validated by the tech management team. Tech companies are considered to be innovative, often in high-growth markets, with high R&D expenditure, such as the games industry, Digital Service Providers (DSPs), robotisation, IT/artificial intelligence, fintech, the internet, e-commerce, industry 4.0, etc.)) Analysis and selection within this universe is carried out by each regional team (France, Europe, Asia and the US).

All our investment ideas are subject to a proprietary, in-depth financial and extra-financial analysis process that seeks to maximise interaction within the investment team. SEXTANT Tech is based on a rigorous selection of securities, obtained after an internal fundamental analysis by the management company, the main criteria of which are :

- the quality of the company's management

- the quality of its financial structure
- the visibility of the company's future results
- the business's growth prospects
- the company's policy towards its minority shareholders (transparency of information, dividend distribution....)
- and, to a lesser extent, the speculative aspect of the value linked to a special situation (takeover bids, public exchange offers, squeeze-outs and their equivalents in the countries concerned)

.Wherever possible, the management team meets directly with the companies in which the sub-fund invests or is likely to invest. The management team endeavours, as far as possible, to meet directly with the companies in which the sub-fund invests or is likely to invest. This can include site visits, but, in technology sectors, it is sometimes more appropriate to test products directly. In order to perfect its analysis of the quality of the management team and refine its understanding of the company's business model, the management team then extends its due diligence to partners, customers and suppliers etc.

Investment decisions are then made primarily in companies whose share price is lower than the intrinsic value estimated by the management company within the restricted universe resulting from the ESG screening explained in the following section "Extra-financial approaches applicable to the sub-fund".

The positions are set up with a long-term holding objective (three years).

The portion of assets not invested in equities is invested in fixed income products (money market instruments and debt securities).

The Sextant Tech sub-fund may be managed in sub-portfolios. This management method is specific to Amiral Gestion. It is based on the free decision-making of each manager-analyst and relies on collective expertise. The Sub-fund's assets are divided into several sub-portfolios, each of which is managed independently by one of the team's manager-analysts. All the investment cases issued are studied, debated and analysed as a group. All the investment cases put forward are studied, debated and criticised collectively.

At the end of this process, each manager is free to decide whether or not to invest (except in the case of ESG-related exclusions) in his sub-portfolio according to his own convictions, or to follow the insights of another manager. A coordinating manager ensures that investments are consistent with the sub-fund's strategy, portfolio objective and ESG constraints.

Extra-financial approaches applicable to the sub-fund

The sub-fund is subject to sustainability risk as defined in the risk profile. These sustainability risks are taken into account through the environmental and social characteristics of the sub-fund mentioned below, and through the application of a common set of responsible investment practices applicable to all the UCIs managed by Amiral Gestion, described in Amiral Gestion's responsible investment policies, available on its website: <https://www.amiralgestion.com/responsible-investment/>.

The sub-fund does not have a sustainable investment objective and is not aligned with a specific sustainable benchmark, but it does promote environmental and social characteristics while ensuring good corporate governance practices, through commitments and the implementation of the following extra-financial approaches :

- A rate of in-house extra-financial analysis and rating covering 100% of equity investments representing at least 75% of the portfolio in small and mid caps, debt securities and money market instruments with a "high yield" credit rating (this rate may be expressed as a percentage of the sub-fund's net assets or in terms of the number of issuers in the UCI) 90% for equities issued by large caps whose registered office is located in 'developed' countries
- The exclusion of any company that does not comply with the principles of the United Nations Global Compact and/or the OECD Guidelines for Multinational Enterprises according to Sustainalytics, and the placing of companies on the Sustainalytics watchlist whose status is confirmed by the Controversies Monitoring Committee following an internal review.
- The exclusion of companies involved in controversies of high severity (level 4) to severe severity (level 5) according to the Sustainalytics scale, subject to an internal analysis by the controversy monitoring committee confirming the reality and severity of the controversy. Particular attention is also paid to controversies relating to climate change, biodiversity, fundamental human rights and fiscal responsibility).
- The exclusion of certain sensitive business sectors (controversial arms, tobacco, pornography, thermal coal, non-conventional fossil fuels with the exception of North American oil and shale gas) in accordance with the terms and thresholds of the sectoral exclusion policy of Amiral Gestion applicable to the Sub-Fund. This policy is available on the Amiral Gestion website, in the "Responsible Investment" section.
- Advanced ESG integration in fundamental analysis and stock selection: the management team applies an internal fundamental analysis synthesised in a proprietary global "Quality Score".
- A commitment to ESG quality, materialised by an average ESG Score for the portfolio covered by the MSCI ESG agency that is higher than the average external ESG Score of the companies in the ESG reference universe, the composition of which is consistent with the investment strategy (i.e. around 1,900 mid- and large-cap international companies in the technology and related sectors¹). This external ESG score monitoring is based mainly² on data provided by MSCI ESG Ratings.
- Individual and/or collaborative ESG influence dialogue and engagement initiatives to encourage certain issuers invested in the portfolio to improve their practices in terms of good governance, social and environmental responsibility (particularly in terms of reducing their impact on global warming) and their transparency in this area
- A commitment to the best performance of the sub-fund on the carbon intensity indicator (emissions of tonnes of CO₂ / €M of sales) relative to the ESG reference universe described above

. In addition,

- the Sub-Fund undertakes to systematically³ take part in the votes of invested companies by applying the principles of the Management Company's proprietary voting policy
- when the portfolio invests in UCITS (excluding cash management), the company will give preference, where possible, to UCITS with the same SFDR classification as that of the Sub-Fund.

This combination of extra-financial approaches classifies the sub-fund in the 'Article 8' category according to the "SFDR Disclosure" classification, and helps to ensure that sustainability risks are properly taken into account.

Part verte - Taxonomie européenne

The principle of "cause no significant harm" applies only to investments underlying the financial product that take into account the European Union's criteria for environmentally sustainable economic activities.

The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

Sustainable investment

Although it does not have an investment strategy focused on a sustainable investment objective within the meaning of the Disclosure SFDR regulation, the sub-fund undertakes to include a minimum proportion of 20% of sustainable investments.

Refer to the pre-contractual Appendix 2 of the SFDR RTS to understand the criteria used by Amiral Gestion to determine the proportion of sustainable investments within the portfolio.

DNSH⁴ SFDR and consideration of Key Negative Impacts⁵

The Sub-Fund implements several complementary DNSH schemes to ensure that its investments do not cause significant environmental and social harm. These include: i) a set of investment rules for the whole portfolio (sectoral and normative exclusions and controversies; attention to Principal Adverse Impacts); ii) stricter requirements for sustainable investments; iii) monitoring of governance practices by tracking "G" ratings and controversies, which in some cases may lead to dialogue with the company. These mechanisms are described in the Sub-Fund's pre-contractual SFDR Appendix 2.

Within the scope of DNSH, the Sub-Fund has, since 31.12.2022, notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) of its investments on sustainability factors, in order to identify and to take appropriate action. The Sub-Fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

Amiral Gestion's "PAI" policy, including details of the sources and methods used to take each indicator into account, is available on its website, under the "Responsible Investment" heading: <https://www.amiralgestion.com/fr/investissement-responsable/>

The metrics and information on how the main negative impacts have been taken into account will be published annually in the Sub-Fund's periodic "Appendix 4 SFDR" document, for the first time in 2024 for the financial year 2023.

This combination of extra-financial approaches, described in detail in the pre-contractual appendix 2 of the SFDR RTS (available in the appendix to this prospectus or on the Amiral Gestion website: <https://www.amiralgestion.com/fr/nos-fonds-sextant>), classifies the sub-fund in the "Article 8" category according to the classification of the so-called "SFDR Disclosure Regulation".

¹ DNSH = Do No Significant Harm

² The data may also be based on the ESG performance rating of the Amiral Gestion reference framework, derived from Ethifinance's Gaïa database, to complete the extra-financial coverage if necessary

³ Except in the event of technical constraints exceptionally preventing voting

⁴ DNSH = Do No Significant Harm

⁵ Principal adverse impacts (PAIs) are defined as the impacts of investment decisions that result in significant or potentially significant adverse impacts on sustainability factors (environmental, social and labour issues, respect for human rights and the fight against corruption and bribery).

♣ ELIGIBLE ASSETS

Shares

Sextant Tech invests at least 75% of net assets in international equities.

These may be shares listed on any regulated market in the world, regardless of their market capitalisation, mainly in the tech sector. Tech companies are innovative businesses, often in high-growth markets, with high R&D expenditure (software such as the games industry, Digital Services Providers (DSPs), robotisation, IT/artificial intelligence, fintech, internet, e-commerce, industry 4.0, etc).

The sub-fund may also invest up to 10% of its net assets in companies which are not admitted to trading on unorganised or unregulated markets.

The Sub-fund may also invest up to 10% of net assets in non-traded companies in non-organised or unregulated markets. The sub-fund may also invest up to 50% of its net assets outside this zone, including in companies that originate from, are listed in or whose business is mainly focused on so-called "emerging" zones (within the same limit), i.e. countries whose GDP per capita is lower than that of the major industrialised countries but whose economic growth is higher.

The sub-fund may also invest in equity equivalent securities (non-voting preference shares, investment certificates, founder's shares).

Exposure to currency risk in currencies other than those of the eurozone is limited to 75% of the sub-fund's net assets.

Equities include equity equivalent securities (preference shares, investment certificates and their equivalents in the countries concerned).

The share invested in equity equivalents depends exclusively on the investment opportunities that fund managers detect on a case-by-case basis, and not on macro-economic considerations.

Debt securities and money market instruments

The sub-fund may invest up to 25% of its net assets in money market instruments.

These are denominated in Euro and have a maximum maturity of twelve months. They will have a minimum rating (Standard & Poor's A3 / Moody's P-3 / Fitch Ratings F3) or, where they are not rated, must be deemed equivalent according to the Management Company's analysis.

As regards fixed-income securities, when selecting securities, the Management Company carries out its own credit and market risk analysis on acquisition and during their lifetime. It therefore does not rely exclusively on ratings provided by rating agencies.

The Sub-fund may invest up to 10% of its assets in debt securities that are intermediaries between bonds and equities, i.e. securities giving access to the issuer's capital (e.g. convertible bonds, bonds with warrants, participating securities). These securities may not be Investment Grade or may be unrated. They will be subject to a financial analysis by the Management Company comparable to that carried out on equities.

Investments in securities of other UCITS, AIFs and/or investment funds

The Sub-fund may invest up to 10% of its net assets in securities of other French or European UCITS or AIFs, including, in particular, "money market" or "short-term money market" UCITS/AIFs, as part of its cash management strategy. These UCIs may be UCIs managed by the management company.

The sub-fund may invest in shares of another sub-fund of the same UCITS.

Derivatives and securities with embedded derivatives

Derivatives (0% to 25% of net assets)

Transactions involving derivatives (purchases of call or put options on equities, indices, interest rates or currencies, and purchases or sales of futures, forward exchange contracts or swaps on equities, indices, interest rates or currencies) and securities that are part of derivatives shall be carried out in order to expose or partially hedge the Sub-fund against favourable or unfavourable trends in equities, indices, interest rates and currencies.

There will be no overexposure. These instruments will be traded on regulated and/or organised or over-the-counter markets. Futures (contracts on financial instruments) relating to commodity indices will be carried out in compliance with the 5/10/20/40 ratio.

Call options on securities will be sold while holding the underlying security as part of strategies to optimise the return on the sub-fund's securities

Put options on securities will be written as part of strategies to potentially acquire such securities at a price below the market price at the time the strategy is implemented.

Securities with embedded derivatives

The Sub-fund may hold products incorporating derivatives (preferential rights / warrants / EMTN / convertible bonds / bonds with warrants and more generally, all puttable/callable products) as part of the management of the equity Sub-fund:

- when these securities are detached from the shares held in the Sub-fund
- when it is more advantageous to acquire shares by purchasing and then exercising these securities (e.g. participation in a capital increase by first purchasing Preferential Subscription Rights on the market).

Deposits and cash

The Sub-fund may use deposits to optimise the management of the Sub-fund's cash and to manage the different subscription/redemption value dates of the underlying UCIs. It may place up to 20% of its net assets in deposits with a single credit institution.

The Sub-fund may hold cash on an ancillary basis, in particular to cover share redemptions by investors. The cash holding threshold may be raised to 20% when justified by exceptional market conditions.

Cash lending is prohibited.

Cash Borrowings

The Sub-fund may borrow cash. Although the Sub-fund is not intended to be a structural cash borrower, it may be in a debit position as a result of transactions linked to its payments (ongoing investments and divestments, subscriptions/redemptions, etc.), up to a limit of 2% of the Sub-fund's net assets.

Temporary acquisition and sale of securities:

None

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

Non applicable

7. Special cases of UCIs with sub-funds

The sub-fund may invest up to 10% of its net assets in shares of another sub-fund of the same UCI.

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk	The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.
Discretionary management risk	The discretionary management style is based on anticipating trends in the financial markets. The Fund's performance will depend on the issuers selected and the asset allocation defined by the manager. There is a risk that the Management Company will not select the best-performing securities and that the net asset value of the Fund will therefore fall.
Equity market risk	Fluctuations in equity markets may lead to significant changes in net assets, which may have a negative impact on the performance of the Fund. The net asset value of the fund may fall significantly.
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk.
Liquidity risk	Liquidity risk measures the difficulty that the fund may have in selling certain assets within a short timeframe in order to meet the need to raise cash or deal with a fall in their market value. Please note that over-the-counter markets do not offer immediate liquidity or enable assets to be sold at the price expected by the Fund.
Credit risk	The Fund may invest in fixed income products. Credit risk is the potential risk of issuer default or credit downgrade, which may lead to a fall in net asset value.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.
Counterparty risk	This is the risk associated with the Fund's use of over-the-counter financial futures instruments. These transactions, entered into with one or more eligible counterparties, potentially expose the Fund to a risk of default by one of its counterparties, which could lead to an event of default that would no longer allow the Fund to honour its commitments under these transactions.

Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none"> 1) lower revenues; 2) higher costs; 3) damage or depreciation in asset value; 4) higher cost of capital; 5) reputational risks and 6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>
---------------------------------------	---

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Legal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

Because of the high risk associated with an investment in equities, this sub-fund is intended primarily for investors who are prepared to withstand the sharp fluctuations inherent in equity markets and who have a minimum investment horizon of five years.

"A" shares are aimed at all subscribers, in particular retail investors and investors who subscribe through a distributor (asset management advisor, etc.).

"I" shares are open to all investors, and are more specifically intended for institutional investors who have received prior approval from the management company and whose minimum initial subscription is 1,000,000 euros (except for the management company, which may subscribe for 1 share).

"SI" shares are more specifically intended for institutional investors who have received prior approval from the management company and whose minimum initial subscription is 10 million euros (except for the management company, which may subscribe for 1 share).

"F" shares are open to all subscribers, and are more specifically intended for institutional investors who have received prior approval from the management company and whose minimum initial subscription is 4,000,000 euros (except for the management company, which may subscribe for 1 share) but who have subscribed before 31/12/2022.

"L" shares are open to all investors, and more specifically to institutional investors who have received prior approval from the management company and whose minimum initial subscription is 4,000,000 euros (except for the management company, which may subscribe for 1 share), but who have subscribed within 6 months of the creation of the share, i.e. before 16/12/2022.

"N" shares are open to all investors, more particularly:

- marketing networks that have received prior approval from the management company
- Or to distributors and intermediaries who have received prior approval from the management company and who provide the following services:
 - Independent advice within the meaning of MiFID regulations
 - Individual management under mandate

"Z" shares are reserved exclusively for:

- the management company
- the management company's staff (permanent employees and managers) and their unmarried spouses, parents and children
- FCPEs for employees of the Management Company
- life insurance or capitalisation companies for the equivalent value of the amount that would be invested in a unit of account representing the sub-fund's Z shares within a life insurance or capitalisation contract taken out by a member of the management company's staff, as well as their unmarried spouses, parents and children.

The SEXTANT TECH sub-fund may be used as a vehicle for unit-linked variable capital life insurance contracts.

11.2 Minimum recommended investment period

5 years

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the valuation models via the beta used to set the weighted average cost of capital (WACC). The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future 5 years cash requirements and your risk aversion. It is also advisable to diversify investments sufficiently to avoid excessive exposure to this Fund risk.

In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

Allocation of distributable income : Accumulation

13. Distribution frequency

Non applicable

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares).

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR0011050863 Share A	100 €	None
FR0011050889 Share I	50000 €	1,000,000 €
FR0013306412 Share N	185.76 €	100,000 € *
FR0011050897 Share Z	2000 €	None
FR001400BAA7 Share SI	10000 €	10,000,000 €
FR001400E5S0 Share F	10000 €	4,000,000 €
FR001400EMP4 Share L	10000 €	4,000,000 €

Subscriptions are accepted either in number of shares (expressed in thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in thousandths of shares).

How to submit subscription requests

Subscription and redemption requests are centralised each day of valuation before 11:00 with the custodian: CACEIS BANK, whose registered office is located at 89-91 rue Gabriel Péri – 92120 Montrouge RCS Nanterre.

Postal addresses of offices: CACEIS BANK.

They are executed on the basis of the next net asset value calculated on the basis of the closing price on the day on which the requests are centralised. Subscription and redemption requests received after 11:00 are processed on the basis of the net asset value calculated according to the method described above. The relevant payments will be made 2 business days after the valuation.

In the event of a public holiday or stock market closure, it will be calculated on the previous business day.

Shareholders' attention is drawn to the fact that orders transmitted to marketers other than the institutions mentioned above must take into account the fact that the order centralisation cut-off time applies to said marketers vis-à-vis CACEIS BANK. Consequently, these marketers may apply their own cut-off time, earlier than that mentioned above, in order to take account of their deadline for transmitting orders to CACEIS BANK.

Orders are centralised in accordance with the table below:

D business day	Day on which the NAV is established (D)	D+1 to D+3	D+2 business days	D+2 business days
Daily reception of orders and centralisation ^{Daily} before 11:00 (Paris time) of subscription* and redemption orders.	Orders are executed no later than day D	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions D-1 before 4pm

**Unless otherwise agreed with your financial institution.*

The Management Company monitors liquidity risk by Sub-Fund in order to ensure an appropriate level of liquidity for each Sub-Fund, particularly with regard to the risk profile, investment strategies and redemption policies in force for the funds. An analysis of the liquidity risk of the Sub-Fund## is carried out to ensure that the investments and funds have sufficient liquidity to honour the redemption of unitholders under normal and extreme market conditions. The Management Company has set up a liquidity management system and tools to ensure that investors are treated fairly.

The sub-fund has introduced a redemption cap mechanism (known as a "gate") as described below:

Redemption Capping Mechanism ("gate"):

The Management Company has implemented a liquidity management mechanism known as a "gate" or "redemption capping" to protect its investors. This mechanism allows, if necessary, the capping of redemptions when the redemption threshold objectively established by the Management Company is reached. The redemption threshold set by the Management Company for this Sub-Fund is 10% of the net assets. To determine the level of this threshold, the Management Company takes into account the frequency of calculating the net asset value of the UCITS, the investment orientation of the Sub-Fund, and the liquidity of its assets.

The trigger threshold for the gates corresponds to the ratio between:

- - the observed difference, on the same consolidation date, between the number of shares in the Sub-Fund for which redemption is requested or the total amount of these redemptions, and the number of shares in the Sub-Fund for which subscription is requested or the total amount of these subscriptions; and
- the net assets of the fund or the total number of units in the sub-fund.

In the event of triggering the gate, the Management Company reserves the right to spread redemptions over several net asset values. The capping of redemptions can be triggered, at the discretion of the Management Company, only in the case of exceptional market circumstances and if the interests of investors so require.

When redemption requests exceed the triggering threshold, and if liquidity conditions permit, the Management Company may decide to honour redemption requests beyond this threshold, thus partially or fully executing orders that may be blocked. Unexecuted redemption requests at a net asset value will be automatically carried over to the next consolidation date and executed on the next net asset value date. They cannot be revoked by the unit holders or shareholders.

For example, if the total redemption requests for shares represent 10% of the net assets of the Sub-Fund while the triggering threshold is set at 15% of the net assets, the Sub-Fund may decide to honour redemption requests up to 12% of the net assets (thus executing 80% of redemption requests) and thereby carry over the balance of unexecuted redemptions to the next consolidation.

The maximum duration of the redemption capping mechanism is set at 20 net asset values over 3 months for a UCITS with a daily valuation frequency .

Notification Procedures for Unit holders:

In the event of activating the "gate" mechanism, Sub-Fund investors will be informed by any means through the website <https://www.amiralgestion.com/fr>.

Sub-Fund investors whose redemption orders have not been executed will be informed promptly and in a special manner.

Treatment of Unexecuted Orders:

During the period of application of the "gate" mechanism, redemption orders will be executed in the same proportions for UCITS unit holders who have requested redemption at the same net asset value. The redemption orders thus carried over will not have priority over subsequent redemption requests. Unexecuted and automatically carried-over redemption orders cannot be revoked by UCITS unit holders.

Exemption from the "gates" mechanism:

Subscription and redemption transactions, for the same number of shares, based on the same net asset value and for the same investor or economic beneficiary (known as round-trip transactions), are not subject to a "gate."

This exclusion also applies to the transition from one class of shares to another class of shares, at the same net asset value, for the same amount and for the same investor or economic beneficiary.

16. Fees and commissions

16.1 Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid To the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
Subscription fee not earned To the Sub-Fund	Net asset value x number	A	2.00%
		I	5.00%
		N	5.00%
		Z	None
		SI	None
		F	5.00%
		L	5.00%

		I	None
		N	None
		Z	None
		SI	None
		F	None
		L	None

Subscription and redemption fees are not subject to VAT.

Exemptions:

It is possible to proceed, free of commissions, with simultaneous redemptions/subscriptions on the basis of the same net asset value for a zero balance transaction volume.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)
Financial management fees	Net asset	A	1.9% (incl. tax) maximum
		I	0.85% (incl. tax) maximum
		N	1.10% (incl. tax) maximum
		Z	None
		SI	0.7% (incl. tax) maximum
		F	0.7% (incl. tax) maximum
		L	0.7% (incl. tax) maximum
Operating Expenses and other services (flat-rate assessment of costs detailed below)	Net asset	Applied to the Fund	0.1% (incl. tax) maximum ¹

indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	None
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	A	15% (inclusive of tax) of the performance of the sub-fund in excess of the performance of the composite performance indicator, reinvested, provided that the performance is positive
		I N SI	15% (inclusive of tax) of the performance of the sub-fund in excess of the performance of the composite performance indicator, reinvested, provided that the performance is positive.
		Z F L	None

¹ The fixed maximum rate may be charged even if the actual fees are lower than it, and conversely, if the actual fees exceed the displayed rate, the excess beyond this rate will be borne by the Management Company

Detail of operating expenses and other services:

Operating expenses and other services include:

- (i) Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- (ii) Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- (iii) Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);
 - Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);
 - Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and messaging functions of Bloomberg).

- (iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.
- (v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring breaches of thresholds, exceeding ratios etc.).
- vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-financial constraints arising from specific client requests and specific to the UCITS).
- (vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French Monetary and Financial Code,
- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

Calculation of the performance fee (A, I, SI and N shares)

The performance fee is based on the comparison between the performance of the sub-fund's A, I and N shares and the composite

performance indicator, reinvested, over the financial year.

Variable management fees are deducted for the benefit of the Management Company as follows:

The sub-fund's performance is calculated on the basis of changes in net asset value:

- if, over the year, the performance of the sub-fund's A, I, SI and N shares is positive and greater than the performance of the composite indicator with dividends reinvested, the variable portion of the management fee will represent 15% (inclusive of tax) of the difference between the sub-fund's performance and the index.
- If, over the year, the performance of the sub-fund's A, I, SI and N shares is negative or less than that of the composite indicator, the variable portion will be zero.

The outperformance fee is calculated on the basis of the net assets of the A, I, SI and N shares on which the performance has been achieved, as well as the subscriptions and redemptions made in the Sub-fund. This method involves comparing the assets of the A, I, SI and N shares of the Sextant Tech sub-fund with the assets of a sub-fund based on the benchmark index, applying the same subscription and redemption flows.

- If, during the financial year, the performance of the A, I, SI and N shares of the sub-fund since the beginning of the financial year is positive and exceeds the benchmark threshold calculated over the same period, this outperformance will be subject to a provision for variable management fees when calculating the net asset value.
- in the event of underperformance of the sub-fund's A, I, SI and N shares relative to the benchmark between two net asset values and/or a negative performance, any provision made previously will be readjusted by a reversal of the provision. Reversals of provisions are capped at the amount of previous allocations..
- This variable portion will only be definitively received at the end of the financial year if the performance of the sub-fund's A, I, SI and N shares over the financial year exceeds the reference threshold and is positive..
- In the event of a share redemption, if there is a provision for variable management fees, the portion proportional to the shares redeemed is paid immediately to the management company.

The performance fee will only be paid at the end of the financial year if the performance of the Sub-fund's A, I, SI and N shares is positive and greater than that of the benchmark index.

The first outperformance fee calculation period ends at the close of June 2021.

Any underperformance of the Sub-fund relative to the benchmark is made up before outperformance fees become payable. To this end, the catch-up period is set at five years. If, during the catch-up period, a new underperformance is observed, this will trigger a new catch-up period of 5 years from the date of the observation in respect of this underperformance. Finally, if the underperformance has not been caught up after five years, it is no longer taken into account for the sixth year.

Illustration:

Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment	Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment
Year 1	5	0	Yes	Year 7	5	0	Yes
Year 2	0	0	No	Year 8	-10	-10	No
Year 3	-5	-5	No	Year 9	2	-8	No
Year 4	3	-2	No	Year 10	2	-6	No
Year 5	2	0	No	Year 11	2	-4	No
Year 6	5	0	Yes	Year 12	0	0*	No

**The underperformance to be offset in year 12 is reset to 0 and not to -4 due to the application of the 5-year catch-up period starting in year 8.*

The past performances of the Sub-fund are available on the website of Amiral Gestion.

The sub-fund will only invest in cash UCITS/AIFs for which the Management Company has been able to negotiate a total exemption from entry and exit fees.

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and evaluates them periodically to ensure the quality of the services provided. Research fees are included in the transaction fees and are deducted from the Fund for each transaction.

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

3. Delegation of financial management

Non applicable

4. Management objective and investment strategy**4.1 Management objective**

SEXTANT Global Smaller Companies is a dynamic sub-fund whose objective is to outperform its benchmark, the MSCI World Small Cap Index (EUR), through a selection of international equities, without seeking to replicate the benchmark.

4.2 Benchmark index

Investors' attention is drawn to the fact that the index does not reflect the management objective of the Sub-Fund. As the management style (see below) is discretionary, the composition of the sub-fund will never seek to replicate the composition of the benchmark index, either geographically or by sector however, the MSCI World Small Cap Index (EUR), converted into euro and dividends reinvested (Bloomberg ticker : M1WOSC) may be used as an ex-post performance indicator.

The MSCI World Small Cap Index (EUR) aims to measure the performance of the equity markets of 23 developed countries, for a total of 4166 securities. The index covers approximately 14% of the free float-adjusted market capitalisation in each country.

At the date of the last update of this prospectus, the administrator of the MSCI index making up the benchmark index is listed in the register of administrators and benchmark indices maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used, describing the measures to be implemented in the event of substantial changes to an index or cessation of supply of that index.

4.3 Investment strategy**❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE**

To achieve its investment objective, the SEXTANT Global Smaller Companies sub-fund is exposed to between 90% and 110% of its net assets in international equities. The investment universe is made up of international equities from OECD countries, including French equities, listed on regulated markets and with a capitalisation below the upper limit of its benchmark index at the time of investment (i.e. EUR 29 billion at 31 March 2024).

The sub-fund may also invest on an incidental basis (i) in equities listed on non-OECD markets (emerging markets) and (ii) in international equities, including French equities, listed on regulated markets and having a current capitalisation higher than the upper limit of the benchmark index at the time of investment (as indicated above).

The geographical composition of the sub-fund is not benchmarked, although the managers may seek to approximate the geographical exposure of the benchmark index.

The portion of assets not invested in equities, due to a lack of opportunities offering a sufficient margin of safety, is invested in fixed income, money market or bond products (excluding liquidity linked to the management of subscription/redemption flows).

Investment process

The process involves a number of stages, including (i) fundamental analysis of companies and their business models, including ESG criteria, (ii) valuation work, leading to (iii) an investment decision.

i) Fundamental analysis

The SEXTANT Global Smaller Companies sub-fund is based on a rigorous selection of securities obtained after an internal

fundamental analysis, summarised in the global "Quality rating" of Amiral Gestion. During this phase, whenever possible, the managers contact the company and its managers to perfect their understanding of its activities and business model, to address strategic issues, and finally to deal with issues related to the financial statements (income statement, cash flow statement, balance sheet). Where necessary, the Management Company supplements this strategic and financial understanding with on-site visits to form its own opinion and to verify certain information provided by the company. Fundamental analysis, which includes ESG criteria, is based on various criteria:

- The quality of the company's management and governance, assessed in particular by the quality and consistency of communication with minority shareholders, the compensation structure of senior executives and their track record, the long-term importance of taking into account the interests of customers and shareholders in operations, but also those of other stakeholders such as employees, society or the environment;
- Capital allocation, or the ability to allocate available capital as efficiently as possible given the options available to the management team (internal investment, debt reduction, returns to shareholders, acquisitions);
- The quality of its financial structure, assessed by the ability to generate cash in relation to debt and/or the presence of monetizable tangible assets;
- The sustainability and robustness of the business model;
- Growth prospects, enabling capital to be reinvested with returns in excess of the cost of capital;
- The presence of competitive advantages such as a distribution network, economies of scale, a brand, patents, an installed base, etc.
- Criteria relating to social, environmental and governance issues, which are the subject of a specific independent rating called an "internal ESG rating" integrated into the overall quality rating.

The examination of these different criteria determines what Amiral Gestion calls its "Quality score", which varies from 0 to 10. A high rating reflects strong company fundamentals. This rating is one of the elements that guide the investment decision and can feed into the ongoing dialogue with companies.

ii) Valuation

Each company monitored is subject to a valuation model that incorporates historical accounts, forecasts, valuation ratios and a discounted cash flow (DCF) model. Amiral Gestion considers that the valuation of a company is linked to the measurement of its capacity to generate free cash flows, which is why the management team uses a DCF model to assess the intrinsic value of a company. This model includes a 5 to 10 year history of the accounts with:

- A detailed analysis of sales and their breakdown by geographical area and business activity;
- An analysis of the income statement, balance sheet and cash flow statement, using all the information available, particularly in the annual reports, to make all the restatements necessary for an economic reading of the accounts that is consistent between our different files;
- Detailed forecasts based on various assumptions supported by our surveys.

iii) Investment decision

All of this analytical work makes it possible to define a target intrinsic valuation (see valuation model above, DCF), as well as an Internal Quality Score (see above), which also includes the Internal ESG Score. These elements allow us to draw conclusions about the company's risks and its attractiveness. Systematic exclusion of issuers involved in severe controversies (level 5 on the Sustainability scale). Monitoring and active dialogue with issuers exposed to serious controversies (level 4) Investment decisions also depend on the existence of a « safety margin » which is the difference between the intrinsic value of a company (in the opinion of fund managers) and its market value (i.e. capitalisation). Note that environmental, social and governance (ESG) criteria are one component of investment policy, but their weight in the final decision is not defined beforehand. Controlling the ESG quality of the portfolio, in accordance with the requirements of the SRI Label and the France Reliance Label, which the Sub-fund holds. The positions are set up with a medium to long-term holding horizon (more than two years).

The SEXTANT Global Smaller Companies sub-fund may be managed in sub-portfolios. This management method is specific to Amiral Gestion. It is based on the free decision-making of each manager-analyst and relies on collective expertise. The Sub-fund's assets are divided into several sub-portfolios, each of which is managed independently by one of the team's manager-analysts. All the investment cases issued are studied, debated and analysed as a group. All the investment cases put forward are studied, debated and criticised collectively.

At the end of this process, everyone is free to invest or not in their sub-portfolio according to their own convictions or to follow the views championed by another manager. A coordinating manager ensures that investments are consistent with the sub-fund's strategy. The positions are set up for long-term conservation (more than two years).

.Extra-financial approaches applicable to the sub-fund:

The Sub-fund's non-financial approach is not backed by a specific sustainable benchmark, but it promotes environmental and social characteristics while ensuring good corporate governance practices via a combination of non-financial approaches, notably:

- Monitoring the portfolio's average external ESG score relative to the average external ESG score of its universe. (Main source: MSCI ESG Rating¹). The portfolio's benchmark universe is an index consistent with the Sub-Fund's investment strategy and made up of around 4,260 companies: the MSCI Small Cap World Local.
- Environmental, social and governance (ESG) criteria are incorporated into the fundamental analysis, via the internal Quality Score, which is made up of ESG criteria (around one third).
- Compliance with the sub-fund's sectoral exclusion policy: thermal coal, tobacco, weapons, controversies, pornography, non-conventional fossil fuels with the exception of North American shale oil and gas, in accordance with the terms and thresholds of the

Amiral Gestion exclusion policy applicable to the sub-fund. This policy is available on the Amiral Gestion website, in the "Responsible Investment" section.

- Compliance with the normative exclusion policy: exclusion/non-investment in issuers that violate the principles of the United Nations Global Compact and/or the OECD Guidelines for Multinational Enterprises, after internal verification and confirmation of non-compliance by the Controversies Monitoring Committee. Monitoring of companies with Sustainalytics Watchlist status, and whose status is confirmed by the Controversies Monitoring Committee following an internal review.
- Exclusion/non-investment in issuers exposed to severe controversies, i.e. level 5 according to the Sustainalytics severity scale and research confirmed following an internal review by the Controversies Monitoring Committee. Particular attention is also paid to controversies relating to climate change, biodiversity, fundamental human rights and fiscal responsibility.

In addition,

- the Sub-Fund undertakes to systematically² take part in the votes of the companies invested in by applying the principles of the Management Company's proprietary voting policy
- when the portfolio invests in UCITS (excluding cash management), the company will give preference, where possible, to UCITS with the same SFDR classification as that of the Sub-Fund.

These extra-financial approaches are described in detail in the Sub-Fund's pre-contractual Appendix 2. These extra-financial approaches are described in greater detail in the Sub-Fund's pre-contractual SFDR Appendix 2.

Part verte - Taxonomie européenne

The principle of "cause no significant harm" applies only to investments underlying the financial product that take into account the European Union's criteria for environmentally sustainable economic activities.

The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

Sustainable investment

Although it does not have an investment strategy centred on a sustainable investment objective within the meaning of the Disclosure SFDR regulation, the sub-fund undertakes³ to present a minimum proportion of 5% of sustainable investments.

Refer to the pre-contractual Appendix 2 of the SFDR RTS to understand the criteria used by Amiral Gestion to determine the proportion of sustainable investments within the portfolio.

DNSH⁴ SFDR and consideration of Key Negative Impacts⁵

The Sub-Fund implements several complementary DNSH schemes to ensure that its investments do not cause significant environmental and social harm. These include: i) a set of investment rules for the whole portfolio (sectoral and normative exclusions and controversies; attention to Principal Adverse Impacts); ii) stricter requirements for sustainable investments; iii) monitoring of governance practices by tracking "G" ratings and controversies, which in some cases may lead to dialogue with the company. These mechanisms are described in the Sub-Fund's pre-contractual SFDR Appendix 2.

Within the scope of DNSH, the Sub-Fund has, since 31.12.2022, notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) of its investments on sustainability factors, in order to identify and to take appropriate action. The Sub-Fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS. Amiral Gestion's "PAI" policy, including details of the sources and methods used to take each indicator into account, is available on its website, under the "Responsible Investment" heading: <https://www.amiralgestion.com/fr/investissement-responsable/>. The metrics and information on how the main negative impacts have been taken into account will be published annually in the Sub-Fund's periodic "Appendix 4 SFDR" document, for the first time in 2024 for the 2023 financial year.

This combination of extra-financial approaches, described in detail in the pre-contractual appendix 2 of the SFDR RTS (available in the appendix to this prospectus or on the Amiral Gestion website: <https://www.amiralgestion.com/fr/nos-fonds-sextant>), classifies the sub-fund as an 'Article 8' category according to the classification of the so-called 'Disclosure - SFDR' regulation.

¹ Mainly MSCI ESG and, failing that, the ESG performance rating of the Amiral reference framework taken from Ethifinance's Gaïa database to complete the coverage if necessary

² Except in the event of a technical constraint preventing voting in exceptional circumstances

³ Commitment effective from 1 January 2024

⁴ DNSH = Do No Significant Harm

⁵ Principal adverse impacts ('PAIs'), are defined as the impacts of investment decisions that result in significant or potentially significant adverse impacts on sustainability factors (environmental, social and personnel issues, respect for human rights and the fight against corruption and bribery).

✦ ELIGIBLE ASSETS

Shares

The SEXTANT Global Smaller Companies sub-fund invests at least 90% of its net assets in equities. Equity investments depend exclusively on the investment opportunities presented to the managers on a case-by-case basis, and not on macroeconomic considerations.

These may be shares listed on all regulated markets throughout the world, regardless of their market capitalisation or sector. The Sub-fund may also invest up to 10% of its net assets in non-traded companies and in non-organised or unregulated market.

SEXTANT Global Smaller Companies tends to invest in the international equity markets of OECD countries. The sub-fund may, on an ancillary basis, invest in equities listed on markets outside the OECD (emerging markets), i.e. countries whose per capita GDP is lower

than that of the major industrialised countries but whose economic growth is higher.

The Sub-fund may also invest in securities that are equivalent to equities (non-voting preference shares, investment certificates, founder shares, or their equivalent in the country concerned).

Debt securities and money market instruments

The sub-fund may invest up to 10% of its net assets in bonds and money market instruments.

Investments in money market instruments are denominated in Euros and have a maximum maturity of twelve months. They will have a minimum rating (Standard & Poor's A3 / Moody's P-3 / Fitch Ratings F3) or, where they are not rated, must be deemed equivalent according to the Management Company's analysis.

The Management Company prefers, however, to invest cash in UCITS/FIAs with a "standard money market" or "short-term money market" classification or UCITS/FIAs with an AMF classification of "Bonds and other debt securities denominated in euro" or "International bonds and other debt securities".

The Sub-fund may invest in all types of bonds, regardless of currency or credit rating.

Investments in high-yield bonds and securities with a Standard & Poor's rating of less than BBB- will remain below 10% of net assets. The sub-fund may also invest in securities treated as bonds (convertible bonds, bonds with warrants, redeemable equity securities).

As regards fixed-income securities, the management company carries out its own credit and market risk analysis when selecting securities on acquisition and during their lifetime. It therefore does not rely exclusively on ratings provided by rating agencies.

Investments in securities of other UCITS, AIFs and/or investment funds

The Sub-fund may invest up to 10% of its net assets in securities of other French and/or European UCITS or AIFs, mainly in connection with the investment of cash via standard money market UCITS/AIFs and short-term money market UCITS/AIFs. On an ancillary basis, the Sub-fund may invest in UCITS/AIFs classified as equities or bonds that are compatible with the management policy of the Sub-fund. The sub-fund may invest up to 5% of its net assets in foreign investment funds and non-general purpose investment funds (FCPR, etc.) that meet the criteria set out in article R.214-13 of the French Monetary and Financial Code.

These UCIs and investment funds may be managed by Admiral Gestion.

Derivatives and securities with embedded derivatives

Transactions involving derivatives (purchases of call or put options on equities, indices, interest rates or currencies, and purchases or sales of futures, forward exchange contracts or swaps on equities, indices, interest rates or currencies) and securities that are part of derivatives shall be carried out in order to expose or partially hedge the Sub-fund against favourable or unfavourable trends in equities, indices, interest rates and currencies. There will be no overexposure. These instruments will be traded on regulated and/or organised or over-the-counter markets.

Futures (contracts on financial instruments) relating to commodity indices will be carried out in compliance with the 5/10/20/40 ratio.

Call options on securities will be sold while holding the underlying security as part of strategies to optimise the return on the sub-fund's securities.

Put options on securities will be written as part of strategies to potentially acquire such securities at a price below the market price at the time the strategy is implemented.

The Sub-fund may hold products incorporating derivatives (preferential rights/warrants, warrants, convertible bonds) as part of its equity portfolio management:

- when these securities are detached from the shares held in the portfolio;
- when it is more advantageous to acquire shares by purchasing and then exercising these securities (e.g. participation in a capital increase by first purchasing Preferential Subscription Rights on the market).

Deposits and cash

The Sub-fund may use deposits to optimise the management of the Sub-fund's cash and to manage the different subscription/redemption value dates of the underlying UCIs. It may place up to 20% of its net assets in deposits at a single credit institution.

The sub-fund may hold cash on an ancillary basis, in particular to cover share redemptions by investors. The cash holding threshold may be raised to 20% of net assets when justified by exceptional market conditions.

Cash lending is prohibited.

Cash Borrowings

The Sub-fund may borrow cash. Although it is not intended to be a structural cash borrower, the Sub-fund may be in a debit position as a result of transactions linked to its paid-in flows (ongoing investments and divestments, subscriptions/redemptions, etc.), up to a limit of 10% of the net assets.

Temporary acquisition and sale of securities:

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

Non applicable

7. Special cases of UCIs with sub-funds

The sub-fund may invest up to 10% of its net assets in shares of another sub-fund of the same UCI.

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk	The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.
Discretionary management risk	The discretionary management style is based on anticipating trends in the financial markets. The Fund's performance will depend on the issuers selected and the asset allocation defined by the manager. There is a risk that the Management Company will not select the best-performing securities and that the net asset value of the Fund will therefore fall.
Emerging markets risk	The Fund may invest on an ancillary basis in equities listed on markets outside the OECD. Investors' attention is drawn to the fact that the operating and supervisory conditions of these markets may deviate from the standards prevailing in the major international markets.
Equity market risk	Fluctuations in equity markets may lead to significant changes in net assets, which may have a negative impact on the performance of the Fund. The net asset value of the fund may fall significantly.
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk.
Risk related to the size of the capitalisation of the selected securities	The Fund may invest in small- and mid-cap markets, as the volume of securities listed on the stock exchange is reduced, and market movements are therefore more pronounced on the downside and faster than in large-cap markets. The fund's net asset value may therefore fall more quickly and more sharply.
Credit risk	The Fund may invest in fixed income products. Credit risk is the potential risk of issuer default or credit downgrade, which may lead to a fall in net asset value.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.
Counterparty risk	This is the risk associated with the Fund's use of over-the-counter financial futures instruments. These transactions, entered into with one or more eligible counterparties, potentially expose the Fund to a risk of default by one of its counterparties, which could lead to an event of default that would no longer allow the Fund to honour its commitments under these transactions.
Risk associated with the use of derivatives	The use of derivatives can lead to significant variations in the net asset value over short periods, both upwards and downwards.

Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none"> 1) lower revenues; 2) higher costs; 3) damage or depreciation in asset value; 4) higher cost of capital; 5) reputational risks and 6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>
---------------------------------------	---

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Lgal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

"A" shares are open to all subscribers. However, due to the high risk associated with an investment in equities, this sub-fund is intended primarily for investors who are prepared to withstand the sharp fluctuations inherent in the equity markets and who have a minimum investment horizon of five years.

"Z" shares are reserved exclusively for:

- the management company
- the management company's staff (permanent employees and managers) and their unmarried spouses, parents and children.
- FCPEs for employees of the Management Company
- life insurance or capitalisation companies for the equivalent value of the amount that would be invested in a unit of account representing the Z shares of the sub-fund within a life insurance or capitalisation contract taken out by a member of staff of the management company or their unmarried spouses, parents and children.

"I" shares are open to all subscribers, and are more specifically intended for institutional investors who have received prior approval from the management company and whose minimum initial subscription is 3,000,000 euros (except for the management company, which may subscribe for 1 share).

"N" shares are open to all subscribers, more particularly:

- marketing networks that have received prior approval from the management company
- Or to distributors and intermediaries who have received prior authorisation from the management company and who provide an independent advisory service within the meaning of MiFID regulations
 - Individual management under mandate.

The Sextant Global Smaller Companies sub-fund may be used as a vehicle for unit-linked variable capital life insurance policies.

11.2 Minimum recommended investment period

More than 5 years

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial

accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the valuation models via the beta used to set the weighted average cost of capital (WACC). The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future More than 5 years cash requirements and your risk aversion. It is also advisable to diversify investments sufficiently to avoid excessive exposure to this Fund risk. In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

Allocation of distributable income : Accumulation

13. Distribution frequency

Non applicable

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares).

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR0010286021 Share A	100 €	None
FR0011171263 Share I	1000 €	3,000,000 €
FR0013306420 Share N	221.90 €	100,000 € *
FR0010373183 Share Z	100 €	None

* Share N : Excluding investments that have been made as part of an exchange of A shares.

Subscriptions are accepted either in number of shares (expressed in thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in thousandths of shares).

How to submit subscription requests

Subscription and redemption requests are centralised the day before the valuation day before 16:00 with the custodian: CACEIS BANK, whose registered office is located at 89-91 rue Gabriel Péri – 92120 Montrouge RCS Nanterre.

Postal addresses of offices: CACEIS BANK.

They are executed on the basis of the next net asset value calculated on the basis of the closing price on the day on which the requests are centralised. Subscription and redemption requests received after 16:00 are processed on the basis of the net asset value calculated according to the method described above. The relevant payments will be made 2 business days after the valuation.

In the event of a public holiday or stock market closure, it will be calculated on the previous business day.

Shareholders' attention is drawn to the fact that orders transmitted to marketers other than the institutions mentioned above must take into account the fact that the order centralisation cut-off time applies to said marketers vis-à-vis CACEIS BANK. Consequently, these marketers may apply their own cut-off time, earlier than that mentioned above, in order to take account of their deadline for transmitting orders to CACEIS BANK.

Orders are centralised in accordance with the table below:

D-1 business day	Day on which the NAV is established (D)	D+1 to D+3	D+2 business days	D+2 business days
Daily reception of orders and centralisation Daily before 16:00 (Paris time) of subscription and redemption orders.	Orders are executed no later than day D	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions D-1 before 4pm

The Management Company monitors liquidity risk by Sub-Fund in order to ensure an appropriate level of liquidity for each Sub-Fund, particularly with regard to the risk profile, investment strategies and redemption policies in force for the funds. An analysis of the liquidity risk of the Sub-Fund## is carried out to ensure that the investments and funds have sufficient liquidity to honour the redemption of unitholders under normal and extreme market conditions. The Management Company has set up a liquidity management system and tools to ensure that investors are treated fairly.

The sub-fund has introduced a redemption cap mechanism (known as a "gate") as described below:

Redemption Capping Mechanism ("gate"):

The Management Company has implemented a liquidity management mechanism known as a "gate" or "redemption capping" to protect its investors. This mechanism allows, if necessary, the capping of redemptions when the redemption threshold objectively established by the Management Company is reached. The redemption threshold set by the Management Company for this Sub-Fund is 10% of the net assets. To determine the level of this threshold, the Management Company takes into account the frequency of calculating the net asset value of the UCITS, the investment orientation of the Sub-Fund, and the liquidity of its assets.

The trigger threshold for the gates corresponds to the ratio between:

- - the observed difference, on the same consolidation date, between the number of shares in the Sub-Fund for which redemption is requested or the total amount of these redemptions, and the number of shares in the Sub-Fund for which subscription is requested or the total amount of these subscriptions; and
- the net assets of the fund or the total number of units in the sub-fund.

In the event of triggering the gate, the Management Company reserves the right to spread redemptions over several net asset values. The capping of redemptions can be triggered, at the discretion of the Management Company, only in the case of exceptional market circumstances and if the interests of investors so require.

When redemption requests exceed the triggering threshold, and if liquidity conditions permit, the Management Company may decide to honour redemption requests beyond this threshold, thus partially or fully executing orders that may be blocked. Unexecuted redemption requests at a net asset value will be automatically carried over to the next consolidation date and executed on the next net asset value date. They cannot be revoked by the unit holders or shareholders.

For example, if the total redemption requests for shares represent 10% of the net assets of the Sub-Fund while the triggering threshold is set at 15% of the net assets, the Sub-Fund may decide to honour redemption requests up to 12% of the net assets (thus executing 80% of redemption requests) and thereby carry over the balance of unexecuted redemptions to the next consolidation.

The maximum duration of the redemption capping mechanism is set at 20 net asset values over 3 months for a UCITS with a daily valuation frequency .

Notification Procedures for Unit holders:

In the event of activating the "gate" mechanism, Sub-Fund investors will be informed by any means through the website <https://www.amiralgestion.com/fr>.

Sub-Fund investors whose redemption orders have not been executed will be informed promptly and in a special manner.

Treatment of Unexecuted Orders:

During the period of application of the "gate" mechanism, redemption orders will be executed in the same proportions for UCITS unit holders who have requested redemption at the same net asset value. The redemption orders thus carried over will not have priority over subsequent redemption requests. Unexecuted and automatically carried-over redemption orders cannot be revoked by UCITS unit holders.

Exemption from the "gates" mechanism:

Subscription and redemption transactions, for the same number of shares, based on the same net asset value and for the same investor or economic beneficiary (known as round-trip transactions), are not subject to a "gate."

This exclusion also applies to the transition from one class of shares to another class of shares, at the same net asset value, for the same amount and for the same investor or economic beneficiary.

16. Fees and commissions

16.1 Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid To the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
Subscription fee not earned To the Sub-Fund	Net asset value x number	A	2.00%
		I	4.00%
		N	5.00%
		Z	None
Subscription fee earned To the Sub-Fund	Net asset value x number	A	None
		I	None
		N	None
		Z	None
Redemption fee not earned To the Sub-Fund	Net asset value x number	A	1.0%
		I	1.0%
		N	1.0%
		Z	None
Redemption fee earned To the Sub-Fund	Net asset value x number	A	None
		I	None
		N	None
		Z	None

Subscription and redemption fees are not subject to VAT.

Exemptions:

It is possible to proceed, free of commissions, with simultaneous redemptions/subscriptions on the basis of the same net asset value for a zero balance transaction volume.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)

Financial management fees	Net asset	A	2% (incl. tax) maximum
		I	1.2% (incl. tax) maximum
		N	1.2% (incl. tax) maximum
		Z	None
Operating Expenses and other services (flat-rate assessment* of costs detailed below)	Net asset	Applied to the Fund	0.1% (incl. tax) maximum ¹
indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	None
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	A I N	15% (incl. tax) of the positive performance of the A, N or I share of the Fund over and above its benchmark index (MSCI World Small Cap Index (EUR)) per calendar year.
		Z	None

* Effective from 01/01/2025

¹ The fixed maximum rate may be charged even if the actual fees are lower than it, and conversely, if the actual fees exceed the displayed rate, the excess beyond this rate will be borne by the Management Company

Detail of operating expenses and other services:

Operating expenses and other services include:

- (i) Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- (ii) Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- (iii) Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);
 - Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);
 - Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and messaging functions of Bloomberg).

(iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.

(v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring breaches of thresholds, exceeding ratios etc.).

vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-financial constraints arising from specific client requests and specific to the UCITS).

(vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French

Monetary and Financial Code,

- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

Calculation of the outperformance fee (A, N and I shares)

Variable management fees are deducted for the benefit of the management company as follows: performance fee.

The performance fee is based on the comparison between the performance of the A, N or I shares of the Sub-fund and the benchmark (MSCI World Small Cap Index (EUR)), over the financial year.

The sub-fund's performance is calculated as follows:

- if, over the year, the performance of the sub-fund's A, N or I shares is positive and greater than its benchmark index (MSCI World Small Cap Index (EUR)), the variable portion of the management fees will represent 15% (inclusive of tax) of the difference between the sub-fund's performance and the benchmark index (MSCI World Small Cap Index (EUR)).
- If, over the year, the performance of the sub-fund's A, N or I shares is negative or less than its benchmark index, the variable portion will be nil.

The performance fee is calculated on the basis of the net assets on which the performance was achieved and the subscriptions and redemptions made on the A, N or I shares of the Sub-fund. This method involves comparing the assets of the A, N or I shares of the Sextant Autour du Monde sub-fund with the assets of a sub-fund following the benchmark threshold by applying the same subscription and redemption flows.

- If, during the financial year, the performance of the A, N or I shares of the sub-fund since the beginning of the financial year is positive and greater than the benchmark threshold calculated over the same period, this outperformance will be subject to a provision for variable management fees when calculating the net asset value.
 - In the event of underperformance of the sub-fund's A, N or I shares relative to the benchmark between two net asset values or of a negative performance, any provision made previously will be readjusted by a reversal of the provision. Reversals of provisions are capped at the amount of previous allocations.
 - This variable portion will only be definitively received at the end of the financial year if the performance of the sub-fund's A, N or I shares over the financial year exceeds the reference threshold and is positive.
 - In the event of a share redemption, if there is a provision for variable management fees, the portion proportional to the shares redeemed is paid immediately to the management company.

These costs (fixed and possibly variable) are charged directly to the income statement of the Sub-fund

Any underperformance of the Sub-fund relative to the benchmark is made up before outperformance fees become payable. To this end, the catch-up period is set at five years. If, during the catch-up period, a new underperformance is observed, this will trigger a new catch-up period of 5 years from the date of the observation in respect of this underperformance. Finally, if the underperformance has not been caught up after five years, it is no longer taken into account for the sixth year.

Illustration:

Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment	Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment
Year 1	5	0	Yes	Year 7	5	0	Yes
Year 2	0	0	No	Year 8	-10	-10	No
Year 3	-5	-5	No	Year 9	2	-8	No
Year 4	3	-2	No	Year 10	2	-6	No
Year 5	2	0	No	Year 11	2	-4	No
Year 6	5	0	Yes	Year 12	0	0*	No

*The underperformance to be offset in year 12 is reset to 0 and not to -4 due to the application of the 5-year catch-up period starting in year 8.

The past performances of the Sub-fund are available on the website of Amiral Gestion.

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and evaluates them periodically to ensure the quality of the services provided. Research fees are included in the transaction fees and are deducted from the Fund for

each transaction.

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

1. ISIN code

Share A	FR0010286013
Share N	FR0013306404
Share Z	FR0010373209

2. Classification

None

3. Delegation of financial management

Non applicable

4. Management objective and investment strategy**4.1 Management objective**

The objective is through discretionary asset allocation and security selection, to achieve capital growth over the recommended investment period by gaining exposure to the equity and fixed income markets. The objective is to achieve an annual performance of 5% for "A" shares and 5.70% for "N" shares over the recommended investment period, with a minimum recommended investment period of 5 years.

It should be noted that the manager cannot enter into an obligation to achieve results. The above-mentioned objective is based on the Management Company's market assumptions and does not under any circumstances constitute a promise of return or performance of the Sub-Fund.

4.2 Benchmark index

As management is discretionary, the benchmark index composed of " 50% of the ESTER index and 50% of the MSCI AC World Index, converted into euros and dividends reinvested (Bloomberg ticker : M1WD) (since April 30, 2018) " may be used to compare the performance of the Sub-Fund after the fact. This indicator does not reflect the management of the sub-fund; performance may therefore differ from that of the index.

The ESTER (Euro Short-Term Rate) index corresponds to an effective rate determined on the basis of a weighted average of all overnight transactions executed on the eurozone interbank market by the banks in the sample.

The objective of the MSCI All Countries World Index is to measure the performance of the equity markets of developed and emerging countries. At December 2019, this index consisted of 49 countries (23 developed countries and 26 emerging countries) with a total of 2852 stocks. The index covers around 85% of all global equity investment opportunities.

As of the last update of this prospectus, only the administrator of the MSCI index composing the benchmark index is registered in the register of administrators and benchmark indices maintained by ESMA. On the other hand, Note that the ESTER administrator benefits from the exemption in Article 2.2 of the benchmark regulation as a central bank and, as such, does not have to be entered in the register of administrators and benchmarks maintained by ESMA).

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used, describing the measures to be implemented in the event of substantial changes to an index or cessation of supply of that index.

4.3 Investment strategy**❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE**

The manager has sole discretionary power.

Asset allocation depends exclusively on investment opportunities, particularly in equities, which present themselves to the managers on a case-by-case basis and not on macroeconomic considerations.

The management objective of SEXTANT GRAND LARGE is based, in the case of equities (and in part in the case of convertible bonds), on a rigorous selection of securities, obtained after an internal fundamental analysis carried out by the management company, the main criteria of which are :

- the quality of the company's management
- the quality of its financial structure
- the visibility of the company's future results
- the business's growth prospects
- the company's policy towards its minority shareholders (transparency of information, dividend distribution, etc.).)

- and, to a lesser extent, the speculative aspect of the value linked to a special situation (takeover bids, public exchange offers, squeeze-outs and their equivalents in the countries concerned)

The management team endeavours as far as possible to meet directly with the companies in which the sub-fund invests or is likely to invest.

The sub-fund may invest up to 15% of its net assets in contingent convertible securities, with the aim of diversifying the portfolio and boosting yield, while controlling exposure.

Investment decisions then depend essentially on the existence of a "margin of safety" made up of the difference between the market value of the company as assessed by the managers and its market value (market capitalisation). In this sense, it is possible to speak of "value investing".

The lines are set up with a long-term holding objective (more than two years).

The part of the assets that has not been invested in equities, for lack of opportunities with a sufficient safety margin, is invested in fixed income products, monetary or bonds.

Extra-financial approaches applicable to the sub-fund

The sub-fund's extra-financial approach is not backed by a specific sustainable benchmark, but it promotes environmental and social characteristics while ensuring good corporate governance practices, through a combination of extra-financial approaches, in particular:

- Monitoring the portfolio's average external ESG score relative to the average external ESG score of its universe. (Main source: MSCI ESG Rating). The benchmark used to compare ESG performance is a composite equity and bond benchmark universe consistent with the Sub-Fund's investment strategy, made up of around 17,000 securities and without taking ESG performance into account when compiling it.
- The inclusion of environmental, social and governance (ESG) criteria in the fundamental analysis of equity investments, via the internal Quality Score, of which around a third includes ESG criteria.
- Compliance with the sub-fund's sectoral exclusion policy: thermal coal, tobacco, controversial weapons, pornography, civil firearms, non-conventional fossil fuels, with the exception of North American oil and shale gas. The criteria, thresholds and methods of application of this vigilance and exclusion policy are specified in the Amiral Gestion sectoral policy applicable to the Sub-Fund. This policy is available on the Amiral Gestion website: <https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>
- The compliance with the normative exclusion policy: exclusion/non-investment in issuers that violate the principles of the United Nations Global Compact and the OECD Guidelines for Multinational Enterprises, after internal verification and confirmation of non-compliance by the Controversies Monitoring Committee. Monitoring of companies with Sustainability Watchlist status, and whose status is confirmed by the Controversies Monitoring Committee following an internal review.
- Exclusion/non-investment in issuers exposed to severe controversies, i.e. level 5 according to the Sustainability severity scale and research confirmed following an internal review by the Controversies Monitoring Committee. Particular attention is also paid to controversies relating to climate change, biodiversity, fundamental human rights and fiscal responsibility

In addition,

- the Sub-Fund undertakes to systematically² take part in the voting of companies invested in shares, applying the principles of the Management Company's proprietary voting policy
- when the portfolio invests in UCITS (excluding cash management), the company will, where possible, give preference to UCITS with the same SFDR classification as that of the Sub-Fund.

These extra-financial approaches are described in more detail in the Sub-Fund's pre-contractual SFDR Appendix 2.

Part verte - Taxonomie européenne

The principle of "cause no significant harm" applies only to investments underlying the financial product that take into account the European Union's criteria for environmentally sustainable economic activities.

The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

Sustainable investment

Although it does not have an investment strategy centred on a sustainable investment objective within the meaning of the Disclosure SFDR regulations, the Sub-Fund undertakes to present a minimum proportion of 10% sustainable investments.

Refer to the pre-contractual Appendix 2 of the SFDR RTS to understand the criteria used by Amiral Gestion to determine the proportion of sustainable investments within the portfolio.

DNSH³ SFDR and consideration of Key Negative Impacts⁴

The Sub-Fund implements several complementary DNSH schemes to ensure that its investments do not cause significant environmental and social harm. These include: i) a set of investment rules for the whole portfolio (sectoral and normative exclusions and controversies; attention to Principal Adverse Impacts); ii) stricter requirements for sustainable investments; iii) monitoring of governance practices by tracking "G" ratings and controversies, which in some cases may lead to dialogue with the company. These mechanisms are described in the Sub-Fund's pre-contractual SFDR Appendix 2.

Within the scope of DNSH, the Sub-Fund has, since 31.12.2022, notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) of its investments on sustainability factors, in order to identify and to take appropriate action. The Sub-Fund thus follows 14 mandatory SFDR PAI indicators and 2 additional indicators selected from the list of optional PAI from Appendix 1 of the SFDR RTS.

Amiral Gestion's "PAI" policy, including details of the sources and methods used to take each indicator into account, is available on its website, in the 'Responsible Investment' section: <https://www.amiralgestion.com/fr/investissement-responsable/The metrics and>

information on how the main negative impacts have been taken into account will be published annually in the Sub-Fund's periodic 'Appendix 4 SFDR' document, for the first time in 2024 for the 2023 financial year.

This combination of extra-financial approaches, described in detail in the pre-contractual appendix 2 of the SFDR RTS (available in the appendix to this prospectus or on the Amiral Gestion website: <https://www.amiralgestion.com/fr/nos-fonds-sextant>), classifies the sub-fund as an 'Article 8' category according to the classification of the so-called 'Disclosure - SFDR' regulation.

¹ *Mainly MSCI ESG and, failing that, the ESG performance rating of the Amiral reference framework taken from Ethifinance's Gaïa database to complete the coverage if necessary*

² *Except in the event of a technical constraint preventing voting in exceptional circumstances*

³ *DNSH = Do No Significant Harm*

⁴ *Principal adverse impacts ('PAIs'), are defined as the impacts of investment decisions that result in significant or potentially significant adverse impacts on sustainability factors (environmental, social and personnel issues, respect for human rights and the fight against corruption and bribery).*

♣ ELIGIBLE ASSETS

Shares

SEXTANT GRAND LARGE invests between 0 and 100% of net assets in equities. These may be shares listed on all regulated markets throughout the world, regardless of their market capitalisation or sector.

SEXTANT GRAND LARGE's management focuses on European equity markets. However, the Sub-fund may invest up to 25% of its net assets in equities outside the euro zone and outside the OECD, including emerging markets.

The Sub-fund may also invest up to 100% of its net assets in securities treated as equities (non-voting preferred shares, investment certificates, founder's shares). The Sub-fund may also invest up to 10% of its net assets in non-traded companies and in non-organised or unregulated market.

Debt securities and money market instruments

The sub-fund may invest up to 100% of its net assets in bonds and money market instruments.

Investments in money market instruments are denominated in euros and have a maximum maturity of twelve months. They must have a minimum rating (Standard & Poor's A3 / Moody's P-3 / Fitch Ratings F3) or, where they do not have a rating, must be deemed equivalent according to the Management Company's analysis.

The Management Company, however, prefers to invest cash in money market UCITS/ AIFs or dynamic short-term money market UCITS/ AIFs.

The sub-fund may invest in all bond securities, regardless of currency or credit rating. Investments in speculative bonds considered "high yield", i.e. securities rated below BBB- by Standard & Poor's or, if not rated, securities considered to be of equivalent quality according to the analysis carried out by the Management Company, will remain below 50% of the net assets.

The sub-fund may also invest in securities treated as bonds equivalents (convertible bonds, bonds with warrants, redeemable equity securities). ...). The sub-fund may invest up to 15% of its net assets in contingent convertible securities in order to diversify the portfolio and increase returns, while controlling exposure.

As regards fixed-income securities, the management company carries out its own credit and market risk analysis when selecting securities on acquisition and during their lifetime. It therefore does not rely exclusively on ratings provided by rating agencies. There will be no overexposure.

Investments in securities of other UCITS, AIFs and/or investment funds

Without seeking to overexpose the portfolio, the Sub-fund may invest up to 10% of its net assets in securities of other French or European UCITS or AIFs, mainly for cash investments via money market UCITS/AIFs and short-term money market UCITS/IFAs, as well as in UCITS/AIFs classified as equities or bonds that are compatible with the management of the Sub-fund. These UCIs and investment Sub-funds may be managed by the Management Company.

The sub-fund may invest up to 5% of its net assets in open-ended or closed-ended foreign investment funds (holding no more than 10% of the units of UCIs or foreign investment funds) that meet the criteria set out in article R.214- 13 of the French Monetary and Financial Code, or in AIFs. However, the sub-fund will never invest in approved FCPR (venture capital funds) or similar funds. The sub-fund does not invest in securitisation vehicles. The Sub-fund may invest in shares of another Sub-fund of the same UCITS.

Derivatives and securities with embedded derivatives

Derivative products

Transactions involving derivatives (purchases or sales of call or put options on equities, indices, interest rates or currencies, volatility, and purchases or sales of forward exchange contracts, futures or swaps on equities, indices, interest rates or currencies, volatility) and securities that are part of derivatives shall be carried out in order to expose or hedge the Sub-fund against favourable or unfavourable trends in equities, indices, interest rates and currencies. The manager may also trade in credit derivatives (credit default swaps).

Exposure to derivatives and embedded derivatives is limited to 20% of net assets, with the exception of volatility exposure through futures and options, which is limited to 10% of net assets. The UCITS may therefore be exposed to 120% of its assets.

These instruments will be traded on regulated and/or organised or over-the-counter markets.

Futures (contracts on financial instruments) relating to commodity indices will be carried out in compliance with the 5/10/20/40 ratio.

Securities with complex derivatives attached: the Sub-fund may have recourse to securities with Cocos attached, to a maximum of 25% of net assets.

Option strategies : depending on the manager's expectations, he can sell or buy equity market options, rates or volatility. For example, if he anticipates a rise in the market, he may buy calls; if he thinks the market will rise slowly and that implied volatility is high, he may sell puts. On the other hand, if he anticipates a decline in the market, he will buy puts. Finally, if he thinks that the market can no longer rise, he will sell calls. The manager can combine these different strategies.

Credit derivatives :

The credit allocation is made on a discretionary basis by the manager.

The credit derivatives used are CDS indices (CDX or iTraxx type) and single issuer CDSs. Single-issuer CDSs may be used subject to the standardisation of the contract and the information available on the markets concerning the underlying entity. Similarly, index CDSs will be subject to the liquidity and accessibility of the index.

These credit derivatives are used for hedging purposes through the purchase of protection:

- to limit the risk of capital loss on certain issuers (present in the sub-fund)
- in order to benefit from an anticipated deterioration in the creditworthiness of an issuer or a basket of issuers not present in the sub-fund that is greater than that of an exposure present in the sub-fund.

and for exposure purposes through the sale of protection:

- to the credit risk of an issuer
- to the credit risk on CDS indices

As CDS may be used for exposure to credit risk or to hedge the sub-fund's credit risk, the use of indices for this purpose could result in transactions which, on a line-by-line basis, could be considered as arbitrage (hedging of the sub-fund's overall credit risk by issuers, parent companies, subsidiaries or other entities not present in the sub-fund).

The percentage of the Sub-fund's assets corresponding to the use of credit derivatives is between 0% and 20%.

Securities with embedded derivatives

The Sub-fund may hold products incorporating derivatives (preferential rights/warrants, warrants, convertible bonds) as part of its equity portfolio management:

- when these securities are detached from the shares held in the portfolio;
- when it is more advantageous to acquire shares by purchasing and then exercising these securities (e.g. participation in a capital increase by first purchasing Preferential Subscription Rights on the market).

Deposits and cash

The Sub-fund may use deposits to optimise the management of the Sub-fund's cash and to manage the different subscription/redemption value dates of the underlying UCIs. It may place up to 20% of its net assets in deposits a single credit institution.

The sub-fund may hold cash on an ancillary basis, in particular to cover share redemptions by investors. The liquidity holding threshold may be raised to 20% of net assets when justified by exceptional market conditions. There will be no overexposure.

Cash loans are prohibited.

Cash Borrowings

The Sub-fund may borrow cash. Although it is not intended to be a structural cash borrower, the sub-fund may be in a debit position as a result of transactions linked to its paid-in flows (ongoing investments and divestments, subscriptions/redemptions, etc.), up to a limit of 10% of the net assets.

Temporary acquisition and sale of securities:

None

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

Non applicable

7. Special cases of UCIs with sub-funds

The sub-fund may invest up to 10% of its net assets in shares of another sub-fund of the same UCI.

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk	The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.
Equity market risk	Fluctuations in equity markets may lead to significant changes in net assets, which may have a negative impact on the performance of the Fund. The net asset value of the fund may fall significantly.
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk.
Risk related to the size of the capitalisation of the selected securities	The Fund may invest in small- and mid-cap markets, as the volume of securities listed on the stock exchange is reduced, and market movements are therefore more pronounced on the downside and faster than in large-cap markets. The fund's net asset value may therefore fall more quickly and more sharply.
Credit risk	The Fund may invest in fixed income products. Credit risk is the potential risk of issuer default or credit downgrade, which may lead to a fall in net asset value.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.
Counterparty risk	This is the risk associated with the Fund's use of over-the-counter financial futures instruments. These transactions, entered into with one or more eligible counterparties, potentially expose the Fund to a risk of default by one of its counterparties, which could lead to an event of default that would no longer allow the Fund to honour its commitments under these transactions.
Contingent bonds risk	CoCos are hybrid securities whose main purpose is to enable the issuing bank or financial company to be recapitalised in the event of a financial crisis. These securities have loss-absorption mechanisms, described in their issue prospectuses, which are generally activated if the issuer's capital ratio falls below a certain "trigger" level. The trigger is firstly mechanical: it is generally based on the CET1 (Common Equity Tier 1) accounting ratio in relation to risk-weighted assets. To compensate for the discrepancy between book values and financial reality, there is a discretionary clause allowing the supervisor to activate the loss-absorption mechanism if it considers that the issuing institution is in a situation of insolvency. CoCos are therefore subject to specific risks, including subordination to precise trigger criteria (e.g. deterioration in the equity ratio,) conversion into shares, loss of capital or non-payment of interest. The use of subordinated bonds, particularly Additional Tier 1 bonds, exposes the fund to the following risks: <ul style="list-style-type: none"> - triggering of contingent clauses: if a capital threshold is crossed, these bonds are either exchanged for shares or undergo a capital reduction, potentially to 0. - cancellation of coupon: Coupon payments on this type of instrument are entirely discretionary and can be cancelled by the issuer at any time, for any reason, with no time constraints. - capital structure: unlike traditional secured debt, investors in this type of instrument can suffer a loss of capital without the prior bankruptcy of the company. In addition, the subordinated creditor will be repaid after the ordinary creditors, but before the shareholders. - Callable perpetuals: These instruments are issued as perpetual instruments, callable at predetermined levels only with the approval of the competent authority - valuation / yield: The attractive yield on these securities can be seen as a complexity premium.
Risk associated with the use of derivatives	The use of derivatives can lead to significant variations in the net asset value over short periods, both upwards and downwards.

Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none"> 1) lower revenues; 2) higher costs; 3) damage or depreciation in asset value; 4) higher cost of capital; 5) reputational risks and 6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>
---------------------------------------	---

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Legal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

"A" shares are open to all subscribers. However, due to the high risk associated with an investment in equities, this sub-fund is intended primarily for investors who are prepared to withstand the sharp fluctuations inherent in the equity markets and who have a minimum investment horizon of five years.

"N" shares are intended for all subscribers, more particularly:

- marketing networks that have received prior approval from the management company
- Or to distributors and intermediaries who have received prior authorisation from the management company and who provide the following services:
 - Independent advice within the meaning of MiFID 2
 - Individual management under mandate

"Z" shares are reserved exclusively for:

- the management company
- the management company's staff (permanent employees and managers) and their unmarried spouses, parents and children
- FCPEs for employees of the Management Company
- life insurance or capitalisation companies for the equivalent of the amount that would be invested in a unit of account representing the sub-fund's Z shares within a life insurance or capitalisation contract taken out by a member of the management company's staff, as well as their unmarried spouses, parents and children.

SEXTANT GRAND LARGE may be used as a vehicle for unit-linked variable capital life insurance contracts.

11.2 Minimum recommended investment period

5 years

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the valuation models through the Beta used to define the weighted average cost of capital (WACC) for equity management and to the issuer selection process and the determination of issuers' weight in the portfolio for bond management.

The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future 5 years cash requirements and your risk aversion. It is also advisable to diversify investments sufficiently to avoid excessive exposure to this Fund risk.

In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

Allocation of distributable income : Accumulation

13. Distribution frequency

Non applicable

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares).

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR0010286013 Share A	100 €	None
FR0013306404 Share N	451.71 €	100,000 € *
FR0010373209 Share Z	100 €	None

* Share N : With the exception of investments made as part of an exchange of Sextant Grand Large "A" shares.

Subscriptions are accepted either in number of shares (expressed in thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in thousandths of shares).

How to submit subscription requests

Subscription and redemption requests are centralised each day of valuation before 11:00 with the custodian: CACEIS BANK, whose registered office is located at 89-91 rue Gabriel Péri – 92120 Montrouge RCS Nanterre.

Postal addresses of offices: CACEIS BANK.

They are executed on the basis of the next net asset value calculated on the basis of the closing price on the day on which the requests are centralised. Subscription and redemption requests received after 11:00 are processed on the basis of the net asset value calculated according to the method described above. The relevant payments will be made 2 business days after the valuation.

In the event of a public holiday or stock market closure, it will be calculated on the previous business day.

Shareholders' attention is drawn to the fact that orders transmitted to marketers other than the institutions mentioned above must take into account the fact that the order centralisation cut-off time applies to said marketers vis-à-vis CACEIS BANK. Consequently, these marketers may apply their own cut-off time, earlier than that mentioned above, in order to take account of their

deadline for transmitting orders to CACEIS BANK.

Orders are centralised in accordance with the table below:

D business day	Day on which the NAV is established (D)	D+1 to D+3	D+2 business days	D+2 business days
Daily reception of orders and centralisation Daily before 11:00 (Paris time) of subscription* and redemption orders.	Orders are executed no later than day D	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions D-1 before 4pm

**Unless otherwise agreed with your financial institution.*

The Management Company monitors liquidity risk by Sub-Fund in order to ensure an appropriate level of liquidity for each Sub-Fund, particularly with regard to the risk profile, investment strategies and redemption policies in force for the funds. An analysis of the liquidity risk of the Sub-Fund is carried out to ensure that the investments and funds have sufficient liquidity to honour the redemption of unitholders under normal and extreme market conditions. The Management Company has set up a liquidity management system and tools to ensure that investors are treated fairly.

The sub-fund has introduced a redemption cap mechanism (known as a "gate") as described below:

Redemption Capping Mechanism ("gate"):

The Management Company has implemented a liquidity management mechanism known as a "gate" or "redemption capping" to protect its investors. This mechanism allows, if necessary, the capping of redemptions when the redemption threshold objectively established by the Management Company is reached. The redemption threshold set by the Management Company for this Sub-Fund is 10% of the net assets. To determine the level of this threshold, the Management Company takes into account the frequency of calculating the net asset value of the UCITS, the investment orientation of the Sub-Fund, and the liquidity of its assets.

The trigger threshold for the gates corresponds to the ratio between:

- - the observed difference, on the same consolidation date, between the number of shares in the Sub-Fund for which redemption is requested or the total amount of these redemptions, and the number of shares in the Sub-Fund for which subscription is requested or the total amount of these subscriptions; and
- the net assets of the fund or the total number of units in the sub-fund.

In the event of triggering the gate, the Management Company reserves the right to spread redemptions over several net asset values. The capping of redemptions can be triggered, at the discretion of the Management Company, only in the case of exceptional market circumstances and if the interests of investors so require.

When redemption requests exceed the triggering threshold, and if liquidity conditions permit, the Management Company may decide to honour redemption requests beyond this threshold, thus partially or fully executing orders that may be blocked. Unexecuted redemption requests at a net asset value will be automatically carried over to the next consolidation date and executed on the next net asset value date. They cannot be revoked by the unit holders or shareholders.

For example, if the total redemption requests for shares represent 10% of the net assets of the Sub-Fund while the triggering threshold is set at 15% of the net assets, the Sub-Fund may decide to honour redemption requests up to 12% of the net assets (thus executing 80% of redemption requests) and thereby carry over the balance of unexecuted redemptions to the next consolidation.

The maximum duration of the redemption capping mechanism is set at 20 net asset values over 3 months for a UCITS with a daily valuation frequency .

Notification Procedures for Unit holders:

In the event of activating the "gate" mechanism, Sub-Fund investors will be informed by any means through the website <https://www.amiralgestion.com/fr>.

Sub-Fund investors whose redemption orders have not been executed will be informed promptly and in a special manner.

Treatment of Unexecuted Orders:

During the period of application of the "gate" mechanism, redemption orders will be executed in the same proportions for UCITS unit holders who have requested redemption at the same net asset value. The redemption orders thus carried over will not have priority over subsequent redemption requests. Unexecuted and automatically carried-over redemption orders cannot be revoked by UCITS unit holders.

Exemption from the "gates" mechanism:

Subscription and redemption transactions, for the same number of shares, based on the same net asset value and for the same investor or economic beneficiary (known as round-trip transactions), are not subject to a "gate."

This exclusion also applies to the transition from one class of shares to another class of shares, at the same net asset value, for the same amount and for the same investor or economic beneficiary.

16. Fees and commissions

16.1 Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid To the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
Subscription fee not earned To the Sub-Fund	Net asset value x number	A	2.00%
		N	5.00%
		Z	None
Subscription fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		Z	None
Redemption fee not earned To the Sub-Fund	Net asset value x number	A	1.0%
		N	1.0%
		Z	None
Redemption fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		Z	None

Subscription and redemption fees are not subject to VAT.

Exemptions:

It is possible to proceed, free of commissions, with simultaneous redemptions/subscriptions on the basis of the same net asset value for a zero balance transaction volume.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)
Financial management fees	Net asset	A	1.7% (incl. tax) maximum
		N	1% (incl. tax) maximum
		Z	None
Operating Expenses and other services (flat-rate assessment* of costs detailed below)	Net asset	Applied to the Fund	0.1% (incl. tax) maximum ¹

indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	None
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	A N	15% (incl. tax) of the performance of the sub-fund in excess of 5% for the A share and 5.7% for the N share per calendar year
		Z	None

* Effective from 01/01/2025

¹ The fixed maximum rate may be charged even if the actual fees are lower than it, and conversely, if the actual fees exceed the displayed rate, the excess beyond this rate will be borne by the Management Company

Detail of operating expenses and other services:

Operating expenses and other services include:

- (i) Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- (ii) Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- (iii) Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);
 - Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);
 - Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and messaging functions of Bloomberg).

(iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.

(v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring breaches of thresholds, exceeding ratios etc.).

vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-financial constraints arising from specific client requests and specific to the UCITS).

(vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French Monetary and Financial Code,
- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

Calculation of the outperformance fee (A and N shares)

The outperformance fee is based on the comparison between the performance of the sub-fund's A or N shares and the reference threshold over the financial year.

Variable management fees are deducted for the benefit of the Management Company as follows:

The performance of the sub-fund is calculated on the basis of changes in the net asset value:

- if, over the year, the performance of the sub-fund's A shares is greater than 5% or 5.7 for N shares, the variable portion of the management fee will represent 15% (inclusive of tax) of the difference between the sub-fund's performance and the benchmark threshold.

- if, over the year, the performance of the sub-fund's A shares is less than 5% of the benchmark or 5.7 for N shares, the variable portion will be nil.
- At each net asset value calculation, the outperformance is defined as the positive difference between the net assets of the sub-fund's A or N shares before taking into account any provision for outperformance fees, and the net assets of a notional sub-fund achieving an annualised performance of 5% for A shares or 5.7 for N shares and recording the same pattern of subscriptions and redemptions as the actual sub-fund if, during the financial year, the performance of the sub-fund's A or N shares since the beginning of the financial year is higher than the benchmark threshold calculated over the same period, this outperformance will be subject to a provision for variable management fees when calculating the net asset value.
- In the event that the sub-fund's A or N shares underperform the benchmark between two net asset values, any provision made previously will be readjusted by reversing the provision. Reversals of provisions are capped at the level of previous allocations.
- This variable portion will only be paid definitively at the end of the financial year if the performance of the A or N shares of the sub-fund exceeds the reference threshold.

Any underperformance of the Sub-fund relative to the benchmark is made up before outperformance fees become payable. For this purpose, an observation period of 1 to 5 years is established with a reset of the calculation at each performance fee deduction. In order to comply with the above recommendations, it must be ensured that any underperformance is carried forward for a minimum period of five years before a performance fee becomes payable. Accordingly, the management company must take into account the last five years to offset underperformance.

If during this period the A or N shares of the Sub-fund have outperformed the reference threshold, the Management Company may crystallise the performance fee and deduct it.

The table below sets out these principles on the basis of example performance assumptions over a 12-year period: Illustration:

Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment	Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment
Year 1	5%	0%	Yes	Year 7	5%	0%	Yes
Year 2	0%	0%	No	Year 8	-10%	-10%	No
Year 3	-5%	-5%	No	Year 9	2%	-8%	No
Year 4	3%	-2%	No	Year 10	2%	-6%	No
Year 5	2%	0%	No	Year 11	2%	-4%	No
Year 6	5%	0%	Yes	Year 12	0%	0%*	No

Illustration Notes:

**The underperformance of year 12 to be carried forward to the next year (YEAR 13) is 0% (not -4%) because the remaining underperformance of year 8 that has not yet been offset (-4%) is no longer relevant as the five-year period has elapsed. (the underperformance of year 8 is compensated until year 12).*

The past performances of the Sub-fund are available on the website of Amiral Gestion.

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and evaluates them periodically to ensure the quality of the services provided. Research fees are included in the transaction fees and are deducted from the Fund for each transaction.

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

Share Z	FR0010556753

2. Classification

Equities of european union countries

3. Delegation of financial management

Non applicable

4. Management objective and investment strategy**4.1 Management objective**

SEXTANT PME is a sub-fund that applies a discretionary strategy. Its objective is to outperform the benchmark (MSCI EMU (European Economic and Monetary Union) Micro Cap Net Return EUR) through a selection of European SMEs. Its investment horizon is over five years. The Sub-Fund also aims to invest in companies that stand out for their good ESG practices, according to a ESG selectivity based on a best-in-class approach, but also to support those with good potential for improvement, particularly in terms of controlling environmental impacts, according to a best-effort approach based on shareholder engagement.

4.2 Benchmark index

Investors' attention is drawn to the fact that the index does not reflect the management objective of the Sub-Fund. As the management style (see below) is discretionary, the composition of the portfolio will never seek to replicate the composition of the benchmark index, either geographically or by sector; however, the MSCI EMU (European Economic and Monetary Union) Micro Cap Net Return EUR may be used as an a posteriori performance indicator.

This index is calculated by MSCI, its Bloomberg code is: M7EMRC.

At the date of this prospectus, the benchmark index administrator, MSCI, is listed on the register of benchmark index administrators maintained by ESMA.

The benchmark index is administered by MSCI Limited, an administrator registered in accordance with Article 34 of Regulation (EU) 2016/1011 and listed on the register of benchmark index administrators maintained by ESMA.

4.3 Investment strategy**❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE**

To achieve its investment objective, the SEXTANT PME sub-fund invests in small and mid-cap equities.

Investment decisions then depend essentially on the existence of a "margin of safety" constituted by the difference between the market value of the company as assessed by the managers and its market value (market capitalisation). In this sense, it is possible to speak of 'value investing'.

The positions are set up with a long-term holding objective (more than two years) and the portfolio is relatively concentrated.

The portion of the assets that has not been invested in equities, due to a lack of opportunities with a sufficient margin of safety, is invested in fixed-income products, money-market or bonds.

SEXTANT PME invests a minimum of 75% of its net assets in equities and securities eligible for the PEA, with a preponderant proportion invested in securities of French companies (a minimum of 30% of the Fund's assets in equity instruments¹ issued by companies whose registered office is located in France), and a minimum of 50% in the European Union's SME segment, of which a minimum of 10% of the net assets is invested in equity instruments, as defined above, of French listed SMEs and micro businesses; The fund is eligible for PEA (French equity savings plan)/SME /ETI (medium sized entities).

Exposure to markets other than those of the European Union is limited to 10% of net assets.

The Sextant PME sub-fund may be managed in sub-portfolios. This management method is specific to Amiral Gestion. It is based on the free decision-making of each manager-analyst and relies on collective expertise. All investment cases are studied, debated and analysed as a group. At the end of this process, each investor is free to invest or not in his sub-portfolio according to his own convictions or to follow the ideas defended by another manager. All the investment cases put forward are studied, debated and critiqued as a team.

At the end of this process, everyone is free to decide whether or not to invest in their sub-portfolio according to their own convictions, or to follow the views of another manager. A coordinating manager ensures that investments are consistent with the sub-fund's strategy.

Socially responsible investment (SRI) approach applicable to the sub-fund

The investment process fully integrates ESG criteria at the heart of its fundamental analysis. The Sub-fund aims to invest in companies that stand out for their good ESG practices, using a best-in-class approach, but also to support those with good potential for improvement by conducting an active dialogue with them, in order to guide them towards a progress approach on the main key ESG issues of their sector of activity (sources of significant impacts, existing levers for improvement), and with a focus on controlling environmental impacts in particular. This approach is based on a dual responsibility that underpins the management team's efforts and sums up their philosophy of responsible investment:

- the fiduciary responsibility of the management team through the central role of ESG analysis in understanding and identifying the material risks of the company and its sources of value creation;
- their societal and shareholder responsibility as an investor.

Sextant PME's SRI approach is mainly based on a selective ESG approach, i.e. using extra-financial filters to reduce the initial investment universe by at least 20%. The universe is made up of around 1,220 European stocks, divided into groups of small and mid-caps, using data from the Gaïa Ratings database of our extra-financial rating agency partner Ethifinance. This allocation is consistent with the sub-fund's investment strategy².

In accordance with the requirements of the Relance Label (the French "Recovery" Label) and the SRI label held by the sub-fund, Sextant PME is also committed to being more highly rated than its investment universe. This commitment to quality is reflected in three indicators described below: one adopting an ESG rating approach, two adopting an indicator approach.

1. An ESG indicator aggregated within the Global ESG Performance Score : this score translates into the average ESG score of the portfolio on all E, S and G criteria taken into account in the ESG analysis grid of Amiral Gestion.
2. The portfolio's performance on two environmental and governance impact indicators
 - Governance / Business conduct : Formalisation of a business conduct and anti-corruption policy
 - Environment/Climate change: Carbon footprint (WACI measure)³: Weighted average of carbon intensity ratios per sales item (sum of weight * intensity ratio for each item), for Scope 1, Scope 2 and Scope 3 upstream.

Two other progress indicators of a social and human rights nature are also monitored with the aim of improving the portfolio's performance in relation to its investment universe : the Sextant PME Sub-fund is thus committed to targeting portfolio companies for their performance on these indicators and/or via its commitment actions to improve them in order to reduce the gap with the universe if the portfolio is underperforming and/or to exceed it in order to widen the gap within three years. The two indicators concerned are :

- Social /Promoting gender equality Average proportion of women on the Executive Committee
- Human rights : Publication of a human rights policy

Investment process

Therefore, the investment process of this sub-fund is based on different stages, namely (i) the definition of the eligible investment universe through a combination of screenings including a best-in-class filter and leading to the reduction of the initial universe by at least 20%. (ii) fundamental analysis of companies and their business model, including in particular the study of ESG criteria and shareholder engagement, (iii) valuation work, leading to (iv) an investment decision, followed by (v) control of the ESG quality of the portfolio.

i. The definition of the universe of eligible securities by reducing the initial universe by at least 20% through the application of several filters

The universe of eligible securities of the SEXTANT PME sub-fund is determined according to :

- **Compliance with the sub-fund's sectoral exclusion policy** (coal, conventional and unconventional fossil fuels, controversial weapons, conventional and nuclear weapons, tobacco, pornography)⁴
- **Compliance with our normative exclusion policy**: exclusion of companies that violate the principles of the United Nations Global Compact and/or the OECD guidelines for international companies, and monitoring of companies on the Sustainalytics Watchlist whose status is confirmed by the Controversy Monitoring Committee following an internal review.
- **The ineligibility of stocks with the worst ESG ratings and a commitment to minimum portfolio coverage** : to ensure that the companies included in the sub-fund's portfolio meet a minimum threshold of requirements, the ratings of the stocks in the universe are screened by the management team using its proprietary evaluation method based in particular on Ethifinance's Gaïa Ratings database. At least 90% of the companies in the portfolio are thus covered by an ESG analysis; the maximum 10% not covered is intended to take into account exceptional cases that do not allow for immediate coverage (small caps for which ESG information is not available or is not readily available, IPOs, etc.). The minimum ESG rating applied to the Sextant PME SRI Sub-Fund is 25/100.
- **The investment ban and the exclusion of companies exposed to serious or severe controversies**, (i) respectively of levels 4 and 5 according to the Sustainalytics classification and/or (ii) after an internal review and analysis by the Controversy Oversight Committee to confirm the reality and severity of controversies. Particular attention is also paid to controversies relating to climate change, biodiversity, fundamental human rights and fiscal responsibility.

The combination of these screenings leads to a selective approach to the entry of the Sub-fund for all new investments, but also to close and continuous monitoring of the portfolio that can lead to the exclusion of certain stocks in case of non-compliance with these criteria. **The investment universe is thus reduced by a minimum of 20%.**

The sources and methodologies of these various ESG screenings are described on the Amiral Gestion website: <https://www.amiralgestion.com/investissement-responsable/>

In addition, when the portfolio invests in UCITS (excluding cash management), the company will give preference, where possible, to UCITS with the same SFDR classification as that of the Sub-Fund and holders of the SRI label.

ii. Fundamental analysis including ESG criteria and shareholder commitment

The SEXTANT PME Sub-fund relies on a rigorous selection of securities obtained after an internal fundamental analysis, summarised

in the overall "Quality rating" of Amiral Gestion. During this phase, whenever possible, the managers contact the company and its managers to perfect their understanding of its activities and business model, to address strategic issues, and finally to deal with issues related to the financial statements (income statement, cash flow statement, balance sheet). Where necessary, the Management Company supplements this strategic and financial understanding with on-site visits (e.g. to industrial sites) to form its own opinion and to verify some of the information provided by the company.

This fundamental analysis is based on the study of various criteria:

- business model: recurrence, predictability, cyclicity, barriers to entry;
- quality of management: operational and financial track record, respect for minority shareholders, motivation, training and profit-sharing of employees, quality of relations with third parties;
- quality of financial structure: balance sheet, realisable assets, level of debt;
- criteria relating to social, environmental and governance aspects which are the subject of a specific independent rating called the "Internal ESG rating" integrated into the overall quality rating.

The study of these different criteria determines what Amiral Gestion calls its "Quality rating", which varies from 0 to 10. A high rating reflects strong company fundamentals. This rating is one of the factors used to guide the investment decision (see point 4) and can be used to fuel ongoing dialogue with companies, or even the implementation of engagement actions when this proves necessary in the context of potentially material ESG risks.

Supporting companies in their progress is a central objective of the sub-fund's SRI approach, and shareholder engagement is at the heart of Sextant PME's investment process. This best-effort approach takes the form of an active dialogue, which can be conducted with all the companies in the portfolio, but gives priority to those :

- Whose ESG analysis would reveal :
 - **Particularly material issues that could have an impact on the company's development potential** (for example, adapting the product mix to environmental or social issues exposed to existing or future regulatory changes).
 - **The shortcomings on certain criteria**, likely to result in strong negative externalities and/or a management risk over the long term.
- **Which would be exposed to an ESG controversy**, in particular in connection with a violation of the United Nations Global Compact, determining the level of severity and/or recurrence.
- Which would be among **the main contributors to the carbon intensity of the sub-fund**, or for those with **strong environmental issues**.
- **Whose performance on the two social and human rights indicators mentioned below could be improved, with the Sextant PME sub-fund committing to an objective of improving the portfolio's performance relative to its investment universe :**
 - Social / Promotion of gender equality: Average proportion of women on the Executive Committee
 - Human rights Publication of a policy in favour of human rights

With this in mind, the Sextant PME sub-fund is committed to improving the performance of the companies in its portfolio in order to reduce the gap with the universe if the portfolio is underperforming and/or to exceed it in order to widen the gap within 3 years.

These dialogue and commitment initiatives enable us to closely monitor the progress made by companies, to adjust their ESG ratings and may, in certain cases, lead us to disinvest if an improvement is deemed insufficient. The shareholder engagement approach applied to the Sub-fund is also embodied in the systematic participation in general meetings, in accordance with Amiral Gestion's proprietary voting policy⁶.

iii. Valuation

Each company monitored is subject to a valuation model that incorporates historical accounts, forecasts, valuation ratios and a discounted cash flow model (hereafter "DCF"). Amiral Gestion believes that a company's valuation is linked to its ability to generate free cash flow, which is why the management team uses a DCF model to assess a company's intrinsic value. This model includes a history of the accounts over 5 to 10 years:

- with: a detailed analysis of sales and their breakdown by geographical area and by activity;
- an analysis of the income statement, balance sheet and cash flow statement, using all the information available, particularly in the annual reports, to make all the restatements necessary for an economic reading of the accounts that is consistent between our different files;
- detailed forecasts based on various assumptions supported by our surveys.

iv. Investment decision

All of this analysis is used to define a target intrinsic valuation (see valuation model above, DCF), as well as an Internal Quality Score (see above), which also includes the Internal ESG Score. These factors make it possible to deduce the risks and attractiveness of each company. Potential, which is based on the target intrinsic value, combined with the Internal Quality Score, enables us to rank each company in terms of investment interest within the sub-fund.

Investment decisions also depend on the existence of a "margin of safety" made up of the difference between the market value of the company as assessed by the managers and its market value (market capitalisation).

It should be noted that environmental, social and governance (ESG) criteria are one of the components of management, but their weighting in the final decision is not defined upstream.

This investment process is documented and is the subject of an investment case incorporating the various elements of analysis mentioned.

The positions are set up with a view to holding them over the medium to long term (more than two years).

v. Controlling the ESG quality of the portfolio, in accordance with the requirements of the SRI Label and the Relance Label (the French "Recovery" Label), which the sub-fund bears

In order to ensure that the ESG characteristics of the portfolio are consistent with the sub-fund's extra-financial objective, Amiral

Gestion relies on :

- Monitoring an ESG Performance Score for which the sub-fund's portfolio is committed to being rated better than the investment universe. The source data making up the ESG Performance Score comes from our internal analysis as well as indicators selected by our teams from Ethifinance's Gaia Ratings database. This rating helps to determine the eligible universe and to calculate the ESG quality of the Sextant PME portfolio, in respect of which the sub-fund is committed to having an ESG performance rating higher than that of its investment universe of around 550 French and European companies, in accordance with the requirements of the Relance Label Charter (the French "Recovery" Label), which the sub-fund holds⁷.
- Monitoring the performance of 2 quality indicators, one on environmental issues and the other on governance, in respect of which the sub-fund's portfolio is committed to achieving a better rating than the investment universe :
 - Environment / Climate change: Carbon intensity
 - Governance / Business conduct : Formalisation of a business conduct and anti-corruption policy;

The Sextant PME sub-fund includes these extra-financial impact indicators in its semi-annual report, including those in respect of which the sub-fund is committed to outperforming its investment universe. Its monthly reporting also includes at the very least the sub-fund's average ESG performance rating in relation to its universe, as well as its carbon intensity.

The UCI is **subject to a sustainability risk** as defined in the risk profile. These sustainability risks are taken into account through the environmental and social characteristics of the sub-fund mentioned below, and through the application of a common set of responsible investment practices applicable to all the UCIs managed by Amiral Gestion, described in the document " Extra-financial communication under the SFDR Disclosure regulation, at the entity level " available on its website: <https://www.amiralgestion.com/investissement-responsable/>.

Investissement durable

The UCI does not have a sustainable investment objective, but it promotes environmental and social characteristics while ensuring good corporate governance practices, via its non-financial approaches (compliance with minimum thresholds for portfolio coverage by an ESG analysis, SRI selectivity of at least 20%, ESG integration in the fundamental analysis, commitment to an average ESG performance rating higher than that of its universe, commitment to a better performance of the portfolio than its universe on certain non-financial impact indicators, normative and sectoral exclusions specific to the Sub-Fund, shareholder commitment) described above in the investment strategy, thus qualifying it as an " Article 8 " Sub-Fund according to the classification of the "SFDR Disclosure" regulation. The SRI Transparency Code, which sets out the transparency of the sub-fund's environmental and social characteristics, is available on the sub-fund's dedicated website: <https://www.amiralgestion.com/fr/sextant-pme>

Although it does not have an investment strategy focused on a sustainable investment objective within the meaning of the Disclosure SFDR regulation, the sub-fund undertakes to present a minimum proportion of 30% of sustainable investments. Sustainable investment according to Amiral Gestion is defined as an investment in a financial instrument relating to one or more economic activities:

- substantially contributing to environmental objectives : i) environmental mitigation of climate change in order to achieve carbon neutrality by 2050 in accordance with the Paris Climate Agreements; ii) adaptation⁸ to the effects of climate change
- making a net positive contribution to one or more of the United Nations Sustainable Development Goals (SDGs) of a social nature by 2030;

Provided that these investments do not cause significant harm to any other environmental or social objectives, and that the companies in which the investments are made apply good governance practices. as detailed in the pre-contractual appendix 2 of the SFDR RTS.

Part verte - Taxonomie européenne

The principle of "cause no significant harm" applies only to investments underlying the financial product that take into account the European Union's criteria for environmentally sustainable economic activities.

The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

DNSH⁹ SFDR and consideration of Key Negative Impacts¹⁰

The Sub-Fund implements several complementary DNSH systems to ensure that its investments do not cause significant environmental and social harm. These include: i) a set of investment rules for the whole portfolio (sectoral and normative exclusions and controversies; ineligibility of companies below the minimum ESG score threshold set for the Sub-Fund; and consideration of the Principal Adverse Impacts); ii) stricter requirements for sustainable investments; iii) monitoring of governance practices by tracking "G" ratings and controversies, which in some cases may lead to dialogue with the company. These requirements are described in Appendix 2 of the Sub-Fund's SFDR.

Within the scope of DNSH, the Sub-Fund has, since the end of 2022, notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) of its investments on sustainability factors, in order to identify and to take appropriate action. The Sub-Fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

The methods by which PAI indicators are taken into account by the Sub-Fund are detailed in its pre-contractual SFDR Appendix 2, and Amiral Gestion's more general policy on the matter, including details of the sources and methods used to take each indicator into account, is available on its website, under the "Responsible Investment" heading: <https://www.amiralgestion.com/fr/investissement-responsable/>

The metrics and information on how the main negative impacts have been taken into account will be published annually in the Sub-Fund's periodic "Appendix 4 SFDR" document, for the first time in 2024 for the financial year 2023. The extra-financial approaches applied to the sub-fund are described in more detail in the pre-contractual appendix 2 of the Sextant PME Sub-Fund, under the "SFDR Disclosure" regulation, which is available on the Amiral Gestion website : <https://www.amiralgestion.com/fr/sextant-pme>

¹ Shares, with the exception of those mentioned in article L. 228-11 of the French Commercial Code, company investment certificates, cooperative investment certificates, shares in limited liability companies or companies with equivalent status, capital securities in companies governed by law no. 47-1775 of 10 September 1947 on the status of cooperatives, bonds redeemable in shares.

² The detailed methodology for defining the universe and for calculating the sub-fund's ESG performance in relation to the universe is described in the sub-fund's SRI Transparency Code, available online on the Amiral Gestion website, on the page dedicated to the sub-fund: <https://www.amiralgestion.com/fr/sextant-pme>.

³ Carbon intensity: weighted average of carbon intensity ratios per turnover (sum of the weights * intensity ratio for each security)

⁴ Details of the exclusion policy, including sub-criteria and turnover thresholds, can be found in the Sextant PME Transparency Code, which is updated regularly and can be accessed on the page dedicated to the sub-fund on the Amiral Gestion website: <https://www.amiralgestion.com/fr/sextant-pme>.

⁵ This rate may be expressed as a percentage of the sub-fund's net assets or in terms of the number of issuers in the UCI.

⁶ The voting policy is available on the Website: <https://www.amiralgestion.com/investissement-responsable/>

⁷ Sextant PME has held the "Relance" Label (Label Relance | economie.gouv.fr)) since 25 November 2020. This label aims to direct French savings towards collective investment schemes that are committed to rapidly mobilizing new resources to support the equity and quasi-equity of French companies (SMEs and ETIs), whether listed or not. The objective is to direct the savings of households and professional investors towards these investments which meet the financing needs of the French economy following the health crisis. Labelled funds must also comply with a set of environmental, social and good governance (ESG) criteria, including in particular a ban on financing coal-fired activities and the monitoring of an ESG rating or indicator.

⁸ The substantial contribution to the objective of adapting to climate change will constitute an effective criterion for Sustainable Investment qualification from 1 January 2024.

⁹ DNSH = Do No Significant Harm

¹⁰ Adverse impacts on sustainability factors ('principal adverse impacts'), are defined as the impacts of investment decisions that result in adverse effects, significant or likely to be significant, on sustainability factors (environmental, social and personnel issues, respect for human rights and anti-corruption and bribery).

♣ ELIGIBLE ASSETS

Shares

The sub-fund invests at least 75% of its net assets in equities and securities eligible for the PEA whose registered office is in the European Union and/or the European Economic Area. The minimum investment in equities and convertible bonds issued by SMEs/ETIs (Intermediate sized enterprises) whose registered office is in the European Union is 50% of the net assets.

The proportion invested in equities depends exclusively on the investment opportunities presented to the managers on a case-by-case basis and not on macro-economic considerations, irrespective of their market capitalisation or sector.

Exposure to currency risk in currencies other than those of the eurozone or the European Union will remain incidental. The Sub-fund invests in small and mid-cap stocks up to a maximum of 110% of its net assets.

Debt securities and money market instruments

The sub-fund may invest up to 25% of its net assets in bonds and money market instruments.

Investments in money market instruments are denominated in Euros and have a maximum maturity of twelve months. They will have a minimum rating (Standard & Poor's A3 / Moody's P-3 / Fitch Ratings F3) or, where they are not rated, must be deemed equivalent according to the Management Company's analysis.

The sub-fund may invest in all bond securities issued by listed SMEs, including convertible bonds and so-called "high-yield" bonds (not having an investment-grade rating) or unrated bonds.

Investments in speculative "high-yield" bonds will remain below 25% of assets.

The Sub-fund may also invest in bond-assimilated instruments (convertible bonds, subscription bonds, participating securities).

Investments in securities of other UCITS, AIFs and/or investment funds

The Sub-fund may invest up to 10% of its net assets in securities of other French or European UCITS or AIFs, mainly for cash investments via "standard money market" and "short-term money market" UCITS/AIFs and "bond" UCITS/AIFs. On an ancillary basis, the Sub-fund may invest in equity or bond UCITS that are compatible with the management of the Sub-fund.

In addition, sales of call options on securities or indices may be made in order to hedge or expose the portfolio without holding the security or index. The Sub-fund will never invest in venture capital funds (FCPR), assimilated funds, or in securitisation vehicles.

Derivatives and securities with embedded derivatives

Derivative products

Transactions involving derivatives (purchases of call or put options on equities, indices, interest rates or currencies, and purchases or sales of futures, forward exchange contracts or swaps on equities, indices, interest rates or currencies) and securities that are part of derivatives shall be carried out in order to expose or partially hedge the Sub-fund against favourable or unfavourable trends in equities, indices, interest rates and currencies.

There will be no overexposure. These instruments will be traded on regulated and/or organised or over-the-counter markets. Futures (forward contracts on financial instruments) relating to commodity indices will be carried out in compliance with the 5/10/20/40 ratio. Call options on securities will be written while holding the underlying security as part of strategies to optimise the return of the securities in the portfolio. In addition, sales of call options on securities or indices may be made in order to hedge or expose the portfolio without holding the security or index.

Put options on securities will be sold as part of strategies to potentially acquire said securities at a price below the market price at the time the strategy is implemented.

Securities with embedded derivatives:

The sub-fund may hold products with embedded derivatives (preferential rights/warrants, warrants, EMTNs, convertible bonds and, more generally, all puttable/callable products) as part of the management of the equity portfolio:

- when these securities are detached from the shares held in the portfolio;
- when it is more advantageous to acquire shares by purchasing and then exercising these securities (e.g. participation in a capital increase by first purchasing preferential subscription rights on the market).

Deposits and cash

For cash management purposes, the sub-fund may use deposits within the limits of the regulations.

The Sub-fund may use deposits to optimise the management of the Sub-fund's cash and to manage the different subscription/redemption value dates of the underlying UCIs. It may place up to 20% of its net assets in deposits a single credit institution. The sub-fund may hold cash on an ancillary basis, in particular to cover share redemptions by investors. The liquidity holding threshold may be raised to 20% of net assets when justified by exceptional market conditions.

The lending of cash is prohibited.

Cash Borrowings

The Sub-fund may borrow cash. Although it is not intended to be a structural cash borrower, the Sub-fund may be in a debit position as a result of transactions linked to its paid-in flows (ongoing investments and divestments, subscriptions/redemptions, etc.), up to a limit of 10% of the net assets.

Temporary acquisition and sale of securities:

None

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

Non applicable

7. Special cases of UCIs with sub-funds

The sub-fund may invest up to 10% of its net assets in shares of another sub-fund of the same UCI.

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk

The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.

Discretionary management risk	The discretionary management style is based on anticipating trends in the financial markets. The Fund's performance will depend on the issuers selected and the asset allocation defined by the manager. There is a risk that the Management Company will not select the best-performing securities and that the net asset value of the Fund will therefore fall.
Equity market risk	Fluctuations in equity markets may lead to significant changes in net assets, which may have a negative impact on the performance of the Fund. The net asset value of the fund may fall significantly.
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk.
Liquidity risk	Liquidity risk measures the difficulty that the fund may have in selling certain assets within a short timeframe in order to meet the need to raise cash or deal with a fall in their market value. Please note that over-the-counter markets do not offer immediate liquidity or enable assets to be sold at the price expected by the Fund.
Credit risk	The Fund may invest in fixed income products. Credit risk is the potential risk of issuer default or credit downgrade, which may lead to a fall in net asset value.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.
Counterparty risk	This is the risk associated with the Fund's use of over-the-counter financial futures instruments. These transactions, entered into with one or more eligible counterparties, potentially expose the Fund to a risk of default by one of its counterparties, which could lead to an event of default that would no longer allow the Fund to honour its commitments under these transactions.
Risk associated with the use of derivatives	The use of derivatives can lead to significant variations in the net asset value over short periods, both upwards and downwards.
Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none"> 1) lower revenues; 2) higher costs; 3) damage or depreciation in asset value; 4) higher cost of capital; 5) reputational risks and 6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Lgal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

"A" shares are open to all subscribers. However, due to the high risk associated with an investment in equities, this sub-fund is intended primarily for investors who are prepared to withstand the sharp fluctuations inherent in the equity markets and who have a minimum investment horizon of five years.

"Z" shares are intended more specifically for:

- the management company
- the management company's UCITS/AIFs
- the management company's staff (permanent employees and managers) and their unmarried spouses, parents and children
- FCPEs for employees of the management company
- life insurance or capitalisation companies for the equivalent value of the amount invested in a unit of account representing the sub-fund's Z shares within a life insurance or capitalisation contract taken out by a member of the management company's staff, as well as their unmarried spouses, parents and children.

"I" shares are open to all subscribers, and more specifically to institutional investors who have received prior approval from the management company and whose minimum initial subscription is 3,000,000 euros (except for the management company, which may subscribe for 1 share).

"N" shares are open to all subscribers, more particularly:

- marketing networks that have received prior approval from the management company
- or distributors and intermediaries that have received prior approval from the management company and provide a service of:
 - Independent advice within the meaning of MiFID 2
 - Individual management under mandate

SEXTANT PME may be used as a vehicle for unit-linked variable capital life insurance policies.

11.2 Minimum recommended investment period

5 years

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the valuation models via the beta used to set the weighted average cost of capital (WACC). The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future 5 years cash requirements and your risk aversion. It is also advisable to diversify investments sufficiently to avoid excessive exposure to this Fund risk.

In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

Allocation of distributable income : Accumulation

13. Distribution frequency

Non applicable

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR0010547869 Share A	100 €	None
FR0011171412 Share I	1000 €	3,000,000 €

FR0013306370 Share N	214.24 €	None
FR0010556753 Share Z	100 €	None

Subscriptions are accepted either in number of shares (expressed in ten thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in ten thousandths of shares).

How to submit subscription requests

Subscription and redemption requests are centralised each day of valuation before 11:00 with the custodian: CACEIS BANK, whose registered office is located at 89-91 rue Gabriel Péri – 92120 Montrouge RCS Nanterre.

Postal addresses of offices: CACEIS BANK.

They are executed on the basis of the next net asset value calculated on the basis of the closing price on the day on which the requests are centralised. Subscription and redemption requests received after 11:00 are processed on the basis of the net asset value calculated according to the method described above. The relevant payments will be made 2 business days after the valuation.

In the event of a public holiday or stock market closure, it will be calculated on the previous business day.

Shareholders' attention is drawn to the fact that orders transmitted to marketers other than the institutions mentioned above must take into account the fact that the order centralisation cut-off time applies to said marketers vis-à-vis CACEIS BANK.

Consequently, these marketers may apply their own cut-off time, earlier than that mentioned above, in order to take account of their deadline for transmitting orders to CACEIS BANK.

Orders are centralised in accordance with the table below:

D business day	Day on which the NAV is established (D)	D+1 to D+3	D+2 business days	D+2 business days
Daily reception of orders and centralisation ^{Daily} before 11:00 (Paris time) of subscription* and redemption orders.	Orders are executed no later than day D	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions D-1 before 4pm

**Unless otherwise agreed with your financial institution.*

The Management Company monitors liquidity risk by Sub-Fund in order to ensure an appropriate level of liquidity for each Sub-Fund, particularly with regard to the risk profile, investment strategies and redemption policies in force for the funds. An analysis of the liquidity risk of the Sub-Fund## is carried out to ensure that the investments and funds have sufficient liquidity to honour the redemption of unitholders under normal and extreme market conditions. The Management Company has set up a liquidity management system and tools to ensure that investors are treated fairly.

The sub-fund has introduced a redemption cap mechanism (known as a "gate") as described below:

Redemption Capping Mechanism ("gate"):

The Management Company has implemented a liquidity management mechanism known as a "gate" or "redemption capping" to protect its investors. This mechanism allows, if necessary, the capping of redemptions when the redemption threshold objectively established by the Management Company is reached. The redemption threshold set by the Management Company for this Sub-Fund is 10% of the net assets. To determine the level of this threshold, the Management Company takes into account the frequency of calculating the net asset value of the UCITS, the investment orientation of the Sub-Fund, and the liquidity of its assets.

The trigger threshold for the gates corresponds to the ratio between:

- - the observed difference, on the same consolidation date, between the number of shares in the Sub-Fund for which redemption is requested or the total amount of these redemptions, and the number of shares in the Sub-Fund for which subscription is requested or the total amount of these subscriptions; and
- the net assets of the fund or the total number of units in the sub-fund.

In the event of triggering the gate, the Management Company reserves the right to spread redemptions over several net asset values. The capping of redemptions can be triggered, at the discretion of the Management Company, only in the case of exceptional market circumstances and if the interests of investors so require.

When redemption requests exceed the triggering threshold, and if liquidity conditions permit, the Management Company may decide to honour redemption requests beyond this threshold, thus partially or fully executing orders that may be blocked. Unexecuted redemption requests at a net asset value will be automatically carried over to the next consolidation date and executed on the next net asset value date. They cannot be revoked by the unit holders or shareholders.

For example, if the total redemption requests for shares represent 5% of the net assets of the Sub-Fund while the triggering threshold is set at 10% of the net assets, the Sub-Fund may decide to honour redemption requests up to 8% of the net assets (thus executing 80% of redemption requests) and thereby carry over the balance of unexecuted redemptions to the next consolidation.

The maximum duration of the redemption capping mechanism is set at 20 net asset values over 3 months for a UCITS with a daily valuation frequency .

Notification Procedures for Unit holders:

In the event of activating the "gate" mechanism, Sub-Fund investors will be informed by any means through the website <https://www.amiralgestion.com/fr>.

Sub-Fund investors whose redemption orders have not been executed will be informed promptly and in a special manner.

Treatment of Unexecuted Orders:

During the period of application of the "gate" mechanism, redemption orders will be executed in the same proportions for UCITS unit holders who have requested redemption at the same net asset value. The redemption orders thus carried over will not have priority over subsequent redemption requests. Unexecuted and automatically carried-over redemption orders cannot be revoked by UCITS unit holders.

Exemption from the "gates" mechanism:

Subscription and redemption transactions, for the same number of shares, based on the same net asset value and for the same investor or economic beneficiary (known as round-trip transactions), are not subject to a "gate."

This exclusion also applies to the transition from one class of shares to another class of shares, at the same net asset value, for the same amount and for the same investor or economic beneficiary.

16. Fees and commissions

16.1 Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid To the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
Subscription fee not earned To the Sub-Fund	Net asset value x number	A	2.00%
		I	10.00%
		N	5.00%
		Z	None
Subscription fee earned To the Sub-Fund	Net asset value x number	A	None
		I	None
		N	None
		Z	None
Redemption fee not earned To the Sub-Fund	Net asset value x number	A	1.0%
		I	1.0%
		N	1.0%
		Z	None
Redemption fee earned To the Sub-Fund	Net asset value x number	A	None
		I	None
		N	None
		Z	None

Subscription and redemption fees are not subject to VAT.

Exemptions:

It is possible to proceed, free of commissions, with simultaneous redemptions/subscriptions on the basis of the same net asset value for a zero balance transaction volume.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)
Financial management fees	Net asset	A	2.2% (incl. tax) maximum
		I	1% (incl. tax) maximum
		N	1.3% (incl. tax) maximum
		Z	None
Operating Expenses and other services (flat-rate assessment* of costs detailed below)	Net asset	Applied to the Fund	0.1% (incl. tax) maximum ¹
indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	None
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	A I N	15% (incl. tax) of the positive performance of the A, N or I sub-fund share over and above its benchmark index per calendar year.
		Z	None

* Effective from 01/01/2025

¹ The fixed maximum rate may be charged even if the actual fees are lower than it, and conversely, if the actual fees exceed the displayed rate, the excess beyond this rate will be borne by the Management Company

Detail of operating expenses and other services:

Operating expenses and other services include:

- Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);
 - Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);

- Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and messaging functions of Bloomberg).

(iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.

(v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring breaches of thresholds, exceeding ratios etc.).

(vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-financial constraints arising from specific client requests and specific to the UCITS).

(vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French Monetary and Financial Code,
- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

Calculation of the outperformance fee (A, N and I shares)

Variable management fees are deducted for the benefit of the management company as follows: performance fee.

The outperformance fee is based on the comparison between the performance of the A, N or I share of the Sub-fund and the reference threshold over the financial year.

The performance of the sub-fund is calculated on the basis of changes in the net asset value:

- if, over the year, the performance of the A, N or I share of the sub-fund is positive and greater than its benchmark index, the variable portion of the management fees will represent 15% (inclusive of tax) of the difference between the performance of the sub-fund and the benchmark threshold.
- If, over the year, the performance of the A, N or I share of the sub-fund is negative or less than its benchmark index, the variable portion will be zero.

The outperformance fee is calculated on the basis of the net assets on which the performance has been achieved and the subscriptions and redemptions made in the Sub-fund. This method involves comparing the assets of the A, N or I share of the Sextant PME sub-fund with the assets of a sub-fund following the benchmark threshold by applying the same subscription and redemption flows.

- If, during the financial year, the performance of the A, N or I share of the sub-fund since the beginning of the financial year is positive and greater than the benchmark threshold calculated over the same period, this outperformance will be subject to a provision for variable management fees when calculating the net asset value.
- In the event that the A, N or I share of the sub-fund underperforms the benchmark or suffers a negative performance between two net asset values, any provision made previously will be readjusted by reversing the provision. Reversals of provisions are capped at the amount of previous allocations.
- This variable portion will only be definitively received at the end of the financial year if the performance of the A, N or I share of the sub-fund is positive or greater than the reference threshold over the financial year.
- In the event of share redemptions, if there is a provision for variable management fees, the portion proportional to the shares redeemed is paid immediately to the management company.

The variable management fee will not be accrued and deducted for the 2012 fiscal year, which runs from January 1, 2012 through December 31, 2012.

These costs (fixed and possibly variable) are charged directly to the income statement of the Sub-fund

Any underperformance of the Sub-fund relative to the benchmark is made up before outperformance fees become payable. To this end, the catch-up period is set at five years. If, during the catch-up period, a new underperformance is observed, this will trigger a new catch-up period of 5 years from the date of the observation in respect of this underperformance. Finally, if the underperformance has not been caught up after five years, it is no longer taken into account for the sixth year.

Illustration:

Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment	Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment
Year 1	5	0	Yes	Year 7	5	0	Yes
Year 2	0	0	No	Year 8	-10	-10	No
Year 3	-5	-5	No	Year 9	2	-8	No
Year 4	3	-2	No	Year 10	2	-6	No

Year 5	2	0	No	Year 11	2	-4	No
Year 6	5	0	Yes	Year 12	0	0*	No

**The underperformance to be offset in year 12 is reset to 0 and not to -4 due to the application of the 5-year catch-up period starting in year 8.*

The past performances of the Sub-fund are available on the website of Amiral Gestion.

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and evaluates them periodically to ensure the quality of the services provided. Research fees are included in the transaction fees and are deducted from the Fund for each transaction.

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

1. ISIN code

2. Classification

International equities

At least 90 % of the Sub-Fund is permanently exposed to international equities markets.

3. Delegation of financial management

Non applicable

4. Management objective and investment strategy**4.1 Management objective**

The SEXTANT QUALITY FOCUS Sub-Fund is a dynamic fund whose objective is to achieve, over the recommended investment period of five years, a performance net of management fees higher than the MSCI World Net Total Return EUR Index, through a selection of international equities of all capitalisation sizes.

4.2 Benchmark index

MSCI World Net Total Return EUR Index.

The MSCI World Net Total Return EUR Index (Bloomberg ticker: MSDEWIN Index) is an equity index that covers the markets of developed countries, but does not include those of emerging markets. It represents the large- and mid- capitalisations of 23 developed markets. With roughly 1,500 components, the index covers most of the market capitalisation adjusted for free float of each country

The MSCI World Net Total Return EUR Index is administered by MSCI, an administrator registered in accordance with Article 34 of (EU) Regulation 2016/1011 and entered in the registry of index administrators kept by ESMA. More information on the Benchmark Index is available on the MSCI website: <https://www.msci.com/index-methodology>

Investors' attention is drawn to the fact that, as the management style (see below) is discretionary, and that the composition of the portfolio will never seek to reproduce, either geographically or by sector, the composition of the benchmark.

4.3 Investment strategy**❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE**

The SEXTANT QUALITY FOCUS sub-fund is exposed to between 90% and 110% of its net assets in international equities.

The Initial Investment Universe is made up of international equities, including French equities, listed on regulated markets and with a current capitalisation or average capitalisation over the last 5 years in excess of one billion euros. The sub-fund may also invest on an ancillary basis (i) in equities listed on markets outside the OECD (emerging markets) and (ii) in international equities, including French equities, listed on regulated markets and with a current capitalisation or average capitalisation over the last 5 years of less than one billion euros.

The managers of the SEXTANT QUALITY FOCUS sub-fund follow a management philosophy aimed at achieving long-term capital appreciation through a fundamental approach. In order to achieve its management objective, the sub-fund invests in equities of companies which are considered by the fund managers to be of high quality (i) and reasonably valued (ii).

(i). The quality of the company is assessed by the managers on a discretionary basis. This approach changes over time and takes into consideration a great many characteristics to provide an overall view. For example, the criteria taken into account by asset managers may include the following:

- High returns on capital with a *business model* that requires little capital to operate, so that the business can generate high profits against tied-up capital (e.g. inventories or plant).
- A high rate of profit to cash conversion (*cash conversion*), i.e. the proportion of book profits carried forward by the business that are accompanied by corresponding cash flows.
- Presence of intangible assets constituting a barrier to entry such as a brand, patents, an installed base (*installed base*), a

distribution network,...

- Sources of growth that enable the company to reinvest its profits with high returns on capital.
- The ability to raise prices without losing market share or reducing volumes (*pricing power*), particularly to offset inflation.
- A management team and a board of directors that prioritise initiatives producing the best return on capital when the company has to choose between financing internal organic growth projects, making acquisitions, disposing of a division, paying dividends or carrying out share buy-backs.
- The longevity of the business insofar as it directly impacts the length of time it will be possible to generate profits. The sub-fund therefore favours companies whose *business model* is not subject to disruption in the medium term, particularly if this disruption is linked to a technological innovation or an environmental constraint.
- Managers who are aware of the long-term importance of taking into account the interests of customers and shareholders in operations, but also those of other stakeholders such as employees, society, or the environment.

(ii). The fund managers invest in companies whose valuations are, in their opinion, lower than the intrinsic value of the company. So, for companies that they judge to be good quality, fund managers create financial models to estimate the potential future free cash flows they consider most probable. The managers then compare the stocks against each other and invest in the companies in the universe being tracked whose stock market valuations seem the most attractive, in order to achieve capital appreciation above the index.

After applying these investment criteria and ESG requirements¹, the sub-fund will be invested in a concentrated equity portfolio of only around 20 to 40 stocks.

Extra-financial approach applicable to the sub-fund

The SEXTANT QUALITY FOCUS sub-fund seeks to promote environmental and social characteristics while ensuring good corporate governance practices, and is classified as an "Article 8" fund within the meaning of the SFDR regulations. Thus, in addition to financial analysis, the investment process incorporates sustainability risks and environmental, social and governance (ESG) aspects when analysing and selecting companies.

The ESG Investable Universe is made up of companies in the MSCI ESG universe with a capitalisation of more than €1 billion and after applying the exclusion filters described below (hereinafter the "**ESG Investable Universe**"). On the day the sub-fund was created, the ESG Investment Universe comprised around 8,200 stocks. Le choix de cet Univers d'Investissement ESG utilisé à des fins de comparaison avec le portefeuille du compartiment est cohérent avec l'Univers d'Investissement Initial du compartiment qui est principalement investi en actions internationales d'une capitalisation supérieure à un milliard d'euros.

The extra-financial approach includes the following elements.

- An extra-financial analysis and rating rate² covering 90% of investments in equities issued by large caps headquartered in 'developed' countries and a minimum of 75% for equities issued by large caps headquartered in "emerging" countries, equities issued by small and mid caps, debt securities and money market instruments benefiting from a high yield credit rating.
- A commitment to improved performance on an environmental indicator, i.e. a carbon footprint (emissions of tonnes of CO₂ / €M enterprise value) of the portfolio below that of the average of the ESG Investment Universe.
- An ESG analysis of the portfolio materialised by monitoring the average ESG score of the companies in the portfolio compared with the average score of the companies in the ESG Investment Universe (based mainly³ on data provided by data provider MSCI).
- The exclusion of any company that does not comply with the principles of the United Nations Global Compact and/or the OECD Guidelines for Multinational Enterprises according to Sustainalytics, and the placing on watchlist of companies according to Sustainalytics and whose status is confirmed by the Controversy Monitoring Committee after internal review.
- The exclusion of certain sensitive business sectors (controversial arms, tobacco, pornography, thermal coal, conventional and non-conventional fossil fuels, etc.), in accordance with the terms and thresholds of the Amiral Gestion sectoral exclusion policy applicable to the Sub-Fund. This policy is available on the Amiral Gestion website, in the "Responsible Investment". section
- Systematic exclusion of companies involved in controversies of severe seriousness (level 5) according to the Sustainalytics scale, subject to an internal analysis by the controversy monitoring committee confirming the reality and seriousness of the controversy, and the monitoring of issuers exposed to significant level 4 controversies. Particular attention is also paid to controversies relating to climate change, biodiversity, fundamental human rights and fiscal responsibility).
- A commitment to vote at general meetings for all companies in the portfolio, with the exceptions set out in the policy (see the voting policy on the website: <https://www.amiralgestion.com/investissement-responsable/>.)

In addition, when the portfolio invests in UCITS (excluding cash management), the Company will, wherever possible, give preference to UCITS with the same SFDR classification as that of the Sub-Fund.

Additional information relating to SFDR regulation and Taxonomy

The sub-fund is subject to **sustainability risk** as defined in the risk profile. Sustainability risks are taken into account via the Sub-Fund's environmental and social characteristics mentioned below, and via application of a set of common responsible investment practices applicable to all funds managed by Amiral Gestion and described in the document entitled "Non-financial communication for SFDR disclosure regulation at the company level" and available on the Amiral Gestion website: <https://www.amiralgestion.com/investissement-responsable>.

Part verte - Taxonomie européenne

The principle of "cause no significant harm" applies only to investments underlying the financial product that take into account the European Union's criteria for environmentally sustainable economic activities.

The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

Sustainable investment

Although it does not have an investment strategy focused on a sustainable investment objective within the meaning of the SFDR Disclosure regulations, the sub-fund undertakes to include a minimum of 20% sustainable investments. Please see the pre-contractual Appendix 2 of the SFDR RTS for information about the criteria used by Amiral Gestion to determine the share of sustainable assets held in the portfolio.

DNSH⁴ SFDR and consideration of Key Adverse Impacts

The Sub-Fund implements several complementary DNSH schemes to ensure that its investments do not cause significant environmental and social harm. These include: i) a set of investment rules for the whole portfolio (sectoral and normative exclusions and controversies; attention to Principal Adverse Impacts); ii) stricter requirements for sustainable investments; iii) monitoring of governance practices by tracking "G" ratings and controversies, which in some cases may lead to dialogue with the company. These mechanisms are described in the Sub-Fund's pre-contractual SFDR Appendix 2.

Within the scope of DNSH, the Sub-Fund has, since 31.12.2022, notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) of its investments on sustainability factors, in order to identify and to take appropriate action. The Sub-Fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

Amiral Gestion's "PAI" policy, including details of the sources and methods used to take each indicator into account, is available on its website, under the "Responsible Investment" heading: <https://www.amiralgestion.com/fr/investissement-responsable/>

The metrics and information on the effective consideration of the main negative impacts will be reported annually in the Sub-Fund's periodic document "Annex 4 SFDR", for the first time in 2024 for the financial year 2023.

We also monitor the rating of the companies in the portfolio as well as exposure to controversies in the Governance pillar.

This combination of extra-financial approaches, described in detail in the pre-contractual appendix 2 of the SFDR RTS (available as an appendix to this prospectus or on the Amiral Gestion website: <https://www.amiralgestion.com/fr/nos-fonds-sextant>), classifies the sub-fund in the "Article 8" category according to the classification of the so-called "SFDR Disclosure" regulations.

¹ These ESG requirements are described in the section entitled "Extra-financial approach applicable to the sub-fund". "

² In accordance with the applicable ESG analysis coverage rates recommended by the AMF in its Doctrine 2020-03 for this portfolio category (Category 2)

³ The data may also be based on the ESG Performance Score of the Amiral Gestion benchmark derived from Ethifinance's Gaïa database, to complete the extra-financial coverage if necessary

⁴ DNSH = Do No Significant Harm

♣ ELIGIBLE ASSETS

Shares

The net assets of the SEXTANT QUALITY FOCUS Sub-Fund are 90-110% exposed to international equities. The sub-fund may invest (i) on an incidental basis in international equities, including French equities, listed on regulated markets with a current capitalisation or average capitalisation over the last 5 years of less than one billion euros and (ii) up to 10% in non-OECD markets (emerging markets).

The SEXTANT QUALITY FOCUS sub-fund invests at least 90% of its net assets in equities.

The portion of assets not invested in equities is invested in fixed income products, deposits or cash.

Debt securities and money market instruments

The sub-fund may invest up to 10% of its net assets in money market instruments,

which are negotiable government debt securities issued by European Union countries and denominated in euros with a maximum maturity of twelve months. They will have a minimum rating (Standard & Poor's A3 / Moody's P-3 / Fitch Ratings F3).

Investments in securities of other UCITS, AIFs and/or investment funds

The sub-fund may invest up to 10% of its net assets in securities of French or European UCITS or AIFs, mainly for cash investments via money market UCITS/AIFs and short-term money market UCITS/AIFs or short-term bond UCITS/AIFs.

Derivatives and securities with embedded derivatives

Derivatives

The SEXTANT QUALITY FOCUS sub-fund will not use derivatives in order to achieve its management objective.

Securities incorporating derivatives

The sub-fund may hold the following products incorporating derivatives: preferential rights/warrants and warrants, as part of portfolio management and up to a limit of 10% of net assets.

The Sub-fund will not invest in convertible bonds.

Deposits and cash

The Sub-fund may invest in sight deposits in order to optimise cash management. It may place up to 10% of its net assets in deposits at a single credit institution.

The sub-fund may hold cash on an ancillary basis, in particular to cover share redemptions by investors. The liquidity holding threshold may be raised to 20% of net assets when justified by exceptional market conditions.

Cash Borrowings

The Sub-fund may borrow cash. The Sub-fund may be a structural borrower of cash up to 10% of net assets, in order to be permanently invested in equity markets; similarly, the Sub-fund may be a debtor due to transactions related to outflows (investments and disinvestments in progress, subscriptions/redemptions etc) up to a maximum of 10% of its net assets.

Temporary acquisition and sale of securities:

None

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

Non applicable

7. Special cases of UCIs with sub-funds

Non applicable

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk	The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.
Discretionary management risk	The discretionary management style is based on anticipating trends in the financial markets. The Fund's performance will depend on the issuers selected and the asset allocation defined by the manager. There is a risk that the Management Company will not select the best-performing securities and that the net asset value of the Fund will therefore fall.
Equity market risk	Fluctuations in equity markets may lead to significant changes in net assets, which may have a negative impact on the performance of the Fund. The net asset value of the fund may fall significantly.
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk.
Risk associated with the concentration of investments	Due to its concentrated investment strategy, the risk of discretionary management is very high.
Liquidity risk	Liquidity risk measures the difficulty that the fund may have in selling certain assets within a short timeframe in order to meet the need to raise cash or deal with a fall in their market value. Please note that over-the-counter markets do not offer immediate liquidity or enable assets to be sold at the price expected by the Fund.
Risk related to the size of the capitalisation of the selected securities	The Fund may invest in small- and mid-cap markets, as the volume of securities listed on the stock exchange is reduced, and market movements are therefore more pronounced on the downside and faster than in large-cap markets. The fund's net asset value may therefore fall more quickly and more sharply.

Emerging markets risk	The Fund may invest in equities listed on emerging markets. Investors' attention is drawn to the fact that the operating and supervisory conditions of these markets may deviate from the standards prevailing in the major international markets.
Credit risk	The Fund may invest in fixed income products. Credit risk is the potential risk of issuer default or credit downgrade, which may lead to a fall in net asset value.
Counterparty risk	This is the risk associated with the Fund's use of over-the-counter financial futures instruments. These transactions, entered into with one or more eligible counterparties, potentially expose the Fund to a risk of default by one of its counterparties, which could lead to an event of default that would no longer allow the Fund to honour its commitments under these transactions.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.
Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none"> 1) lower revenues; 2) higher costs; 3) damage or depreciation in asset value; 4) higher cost of capital; 5) reputational risks and 6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Legal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

Due to the high risk associated with an investment in equities, this Sub-fund is intended above all for investors who are prepared to bear the strong fluctuations inherent in the equity markets and who have a minimum investment horizon of five years.

"A" shares are intended for all subscribers, notably individual investors and investors subscribing through a distributor (asset management consultant, etc.).

"I" shares are open to all subscribers, and are more particularly intended for institutional investors who have received prior approval from the management company and whose minimum initial subscription is 1,000,000 euros (except for the management company, which may subscribe for 1 unit).

"SI" shares are open to all subscribers, and are more particularly intended for institutional investors who have received prior approval from the Management Company and whose minimum initial subscription is 5,000,000 euros (except for the Management Company, which may subscribe for one unit).

"N" shares are reserved for the category of subscribers listed below whose minimum initial subscription amount is 5 000 euros:

- to marketing networks that have received prior approval from the Management Company
- Or to distributors and intermediaries that have received prior approval from the Management Company and provide a:
 - independent advice within the meaning of MiFID2
 - individual management under mandate regulations

"F" founding shareholders are intended for all subscribers who have subscribed during the initial subscription period (the first thirteen months following the creation of the sub-fund), whose initial subscription is €2,000,000 and who have received prior approval from the Management Company.

"Z" shares are reserved exclusively for:

- the Management Company

- the staff of the Management Company (permanent employees and managers) and their unmarried spouses, parents and children.
- to FCPEs intended for the staff of the Management Company
- life insurance or capitalisation companies for the equivalent value of the amount invested in a unit of account representing the sub-fund's Z shares within a life insurance or capitalisation contract taken out by a member of the Management Company's staff, as well as their unmarried spouses, parents and children.

The Sub-fund can be used as a support for unit-linked variable capital life insurance contracts.

11.2 Minimum recommended investment period

5 years

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the valuation models via the beta used to set the weighted average cost of capital (WACC). The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future 5 years cash requirements and your risk aversion. It is also advisable to diversify investments sufficiently to avoid excessive exposure to this Fund risk.

In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

Allocation of distributable income : Accumulation

13. Distribution frequency

Non applicable

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares).

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR001400CEG4 Share A	100 €	1 share(s)
FR001400CEH2 Share N	100 €	5,000 €
FR001400CEI0 Share I	1000 €	1,000,000 €
FR001400CEJ8 Share SI	1000 €	5,000,000 €

FR001400CEK6 Share F	100 €	2,000,000 €
FR001400CEL4 Share Z	100 €	1 share(s)

Subscriptions are accepted either in number of shares (expressed in thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in thousandths of shares).

How to submit subscription requests

Subscription and redemption requests are centralised each day of valuation before 11:00 with the custodian: CACEIS BANK, whose registered office is located at 89-91 rue Gabriel Péri – 92120 Montrouge RCS Nanterre.

Postal addresses of offices: CACEIS BANK.

They are executed on the basis of the next net asset value calculated on the basis of the closing price on the day on which the requests are centralised. Subscription and redemption requests received after 11:00 are processed on the basis of the net asset value calculated according to the method described above. The relevant payments will be made 2 business days after the valuation.

In the event of a public holiday or stock market closure, it will be calculated on the previous business day.

Orders are centralised in accordance with the table below:

D business day	Day on which the NAV is established (D)	D+1 to D+3	D+2 business days	D+2 business days
Daily reception of orders and centralisation ^{Daily} before 11:00 (Paris time) of subscription* and redemption orders.	Orders are executed no later than day D	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions D-1 before 4pm

**Unless otherwise agreed with your financial institution.*

The Management Company monitors liquidity risk by Sub-Fund in order to ensure an appropriate level of liquidity for each Sub-Fund, particularly with regard to the risk profile, investment strategies and redemption policies in force for the funds. An analysis of the liquidity risk of the Sub-Fund## is carried out to ensure that the investments and funds have sufficient liquidity to honour the redemption of unitholders under normal and extreme market conditions. The Management Company has set up a liquidity management system and tools to ensure that investors are treated fairly.

The Sub-Fund has not implemented a redemption cap mechanism (known as "Gates") so in the event of exceptional circumstances, the absence of a redemption cap mechanism may result in The UCITS being unable to honour redemption requests and thus increase the risk of a complete suspension of subscriptions and redemptions on The UCITS.

16. Fees and commissions

16.1 Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid To the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
Subscription fee not earned To the Sub-Fund	Net asset value x number	A	1.00%
		N	None
		I	None
		SI	None
		F	None
		Z	None

Subscription fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		I	None
		SI	None
		F	None
		Z	None
Redemption fee not earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		I	None
		SI	None
		F	None
		Z	None
Redemption fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		I	None
		SI	None
		F	None
		Z	None

Subscription and redemption fees are not subject to VAT.

Exemptions:

It is possible to proceed, free of commissions, with simultaneous redemptions/subscriptions on the basis of the same net asset value for a zero balance transaction volume.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)

Financial management fees	Net asset	A	1.80% (incl. tax) maximum
		N	1.10% (incl. tax) maximum
		I	0.90% (incl. tax) maximum
		SI	0.70% (incl. tax) maximum
		F	0.50% (incl. tax) maximum
		Z	None
Operating expenses and other services detailed below	Net asset	Applied to the Fund	Included in management fees
indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	None
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	A N I SI F Z	None

Detail of operating expenses and other services:

Operating expenses and other services include:

- (i) Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- (ii) Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- (iii) Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);
 - Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);
 - Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and messaging functions of Bloomberg).

- (iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.
- (v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring breaches of thresholds, exceeding ratios etc.).
- (vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-financial constraints arising from specific client requests and specific to the UCITS).
- (vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French Monetary and Financial Code,
- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and evaluates them periodically to ensure the quality of the services provided. Research costs are included in transaction costs and, where applicable, are deducted from the fund for each transaction.

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

1. ISIN code

Share N	FR0013202140
Share Z	FR0013202157

2. Classification

International bonds and other debt securities

3. Delegation of financial management

Non applicable

4. Management objective and investment strategy**4.1 Management objective**

SEXTANT BOND PICKING est un compartiment cherchant à générer une performance nette de frais supérieure à :

- l'indice "Euro Constant Maturity Treasury (CMT) cash 3Y" capitalisé + 100 bp pour l'action A
- l'indice "Euro Constant Maturity Treasury (CMT) cash 3Y" capitalisé + 140 bp pour l'action N
- l'indice "Euro Constant Maturity Treasury (CMT) cash 3Y" capitalisé + 230 bp pour l'action Z

au travers d'une sélection d'obligations internationales sans que cette sélection ne cherche à reproduire le contenu de cet indice.

4.2 Benchmark index

The "Euro Constant Maturity Treasury (CMT) cash 3Y" index is an index representing the yield of 3-year government bonds in euros, capitalised, (ticker bloomberg : CMTEUR3Y).

Investors should note that as the management style is discretionary (see below), the composition of the sub-fund will never seek to replicate the composition of the benchmark, either geographically or by sector.

This indicator does not reflect the management of the sub-fund; performance may therefore differ from that of the index.

4.3 Investment strategy**❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE**

In order to meet its management objective, SEXTANT BOND PICKING is mainly invested in international bonds. The investment universe includes public or private issuers, issuers not rated by rating agencies, issuers considered as speculative (high yield) or bonds with complex characteristics (convertible bonds, subordinated bonds, perpetual bonds, etc). The sub-fund may invest up to 15% of its net assets in contingent convertible securities, with the aim of diversifying the portfolio and increasing yield while controlling exposure.

Bonds are selected on the basis of an internal fundamental analysis of the risk of each issuer. The risk analysis takes into account:

- the cyclical and operational risks of the business line;
- the company's past results and reputation;
- regular cash flow generation (or equity generation for financial institutions);
- the reasonableness of debt ratios (net debt/Ebitda, gearing) in relation to the business line, working capital requirements and any tangible and transferable assets held by the issuer;
- the resources and liquidity needs of the issuer and the debt structure;
- the quality of its shareholder base.

The sub-fund is constructed at the manager's sole discretion on the basis of the relationship between the yield offered, the credit risk and the sensitivity (interest rate risk and spread risk) of the securities selected.

Information on the sensitivity range within which the sub-fund is managed is shown in the table below:

Interest rate sensitivity range within which the sub-fund is managed		Geographical zone of the issuers of the securities	Currency of denomination of the securities in which the fund invests	Range of net asset exposure corresponding to the zone
0 - 7 *	Developed countries *	The main currencies used will be: Euro, USD, GBP, SGD and on an ancillary basis, the other currencies corresponding to the defined geographical area. The sub-fund's total exposure to currency risk shall not exceed 20% of its net assets.		From 70% to 110% maximum
	Emerging countries **			From 0 to 30% maximum

* The target sensitivity is between 3 and 4;

** Developed countries are considered to be those countries included in the "MSCI World Index" and listed on the website: <https://www.msci.com/world>; all other countries are considered to be emerging countries; the exposure range refers to net assets excluding cash and UCIs.

The Sextant Bond Picking sub-fund may be managed in sub-portfolios. This management method is specific to Amiral Gestion. It is based on the free decision-making of each manager-analyst and relies on collective expertise.

The Sub-fund's assets are divided into several sub-portfolios, each of which is managed independently by one of the team's manager-analysts.

At the end of this process, everyone is free to decide whether or not to invest in their sub-portfolio according to their own convictions, or to follow the ideas of another manager. A coordinating manager ensures that investments are consistent with the sub-fund's strategy.

Extra-financial approaches applicable to the sub-fund :

The sub-fund's extra-financial approach is not backed by a specific sustainable benchmark, but it promotes environmental and social characteristics while ensuring good corporate governance practices through a combination of extra-financial approaches, notably:

- The tracking of the portfolio's average external ESG score relative to the average external ESG score of its benchmark index (Main source¹: MSCI ESG Rating). The benchmark used to compare ESG performance is an index that is consistent with the Sub-Fund's investment strategy and comprises around 3,470 stocks: the Global HY (LG30TRUU Index)
- Compliance with the Sub-Fund's sector exclusion policy: thermal coal, tobacco, controversial weapons, civil firearms, pornography, non-conventional fossil fuels with the exception of North American shale oil and gas. The criteria, thresholds and procedures for applying this due diligence and exclusion policy are specified in the Amiral Gestion sector policy applicable to the Sub-fund. This policy is available on the Amiral Gestion website: <https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>
- The compliance with the normative exclusion policy: exclusion/non-investment in issuers that violate the principles of the United Nations Global Compact and/or the OECD Guidelines for Multinational Enterprises, after internal verification and confirmation of non-compliance by the Controversies Monitoring Committee. Monitoring of companies with Sustainalytics Watchlist status, and whose status is confirmed by the Controversies Monitoring Committee following an internal review.
- Exclusion/non-investment in issuers exposed to severe controversies, i.e. level 5 according to the Sustainalytics severity scale and research confirmed following an internal review by the Controversies Monitoring Committee. Particular attention is also paid to controversies relating to climate change, biodiversity, fundamental human rights and fiscal responsibility

.In addition, when the portfolio invests in UCITS (excluding cash management), the company will, wherever possible, give preference to UCITS with the same SFDR classification as that of the Sub-Fund.

These extra-financial approaches are described in greater detail in the Sub-Fund's pre-contractual SFDR Appendix 2.

Part verte - Taxonomie européenne

The principle of "cause no significant harm" applies only to investments underlying the financial product that take into account the European Union's criteria for environmentally sustainable economic activities.

The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

Sustainable investment

Although it does not have an investment strategy focused on a sustainable investment objective within the meaning of the SFDR Disclosure regulations, the sub-fund undertakes to include a minimum of 10% sustainable investments. Refer to the pre-contractual Appendix 2 of the SFDR RTS to understand the criteria used by Amiral Gestion to determine the proportion of sustainable investments within the portfolio.

DNSh² SFDR and consideration of Key Negative Impacts³

The Sub-Fund implements several complementary DNSh schemes to ensure that its investments do not cause significant environmental and social harm. These include: i) a set of investment rules for the whole portfolio (sectoral and normative exclusions and controversies; attention to Principal Adverse Impacts); ii) stricter requirements for sustainable investments; iii) monitoring of governance practices by tracking "G" ratings and controversies, which in some cases may lead to dialogue with the company. These measures are described in the Sub-Fund's pre-contractual SFDR Appendix 2.

Thus, as part of this DNSh system, the Sub-Fund has undertaken, since 31.12.2022, to monitor and consider the main negative impacts of its investments ("SFDR PAI") on sustainability factors, in order to progressively identify and implement appropriate measures. The Sub-Fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

Amiral Gestion's "PAI" policy, including details of the sources and methods used to take each indicator into account, is available on its website, under the "Responsible Investment" heading: <https://www.amiralgestion.com/fr/investissement-responsable/> The metrics and information on how the main negative impacts have been taken into account will be published annually in the Sub-Fund's periodic "Appendix 4 SFDR" document, for the first time in 2024 for the financial year 2023.

This combination of extra-financial approaches, described in detail in the pre-contractual appendix 2 of the SFDR RTS (available in the appendix to this prospectus or on the Amiral Gestion website: <https://www.amiralgestion.com/fr/nos-fonds-sextant/>), classifies the sub-fund in the "Article 8" category according to the classification of the so-called "SFDR Disclosure" regulation.

¹ Mainly MSCI ESG and, failing that, the ESG Performance Score of the Admiral benchmark derived from Ethifinance's Gaïa database

to complete the coverage if necessary

² DNSH = Do No Significant Harm

³ Principal adverse impacts ("PAI"), are defined as the impacts of investment decisions that result in significant or potentially significant adverse effects on sustainability factors (environmental, social and labour issues, respect for human rights and the fight against corruption and bribery).

❖ ELIGIBLE ASSETS

Shares

The Sub-fund does not invest directly in equities, except where the shares stem from conversion or swap of a convertible bond, subordinated bond or other credit note, debt restructuring or other special situation. The Sub-fund's equity exposure shall not exceed 10% of net assets.

Debt securities and money market instruments

The sub-fund may invest up to 110% of its net assets in bonds and money market instruments.

Investments in money market instruments, particularly negotiable debt securities (certificates of deposit, commercial paper, medium-term notes) are denominated in euros and have a maximum maturity of twelve months. They must have a minimum rating (Standard & Poor's A3 / Moody's P-3 / Fitch Ratings F3) or be deemed equivalent according to the Management Company's analysis. Nevertheless, the manager will give preference to investing cash in money-market or short-term money-market UCITS/FIAs.

The sub-fund also reserves the right to invest in fixed-rate and/or floating-rate bonds, whether convertible or not, issued by private, public or semi-public entities, with no rating restrictions.

Net exposure to currency risk will remain below 20% of net assets, with net exposure per currency limited to 10% of net assets.

As the sub-fund is managed on a discretionary basis, the allocation will be unconstrained a priori.

The Sub-fund may also invest in securities treated as bonds (up to 110% of net assets), i.e. securities giving access to the issuer's capital (e.g. convertible bonds, bonds with warrants, equity securities). These securities may not be Investment Grade or may be unrated. They will be subject to a financial analysis by the management company comparable to that carried out on equities.

The fund may invest in speculative bonds considered as "high yield", i.e. securities with a rating below BBB- according to Standard & Poor's or securities considered of equivalent quality according to the analysis carried out by the Management Company, up to 110% of the net assets.

The Management Company conducts its own analysis of the yield/risk profile of securities (profitability, credit, liquidity, maturity). Thus, the acquisition, retention or disposal of a security (particularly in the event of a change in the security's rating) will not be based exclusively on the ratings provided by the main rating agencies, but will also be based on an analysis of credit risks and market conditions internal to the Management Company.

The Sub-fund may invest in all types of bonds, regardless of currency or credit rating. No constraints are imposed on the duration, sensitivity or split between private and public debt of the securities selected as long as the overall sensitivity of the sub-fund is between 0 and 7. The target sensitivity is between 3 and 4.

Investments in securities of other UCITS, AIFs and/or investment funds

The Sub-fund may invest up to 10% of its net assets in securities of other French or European UCITS or AIFs or closed or open-ended foreign investment funds (holding no more than 10% of the units of foreign UCIs or investment funds) that meet the criteria set out in article R.214-13 of the French Monetary and Financial Code, mainly in the investment of cash via money market UCITS/AIFs and short-term money market UCITS/AIFs, as well as in UCITS/AIFs that are classified as French equities or bonds that are compatible with the sub-fund's management.

These UCIs and investment funds may be managed by the Management Company.

The sub-fund will never invest in approved venture capital funds (FCPR) or similar funds, or in securitisation vehicles. The sub-fund may invest in shares of another sub-fund of the same UCITS.

Derivatives and securities with embedded derivatives

In order to achieve its management objective, the Sub-fund will only use simple forward financial instruments whose resulting commitment may be valued using the commitment method.

Nature of the intervention markets:

These instruments will be traded on eurozone and international regulated, organised or over-the-counter markets.

Transactions involving derivatives (purchases or sales of call options or put options on equities, interest rates, indices or currencies, volatility, and purchases or sales of contracts on forward financial instruments (forward exchange, swap futures on equities, interest rates, indices, volatility or currencies) and securities incorporating derivatives, shall be carried out with the aim of hedging or exposing the sub-fund against favourable or unfavourable developments on the equity, interest rate, index and currency markets. The manager may also invest in credit derivatives (Credit Default Swaps).

The exposure arising from derivatives and securities with embedded derivatives is limited to 20% of the net assets, with the exception of volatility exposure, which will be through futures and options limited to 10% of the net assets. The Fund may therefore be exposed to 120% of its net assets.

Optional strategies: depending on the manager's expectations, he may sell or buy equity market, interest rate or volatility options. For

example, if he anticipates a sharp rise in the market, he may buy calls; if he thinks the market will rise slowly and that implied volatility is high, he may sell puts. On the other hand, if he expects the market to fall, he will buy puts. Finally, if he thinks the market can no longer rise, he will sell calls. The manager may combine these different strategies. The sub-fund's overall exposure to the equity market, including exposure arising from the use of derivatives, shall not exceed 10% of the net assets.

Credit derivatives :

The credit allocation is made on a discretionary basis by the manager.

The credit derivatives used are CDS indices (CDX or iTraxx type) and single issuer CDSs. Single-issuer CDSs may be used subject to the standardisation of the contract and the information available on the markets concerning the underlying entity.

Similarly, index CDSs will be subject to the liquidity and accessibility of the index.

These credit derivatives are used for hedging purposes through the purchase of protection:

- in order to limit the risk of capital loss on certain issuers (present in the sub-fund)
- in order to benefit from an anticipated deterioration in the creditworthiness of an issuer or a basket of issuers not present in the sub-fund that is greater than that of an exposure present in the sub-fund.

and for exposure purposes through the sale of protection:

- to the credit risk of an issuer
- to the credit risk on CDS indices

As CDS may be used for exposure to credit risk or to hedge the sub-fund's credit risk, the use of indices for this purpose could result in transactions which, on a holding by holding basis, could be likened to arbitrage (hedging of the sub-fund's overall credit risk by issuers, parent companies, subsidiaries or other entities not present in the sub-fund). The percentage of the sub-fund's net assets exposed to credit derivatives is between 0% and 20%.

Securities incorporating derivatives :

The sub-fund may hold products incorporating derivatives (preferential rights/warrants, EMTNs, warrants, convertible bonds and, more generally, all puttable/callable products) as part of its equity portfolio management:

- when these securities are detached from the shares held in the portfolio;
- when it is more advantageous to acquire shares by purchasing and then exercising these securities (e.g. participation in a capital increase by first purchasing Preferential Subscription Rights on the market).

Securities incorporating complex derivatives :

Securities with complex derivatives attached: the Sub-fund may have recourse to securities with Cocos attached, to a maximum of 15% of net assets.

Deposits and cash

The Sub-fund may use deposits to optimise the management of the Sub-fund's cash and to manage the different subscription/redemption value dates of the underlying UCIs. These transactions are carried out within the regulatory limits. The sub-fund may hold cash on an incidental basis (up to 10% of net assets), in particular to cover investor share redemptions. However, in order to protect investors' interests, the cash holding threshold may be raised to 20% of net assets when justified by exceptional market conditions.

Cash lending is prohibited.

Cash Borrowings

The Sub-fund may borrow cash, particularly as a result of investment/disinvestment or subscription/redemption transactions. Although it is not intended to be a structural cash borrower, the Sub-fund may find itself in a debit position as a result of transactions linked to its cash flows (ongoing investments and divestments, subscriptions/redemptions, etc.) and may therefore temporarily borrow up to a maximum of 10% of the Sub-fund's net assets.

Temporary acquisition and sale of securities:

None

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

7. Special cases of UCIs with sub-funds

The sub-fund may invest up to 10% of its net assets in shares of another sub-fund of the same UCI.

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk	The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.
Discretionary management risk	The discretionary management style is based on anticipating trends in the financial markets. The Fund's performance will depend on the issuers selected and the asset allocation defined by the manager. There is a risk that the Management Company will not select the best-performing securities and that the net asset value of the Fund will therefore fall.
Equity market risk	Degree of exposure to equity risk: 0% to 10%. Fluctuations in equity markets may lead to significant changes in net assets, which may have a positive or negative impact on the net asset value of the Fund. The fall in share prices corresponds to market risk
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk. Exposure to currency risk in currencies other than those of the eurozone or the European Union will remain incidental.
Credit risk	The Fund may invest in fixed income products. Credit risk is the potential risk of issuer default or credit downgrade, which may lead to a fall in net asset value.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.
Risks associated with investing in speculative and/or unrated and/or subordinated (excluding CoCos) and/or hybrid and/or perpetual securities	The Fund may invest in bonds with these characteristics. With this type of paper, (i) market movements are more pronounced, both upwards and downwards, and (ii) the risk of payment default resulting in the permanent loss of all or part of the amounts invested is higher. This will be reflected in the Fund's evolving net asset value.
Contingent bonds risk	CoCos are hybrid securities whose main purpose is to enable the issuing bank or financial company to be recapitalised in the event of a financial crisis. These securities have loss-absorption mechanisms, described in their issue prospectuses, which are generally activated if the issuer's capital ratio falls below a certain "trigger" level. The trigger is firstly mechanical: it is generally based on the CET1 (Common Equity Tier 1) accounting ratio in relation to risk-weighted assets. To compensate for the discrepancy between book values and financial reality, there is a discretionary clause allowing the supervisor to activate the loss-absorption mechanism if it considers that the issuing institution is in a situation of insolvency. CoCos are therefore subject to specific risks, including subordination to precise trigger criteria (e.g. deterioration in the equity ratio,) conversion into shares, loss of capital or non-payment of interest. The use of subordinated bonds, particularly Additional Tier 1 bonds, exposes the fund to the following risks: - triggering of contingent clauses: if a capital threshold is crossed, these bonds are either exchanged for shares or undergo a capital reduction, potentially to 0. - cancellation of coupon: Coupon payments on this type of instrument are entirely discretionary and can be cancelled by the issuer at any time, for any reason, with no time constraints. - capital structure: unlike traditional secured debt, investors in this type of instrument can suffer a loss of capital without the prior bankruptcy of the company. In addition, the subordinated creditor will be repaid after the ordinary creditors, but before the shareholders. - Callable perpetuals: These instruments are issued as perpetual instruments, callable at predetermined levels only with the approval of the competent authority - valuation / yield: The attractive yield on these securities can be seen as a complexity premium.
Counterparty risk	This is the risk associated with the Fund's use of over-the-counter financial futures instruments. These transactions, entered into with one or more eligible counterparties, potentially expose the Fund to a risk of default by one of its counterparties, which could lead to an event of default that would no longer allow the Fund to honour its commitments under these transactions.
Liquidity risk	Liquidity risk measures the difficulty that the fund may have in selling certain assets within a short timeframe in order to meet the need to raise cash or deal with a fall in their market value. Please note that over-the-counter markets do not offer immediate liquidity or enable assets to be sold at the price expected by the Fund.
Risk associated with the use of derivatives	The use of derivatives can lead to significant variations in the net asset value over short periods, both upwards and downwards.

Specific risk associated with subordinated debt securities	A debt is said to be subordinated when its repayment depends on the initial repayment of other creditors (preferred creditors, unsecured creditors). The subordinated creditor will therefore be repaid after the ordinary creditors, but before the shareholders. The interest rate on this type of debt will be higher than on other debt. In the event of the triggering of one or more clauses provided for in the issue documentation for the said subordinated debt securities and, more generally in the event of a credit event affecting the issuer concerned, there is a risk that the net asset value of the Fund will fall. The use of subordinated bonds may expose the Fund to the risks of coupon cancellation or deferral (at the sole discretion of the issuer), uncertainty over the redemption date, or valuation/return (the attractive yield of these securities may be considered a complexity premium).
Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none"> 1) lower revenues; 2) higher costs; 3) damage or depreciation in asset value; 4) higher cost of capital; 5) reputational risks and 6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Legal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

"A" shares are open to all subscribers. However, due to the high risk associated with an investment in fixed-income products, this sub-fund is intended primarily for investors who are prepared to withstand the sharp fluctuations inherent in the fixed-income markets and who have a minimum investment horizon of three years.

"N" shares are intended for all subscribers, and more specifically:

- marketing networks that have received prior approval from the management company
- Or to distributors and intermediaries who have received prior approval from the Management Company and who provide the following services:
 - Independent advice within the meaning of MiFID 2
 - Individual management under mandate

"Z" shares are reserved exclusively for:

- the Management Company (including as part of its discretionary management activity)
- the staff of the Management Company (permanent employees and senior managers) and their spouses (not legally separated), parents and children
- FCPs for employees of the Management Company
- life insurance or capitalisation companies for the equivalent value of the amount that would be invested in a unit of account representing the Z shares of the sub-fund within a life insurance or capitalisation contract taken out by a member of the Management Company's staff, or their spouse who is not legally separated, parents and children.

SEXTANT BOND PICKING may be used as a vehicle for unit-linked life insurance or capitalisation contracts.

11.2 Minimum recommended investment period

3 years

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the issuer selection process and the determination of issuers' weight in the portfolio. The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future 3 years cash requirements and your risk aversion. It is also advisable to diversify investments sufficiently to avoid excessive exposure to this Fund risk. In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

Allocation of distributable income : Accumulation

13. Distribution frequency

Non applicable

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares).

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR0013202132 Share A	100 €	1 share(s)
FR0013202140 Share N	5000 €	100,000 €
FR0013202157 Share Z	100 €	1 share(s)

Subscriptions are accepted either in number of shares (expressed in thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in thousandths of shares).

Subscriptions may be made in cash and/or in kind (by contribution of transferable securities) subject to the prior agreement of the Management Company.

How to submit subscription requests

Subscription and redemption requests are centralised the day before the valuation day before 11:00 with the custodian: CACEIS BANK, whose registered office is located at 89-91 rue Gabriel Péri – 92120 Montrouge RCS Nanterre.

Postal addresses of offices: CACEIS BANK.

They are executed on the basis of the next net asset value calculated on the basis of the closing price on the day on which the requests are centralised. Subscription and redemption requests received after 11:00 are processed on the basis of the net asset value calculated according to the method described above. The relevant payments will be made 2 business days after the valuation.

In the event of a public holiday or stock market closure, it will be calculated on the previous business day.

Shareholders' attention is drawn to the fact that orders transmitted to marketers other than the institutions mentioned above must take into account the fact that the order centralisation cut-off time applies to said marketers vis-à-vis CACEIS BANK. Consequently, these marketers may apply their own cut-off time, earlier than that mentioned above, in order to take account of their deadline for transmitting orders to CACEIS BANK.

Orders are centralised in accordance with the table below:

D-1 business day	Day on which the NAV is established (D)	D+1 to D+3	D+2 business days	D+2 business days
Daily reception of orders and centralisation Daily before 11:00 (Paris time) of subscription* and redemption orders.	Orders are executed no later than day D	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions D-1 before 4pm

**Unless otherwise agreed with your financial institution.*

The Management Company monitors liquidity risk by Sub-Fund in order to ensure an appropriate level of liquidity for each Sub-Fund, particularly with regard to the risk profile, investment strategies and redemption policies in force for the funds. An analysis of the liquidity risk of the Sub-Fund## is carried out to ensure that the investments and funds have sufficient liquidity to honour the redemption of unitholders under normal and extreme market conditions. The Management Company has set up a liquidity management system and tools to ensure that investors are treated fairly.

The Sub-Fund has not implemented a redemption cap mechanism (known as "Gates") so in the event of exceptional circumstances, the absence of a redemption cap mechanism may result in The UCITS being unable to honour redemption requests and thus increase the risk of a complete suspension of subscriptions and redemptions on The UCITS.

The Sub-Fund implements several complementary DNSH schemes to ensure that its investments do not cause significant environmental and social harm.

16. Fees and commissions

16.1 Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid To the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
Subscription fee not earned To the Sub-Fund	Net asset value x number	A	1.00%
		N	5.00%
		Z	None
Subscription fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		Z	None
Redemption fee not earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		Z	None

Redemption fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		Z	None

Subscription and redemption fees are not subject to VAT.

Exemptions:

It is possible to proceed, free of commissions, with simultaneous redemptions/subscriptions on the basis of the same net asset value for a zero balance transaction volume.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)
Financial management fees	Net asset	A	1.25% (incl. tax) maximum
		N	0.85% (incl. tax) maximum
		Z	None
Operating Expenses and other services (flat-rate assessment of costs detailed below)	Net asset	Applied to the Fund	0.05% (incl. tax) maximum ¹
indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	Accessories
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	A	15% (incl. tax) of the Sub-Fund's performance in excess of its performance indicator plus 300BP.
		N	15% (incl. tax) of the Fund's performance in excess of its benchmark index plus 350 BP.
		Z	None

¹ The fixed maximum rate may be charged even if the actual fees are lower than it, and conversely, if the actual fees exceed the displayed rate, the excess beyond this rate will be borne by the Management Company

Detail of operating expenses and other services:

Operating expenses and other services include:

- (i) Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- (ii) Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- (iii) Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);
 - Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);
 - Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and messaging functions of Bloomberg).

- (iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.
- (v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring breaches of thresholds, exceeding ratios etc.).
- (vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-financial constraints arising from specific client requests and specific to the UCITS).
- (vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French Monetary and Financial Code,
- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

Calculation of the performance fee (A and N shares)

The performance fee is based on a comparison between the performance of the sub-fund and its benchmark index over the financial year.

Variable management fees are deducted for the benefit of the Management Company as follows: The performance of the sub-fund is calculated on the basis of changes in the net asset value: if, over the financial year, the performance of the sub-fund is positive and greater than its benchmark, i.e.

- the "Euro Constant Maturity Treasury (CMT) cash 3Y" index capitalised + 300 bp for the A share
- the "Euro Constant Maturity Treasury (CMT) cash 3Y" index capitalised + 350 bp for the N share

the variable management fee will represent 15% (inclusive of tax) of the difference between the performance of the sub-fund and the benchmark. The first calculation of the variable management fee will be carried out for the period from the date of creation of the sub-fund until 31 December 2018.

- If, over the financial year, the sub-fund's performance is negative or below its benchmark, the variable portion will be zero.

The outperformance fee is calculated on the basis of the net assets on which the performance has been achieved and the subscriptions and redemptions made in the Sub-fund. This method involves comparing the assets of the Sextant Bond Picking Sub-fund with the assets of a sub-fund that follows the benchmark index by applying the same subscription and redemption flows.

If, during the course of the financial year, the performance of the Sub-fund since the beginning of the financial year is positive and greater than the benchmark calculated over the same period, this outperformance shall be subject to a provision for variable management fees when the net asset value is calculated.

In the event that the Sub-fund underperforms the benchmark between two net asset values, or underperforms, any provision previously set aside will be adjusted by reversing the provision. Reversals of provisions are limited to the amount of previous allocations.

This variable component will only be definitively received at the end of the financial year if the performance of the Sub-fund is positive and greater than the benchmark threshold.

In the event of share redemptions, if there is a provision for variable management fees, the portion proportional to the shares redeemed shall be paid immediately to the Management Company

These costs (fixed and possibly variable) are charged directly to the income statement of the Sub-fund.

Any underperformance of the Sub-fund relative to the benchmark is made up before outperformance fees become payable. To this end, the catch-up period is set at five years. If, during the catch-up period, a new underperformance is observed, this will trigger a new catch-up period of 5 years from the date of the observation in respect of this underperformance. Finally, if the underperformance has not been caught up after five years, it is no longer taken into account for the sixth year.

Illustration:

Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment	Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment
Year 1	5	0	Yes	Year 7	5	0	Yes
Year 2	0	0	No	Year 8	-10	-10	No
Year 3	-5	-5	No	Year 9	2	-8	No
Year 4	3	-2	No	Year 10	2	-6	No
Year 5	2	0	No	Year 11	2	-4	No
Year 6	5	0	Yes	Year 12	0	0*	No

*The underperformance to be offset in year 12 is reset to 0 and not to -4 due to the application of the 5-year catch-up period starting in year 8.

The past performances of the Sub-fund are available on the website of Amiral Gestion.

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and evaluates them periodically to ensure the quality of the services provided. Research fees are included in the transaction fees and are deducted from the Fund for each transaction.

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

Swing Pricing NAV adjustment method with trigger threshold

In order not to penalise shareholders who remain in the Sub-Fund, an adjustment factor will be applied to those who subscribe or redeem significant amounts of the Sub-Fund's assets, which is likely to generate costs for holders entering or leaving the Sub-Fund that would otherwise be charged to shareholders present in the Sub-Fund. Thus, if on any NAV calculation day the total number of net subscription/redemption orders from investors for all of the Sub-Fund's share categories exceeds a threshold predetermined by the Management Company and determined on the basis of objective criteria as a percentage of the Sub-Fund's net assets, the NAV may be adjusted upwards or downwards to take into account the readjustment costs attributable to the net subscription/redemption orders respectively. The NAV of each share category is calculated separately, but any adjustment has an identical percentage impact on the overall NAV of each share category of the Sub-Fund.

The cost and trigger threshold parameters are determined by the Management Company and reviewed periodically, but this period may not exceed six months. These costs are estimated by the Management Company on the basis of transaction costs, buy/sell ranges and any taxes applicable to the Sub-Fund.

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and assesses them periodically to ensure the quality of the services provided. Consequently, it is also not possible to predict exactly how often the Management Company will have to make such adjustments, which may not exceed 2.5% of the NAV. Investors are informed that the volatility of the NAV of the Sub-fund may not reflect only the volatility of the securities held in the portfolio due to the application of swing pricing.

4. Management objective and investment strategy**4.1 Management objective**

Sextant Climate Transition Europe is a Sub-Fund with a management objective to outperform the MSCI EMU Small Cap index over the recommended five-year investment period, net dividends reinvested, by gaining exposure to European equity markets through companies that stand out for their level of progress in tackling climate issues, as well as for their good governance and the quality of their social and environmental policies (ESG), using a selective SRI approach in relation to an investable universe.

The sustainable investment objective is to:

- finance small and medium-sized companies whose business models take account of climate change issues
- actively support companies capable of generating a measurable positive contribution to the fight against global warming over the recommended investment period.

The sub-fund is classified under article 9 of the SFDR¹ regulations.

Investors should note that an investment in the Sub-Fund has no direct impact on the environment or on society, but the Sub-Fund seeks to select and invest in companies that satisfy specific criteria laid out in its management strategy.

¹ <https://eur-lex.europa.eu/legal-content/FR/TXT/PDF/?uri=CELEX:32019R2088&from=fr>

4.2 Benchmark index

The performance of the Sub-Fund can be compared to that of its benchmark, the MSCI EMU Small cap (net dividends reinvested). With 436 constituents, the index covers around 14% of all companies with a market capitalisation on 18 November 2022 of between €120 million and €8 billion (note that two-thirds are made up of companies with a market capitalisation of between €2 billion and €7 billion) in the eurozone at the time the sub-fund was created. This indicator is calculated in euros and net dividends reinvested.

Investors' attention is drawn to the fact that, as the management style (see below) is discretionary, the composition of the portfolio will never seek to reproduce, either geographically or by sector, the composition of the benchmark.

As of the last update of this prospectus, the administrator of the MSCI index making up the benchmark index is listed in the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of June 8, 2016, the Management Company has a procedure for monitoring the benchmark indices used describing the measures to be implemented in the event of substantial changes to an index or the discontinuation of the supply of that index

4.3 Investment strategy**❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE**

In order to meet its management objective and also to enable PEA eligibility, 75% of the sub-fund's net assets are permanently invested in PEA-eligible European equities. The remaining 25% may be invested in equities outside the European Union (limited exclusively to the United Kingdom, Switzerland and Norway).

(i). Definition of universes:

a. The "Initial Investment Universe" is composed of small and mid-cap equities, i.e., at the time of investment, capitalisations of less than €7 billion in the European Union but also in the United Kingdom, Sweden, Switzerland and Norway. And up to 10% of the Sub-

Fund's net assets is invested in EU capitalisations over €7 billion euros from the above-mentioned geographic zone, on condition that these stocks have an ESG rating that exceeds the required thresholds. The Investment Universe is made up of around 2,620 stocks.

b. The manager then determines the **Eligible Investment Universe** using a proprietary score to measure the materiality of climate issues. The issues at stake are measured by an analysis of non-financial indicators (see below) that quantify, using a proprietary "double materiality" score, the exposure of these companies to the risks and opportunities of climate change and also the risks that the companies' activities pose for climate change.

The data and indicators used to quantify the double materiality score are as follows²:

- the risks of a company's negative impact on the climate: direct carbon emissions (scopes 1 and 2), indirect carbon emissions (scope 3), carbon intensities, energy consumption, water consumption, quantity of waste produced, etc.
- the risks of negative impact of climate change on a company: estimated revenues at risk by 2030 according to the most unfavourable climate change scenario (transition risk), aggregate score measuring physical risks by 2030 according to the most unfavourable climate change scenario
- Climate change opportunities: shares of alignment with the climate change mitigation objective according to the European taxonomy, based on aligned revenues, CAPEX and OPEX; consumption of renewable energy produced or purchased, initiatives to reduce the quantity of inputs (excluding energy), action plan to promote energy savings.

The higher the risk of a company having a negative impact on the climate, the higher the score.

The greater the risk of climate change having an adverse impact on a company, the higher its score.

The greater the opportunities created by climate change, the higher the score.

On the basis of this double materiality score, the sub-fund undertakes to exclude 20% of the companies in the Initial Investment Universe with the lowest materiality to climate issues, in order to obtain the "Eligible Investment Universe". This approach is significant because it uses extra-financial criteria to measure exposure to climate risks and opportunities for each component of the initial universe, whatever their sector and ESG quality.

c. Lastly, a final **ESG Filter**, as described below, is applied making it possible to exclude from the "Eligible Investment Universe" a minimum of 20% of the companies in this universe thus resulting in the '**Investable Universe**').

(ii). Selection of companies and allocation by category:

>The manager selects companies from the Investment Universe and categorises them into two categories: "**Climate Core Business Category**" or '**Climate Transition Category**'; according to the following Climate Allocation Matrix depending on (a) temperature alignment relative to a climate warming trajectory limited to 2°C* and (b) proprietary climate commitment score out of 100**. This classification makes it possible to determine objectives for climate performance and, as a corollary, a tool for commitment and specific monitoring of the companies in each group according to their level of maturity and positive contribution to the fight against global warming. The final portfolio should be concentrated (roughly 25 positions)

Climate allocation matrix:

1. Climate Core Business category:

- a) Temperature alignment with a climate trajectory below 2°C*
- b) A climate commitment score above 50/100 (=> proprietary internal qualitative assessment score**) as defined below

2. Climate Transition category:

- a) Temperature alignment with a climate trajectory of between 2°C and 3°C*
- b) A climate commitment score above 20/100 (=> proprietary internal qualitative assessment score**)

*The calculation of an alignment temperature in relation to a global warming scenario is modelled using an analysis of the greenhouse gas emissions trajectory based on the SB2A methodology carried out by data provider Iceberg Datalab

* Climate commitment and maturity score: (=> internal proprietary qualitative assessment score). Amiral Gestion's proprietary climate commitment score (/100) is a tool for assessing a company's maturity on climate issues, both in terms of governance and the consistency of its climate commitments and associated action plans. This score is used in particular to identify areas of concern and areas for improvement in terms of climate change that could trigger action to engage with the companies in the portfolio (see section "vi. Monitoring sustainable investment objectives").

It is constructed as follows:

Climate governance	/20	Climate action and commitments	/40
Integrating climate into remuneration schemes	/10	Carbon footprint including at least part of scope 3	/5
Level of climate expertise and involvement of the Board and senior management	/2,5	Scenario analysis to measure exposure to transition and physical risks	/3
Climate risk assessment and management committee	/2,5	CDP reporting and/or other equivalent and recognised local standards	/7
Say on climate	/5	Short-term GHG emissions reduction targets = Setting emission reduction targets - 5 pts SBTi "Target set" - 5pts = Target 1.5°C rather than Below 2°C - 5 pts = Quantified reduction target for scope 3 - 5 pts	/20
		Long-term objective of contributing to carbon neutrality	/5

Bonus ACT +5 points

Responsible investment approach applicable to the sub-fund.

Consistent with its management objective, the sub-fund's sustainable investment objective is:

"Financing small and medium-sized companies that address climate issues in their business models and actively supporting Companies capable of generating, over the recommended investment period, a measurable positive contribution in the fight against global warming".

Our responsible investment approach focuses on companies that can make a contribution to mitigating or adapting to climate change:

- either because they are moving towards a reduction in their own GHG emissions;
- or because they are helping to reduce the GHG emissions of other players in the economy;
- or because they offer solutions for adapting to the physical consequences of global warming.

The impact of these companies is measured through a combination of quantitative indicators (2°C alignment) and qualitative indicators (Climate Commitment Score). These tracking indicators will be published annually in the Sub-Fund's climate impact report.□

The manager pursues a policy of active shareholder engagement on climate-related issues in order to meet the objective of sustainable investment.

The application of successive filters leads to the selection of a shortlist of securities in the portfolio that have the potential to help the sub-fund achieve the following objectives:

1. Reduce the sub-fund's temperature over 3 years (at portfolio level)

.This objective will be achieved by effectively reducing the temperature of the emitters in the portfolio, putting them on a trajectory towards 1.5°C (excluding any arbitrage effects)³

2. Increase the "climate commitment score" for all companies in the portfolio, particularly in the "Climate Transition" category, between the time they enter and exit the portfolio.

Details of the Investment Process

(i). The ESG filter

The application of this filter excludes at least 20% of the eligible investment universe on the basis of:

- **the sectoral exclusion policy** on controversial weaponry, tobacco and pornography in accordance with Amiral Gestion's policy on the matter⁴ according to the criteria and thresholds applicable to the Sub-Fund, as well as the exclusion of players exposed to thermal coal, oil and gas extraction⁵.
- **normative exclusions** in the event of violation of the Principles of the United Nations Global Compact, and/or the OECD Guidelines for Multinational Enterprises, after internal verification and confirmation of non-compliance by the Controversies Monitoring Committee. Ineligibility for sustainable investment (and therefore for inclusion or retention in this Article 9 SFDR classified portfolio) are companies with Watchlist status according to Sustainalytics, and whose status is confirmed by the committee for monitoring of controversies following an internal review.
- **exclusions/non-investment in companies exposed to serious (Level 4) and severe controversies (Level 5)**, on the Sustainalytics scale, if confirmed by the committee for monitoring of controversies following an internal review. Particular attention is also paid to controversies relating to climate change, biodiversity, fundamental human rights and fiscal responsibility

From the ineligibility of companies with worse ESG scores. This ESG filter is based mainly on MSCI's "External ESG Scores")⁶: a minimum ESG rating of 4/10 and a minimum rating of 5/10⁷ on the Governance pillar are thus required for entry into the portfolio.

In addition, when the portfolio invests in UCITS (excluding cash management), the company will give preference, where possible, to UCITS with the same SFDR classification as that of the Sub-Fund.

(ii). Sustainable investing

The management team is committed to ensuring that 100% of the sub-fund's equity investments are sustainable (i.e. a minimum of 90% of the portfolio, including derivatives and cash used on an incidental basis).

Sustainable investment according to Amiral Gestion is defined as an investment in a financial instrument relating to one or more economic activities:

- substantially contributing to the environmental objectives: i) mitigating climate change in order to achieve carbon neutrality by 2050 in accordance with the Paris Climate Agreements; ii) adapting to the effects of climate change⁸
- making a net positive contribution to one or more United Nations Sustainable Development Goals (SDGs) of a social nature by 2030;

Provided that these investments do not cause significant harm to any other environmental or social objectives, and that the companies in which the investments are made apply good governance practices as detailed in the Sub-Fund's pre-contractual SFDR appendix 3.

(iii). Validation of Do No Significant Harm (DNSH) and consideration of Principal Adverse Impacts (PAI)⁹

The sub-fund relies on a DNSH system based on several axes of its investment process to ensure that its investments do not cause significant social or environmental harm.

As of the date of this prospectus being updated, the DNSH system includes:

- inclusion of strict ESG filters¹⁰, normative sector exclusions¹¹, controversies and the worst ESG scores and accumulating a minimum of 20% exclusion from the eligible universe to arrive at the investable universe.
- Monitoring good governance practices, in particular by achieving a minimum portfolio entry score of 5/10 on the Governance Pillar, by excluding controversies of high (level 4) or severe (level 5)¹² including those relating to Governance, and through shareholder engagement initiatives in the event of significant shortcomings or controversies identified relating to Governance (in particular if the controversies relate to Fiscal Responsibility, and if the shortcomings identified are linked to the PAI)

- The taking into account of "PAI": since 31.12.2022, the Sub-Fund has undertaken to monitor and factor in the main negative impacts of its investments ("SFDR PAI") on sustainability factors, in order to gradually identify and implement appropriate measures. The Sub-Fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS. To take these PAI indicators into account, the Sub-Fund:
 - relies on Amiral Gestion's responsible investment approach: sector and normative exclusions, close monitoring of controversies including exclusions in certain cases, metrics analysed as part of ESG research in particular when relevant to the sector, voting policy levers for certain PAI indicators or individual and/or collaborative dialogue encouraged on certain PAI to encourage companies to improve transparency and/or their practices. Amiral Gestion's PAI policy, including the overall approach and the sources of each indicator, is available on its website, under the "Responsible Investment" heading: <https://www.amiralgestion.com/fr/investissement-responsable>
 - deploys additional measures that are specific to it: Given the positioning and sustainable investment objective of Sextant Climate Transition Europe, which focuses on the fight against climate change, the sub-fund gives priority to taking into account PAI #1, #2, #3 and #4 in accordance with the procedures set out in the sub-fund's pre-contractual SFDR appendix 3.

The metrics and information on the consideration of the main negative impacts will be reported annually in the Sub-Fund's periodic "SFDR Appendix 5" document, for the first time in 2024 in respect of the 2023 financial year.

(iv). Fundamental analysis and valuation

The Sextant Climate Transition Europe Sub-Fund relies on a rigorous selection of securities obtained after an internal fundamental analysis synthesised in the global "Quality rating" of Amiral Gestion. During this phase, whenever possible, the managers contact the company and its managers to perfect their understanding of its activities and business model, to address strategic issues, and finally to deal with issues related to the financial statements (income statement, cash flow statement, balance sheet). Where necessary, the Management Company supplements this strategic and financial understanding with on-site visits (e.g. to industrial sites) to form its own opinion and to verify certain information provided by the company. This fundamental analysis is based on a number of criteria:

- business model: recurrence, predictability, cyclicity, entry barriers;
- quality of management: operational and financial track record, respect for minority shareholders, motivation, training and profit-sharing of employees, quality of relations with third parties;
- quality of financial structure: balance sheet, realisable assets, level of debt;
- criteria relating to the social, environmental and governance dimensions which are the subject of a specific independent rating called the 'Internal ESG rating' integrated into the overall quality rating and assessed qualitatively.

The study of these different criteria determines what Amiral Gestion calls its "Quality score", which varies from 0 to 10. A high rating reflects strong company fundamentals. This rating is one of the elements that guides investment decisions (see section v) and which may be the basis of an ongoing dialogue with company managements, and possibly even inspire engagement actions where necessary, due to potentially material ESG risks. Moreover, each company is the object of a valuation, based on historical accounts, forecasts, valuation ratios and discounted cash flows (DCF).

In addition, each company monitored is subject to a valuation model that incorporates historical accounts, forecasts, valuation ratios and a discounted cash flow model (hereafter "DCF"). Amiral Gestion considers that the valuation of a company is linked to the measurement of its capacity to generate free cash flows, which is why the management team uses a DCF model to assess the intrinsic value of a company.□

This model includes a 5 to 10 year accounting history with:

- a detailed analysis of sales and their breakdown by geographical area and by business;
- an analysis of the income statement, balance sheet and cash flow statement, drawing on all the information available, particularly in the annual reports, in order to make all the restatements necessary for an economic reading of the accounts that is consistent between our different files;
- detailed forecasts based on various assumptions supported by our own investigations.

(v). Investment decision

All of this analysis is used to define a target intrinsic value (see valuation model above, DCF), an Internal Quality Score (see above) and an assessment of the company's climate profile.

These elements allow us to draw conclusions about the company's risks and its attractiveness.

The potential, which depends on the target intrinsic valuation, combined with the Internal Quality Rating and the climate profile, makes it possible to rank the appeal of each company as a possible investment for the Sub-Fund.

Investment decisions also depend on the existence of a « safety margin » which is the difference between the fair value of a company (in the opinion of fund managers) and its market value (i.e. market capitalisation).

Note that environmental, social and governance (ESG) criteria are one component of investment policy, but their weight in the final decision is not defined beforehand.

Controlling the ESG quality of the portfolio, in accordance with the requirements of the SRI Label and the France Relance Label, which the Sub-fund holds.

Positions are acquired on a medium- to long-term basis (i.e. holding period of more than two years).

(vi). Monitoring of sustainable investment objectives

a) Active shareholder engagement policy

In line with its sustainable investment objective, the Sub-Fund supports companies that have a role to play in the climate transition and engages in active dialogue to assist them in this domain. Amiral Gestion's activist shareholder policy may apply to both Climate Core Business and Climate Transition categories. However, particularly intense efforts are made to reach out to companies in the Climate Transition category.

The associated commitment actions are a key lever for achieving our objective of improving the climate commitment score of each invested company between the time it enters and exits the portfolio.

The shareholder engagement approach applied to the Sub-Fund is also embodied in the systematic participation in General Meetings, in accordance with Amiral Gestion's proprietary voting policy¹³ Use of voting rights may be the object of a pre-AGM discussion with management, resolution proposals, or support for concerted activist shareholder actions, in order to express our expectations in terms of transparency and changing practices implied by resolutions (e.g. Say on climate).

b) Measures for monitoring results linked to sustainable investment objectives

An analysis of KPIs related to the Sub-Fund's sustainable investment objectives will be included in monthly financial reports. An annual report of the Sub-Fund's impact will include an update on the climate performance and an account of engagement actions with companies targeted in the transition category.

Part verte - Taxonomie européenne

The principle of "cause no significant harm" applies only to investments underlying the financial product that take into account the European Union's criteria for environmentally sustainable economic activities.

The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

Methodology Limitations:

The double materiality climate score is based on a statistical model of extra-financial indicators that are either reported by the company or estimated by data providers. The quality of estimates is variable, depending on the source. In order to optimise coverage of our investment universe in terms of climate data, the Management Company also consults data suppliers with models that cover a wide range of issuers. There is, therefore, an arbitrage between quantity and quality of data, and care is taken to rely on sources that take a highly robust approach to the most important climate data (e.g. carbon emissions, alignment with taxonomy etc). The Management Company uses several detailed indicators detailed in the report of technical criteria related to the SFDR regulation, suggesting better coverage and data quality in the future.

The ESG analysis adopted by the sub-fund is based mainly on qualitative and quantitative data provided by the companies themselves. The Sub-Fund's ESG analysis depends, therefore, on information whose quality is heterogeneous and on the quantity of data available. To offset these shortcomings, the Sub-Fund submits ESG and climate questionnaires to companies, in order to obtain the necessary information.

Third-party ESG data may be incomplete, inaccurate, or only available on an occasional basis. There is, therefore, a risk that the fund managers may assess the performance and impact of an issuer incorrectly. There is a bias due to the manager's bias in selecting and interpreting the extra-financial criteria used. There may also be a size bias, as small and mid-caps have a limited budget allocated to their responsible and CSR approach, and the manager aims to improve the availability and quality of data as a result of their commitment.

Temperature conversion:

- The standard temperature conversion is based on intensity and therefore does not take into account production growth which, despite operational improvements, can lead to an absolute increase in emissions.
- The temperature is based on the sectoral decarbonisation curve and therefore does not take into account efforts to achieve temperature alignment with a climate trajectory below 2°C.

The data provider's calculation does not take into account the Management Company's commitment at the time of the analysis. For example, if the Management Company invests in companies that have fallen behind, but demands that they make a real commitment and promotes strategic change, these efforts will not be reflected in the temperature of the portfolio during the year of calculation N. We consider this bias acceptable, because « progress tracking » cannot be implemented without first having a reliable footprint metric. The impact of the Management Company's commitment, however, can be captured in other ways, such as changes in the temperature of the portfolio over time (n+1, n+2...), commitment reports, proxy votes, etc.

^{.2} When the sub-fund is created, data from various suppliers can be used for this score: for example, Sustainalytics, S&P Trucost, IcebergDataLab, Ethifinance.

³ By reducing the temperature of issuers between their entry and exit from the portfolio

⁴ Amiral Gestion's sector policy is available on its website: <https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>

⁵ The Oil & Gas sector (exploration, extraction, refining, distribution) is not included in the Initial Investment Universe, except in exceptional cases validated by the ESG Committee, if the latter considers that the company has a proven substantial contribution to make to the climate transition, validates the DNSH of the taxonomy, complies with the good practice of "Say on Climate" and that the quality of its ESG profile is among the best-in-class or best-effort in its sector.

⁶ Mainly MSCI ESG Ratings, and failing that the ESG Performance Rating of the Admiral benchmark from Ethifinance's Gaia database, or the Internal Quality Rating to complete the coverage if necessary

^{.7} Minimum G rating threshold set for Sustainable Investment qualification

^{.8} The substantial contribution to the objective of adapting to climate change will constitute an effective criterion for Sustainable Investment qualification from 1 January 2024

⁹ Principal adverse impacts ("PAIs") are defined as the impacts of investment decisions that result in significant, or potentially significant, adverse impacts on sustainability factors (environmental, social and labour issues, respect for human rights and anti-corruption and bribery).

¹⁰ In addition to the Climate filter applied upstream, reducing the initial universe by at least 20% to arrive at the eligible universe

^{.11} The normative policy is based on compliance with the United Nations Global Compact and/or the OECD Guidelines

^{.12} According to the Sustainalytics scale ranging from 1 (least serious) to 5 (most serious)

¹³ The voting policy is available on the website: <https://www.amiralgestion.com/investissement-responsable/>

❖ ELIGIBLE ASSETS

Shares

To ensure that the sub-fund is PEA-eligible, 75% of its net assets are permanently invested in PEA-eligible European equities. The remaining 25% may be invested in equities outside the European Union (limited exclusively to the United Kingdom, Switzerland and Norway).

The sub-fund invests up to 110% of its net assets in small and mid-cap equities (capitalisation of less than €7 billion) and, on an incidental basis, in equities with a capitalisation of more than €7 billion.

The Sub-fund may invest in money market instruments in the form of liquidity, up to a maximum of 10% of its assets;

Debt securities and money market instruments

The sub-fund may invest up to 10% of its net assets in securities treated as equivalent to bonds (convertible bonds, bonds with warrants, profit participating securities).

Investments in securities of other UCITS, AIFs and/or investment funds

The Sub-fund may invest up to 10% of its net assets in securities of other French or European UCITS or AIFs, mainly for cash investments via "standard money market" and "short-term money market" UCITS/AIFs and "bond" UCITS/AIFs.

These UCIs and investment funds may be managed by the management company.

The Sub-fund may invest up to 5% of its net assets in foreign investment funds (holding no more than 10% of the units of UCIs or foreign investment funds) that meet the criteria set out in Article R.214-13 of the French Monetary and Financial Code, or in AIFs. The Sub-fund will never invest in venture capital funds (FCPR), assimilated funds, or in securitisation vehicles. The Sub-fund may invest in shares of another Sub-fund of the same UCITS.

Derivatives and securities with embedded derivatives

Transactions involving derivatives (purchases of call options or put options on equities, indices, interest rates or currencies, and purchases or sales of futures, forward exchange contracts or swaps on equities, indices, interest rates or currencies) and securities that are derivatives will be carried out with the aim of exposing or partially hedging the sub-fund against favourable or unfavourable movements in equities, indices, interest rates or currencies.

There will be no overexposure. These instruments will be traded on regulated and/or organised markets or over-the-counter.

Futures (contracts on financial futures instruments) relating to commodity indices will be carried out in compliance with the 5/10/20/40 ratio.

Call options on securities will be sold while holding the underlying security as part of strategies to optimise the return on securities in the portfolio. In addition, sales of call options on securities or indices may be made in order to hedge or expose the portfolio without holding the security or index.

Put options on securities will be written as part of strategies to potentially acquire such securities at a price below the market price at the time the strategy is implemented.

The sub-fund may hold products incorporating derivatives (preferential subscription rights/warrants, warrants, convertible bonds) as part of its equity portfolio management:

- when these securities are detached from the shares held in the portfolio;
- when it is more advantageous to acquire shares by purchasing and then exercising these securities (e.g. participation in a capital increase by first purchasing preferential subscription rights on the market).

Deposits and cash

The sub-fund may use deposits for cash management purposes within the limits set by regulations.

The sub-fund may use deposits to optimise its cash management and manage the different subscription/redemption value dates of the underlying UCIs. It may place up to 20% of its net assets in deposits a single credit institution. This type of transaction will be used on an exceptional basis.

The sub-fund may hold cash on an ancillary basis, in particular to cover share redemptions by investors. The cash holding threshold may be raised to 20% of net assets when justified by exceptional market conditions.

Cash lending is prohibited.

Cash Borrowings

The Sub-fund may borrow cash. Although it is not intended to be a structural cash borrower, the Sub-fund may be in a debit position as a result of transactions linked to its paid-in flows (ongoing investments and divestments, subscriptions/redemptions, etc.), up to a limit of 10% of the net assets.

Temporary acquisition and sale of securities:

None

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

Non applicable

7. Special cases of UCIs with sub-funds

The sub-fund may invest up to 10% of its net assets in shares of another sub-fund of the same UCI.

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk	The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.
Discretionary management risk	The discretionary management style is based on anticipating trends in the financial markets. The Fund's performance will depend on the issuers selected and the asset allocation defined by the manager. There is a risk that the Management Company will not select the best-performing securities and that the net asset value of the Fund will therefore fall.
Equity market risk	Fluctuations in equity markets may lead to significant changes in net assets, which may have a negative impact on the performance of the Fund. The net asset value of the fund may fall significantly.
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk.
Risk related to the size of the capitalisation of the selected securities	The Fund may invest in small- and mid-cap markets, as the volume of securities listed on the stock exchange is reduced, and market movements are therefore more pronounced on the downside and faster than in large-cap markets. The fund's net asset value may therefore fall more quickly and more sharply.
Liquidity risk	Liquidity risk measures the difficulty that the fund may have in selling certain assets within a short timeframe in order to meet the need to raise cash or deal with a fall in their market value. Please note that over-the-counter markets do not offer immediate liquidity or enable assets to be sold at the price expected by the Fund.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.
Counterparty risk	This is the risk associated with the Fund's use of over-the-counter financial futures instruments. These transactions, entered into with one or more eligible counterparties, potentially expose the Fund to a risk of default by one of its counterparties, which could lead to an event of default that would no longer allow the Fund to honour its commitments under these transactions.
Risk associated with the use of derivatives	The use of derivatives can lead to significant variations in the net asset value over short periods, both upwards and downwards.

Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none"> 1) lower revenues; 2) higher costs; 3) damage or depreciation in asset value; 4) higher cost of capital; 5) reputational risks and 6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>
---------------------------------------	---

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Lgal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

"A" shares are open to all subscribers. However, due to the high risk associated with an investment in equities, this Sub-fund is intended above all for investors who are prepared to bear the strong fluctuations inherent to equity markets and who have a minimum investment horizon of five years.

The "N" shares are intended for all subscribers, in particular:

- marketing networks that have received prior approval from the management company
- Or to distributors and intermediaries who have received prior approval from the management company and who provide:
 - Independent advice within the meaning of MiFID 2
 - Individual management under mandate regulations

"I" shares are open to all subscribers, and are more specifically intended for institutional investors who have received prior approval from the management company and whose minimum initial subscription is €1,000,000 (except for the management company, which may subscribe for 1 share).

The "Z" shares are more specifically intended for:

- the management company
- the management company's UCITS/AIFs
- the management company's staff (permanent employees and managers) and their unmarried spouses, parents and children.
- FCPEs intended for the staff of the management company
- life insurance or capitalisation companies for the equivalent value of the amount invested in a unit of account representing the sub-fund's Z shares within a life insurance or capitalisation contract taken out by a member of the management company's staff, as well as their unmarried spouses, parents and children.

The "LA" shares are open to all subscribers, and are more specifically intended for institutional investors or key accounts that have received prior approval from the management company, with a minimum initial subscription of 10,000,000 euros (except for the management company, which may subscribe for 1 share).

Sextant Climate Transition Europe can be used as a support for unit-linked variable capital life insurance contracts.

11.2 Minimum recommended investment period

5 years

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax

residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the valuation models via the beta used to set the weighted average cost of capital (WACC). The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future 5 years cash requirements and your risk aversion. It is also advisable to diversify investments sufficiently to avoid excessive exposure to this Fund risk.

In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

Allocation of distributable income : Accumulation

13. Distribution frequency

Non applicable

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares).

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR001400A5A2 Share A	100 €	None
FR001400A5C8 Share N	100 €	None
FR001400A5B0 Share I	1000 €	1,000,000 €
FR001400A5D6 Share Z	100 €	None
FR001400HPC8 Share LA	100 €	10,000,000 €

Subscriptions are accepted either in number of shares (expressed in thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in thousandths of shares).

How to submit subscription requests

Subscription and redemption requests are centralised each day of valuation before 11:00 with the custodian: CACEIS BANK, whose registered office is located at 89-91 rue Gabriel Péri – 92120 Montrouge RCS Nanterre.

Postal addresses of offices: CACEIS BANK.

They are executed on the basis of the next net asset value calculated on the basis of the closing price on the day on which the requests are centralised. Subscription and redemption requests received after 11:00 are processed on the basis of the net asset value calculated according to the method described above. The relevant payments will be made 2 business days after the valuation.

In the event of a public holiday or stock market closure, it will be calculated on the previous business day.

Shareholders' attention is drawn to the fact that orders transmitted to marketers other than the institutions mentioned above must take into account the fact that the order centralisation cut-off time applies to said marketers vis-à-vis CACEIS BANK. Consequently, these marketers may apply their own cut-off time, earlier than that mentioned above, in order to take account of their deadline for transmitting orders to CACEIS BANK.

Orders are centralised in accordance with the table below:

D business day	Day on which the NAV is established (D)	D+1 to D+3	D+2 business days	D+2 business days
Daily reception of orders and centralisation Daily before 11:00 (Paris time) of subscription* and redemption orders.	Orders are executed no later than day D	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions D-1 before 4pm

**Unless otherwise agreed with your financial institution.*

The Management Company monitors liquidity risk by Sub-Fund in order to ensure an appropriate level of liquidity for each Sub-Fund, particularly with regard to the risk profile, investment strategies and redemption policies in force for the funds. An analysis of the liquidity risk of the Sub-Fund## is carried out to ensure that the investments and funds have sufficient liquidity to honour the redemption of unitholders under normal and extreme market conditions. The Management Company has set up a liquidity management system and tools to ensure that investors are treated fairly.

The sub-fund has introduced a redemption cap mechanism (known as a "gate") as described below:

Redemption Capping Mechanism ("gate"):

The Management Company has implemented a liquidity management mechanism known as a "gate" or "redemption capping" to protect its investors. This mechanism allows, if necessary, the capping of redemptions when the redemption threshold objectively established by the Management Company is reached. The redemption threshold set by the Management Company for this Sub-Fund is 10% of the net assets. To determine the level of this threshold, the Management Company takes into account the frequency of calculating the net asset value of the UCITS, the investment orientation of the Sub-Fund, and the liquidity of its assets.

The trigger threshold for the gates corresponds to the ratio between:

- - the observed difference, on the same consolidation date, between the number of shares in the Sub-Fund for which redemption is requested or the total amount of these redemptions, and the number of shares in the Sub-Fund for which subscription is requested or the total amount of these subscriptions; and
- the net assets of the fund or the total number of units in the sub-fund.

In the event of triggering the gate, the Management Company reserves the right to spread redemptions over several net asset values. The capping of redemptions can be triggered, at the discretion of the Management Company, only in the case of exceptional market circumstances and if the interests of investors so require.

When redemption requests exceed the triggering threshold, and if liquidity conditions permit, the Management Company may decide to honour redemption requests beyond this threshold, thus partially or fully executing orders that may be blocked. Unexecuted redemption requests at a net asset value will be automatically carried over to the next consolidation date and executed on the next net asset value date. They cannot be revoked by the unit holders or shareholders.

For example, if the total redemption requests for shares represent 10% of the net assets of the Sub-Fund while the triggering threshold is set at 15% of the net assets, the Sub-Fund may decide to honour redemption requests up to 12% of the net assets (thus executing 80% of redemption requests) and thereby carry over the balance of unexecuted redemptions to the next consolidation.

The maximum duration of the redemption capping mechanism is set at 20 net asset values over 3 months for a UCITS with a daily valuation frequency .

Notification Procedures for Unit holders:

In the event of activating the "gate" mechanism, Sub-Fund investors will be informed by any means through the website <https://www.amiralgestion.com/fr>.

Sub-Fund investors whose redemption orders have not been executed will be informed promptly and in a special manner.

Treatment of Unexecuted Orders:

During the period of application of the "gate" mechanism, redemption orders will be executed in the same proportions for UCITS unit holders who have requested redemption at the same net asset value. The redemption orders thus carried over will not have priority over subsequent redemption requests. Unexecuted and automatically carried-over redemption orders cannot be revoked by UCITS unit holders.

Exemption from the "gates" mechanism:

Subscription and redemption transactions, for the same number of shares, based on the same net asset value and for the same investor or economic beneficiary (known as round-trip transactions), are not subject to a "gate."

This exclusion also applies to the transition from one class of shares to another class of shares, at the same net asset value, for the same amount and for the same investor or economic beneficiary.

16. Fees and commissions

16.1 Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid To the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
Subscription fee not earned To the Sub-Fund	Net asset value x number	A	2.00%
		N	5.00%
		I	10.00%
		Z	None
		LA	10.00%
Subscription fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		I	None
		Z	None
		LA	None
Redemption fee not earned To the Sub-Fund	Net asset value x number	A	1.0%
		N	1.0%
		I	1.0%
		Z	None
		LA	1.0%
Redemption fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		I	None
		Z	None
		LA	None

Subscription and redemption fees are not subject to VAT.

Exemptions:

It is possible to proceed, free of commissions, with simultaneous redemptions/subscriptions on the basis of the same net asset value for a zero balance transaction volume.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)
Financial management fees	Net asset	A	1.90% (incl. tax) maximum
		N	1.10% (incl. tax) maximum
		I	0.90% (incl. tax) maximum
		Z	None
		LA	0.80% (incl. tax) maximum
Operating Expenses and other services (flat-rate assessment of costs detailed below)	Net asset	Applied to the Fund	0.1% (incl. tax) maximum ¹
indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	None
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	A N I	15% (incl. tax) of the positive performance of the A, N or I sub-fund share over and above its benchmark index (MSCI EMU Small cap - dividends reinvested) per calendar year
		Z LA	None

¹ The fixed maximum rate may be charged even if the actual fees are lower than it, and conversely, if the actual fees exceed the displayed rate, the excess beyond this rate will be borne by the Management Company

Detail of operating expenses and other services:

Operating expenses and other services include:

- Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);
 - Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);
 - Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and messaging functions of Bloomberg).

(iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.

(v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring

breaches of thresholds, exceeding ratios etc.).

vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-financial constraints arising from specific client requests and specific to the UCITS).

(vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French Monetary and Financial Code,
- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

Calculation of the outperformance fee (A, N and I shares)

Variable management fees are deducted for the benefit of the management company as follows: performance fee.

The outperformance fee is based on the comparison between the performance of the A, N or I share of the Sub-fund and the reference threshold over the financial year.

The performance of the sub-fund is calculated on the basis of changes in the net asset value:

- if, over the year, the performance of the A, N or I share of the sub-fund is positive and greater than its benchmark index, the variable portion of the management fees will represent 15% (inclusive of tax) of the difference between the performance of the sub-fund and the benchmark threshold.
- if, over the year, the performance of the A, N or I share of the sub-fund is negative or less than its benchmark index, the variable portion will be zero.

The outperformance fee is calculated on the basis of the net assets on which the performance has been achieved and the subscriptions and redemptions made in the Sub-fund. This method involves comparing the assets of the A, N or I share of the Sextant Climate Transition Europe sub-fund with the assets of a sub-fund following the benchmark threshold by applying the same subscription and redemption flows.

- If, during the financial year, the performance of the A, N or I share of the sub-fund since the beginning of the financial year is positive and greater than the benchmark threshold calculated over the same period, this outperformance will be subject to a provision for variable management fees when calculating the net asset value.
- In the event that the A, N or I share of the sub-fund underperforms the benchmark or suffers a negative performance between two net asset values, any provision made previously will be readjusted by reversing the provision. Reversals of provisions are capped at the amount of previous allocations.
- This variable portion will only be definitively received at the end of the financial year if the performance of the A, N or I share of the sub-fund is positive or greater than the reference threshold over the financial year. In the event of share redemptions, if there is a provision for variable management fees, the portion proportional to the shares redeemed is paid immediately to the management company.

These costs (fixed and possibly variable) are charged directly to the income statement of the Sub-fund.

Any underperformance of the Sub-fund relative to the benchmark is made up before outperformance fees become payable. To this end, the catch-up period is set at five years. If, during the catch-up period, a new underperformance is observed, this will trigger a new catch-up period of 5 years from the date of the observation in respect of this underperformance. Finally, if the underperformance has not been caught up after five years, it is no longer taken into account for the sixth year.

Illustration:

Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment	Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment
Year 1	5	0	Yes	Year 7	5	0	Yes
Year 2	0	0	No	Year 8	-10	-10	No
Year 3	-5	-5	No	Year 9	2	-8	Non
Year 4	3	-2	No	Year 10	2	-6	Non
Year 5	2	0	No	Year 11	2	-4	Non
Year 6	5	0	Yes	Year 12	0	0*	Non

*The underperformance to be offset in year 12 is reset to 0 and not to -4 due to the application of the 5-year catch-up period starting in year 8.

The past performances of the Sub-fund are available on the website of Amiral Gestion.

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and evaluates them periodically to ensure the quality of the services provided. Research fees are included in the transaction fees and are deducted from the Fund for each transaction.

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

1. ISIN code

Share A	FR001400FR08
Share N	FR001400FR16
Share I	FR001400FR24
Share Z	FR001400FR32

2. Classification

Equities of european union countries

3. Delegation of financial management

Non applicable

4. Management objective and investment strategy**4.1 Management objective**

This performance is achieved largely by investing in European small- and medium-sized equities (i.e. market capitalisation over five hundred million euros at the time of investment, or averaged over the previous five years) and with at least 10% of the capital or voting rights held, directly or indirectly, by entrepreneurs, management and/or families.

4.2 Benchmark index

The Sub-Fund's benchmark is the MSCI EMU Small Cap index (valued at closing prices, net dividends reinvested).

The MSCI (Morgan Stanley Capital International) EMU (European Monetary Union) index is a proxy for the stock markets of the euro zone as a whole. It largely comprises small- or mid-cap equities whose weighting in the portfolio depends either on their market capitalisation or free float.

The index comprises several hundred stocks, and the number may fluctuate as new countries join the euro zone, or with new listings or de-listings, or in response to MSCI decisions.

As of the date of this prospectus, the administrator of the benchmark index, MSCI, is listed in the register of administrators and benchmarks maintained by ESMA.

In accordance with EU Regulation 2016/1011 of the European Parliament and Council of 8 June 2016, the Management Company has a procedure for tracking benchmarks used

4.3 Investment strategy**❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE**

The sub-fund invests a constant 90%¹ of its net assets in equities (or securities treated as equities, e.g. non-voting preference shares, cooperative investment certificates, etc.) of companies that are listed or have their registered office in a European Union country and are subject to corporation tax (or a comparable tax) under ordinary law. The remaining 10% may be invested in non-EU equities (notably in the UK, Switzerland, Norway). As a result, at least 75% of the Fund's net assets are invested in PEA-eligible equities. Exposure to the equity markets varies according to the manager's expectations and may range from 60% to 110% of net assets.

The sub-fund may invest in European equities listed on regulated markets with a current capitalisation or average capitalisation over the last 5 years of more than five hundred (500) million euros and less than fifteen (15) billion euros. The sub-fund may also invest on an ancillary basis in European equities listed on regulated markets with a current capitalisation or average capitalisation over the last 5 years of less than five hundred (500) million euros and more than fifteen (15) billion euros.

Managers of the Sextant Entrepreneurs Europe Sub-fund implement a management strategy that seeks long-term capital appreciation based on a fundamental approach. In order to achieve its management objective, the Sub-Fund invests in European equities which, in the opinion of the managers, trade at reasonable valuations. At least 50% of the net assets of the selected securities will be held by their managers, who will own at least 10% of them in order to achieve a better alignment of interests.

Extra-financial approaches applicable to the sub-fund

The Sub-Fund's non-financial approach is not backed by a specific sustainable benchmark, but it promotes environmental and social characteristics while ensuring good corporate governance practices via a combination of non-financial approaches, notably:

- **Monitoring the portfolio's average external ESG score** relative to the average external ESG score of its universe. (Main source:

MSCI ESG Rating²). The portfolio's benchmark universe is an index that is consistent with the Sub-Fund's investment strategy and comprises 430 companies: le MSCI EMU small cap NETR USD.

- **Integration of environmental, social and governance (ESG) criteria in fundamental analysis**, via an internal Quality Rating comprising one-third ESG criteria.
- **Respect for the Sub-Fund's exclusion policy**: thermal coal, tobacco, controversial arms, pornography, unconventional fossil energies (except North American shale oil and gas) in line with the terms and thresholds of the Amiral Gestion exclusion policy applicable to the Sub-Fund. This policy is available on the Amiral Gestion website, in the "Responsible Investment" section.
- **Compliance with the normative exclusion policy**: exclusion/non-investment in issuers that violate the principles of the United Nations Global Compact and/or the OECD Guidelines for Multinational Enterprises, after internal verification and confirmation of non-compliance by the Controversies Monitoring Committee. Monitoring of companies with Sustainalytics Watchlist status, and whose status is confirmed by the Controversies Monitoring Committee following an internal review.
- **Exclusion/non-investment in issuers exposed to severe controversies**, i.e. level 5 according to the Sustainalytics severity scale and research confirmed following an internal review by the Controversies Monitoring Committee. Particular attention is also paid to controversies relating to climate change, biodiversity, fundamental human rights and fiscal responsibility.

In addition,

- the Sub-Fund undertakes to systematically³ take part in the votes of the companies invested in by applying the principles of the Management Company's proprietary voting policy;
- when the portfolio invests in UCITS (excluding cash management), the company will give preference, where possible, to UCITS with the same SFDR classification as that of the Sub-Fund.

These extra-financial approaches are described in detail in the Sub-Fund's pre-contractual Appendix 2. These extra-financial approaches are described in greater detail in the Sub-Fund's pre-contractual SFDR Appendix 2.

Part verte - Taxonomie européenne

The principle of "cause no significant harm" applies only to investments underlying the financial product that take into account the European Union's criteria for environmentally sustainable economic activities.

The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

Sustainable investment

Although it does not have an investment strategy focused on a sustainable investment objective within the meaning of the Disclosure SFDR regulations, the sub-fund undertakes to present a minimum proportion of 10% sustainable investments.

Refer to the pre-contractual Appendix 2 of the SFDR RTS to understand the criteria used by Amiral Gestion to determine the proportion of sustainable investments within the portfolio.

DNSH⁴ SFDR and consideration of Key Negative Impacts⁵

The Sub-Fund implements several complementary DNSH schemes to ensure that its investments do not cause significant environmental and social harm. These include: i) a set of investment rules for the whole portfolio (sectoral and normative exclusions and controversies; attention to Principal Adverse Impacts); ii) stricter requirements for sustainable investments; iii) monitoring of governance practices by tracking "G" ratings and controversies, which in some cases may lead to dialogue with the company. These mechanisms are described in the Sub-Fund's pre-contractual SFDR Appendix 2.

Within the scope of DNSH, the Sub-Fund has, since 31.12.2022, notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) of its investments on sustainability factors, in order to identify and to take appropriate action. The Sub-Fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

Amiral Gestion's "PAI" policy, including details of the sources and methods used to take each indicator into account, is available on its website, under the "Responsible Investment" heading: <https://www.amiralgestion.com/fr/investissement-responsable/>

The metrics and information on how the main negative impacts have been taken into account will be published annually in the Sub-Fund's periodic "Appendix 4 SFDR" document, for the first time in 2024 for the 2023 financial year.

This combination of extra-financial approaches, described in detail in the pre-contractual appendix 2 of the SFDR RTS (available in the appendix to this prospectus or on the Amiral Gestion website: <https://www.amiralgestion.com/fr/nos-fonds-sextant>), classifies the sub-fund as an 'Article 8' category according to the classification of the so-called 'Disclosure - SFDR' regulation.

¹ The 90% requirement is deemed to have been met if, for each calendar half-year, the daily average of the real value of the securities mentioned above is at least equal to 90% of the daily average of the real value of all the assets.

² Mainly MSCI ESG and, failing that, the ESG performance rating of the Amiral reference framework taken from Ethifinance's Gaïa database to complete the coverage if necessary

³ Except in the event of a technical constraint preventing voting in exceptional circumstances

⁴ DNSH = Do No Significant Harm

⁵ Principal adverse impacts ('PAIs'), are defined as the impacts of investment decisions that result in significant or potentially significant adverse impacts on sustainability factors (environmental, social and personnel issues, respect for human rights and the fight against corruption and bribery).

❖ ELIGIBLE ASSETS

Shares

SEXTANT ENTREPRENEURS EUROPE invests 90% of its net assets in equities of companies listed or having their registered office in one or more countries of the European Union or the European Economic Area (making them eligible for the PEA). The required minimum investment in equities is 60%. The portion invested in equities depends exclusively on the investment opportunities presented to the managers on a case-by-case basis and not on macro-economic considerations, regardless of their market capitalisation and sectors. The sub-fund may invest up to 10% of its net assets in equities of companies listed or having their registered office in one or more countries outside the European Union.

Non-financial analysis and ratings covering 90% of equity investments equities issued by large caps headquartered in "developed" countries and a minimum of 75% for equities issued by large caps headquartered in "emerging" countries, equities issued by small and medium caps, debt securities and money market instruments with a high yield credit rating.

Debt securities and money market instruments

The sub-fund may invest up to 10% of its net assets in bonds and money market instruments.

Investments in money market instruments are denominated in Euros and have a maximum maturity of twelve months. They shall have a minimum rating (Standard & Poor's A3 / Moody's P-3 / Fitch Ratings F3) or, where they are not rated, shall be deemed equivalent according to the Management Company's analysis.

The Management Company shall, however, give preference to investing cash in "money-market" or "short-term money-market" UCITS/AIFs up to a limit of 10% of the net assets.

The sub-fund also reserves the right to invest in all types of bonds, regardless of currency or credit rating, including convertible bonds and so-called "high-yield" bonds (i.e. bonds with a non-investment grade credit rating).

Investments in "high yield" bonds and securities with a Standard & Poor's rating of less than BBB- will remain ancillary, i.e. less than 10% of net assets.

As regards fixed-income securities, the management company carries out its own credit and market risk analysis when selecting securities on acquisition and during their lifetime. It therefore does not rely exclusively on ratings provided by rating agencies.

Investments in securities of other UCITS, AIFs and/or investment funds

The Sub-fund may invest up to 10% of its net assets in securities of other French or European UCITS or AIFs, in particular for cash investments; these will be "standard money market" UCITS/AIFs and "short-term money market" UCITS/AIFs. "These may be dynamic money market UCITS/AIFs employing alternative management strategies. On an ancillary basis, the Sub-fund may invest in UCITS/AIFs classified as equities or bonds that are compatible with the management policy of the Sub-fund.

These UCIs and investment funds can be managed by Amiral Gestion.

The Sub-fund may invest up to 5% of its net assets in foreign investment funds and AIFs other than general purpose funds (FCPRs, etc.) that meet the criteria set out in Article R.214-13 of the French Monetary and Financial Code.

Derivatives and securities with embedded derivatives

Transactions involving derivatives (purchases or sales of call or put options on equities, indices, interest rates or currencies, and purchases or sales of futures, forward exchange contracts or swaps on equities, indices, interest rates or currencies) and securities that are derivatives will be carried out on a discretionary basis with the aim of exposing or partially hedging the sub-fund against favourable or unfavourable movements in equities, indices, interest rates and currencies.

There will be no overexposure. These instruments will be traded on regulated and/or organised or over-the-counter markets

Futures (contracts on financial instruments) relating to commodity indices will be carried out in compliance with the 5/10/20/40 ratio.

Option strategies:

Depending on the manager's expectations, he may buy or sell equity market options. For example, if he anticipates a sharp rise in the market, he may buy calls; if he thinks the market will rise slowly and that implied volatility is high, he may sell puts. On the other hand, if he expects the market to fall sharply, he will buy puts. Finally, if he thinks the market can no longer rise, he will sell calls. The manager may combine these different strategies.

Securities incorporating derivatives:

The sub-fund may hold products incorporating derivatives (preferential rights/warrants, warrants, convertible bonds) as part of its equity portfolio management:

- when these securities are detached from the shares held in the portfolio;
- when it is more advantageous to acquire shares by purchasing and then exercising these securities (e.g. participation in a capital increase by first purchasing Preferential Subscription Rights on the market).

Deposits and cash

The Sub-fund may use deposits to optimise the management of the Sub-fund's cash and to manage the different subscription/redemption value dates of the underlying UCIs. It may invest **up to 10% of its net assets in deposits placed with a single credit institution**. The sub-fund may hold cash on an ancillary basis, in particular to cover share redemptions by investors. The liquidity holding threshold may be raised to 20% of net assets when justified by exceptional market conditions.

The lending of cash is prohibited.

Cash Borrowings

The Sub-fund may borrow cash. Although it is not intended to be a structural cash borrower, the Sub-fund may be in a debit position as a result of transactions linked to its paid-in flows (ongoing investments and divestments, subscriptions/redemptions, etc.), up to a limit of 10% of the net assets.

Temporary acquisition and sale of securities:

None

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

Non applicable

7. Special cases of UCIs with sub-funds

The sub-fund may invest up to 10% of its net assets in shares of another sub-fund of the same UCI.

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk	The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.
Discretionary management risk	The discretionary management style is based on anticipating trends in the financial markets. The Fund's performance will depend on the issuers selected and the asset allocation defined by the manager. There is a risk that the Management Company will not select the best-performing securities and that the net asset value of the Fund will therefore fall.
Equity market risk	Fluctuations in equity markets may lead to significant changes in net assets, which may have a negative impact on the performance of the Fund. The net asset value of the fund may fall significantly.
Liquidity risk	Liquidity risk measures the difficulty that the fund may have in selling certain assets within a short timeframe in order to meet the need to raise cash or deal with a fall in their market value. Please note that over-the-counter markets do not offer immediate liquidity or enable assets to be sold at the price expected by the Fund.
Risk related to the size of the capitalisation of the selected securities	The Fund may invest in small- and mid-cap markets, as the volume of securities listed on the stock exchange is reduced, and market movements are therefore more pronounced on the downside and faster than in large-cap markets. The fund's net asset value may therefore fall more quickly and more sharply.
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk. Exposure to currency risk in currencies other than those of the eurozone or the European Union will remain incidental.
Emerging markets risk	The Fund may invest in equities listed on emerging markets. Investors' attention is drawn to the fact that the operating and supervisory conditions of these markets may deviate from the standards prevailing in the major international markets.

Credit risk	The Fund may invest in fixed income products. Credit risk is the potential risk of issuer default or credit downgrade, which may lead to a fall in net asset value.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.
Counterparty risk	This is the risk associated with the Fund's use of over-the-counter financial futures instruments. These transactions, entered into with one or more eligible counterparties, potentially expose the Fund to a risk of default by one of its counterparties, which could lead to an event of default that would no longer allow the Fund to honour its commitments under these transactions.
Risk associated with the use of derivatives	The use of derivatives can lead to significant variations in the net asset value over short periods, both upwards and downwards.
Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none"> 1) lower revenues; 2) higher costs; 3) damage or depreciation in asset value; 4) higher cost of capital; 5) reputational risks and 6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Lgal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

Due to the high risk associated with an investment in equities, this Sub-fund is intended above all for investors who are prepared to bear the strong fluctuations inherent in the equity markets and who have a minimum investment horizon of five years.

"A" shares are intended for all subscribers, notably individual investors and investors subscribing through a distributor (asset management consultant, etc.).

"I" shares are open to all subscribers, and are more particularly intended for institutional investors who have received prior approval from the management company and whose minimum initial subscription is 1,000,000 euros (except for the management company, which may subscribe for 1 unit).

"N" shares are reserved for the category of subscribers listed below whose minimum initial subscription amount is 1 share:

- marketing networks that have received prior approval from the management company
- Or to distributors and intermediaries who have received prior approval from the management company and who provide a:
 - independent advice within the meaning of MiFID 2
 - individual management under mandate regulations

"Z" shares are reserved exclusively for:

- the Management Company
- the staff of the Management Company (permanent employees and managers) and their unmarried spouses, parents and children.
- to FCPEs intended for the staff of the Management Company
- life insurance or capitalisation companies for the equivalent value of the amount invested in a unit of account representing the sub-fund's Z shares within a life insurance or capitalisation contract taken out by a member of the Management Company's staff, as well as their unmarried spouses, parents and children.

The Sub-fund can be used as a support for unit-linked variable capital life insurance contracts.

11.2 Minimum recommended investment period

More than 5 years

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the valuation models via the beta used to set the weighted average cost of capital (WACC). The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future More than 5 years cash requirements and your risk aversion. It is also advisable to diversify investments sufficiently to avoid excessive exposure to this Fund risk.

In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

Allocation of distributable income : Accumulation

13. Distribution frequency

Non applicable

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR001400FR08 Share A	100 €	1 share(s)
FR001400FR16 Share N	100 €	1 share(s)
FR001400FR24 Share I	1000 €	1,000,000 €
FR001400FR32 Share Z	100 €	1 share(s)

Subscriptions are accepted either in number of shares (expressed in ten thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in ten thousandths of shares).

How to submit subscription requests

Subscription and redemption requests are centralised each day of valuation before 11:00 with the custodian: CACEIS BANK, whose registered office is located at 89-91 rue Gabriel Péri – 92120 Montrouge RCS Nanterre.

Postal addresses of offices: CACEIS BANK.

They are executed on the basis of the next net asset value calculated on the basis of the closing price on the day on which the requests are centralised. Subscription and redemption requests received after 11:00 are processed on the basis of the net asset value calculated according to the method described above. The relevant payments will be made 2 business days after the valuation.

In the event of a public holiday or stock market closure, it will be calculated on the previous business day.

Shareholders' attention is drawn to the fact that orders transmitted to marketers other than the institutions mentioned above must take into account the fact that the order centralisation cut-off time applies to said marketers vis-à-vis CACEIS BANK. Consequently, these marketers may apply their own cut-off time, earlier than the one mentioned above, in order to take into account their deadline for transmitting orders to CACEIS BANK.

Orders are centralised in accordance with the table below:

D business day	Day on which the NAV is established (D)	D+1 to D+3	D+2 business days	D+2 business days
Daily reception of orders and centralisation ^{Daily} before 11:00 (Paris time) of subscription* and redemption orders.	Orders are executed no later than day D	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions D-1 before 4pm

**Unless otherwise agreed with your financial institution.*

The Management Company monitors liquidity risk by Sub-Fund in order to ensure an appropriate level of liquidity for each Sub-Fund, particularly with regard to the risk profile, investment strategies and redemption policies in force for the funds. An analysis of the liquidity risk of the Sub-Fund## is carried out to ensure that the investments and funds have sufficient liquidity to honour the redemption of unitholders under normal and extreme market conditions. The Management Company has set up a liquidity management system and tools to ensure that investors are treated fairly.

The sub-fund has introduced a redemption cap mechanism (known as a "gate") as described below:

Redemption Capping Mechanism ("gate"):

The Management Company has implemented a liquidity management mechanism known as a "gate" or "redemption capping" to protect its investors. This mechanism allows, if necessary, the capping of redemptions when the redemption threshold objectively established by the Management Company is reached. The redemption threshold set by the Management Company for this Sub-Fund is 10% of the net assets. To determine the level of this threshold, the Management Company takes into account the frequency of calculating the net asset value of the UCITS, the investment orientation of the Sub-Fund, and the liquidity of its assets.

The trigger threshold for the gates corresponds to the ratio between:

- - the observed difference, on the same consolidation date, between the number of shares in the Sub-Fund for which redemption is requested or the total amount of these redemptions, and the number of shares in the Sub-Fund for which subscription is requested or the total amount of these subscriptions; and
- the net assets of the fund or the total number of units in the sub-fund.

In the event of triggering the gate, the Management Company reserves the right to spread redemptions over several net asset values. The capping of redemptions can be triggered, at the discretion of the Management Company, only in the case of exceptional market circumstances and if the interests of investors so require.

When redemption requests exceed the triggering threshold, and if liquidity conditions permit, the Management Company may decide to honour redemption requests beyond this threshold, thus partially or fully executing orders that may be blocked. Unexecuted redemption requests at a net asset value will be automatically carried over to the next consolidation date and executed on the next net asset value date. They cannot be revoked by the unit holders or shareholders.

For example, if the total redemption requests for shares represent 5% of the net assets of the Sub-Fund while the triggering threshold is set at 10% of the net assets, the Sub-Fund may decide to honour redemption requests up to 8% of the net assets (thus executing 80% of redemption requests) and thereby carry over the balance of unexecuted redemptions to the next consolidation.

The maximum duration of the redemption capping mechanism is set at 20 net asset values over 3 months for a UCITS with a daily valuation frequency.

Notification Procedures for Unit holders:

In the event of activating the "gate" mechanism, Sub-Fund investors will be informed by any means through the website <https://www.amiralgestion.com/fr>.

Sub-Fund investors whose redemption orders have not been executed will be informed promptly and in a special manner.

Treatment of Unexecuted Orders:

During the period of application of the "gate" mechanism, redemption orders will be executed in the same proportions for UCITS unit holders who have requested redemption at the same net asset value. The redemption orders thus carried over will not have priority over subsequent redemption requests. Unexecuted and automatically carried-over redemption orders cannot be revoked by UCITS unit holders.

Exemption from the "gates" mechanism:

Subscription and redemption transactions, for the same number of shares, based on the same net asset value and for the same investor or economic beneficiary (known as round-trip transactions), are not subject to a "gate."

This exclusion also applies to the transition from one class of shares to another class of shares, at the same net asset value, for the same amount and for the same investor or economic beneficiary.

16. Fees and commissions

16.1 Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid To the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
Subscription fee not earned To the Sub-Fund	Net asset value x number	A	2.00%
		N	5.00%
		I	10.00%
		Z	None
Subscription fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		I	None
		Z	None
Redemption fee not earned To the Sub-Fund	Net asset value x number	A	1.0%
		N	1.0%
		I	1.0%
		Z	None
Redemption fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		I	None
		Z	None

Subscription and redemption fees are not subject to VAT.

Exemptions:

It is possible to proceed, free of commissions, with simultaneous redemptions/subscriptions on the basis of the same net asset value for a zero balance transaction volume.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)
Financial management fees	Net asset	A	1.90% (incl. tax) maximum
		N	1.10% (incl. tax) maximum
		I	0.90% (incl. tax) maximum
		Z	None
Operating Expenses and other services (flat-rate assessment of costs detailed below)	Net asset	Applied to the Fund	0.1% (incl. tax) maximum ¹
indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	None
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	A N I	15% (incl. tax) of the positive performance of the sub-fund's A, N, I shares over and above its benchmark index (MSCI EMU Small Cap - dividends reinvested) per calendar year
		Z	None

¹ The fixed maximum rate may be charged even if the actual fees are lower than it, and conversely, if the actual fees exceed the displayed rate, the excess beyond this rate will be borne by the Management Company

Detail of operating expenses and other services:

Operating expenses and other services include:

- (i) Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- (ii) Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- (iii) Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);
 - Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);
 - Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and messaging functions of Bloomberg).

(iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.

(v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring breaches of thresholds, exceeding ratios etc.).

vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-financial constraints arising from specific client requests and specific to the UCITS).

(vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French Monetary and Financial Code,
- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

Calculation of the outperformance fee (A, N and I shares)

Variable management fees are deducted for the benefit of the management company as follows: performance fee.

The outperformance fee is based on the comparison between the performance of the A, N or I share of the Sub-fund and the reference threshold over the financial year.

The performance of the sub-fund is calculated on the basis of changes in the net asset value:

- if, over the year, the performance of the A, N or I share of the sub-fund is positive and greater than its benchmark index, the variable portion of the management fees will represent 15% (inclusive of tax) of the difference between the performance of the sub-fund and the benchmark threshold.
- if, over the year, the performance of the A, N or I share of the sub-fund is negative or less than its benchmark index, the variable portion will be zero.

The outperformance fee is calculated on the basis of the net assets on which the performance has been achieved and the subscriptions and redemptions made in the Sub-fund. This method involves comparing the assets of the A, N or I share of the sub-fund with the assets of a sub-fund following the benchmark threshold by applying the same subscription and redemption flows.

- If, during the financial year, the performance of the A, N or I share of the sub-fund since the beginning of the financial year is positive and greater than the benchmark threshold calculated over the same period, this outperformance will be subject to a provision for variable management fees when calculating the net asset value.
- In the event that the A, N or I share of the sub-fund underperforms the benchmark or suffers a negative performance between two net asset values, any provision made previously will be readjusted by reversing the provision. Reversals of provisions are capped at the amount of previous allocations.
- This variable portion will only be definitively received at the end of the financial year if the performance of the A, N or I share of the sub-fund is positive and greater than the reference threshold over the financial year.
- In the event of share redemptions, if there is a provision for variable management fees, the portion proportional to the shares redeemed is paid immediately to the management company.

These costs (fixed and possibly variable) are charged directly to the income statement of the Sub-fund.

Any underperformance of the Sub-fund relative to the benchmark is made up before outperformance fees become payable. To this end, the catch-up period is set at five years. If, during the catch-up period, a new underperformance is observed, this will trigger a new catch-up period of 5 years from the date of the observation in respect of this underperformance. Finally, if the underperformance has not been caught up after five years, it is no longer taken into account for the sixth year.

Illustration:

Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment	Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment
Year 1	5	0	Yes				
Year 2	0	0	No	Year 11	2	-4	No
Year 3	-5	-5	No	Year 12	0	0*	No
Year 4	3	-2	No	Year 13	2	0	Yes
Year 5	2	0	No	Year 14	-6	-6	No
Year 6	5	0	Yes	Year 15	2	-4	No
Year 7	5	0	Yes	Year 16	2	-2	No
Year 8	-10	-10	No	Year 17	-4	-6	No
Year 9	2	-8	No	Year 18	0	-4**	No
Year 10	2	-6	No	Year 19	5	0	Yes

*The underperformance to be offset in year 12 is reset to 0 and not to -4 due to the application of the 5-year catch-up period starting in year 8.

The underperformance of Year 18 carried forward to the following year (Y19) is 4% (and not -6%) given the fact that the residual underperformance of Y14 which has not yet been offset (-2%) is no longer valid as the five-year period

The past performances of the Sub-fund are available on the website of Amiral Gestion.

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and evaluates them periodically to ensure the quality of the services provided. Research fees are included in the transaction fees and are deducted from the Fund for each transaction.

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

4. Management objective and investment strategy**4.1 Management objective**

SEXTANT REGATTA 2031 is a sub-fund which seeks to achieve an annual performance, net of expenses and estimated default risk calculated by the Management Company, equal to 4.00% for A and AD units and 4.60% for I and ID units, by investing mainly in bonds issued by companies and public or semi-public financial institutions.

This objective, including the costs associated with currency hedging, is based on market conditions at the time of opening the Sub-Fund and is only valid if subscribed at that time. In the event of subsequent subscription, performance will depend on the market conditions prevailing at the time, which cannot be anticipated and could therefore lead to a different performance.

These investments are made without any financial rating constraints. The Management Company stresses that there is a risk the financial situation of issuers may be weaker than expected; that unfavourable conditions (e.g. more numerous defaults, lower recovery rate) could have a negative impact on the Sub-fund's performance. The management objective may not therefore be reached. The sub-fund seeks to profit from attractive actuarial yields on bonds issued by state or semi-state bodies.

4.2 Benchmark index

The Sub-fund will not be managed based on a benchmark index which could lead to misunderstanding in the investors' mind. No Benchmark Index is therefore defined.

4.3 Investment strategy**❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE****1. Eligible strategies:**

The Sub-Fund's investment strategy is based mainly on a holding or buy-and-hold policy (acquisition of securities with the intention of holding them in the portfolio until the first date of final maturity or early redemption following a decision by the issuer or holder). Notwithstanding this, the Management Company reserves the right to actively manage the portfolio, for example, but not exclusively, by selling a security, purchasing a new security for one or more bonds in the portfolio, in the event of early redemption, OST (operations on securities), a change in the issuer's credit profile towards a deterioration or, on the contrary, an improvement such that the bond is no longer of interest.

To construct his portfolio, the manager carries out his own qualitative analysis of bonds. It also relies on the ratings of rating agencies without relying exclusively and mechanically on them.

When the bonds in the portfolio gradually reach maturity and are redeemed, the Management Company may reinvest:

- in bonds with a maturity date (final, or redemption options at the option of the bearer) not exceeding 31 December 2031;
- in debt securities (maximum maturity date 31 December 2031) or money market instruments, up to 100% of the Sub-Fund's assets ;
- up to 10% of the sub-fund's net assets in bonds with a final maturity of later than 31 December 2031, provided that the redemption option at the issuer's discretion can be exercised before 31 December 2031.

Once the portfolio has been built up, the Management Company may carry out arbitrages aimed at improving the portfolio's rate of return, as indicated above.

For a period of 12 months following the creation of the sub-fund, the manager may invest the total net assets in money market instruments. In that case, the Management Company shall charge no management fees and shall pay the Sub-Fund's external management fees. The Management Company of the SICAV may also decide to liquidate the sub-fund or merge it with another sub-fund if the anticipated subscriptions, at the end of a period of 12 months following the creation of the sub-fund, are less than 10 million euros.

Post 31 December 2031, if market conditions permit and after approval by the Autorité des marchés financiers, the sub-fund's strategy will be renewed for a further holding period. Otherwise, the Sub-Fund will be dissolved or merged with another fund, or modified with the approval of the AMF. The Management Company reserves the right, subject to the approval of the Autorité des Marchés Financiers, to liquidate the sub-fund early if the expected performance over the remaining period is close to that of the money market over the period.

Information on the sensitivity range within which the sub-fund is managed is shown in the table below:

0-7	Developed countries*	The main currencies used will be: EUR, USD, GBP, SGD and, on an ancillary basis, the other currencies corresponding to the specified geographical area. The sub-fund's total exposure to currency risk shall not exceed 10% of its net assets.	from 0% to 100% maximum
	Emerging countries*		from 0% to 30% maximum

2. Selection process:

The selection of bonds is based on an internal fundamental analysis by the Management Company of the risk of each issuer. The risk analysis takes into account:

- The cyclical and operational risks of the business;
- The company's past results and reputation;
- The regular generation of cash (or equity for financial institutions);
- The reasonableness of the debt ratios (net debt/Ebitda, gearing) in relation to the business, the working capital requirements and any tangible and transferable assets held by the issuer;
- The issuer's resources and liquidity requirements and debt structure;
- The quality of its shareholder base.

Extra-financial approaches applicable to the sub-fund:

The sub-fund's extra-financial approach is not backed by a specific sustainable benchmark, but it promotes environmental and social characteristics while ensuring good corporate governance practices through a combination of extra-financial approaches, particularly:

- Monitoring the portfolio's average external ESG score relative to the average external ESG score of its benchmark index (Main source1: MSCI ESG Rating). The benchmark used to compare ESG performance is an index that is consistent with the Sub-Fund's investment strategy and comprises around 3,470 stocks: the Global HY (LG30TRUU Index).

- Compliance with the Sub-Fund's sector exclusion policy: thermal coal, tobacco, controversial weapons, civil firearms, pornography, non-conventional fossil fuels with the exception of North American shale oil and gas. The criteria, thresholds and procedures for applying this due diligence and exclusion policy are specified in the Amiral Gestion sector policy applicable to the sub-fund. This policy is available on the Amiral Gestion website: <https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>

- The compliance with the normative exclusion policy: exclusion/non-investment in issuers that violate the principles of the United Nations Global Compact and/or the OECD Guidelines for Multinational Enterprises, after internal verification and confirmation of non-compliance by the Controversies Monitoring Committee. Monitoring of companies on the Sustainalytics Watchlist, and whose watchlist status is confirmed by the Controversies Monitoring Committee following an internal review.

- Exclusion/non-investment in issuers exposed to controversies of severe seriousness, i.e. level 5 on the Sustainalytics seriousness and research scale, confirmed following an internal review by the Controversies Monitoring Committee. Particular attention is also paid to controversies relating to climate change, biodiversity, fundamental human rights and fiscal responsibility.

Furthermore, when the portfolio invests in UCITS, the latter must have the same SFDR classification as the sub-fund.

These extra-financial approaches are described in greater detail in the sub-fund's pre-contractual SFDR Appendix 2.

Green Part - European Taxonomy:

The minimum percentage of investments aligned with the taxonomy, i.e. made in environmentally sustainable economic activities, represents 0% of the sub-fund's net assets. Given the limited availability of alignment data reported by companies, Amiral Gestion is not in a position to commit at this stage to a minimum share of sustainable investments aligned with the taxonomy.

The principle of "not causing significant harm" applies only to investments that underpin the financial product and that consider the European Union's criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the European Union's criteria for environmentally sustainable economic activities'.

Sustainable investment:

The sub-fund does not have an investment strategy focused on a sustainable investment objective within the meaning of the SFDR Disclosure regulation and has not set a minimum sustainable investment component to date. The sub-fund therefore undertakes to invest a minimum of 0% in sustainable investments.

Refer to the pre-contractual Appendix 2 of the SFDR RTS to understand the criteria used by Amiral Gestion to determine the proportion of sustainable investments within the portfolio.

DNSH[2 SFDR and consideration of Key Negative Impacts[3]:

The Sub-Fund implements several complementary DNSH schemes to ensure that its investments do not cause significant environmental and social harm. These requirements take the form of: i) a core set of investment rules for the entire portfolio (sectoral, normative and controversy exclusions; and consideration of the main negative impacts); ii) enhanced requirements for sustainable investments; iii) monitoring of governance practices by tracking the level of ratings and controversies under pillar G, which may trigger a dialogue with the issuer in certain cases. These mechanisms are described in the sub-fund's pre-contractual SFDR Appendix 2.

Within the scope of DNSH, the sub-fund has, since its launch date, notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) of its investments on sustainability factors, in order to identify and to take appropriate action. The sub-fund thus tracks 14 mandatory SFDR PAI indicators and 2 additional indicators selected from the list of optional PAI taken from appendix 1 of the SFDR RTS.

Amiral Gestion's "PAI" policy, including details of the sources and methods used to take each indicator into account, is available on its website, under the "Responsible Investment" heading: <https://www.amiralgestion.com/fr/investissement-responsable/>

The metrics and information on how the main negative impacts have been taken into account will be published annually in the sub-fund's periodic document "SFDR Appendix 4".

This combination of extra-financial approaches, described in detail in the pre-contractual appendix 2 of the RTS SFDR (available in the appendix to this prospectus or on the Amiral Gestion website: <https://www.amiralgestion.com/fr/nos-fonds-sextant>), classifies the sub-fund in the "Article 8" category according to the classification of the "SFDR Disclosure" Regulation.

[2] DNSH = Do No Significant Harm

[3] Principal adverse impacts ('PAI') are defined as the impacts of investment decisions that result in significant or potentially significant adverse impacts on sustainability factors (environmental, social and labour issues, respect for human rights and the fight against corruption and bribery).

♣ ELIGIBLE ASSETS

Shares

The sub-fund is not intended to be exposed to equities. However, it may have exposure to equities up to a maximum of 10% of net assets, as a result of investments in convertible bonds or restructuring of classic bonds.

Debt securities and money market instruments

The Sub-fund may invest up to 100% of its net assets in bonds and money market instruments. These may be fixed-rate and/or floating-rate bonds, convertible or not, issued by private, public or semi-public entities that are members of an OECD country, with no rating restrictions.

The currency risk will be hedged, although net exposure to currency risk will remain below 10% of net assets.

As the sub-fund is managed on a discretionary basis, the allocation will be unconstrained.

The sub-fund may also invest in securities treated as bonds, i.e. giving access to the issuer's capital (e.g. convertible bonds, bonds with warrants, participating securities). These securities may not be Investment Grade or may be unrated. They will be subject to a financial analysis by the Management Company comparable to that carried out on equities.

The sub-fund may invest in speculative bonds considered as "high yield", i.e. securities with a rating below BBB- according to Standard & Poor's or securities considered of equivalent quality according to the analysis carried out by the Management Company, up to 100% of the net assets.

The Management Company carries out its own analysis of the risk/return profile of securities (profitability, credit, liquidity, maturity). Thus, the acquisition, holding or disposal of a security (particularly in the event of a change in the security's rating) will not be based exclusively on the ratings provided by the main rating agencies, but will be based primarily on an analysis of credit risks and the Management Company's internal market conditions.

The sub-fund may invest in all bond securities, regardless of currency or credit rating. There are no restrictions on the duration,

sensitivity or allocation between private, semi-public and public debt of the securities selected, as long as the overall sensitivity of the portfolio is between 0 and 7.

The sub-fund is also invested in money market instruments, in particular negotiable debt securities (certificates of deposit, commercial paper, negotiable medium-term notes) denominated in euros with a maximum maturity of twelve months: the short-term securities used will have a minimum rating (Standard & Poor's A3 / Moody's P-3 / Fitch Ratings F3) or will be deemed equivalent according to the Management Company's analysis.

Nevertheless, the Management Company will give preference to investing cash in money market or short-term money market UCITS/AIFs.

Investments in securities of other UCITS, AIFs and/or investment funds

The Sub-fund may invest up to 10% of its net assets in securities of other French or European UCITS or AIFs or foreign investment funds (holding no more than 10% of the units of foreign UCIs or investment funds) that meet the criteria set out in article R.214-13 of the French Monetary and Financial Code, mainly in the investment of cash via money market UCITS/AIFs and short-term money market UCITS/AIFs, as well as in UCITS/AIFs that are classified as equities or bonds that are compatible with the sub-fund's management.

These UCIs and investment funds may be managed by the Management Company.

The sub-fund will never invest in approved or similar FCPRs (venture capital funds) or securitisation vehicles.

Derivatives and securities with embedded derivatives

In order to achieve the Sub-Fund's management objective, the Sub-Fund will only use simple forward financial instruments whose resulting commitment may be valued using the commitment method.

Nature of the markets on which the Sub-Fund operates :

These instruments will be traded on regulated, organised or over-the-counter markets in the eurozone and internationally. Transactions involving derivatives (purchases or sales of call options or put options on equities, interest rates, indices or currencies, and purchases or sales of contracts on financial futures instruments (futures, forward exchange contracts or swaps on equities, interest rates, indices or currencies) and securities incorporating derivatives will be carried out at the manager's discretion in order to gain exposure and/or partially hedge the sub-fund against unfavourable movements in the equity, interest rate, index and currency markets. The manager may also invest in credit derivatives (Credit Default Swaps). There will be no overexposure.

Optional strategies:

The Management Company may sell or buy equity market options depending on its expectations. For example, if the Company expects a sharp rise in share prices, it may buy calls; if it thinks the market will rise slowly and implicit volatility is high, it may sell puts. On the other hand, if it anticipates a sharp fall in the market, it will buy puts. Finally, if it believes that the market can no longer rise, it will sell calls. The Management Company may combine these different strategies. The overall exposure of the portfolio to the equity market, including the exposure induced by the use of derivatives, shall not exceed 10%.

Credit derivatives:

The credit allocation is made at the discretion of the Management Company.

The credit derivatives used are CDS indices (of the CDX or iTraxx type) and single-issuer CDS. Single-issuer CDS may be used subject to the standardisation of the contract and the information available on the markets concerning the underlying entity. Similarly, index CDSs are subject to the index's liquidity and accessibility.

These credit derivatives are used for hedging purposes through the purchase of protection:

- to limit the risk of capital loss on certain issuers (present in the portfolio);
- to benefit from an anticipated deterioration in the creditworthiness of an issuer or a basket of issuers not present in the portfolio that is greater than that of an exposure present in the portfolio.

and for exposure purposes through the sale of protection:

- to the credit risk of an issuer;
- to the credit risk on CDS indices.

Since CDS can be used for exposure to credit risk or to hedge the portfolio's credit risk, the use of indices for this purpose could give rise to transactions which, on a holding-by-holding basis, could be likened to arbitrage (hedging of the portfolio's overall credit risk by issuers, parent companies, subsidiaries or other entities not present in the portfolio). The percentage of the sub-fund's net assets corresponding to the use of credit derivatives is between 0% and 20%.

Deposits and cash

The Sub-fund may use deposits to optimise the management of the Sub-fund's cash and to manage the different

subscription/redemption value dates of the underlying UCIs. These transactions are carried out within the regulatory limits. The sub-fund may hold cash on an ancillary basis up to a limit of 10% Net assets in particular to cover share redemptions by investors. However, in order to protect the interests of investors, the cash holding threshold may be raised to 20% when justified by exceptional market conditions. The lending of cash is prohibited.

Cash Borrowings

The sub-fund may borrow cash, particularly as a result of investment/disinvestment or subscription/redemption transactions. Although it is not intended to be a structural cash borrower, the Sub-fund may find itself in a debit position as a result of transactions linked to its cash flows (ongoing investments and divestments, subscriptions/redemptions, etc.) and may therefore temporarily borrow up to a maximum of 10% of the Sub-fund's net assets.

Temporary acquisition and sale of securities:

None

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

Non applicable

7. Special cases of UCIs with sub-funds

Non applicable

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk	The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.
Discretionary management risk	The discretionary management style is based on anticipating trends in the financial markets. The Fund's performance will depend on the issuers selected and the asset allocation defined by the manager. There is a risk that the Management Company will not select the best-performing securities and that the net asset value of the Fund will therefore fall.
Equity market risk	Degree of exposure to equity risk: 0% to 10%. Fluctuations in equity markets may lead to significant changes in net assets, which may have a positive or negative impact on the net asset value of the Fund. The fall in share prices corresponds to market risk
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk. Exposure to currency risk in currencies other than those of the eurozone or the European Union will remain incidental.
Credit risk	The Fund may invest in fixed income products. Credit risk is the potential risk of issuer default or credit downgrade, which may lead to a fall in net asset value.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.

Risks associated with investing in speculative and/or unrated and/or subordinated (excluding CoCos) and/or hybrid and/or perpetual securities	The Fund may invest in bonds with these characteristics. With this type of paper, (i) market movements are more pronounced, both upwards and downwards, and (ii) the risk of payment default resulting in the permanent loss of all or part of the amounts invested is higher. This will be reflected in the Fund's evolving net asset value.
Contingent bonds risk	<p>CoCos are hybrid securities whose main purpose is to enable the issuing bank or financial company to be recapitalised in the event of a financial crisis. These securities have loss-absorption mechanisms, described in their issue prospectuses, which are generally activated if the issuer's capital ratio falls below a certain "trigger" level. The trigger is firstly mechanical: it is generally based on the CET1 (Common Equity Tier 1) accounting ratio in relation to risk-weighted assets. To compensate for the discrepancy between book values and financial reality, there is a discretionary clause allowing the supervisor to activate the loss-absorption mechanism if it considers that the issuing institution is in a situation of insolvency. CoCos are therefore subject to specific risks, including subordination to precise trigger criteria (e.g. deterioration in the equity ratio,) conversion into shares, loss of capital or non-payment of interest. The use of subordinated bonds, particularly Additional Tier 1 bonds, exposes the fund to the following risks:</p> <ul style="list-style-type: none"> - triggering of contingent clauses: if a capital threshold is crossed, these bonds are either exchanged for shares or undergo a capital reduction, potentially to 0. - cancellation of coupon: Coupon payments on this type of instrument are entirely discretionary and can be cancelled by the issuer at any time, for any reason, with no time constraints. - capital structure: unlike traditional secured debt, investors in this type of instrument can suffer a loss of capital without the prior bankruptcy of the company. In addition, the subordinated creditor will be repaid after the ordinary creditors, but before the shareholders. - Callable perpetuals: These instruments are issued as perpetual instruments, callable at predetermined levels only with the approval of the competent authority - valuation / yield: The attractive yield on these securities can be seen as a complexity premium.
Liquidity risk	Liquidity risk measures the difficulty that the fund may have in selling certain assets within a short timeframe in order to meet the need to raise cash or deal with a fall in their market value. Please note that over-the-counter markets do not offer immediate liquidity or enable assets to be sold at the price expected by the Fund.
Risk associated with the use of derivatives	The use of derivatives can lead to significant variations in the net asset value over short periods, both upwards and downwards.
Specific risk associated with subordinated debt securities	A debt is said to be subordinated when its repayment depends on the initial repayment of other creditors (preferred creditors, unsecured creditors). The subordinated creditor will therefore be repaid after the ordinary creditors, but before the shareholders. The interest rate on this type of debt will be higher than on other debt. In the event of the triggering of one or more clauses provided for in the issue documentation for the said subordinated debt securities and, more generally in the event of a credit event affecting the issuer concerned, there is a risk that the net asset value of the Fund will fall. The use of subordinated bonds may expose the Fund to the risks of coupon cancellation or deferral (at the sole discretion of the issuer), uncertainty over the redemption date, or valuation/return (the attractive yield of these securities may be considered a complexity premium).
Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none"> 1) lower revenues; 2) higher costs; 3) damage or depreciation in asset value; 4) higher cost of capital; 5) reputational risks and 6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Lgal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

The "AD" and "A" units are intended for all subscribers. However, due to the high risk associated with an investment in fixed income

products, this sub-fund is intended primarily for investors who are prepared to withstand the sharp fluctuations inherent in the fixed income markets and who have a minimum investment horizon of three years.

"Z" units are reserved exclusively for:

- the Management Company (including as part of its discretionary management activity);
- the Management Company's staff (permanent employees and managers) and their unmarried spouses, parents and children.
- FCPEs intended for the staff of the Management Company;
- life or capitalisation insurance companies for the equivalent value of the amount invested in a unit of account representing the sub-fund's Z units within a life insurance contract or capitalisation contract taken out by a member of the Management Company's staff, or their spouse who is not legally separated, parents and children.

"ID" and "I" units are open to all subscribers, and are more specifically intended for :

- Institutional investors who have received prior approval from the Management Company and whose minimum initial subscription is 100,000 euros (except for the Management Company, which may subscribe for 1 unit), or to
- Marketing networks who have received prior approval from the Management Company, or to
- Distributors and intermediaries who have received prior approval from the Management Company and who provide (i) independent advice within the meaning of MiFID2 regulations; (ii) individual management under mandate.

Sextant REGATTA 2031 may be used as a vehicle for unit-linked life insurance policies or capitalisation policies.

11.2 Minimum recommended investment period

until 31 December 2031

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the issuer selection process and the determination of issuers' weight in the portfolio. The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future 7 years cash requirements and your risk aversion. It is also advisable to diversify investments sufficiently to avoid excessive exposure to this Fund risk.

In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

Allocation of distributable income : Accumulation and/or Distribution following the decision taken by the General Meeting of Shareholders

13. Distribution frequency

Annual

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares).

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR001400S3Z4 Share AD	100 €	100 €
FR001400S409 Share A	100 €	100 €
FR001400S417 Share ID	1000 €	100,000 €
FR001400S425 Share I	1000 €	100,000 €
FR001400S433 Share Z	100 €	100 €

Subscriptions are accepted either in number of shares (expressed in thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in thousandths of shares).

Subscription and redemption requests are centralised by the custodian before 11 a.m. on the day before the valuation day (D-1) :CACEIS BANK, Credit institution approved by the ACPR , head quarters: 89-91 rue Gabriel Péri- 92120 Montrouge Postal address: 12 Place des Etats-Unis CS 40083 92549 Montrouge Cedexand are executed on the basis of the next net asset value (D) calculated on the basis of the closing price on the valuation day of the net asset value (D). Subscription and redemption requests received after 11 a.m. are executed on the basis of the next net asset value.Settlements will be made two business days after the valuation of the unit (D+2).Investor's attention is drawn to the fact that orders transmitted to marketers other than the above-mentioned institutions must take into account the fact that the cut-off time for the centralisation of orders applies to the said marketers vis-à-vis CACEIS BANK.Consequently, these marketers may apply their own cut-off time, earlier than the one mentioned above, in order to take into account their deadline for transmitting orders to CACEIS BANK.

The Sub-Fund has not implemented a redemption cap mechanism (known as "Gates") so in the event of exceptional circumstances, the absence of a redemption cap mechanism may result in The UCITS being unable to honour redemption requests and thus increase the risk of a complete suspension of subscriptions and redemptions on The UCITS.

16. Fees and commissions

16.1 Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid To the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
Subscription fee not earned To the Sub-Fund	Net asset value x number	AD	None
		A	None
		ID	5.00%
		I	5.00%
		Z	None

Redemption fee earned To the Sub-Fund	Net asset value x number	AD	None
		A	None
		ID	None
		I	None
		Z	None

Subscription and redemption fees are not subject to VAT.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)
Financial management fees	Net asset	AD	Max. 1.20% incl. tax
		A	Max. 1.20% incl. tax
		ID	Max. 0.60% incl. tax
		I	Max. 0.60% incl. tax
		Z	N/A
Operating Expenses and other services (flat-rate assessment of costs detailed below)	Net asset	Applied to the Fund	0.05% incl. tax maximum (Any excess is borne by the Management Company)* ¹
indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	Accessories
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	AD A ID I Z	None

¹ *The fixed maximum rate may be charged even if the actual fees are lower than it, and conversely, if the actual fees exceed the displayed rate, the excess beyond this rate will be borne by the Management Company

Detail of operating expenses and other services:

Operating expenses and other services include:

- (i) Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- (ii) Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- (iii) Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);
 - Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);
 - Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and messaging functions of Bloomberg).

- (iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.
- (v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring breaches of thresholds, exceeding ratios etc.).
- (vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-financial constraints arising from specific client requests and specific to the UCITS).
- (vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French Monetary and Financial Code,
- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

2. Classification

International bonds and other debt securities

3. Delegation of financial management

Non applicable

4. Management objective and investment strategy**4.1 Management objective**

The sub-fund aims to outperform its benchmark index (net of management fees):

- €STR (OIS-Ester) capitalised +3% for I ACC shares;
- €STR (OIS-Ester) capitalised +3.20% for F ACC shares;
- €STR (OIS-Ester) capitalised +2.80% for N ACC shares;
- €STR (OIS-Ester) capitalised +2.40% for A ACC shares;
- €STR (OIS-Ester) capitalised +3.60% for Z shares;

over the recommended investment period, by managing a portfolio of bonds denominated in euros or currencies other than the euro.

4.2 Benchmark index

The Fund's benchmark index is :

- €STR (OIS-Ester) capitalised +3% for I ACC shares;
- €STR (OIS-Ester) capitalised +3.20% for F ACC shares;
- €STR (OIS-Ester) capitalised +2.80% for N ACC shares;
- €STR (OIS-Ester) capitalised +2.40% for A ACC shares;
- €STR (OIS-Ester) capitalised +3.60% for Z shares;

The €STR (OIS-Ester) is an acronym for Euro Short-Term Rate capitalised. This is a benchmark interbank interest rate calculated by the European Central Bank. This index is based on the weighted average of overnight transactions in excess of €1 million in unsecured money market loans by the most active banks in the eurozone. It is calculated by the European Central Bank on the basis of data on actual transactions supplied by a sample of the largest banks in the eurozone and published on the www.ecb.europa.eu website.

However, as the Fund is not managed on an indexed basis, it may deviate from the benchmark indicator and, consequently, the Fund's performance may differ from that of its indicator.

Information concerning the benchmark indicator used by the sub-fund carried out in accordance with the provisions of EU Regulation 2016/1011.

The administrator benefits from the exemption under Article 2.2 of the benchmark regulation as a central bank and as such does not have to be entered on the ESMA register.

4.3 Investment strategy**❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE**

The Sub-Fund is permanently exposed to fixed income securities denominated in euro or in currencies other than the euro.

Exposure to securities denominated in currencies other than the euro and exposure to currency risk will not exceed 10% of the net assets.

To achieve its investment objective, the Sub-Fund's strategy consists (mainly directly or on an incidental basis via UCIs) of managing bonds and other debt securities denominated in euros or in currencies other than the euro, on a discretionary basis and according to the management company's micro and macroeconomic forecasts and the recommendations of its credit analysts. The sub-fund may invest up to 100% of its net assets in subordinated bonds and up to 10% of its net assets in contingent convertible bonds ('CoCo's').

The Fund's sensitivity to interest rate risk will be between -3 and 5.

Sensitivity range	Geographical zone of issuers	Exposition range of the geographical zone
-3 to 5	Issuers based in EEA and UK	0-100%
	issuers outside the EEA and UK	-10-30%
	of which issuers outside of EEA and OECD	0-10%

**The nationality of an issuer of a security in which the Sub-Fund invests is defined with regard to the country in which its registered office is located, including where the issuer is a subsidiary located in a country other than that of its parent company.*

*** The bonds and debt securities held will be of all maturities or perpetual.*

The weighted average exposure of credit holdings (including balance sheet assets and forward financial instruments) will not exceed that of a portfolio of corporate bonds with maturities of between 0 and 30 years.

The Sub-Fund's portfolio may hold up to 20% of bonds convertible into shares, resulting in exposure to the implicit volatility of the underlying shares. The Fund's overall exposure to the equity markets may not exceed 10% of its net assets.

The Fund may be exposed to emerging markets (excluding OECD countries) up to a maximum of 10% of its net assets.

Extra-financial approach applicable to the Fund

The SEXTANT OPTIMAL INCOME Fund seeks to promote environmental and social characteristics while ensuring good corporate governance practices, and is classified as an "Article 8" fund within the meaning of the SFDR regulations. In addition to financial analysis, the investment process incorporates sustainability risks and environmental, social and governance (ESG) aspects into the analysis and selection of issuers.

The sub-fund's extra-financial approach is not backed by a specific sustainable benchmark, but promotes environmental and social characteristics while ensuring good corporate governance practices through a combination of extra-financial approaches, including:

- Monitoring the portfolio's average external ESG score.
- Compliance with the sub-fund's sector exclusion policy: thermal coal, tobacco, controversial weapons, civilian firearms, pornography, unconventional fossil fuels with the exception of North American shale oil and gas. The criteria, thresholds and procedures for applying this due diligence and exclusion policy are specified in the Amiral Gestion sector policy applicable to the Sub-fund. This policy is available on the Amiral Gestion website: <https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>
- The compliance with the normative exclusion policy: exclusion/non-investment in issuers that violate the principles of the United Nations Global Compact and/or the OECD Guidelines for Multinational Enterprises, after internal verification and confirmation of non-compliance by the Controversies Monitoring Committee. Monitoring of companies with Sustainalytics Watchlist status, and whose status is confirmed by the Controversies Monitoring Committee following an internal review.
- Exclusion/non-investment in issuers exposed to severe controversies, i.e. level 5 according to the Sustainalytics severity scale and research confirmed following an internal review by the Controversies Monitoring Committee. Particular attention is also paid to controversies relating to climate change, biodiversity, fundamental human rights and fiscal responsibility.

In addition, when the portfolio invests in UCITS, these must have the same SFDR classification as the Sub-Fund. These extra-financial approaches are described in more detail in the Sub-Fund's pre-contractual SFDR Appendix 2.

Green Portion - European Taxonomy

The minimum percentage of investments aligned with the taxonomy, i.e. made in environmentally sustainable economic activities, represents 0% of the Sub-Fund's assets. Given the limited availability of alignment data reported by companies, Admiral Gestion is not in a position to commit at this stage to a minimum share of sustainable investments aligned to the taxonomy.

The principle of "not causing significant harm" applies only to those investments that underpin the financial product and that consider the European Union's criteria for environmentally sustainable economic activities.

The investments underpinning the remaining portion of this financial product do not take into account the European Union's criteria for environmentally sustainable economic activities.

Sustainable Investment

As the sub-fund has not adopted an investment strategy with a sustainable investment objective within the meaning of the SFDR Disclosure regulation, it is not committed to having a minimum sustainable investment component. However, the sustainable investment component of the portfolio may be reported ex-post when the annual periodic report is published (appendix 4 of the SFDR RTS). Refer to the pre-contractual Appendix 2 of the SFDR RTS to understand the criteria used by Amiral Gestion to determine the proportion of sustainable investments within the portfolio.

DNSH² SFDR and consideration of Key Negative Impacts³

The sub-fund implements several complementary DNSH schemes to ensure that its investments do not cause significant environmental and social harm. These requirements take the form of: i) a core set of investment rules for the entire portfolio (sectoral, normative and controversy exclusions; and consideration of the main negative impacts); ii) enhanced requirements for sustainable investments; iii) monitoring of governance practices by tracking the level of ratings and controversies under pillar G, which may trigger a dialogue with

the issuer in certain cases. These mechanisms are described in the Sub-Fund's pre-contractual SFDR Appendix 2. In particular, as part of this DNSH mechanism, the Sub-Fund is committed to monitoring and taking into account the main negative impacts of its investments ("SFDR PAI") on sustainability factors at the end of its first financial year, i.e. from 31 December 2025, in order to progressively identify and implement appropriate measures. The sub-fund thus tracks 14 mandatory SFDR PAI indicators and 2 additional indicators selected from the list of optional PAI from Appendix 1 of the SFDR RTS. Amiral Gestion's "PAI" policy, including details of the sources and methods used to take each indicator into account, is available on its website, under the "Responsible Investment" heading: <https://www.amiralgestion.com/fr/investissement-responsable/>. The metrics and information on how the main negative impacts have been taken into account will be reported annually in the Sub-Fund's periodic document "SFDR Appendix 4", for the first time in 2027 for the financial year 2026.

This combination of extra-financial approaches, described in detail in the pre-contractual appendix 22 of the SFDR RTS (available in the appendix to this prospectus or on the Amiral gestion website: <https://www.amiralgestion.com/fr/nos-fonds-sextant>), classifies the sub-fund as an "Article 8" category according to the classification of the "SFDR Disclosure Regulation".

2 DNSH = Do no Significant Harm

3 Principally Adverse Impacts ('PAI') are defined as the impacts of investment decisions that result in significant or potentially significant adverse impacts on sustainability factors (environmental, social and labour issues, respect for human rights and the fight against corruption and bribery).

❖ ELIGIBLE ASSETS

Shares

Portfolio may hold shares up to a maximum of 10% of its net asset either as a direct investment or when they result from a conversion or exchange for a transitional period.

Debt securities and money market instruments

The sub-fund will invest up to 100% of its net assets in bonds, including subordinated bonds up to 100% of its net assets, and negotiable debt securities, mainly denominated in euro, issued by both public and private issuers. It may also invest up to 30% in securities denominated in currencies other than the euro.

The sub-fund may hold up to 20% in convertible, exchangeable or index-linked bonds (with the exception of government bonds) and up to 10% in contingent convertible bonds (or Cocos). They will be acquired through outright purchases, reverse repurchase agreements or securities borrowing. Exposure to the equity market through convertible bonds will be less than 10%.

Speculative-grade assets (securities or, failing that, issuers) rated below BBB- (Standard & Poor's or other recognised rating agencies, or deemed equivalent according to the management company's analysis) may represent up to 30% of the net assets.

Securities and issuers not rated by the rating agencies may represent up to 50% of the net assets.

The assessment of the risk of default of an issue or its issuer is based on the analysis of the management company according to its proprietary credit risk assessment methodology.

In the event of multiple rating sources, a median rating will be calculated taking into account the ratings of official agencies and the internal rating of the management company. In this case, the management company's internal rating is given the same weight as that of the rating agencies.

At the decision of the management company, the management company's internal rating may, however, replace the median rating. Thus, decisions to invest in or sell credit instruments are not automatically and exclusively based on the criteria of recognised agencies, but also on an internal analysis of the credit or market risk by the management company.

The Sub-Fund may also invest up to 10% of its net assets in Euro Commercial Paper.

Lastly, the Sub-Fund may invest on an incidental basis in securities issued by Securitisation Undertakings that meet the eligibility criteria for financial securities defined by the French Monetary and Financial Code.

Investments in securities of other UCITS, AIFs and/or investment funds

The Sub-fund may invest up to 10% of its net assets in securities of other French or European UCITS or AIFs or closed or open-ended foreign investment funds (holding no more than 10% of the units of foreign UCIs or investment funds) that meet the criteria set out in article R.214-13 of the French Monetary and Financial Code, mainly in the investment of cash via money market UCITS/AIFs and short-term money market UCITS/AIFs, as well as in UCITS/AIFs that are classified as French equities or bonds that are compatible with the sub-fund's management.

These UCIs and investment funds may be managed by the Management Company.

The sub-fund will never invest in approved or similar FCPRs (venture capital funds) or securitisation vehicles. The Sub-fund may invest in shares of another Sub-fund of the same UCITS.

Derivatives and securities with embedded derivatives

To achieve the management objective, the UCITS may use derivative instruments or instruments incorporating derivatives.

The exposure to derivatives and securities incorporating derivatives is limited to 100% of net assets. The UCITS will therefore be able

to be exposed to 200% of its net assets. Their use will in particular serve to hedge and expose the portfolio against interest, equity, exchange and credit risks, to make adjustments due to subscription and redemption movements and thus adapt to certain market conditions.

Nature of intervention markets :

- ☒ regulated ;
- ☒ organized ;
- ☒ by mutual agreement.

Risks on which the manager wished to intervene :

- ☒ Shares ;
- ☒ Rate ;
- ☒ Change ;
- ☒ Credit ;
- ☐ Others.

Nature of the intervention (all operations to be limited to achieving the management objective) :

- ☒ Hedging ;
- ☒ Exposure ;
- ☐ Arbitration ;
- ☐ Other (to be specified)

Nature of used instruments :

- ☒ futures ;
- ☒ options ;
- ☒ swaps ;
- ☒ Exchange rate term ;
- ☒ Credit derivatives, Crédit Default Swap.
- ☐ Other (to be specified)

Strategy for using derivatives to achieve the management objective :

- ☒ currency hedging ;
- ☒ equity coverage or exposure ;
- ☒ reconstitution of synthetic exposure to assets, risks ;
- ☒ increase in market exposure and leverage accuracy ;
- ☒ hedging of interest rate risk ;
- ☒ exposure to interest rate risk;
- ☐ other (to be specified).

Exposure levels to these risks, including use of derivatives, will not exceed the exposure levels cited in the "Risk Profile" paragraph.

Securities incorporating derivatives :

To achieve the management objective, the Sub-fund may use instruments incorporating derivatives. Their use will be used to hedge and expose the portfolio against interest, equity and credit risks, to make adjustments due to movements in subscriptions and redemptions, to adapt to certain market conditions (for example, better liquidity or efficiency of financial futures instruments) or manage the sensitivity to interest rate risk, notably through exposure to interest rate markets, in accordance with the manager's expectations, in order to fulfil the management objective. The commitment resulting from derivatives does not overexpose the sub-fund beyond regulatory limits.

Risks on which the manager wishes to intervene :

- ☒ Equities (through the use of convertible bonds),
- ☒ Rate ;
- ☒ currency ;
- ☒ credit ;
- ☐ Other (to be specified)

Nature of the interventions and description of all operations to be limited to achieving the management objective :

- ☒ Hedging ;
- ☒ exposure ;
- ☐ arbitration
- ☐ other.

Nature of used instruments:

- ☒ EMTN
- ☒ BMTN
- ☒ Convertible bonds
- ☒ Contingent Convertible bonds (Coco's)
- ☒ Callables and Puttables Securities ;
- ☒ Warrants ;

Deposits and cash

The subfund may use deposits to optimize the management of the cash flow of the subfund. It may use up to 10% of its net assets in deposits placed with the same credit institution. The sub-fund may hold cash on an incidental basis, for example, to meet share buybacks by investors. the liquidity holding threshold may be raised to 20% when exceptional market conditions justify it.

Cash Borrowings

The subfund may be a cash borrower. the subfund may be structurally a borrower of cash up to 10% of the net assets of the subfund in order to be permanently invested in the stock market, and the subfund may also be in a debit position due to transactions related to its flowspaid (investments and divestments in progress, subscription/redemption transactions,...) within a limit of 10% of the net assets of the subfund.

Temporary acquisition and sale of securities:

None

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

Non applicable

7. Special cases of UCIs with sub-funds

Non applicable

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk	The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.
Discretionary management risk	The discretionary management style is based on anticipating trends in the financial markets. The Fund's performance will depend on the issuers selected and the asset allocation defined by the manager. There is a risk that the Management Company will not select the best-performing securities and that the net asset value of the Fund will therefore fall.
Equity market risk	Degree of exposure to equity risk: 0% to 10%. Fluctuations in equity markets may lead to significant changes in net assets, which may have a positive or negative impact on the net asset value of the Fund. The fall in share prices corresponds to market risk
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk. Exposure to currency risk in currencies other than those of the eurozone or the European Union will remain incidental.
Credit risk	The Fund may invest in fixed income products. Credit risk is the potential risk of issuer default or credit downgrade, which may lead to a fall in net asset value.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.

Risks associated with investing in speculative and/or unrated and/or subordinated (excluding CoCos) and/or hybrid and/or perpetual securities	The Fund may invest in bonds with these characteristics. With this type of paper, (i) market movements are more pronounced, both upwards and downwards, and (ii) the risk of payment default resulting in the permanent loss of all or part of the amounts invested is higher. This will be reflected in the Fund's evolving net asset value.
Contingent bonds risk	<p>CoCos are hybrid securities whose main purpose is to enable the issuing bank or financial company to be recapitalised in the event of a financial crisis. These securities have loss-absorption mechanisms, described in their issue prospectuses, which are generally activated if the issuer's capital ratio falls below a certain "trigger" level. The trigger is firstly mechanical: it is generally based on the CET1 (Common Equity Tier 1) accounting ratio in relation to risk-weighted assets. To compensate for the discrepancy between book values and financial reality, there is a discretionary clause allowing the supervisor to activate the loss-absorption mechanism if it considers that the issuing institution is in a situation of insolvency. CoCos are therefore subject to specific risks, including subordination to precise trigger criteria (e.g. deterioration in the equity ratio,) conversion into shares, loss of capital or non-payment of interest. The use of subordinated bonds, particularly Additional Tier 1 bonds, exposes the fund to the following risks:</p> <ul style="list-style-type: none"> - triggering of contingent clauses: if a capital threshold is crossed, these bonds are either exchanged for shares or undergo a capital reduction, potentially to 0. - cancellation of coupon: Coupon payments on this type of instrument are entirely discretionary and can be cancelled by the issuer at any time, for any reason, with no time constraints. - capital structure: unlike traditional secured debt, investors in this type of instrument can suffer a loss of capital without the prior bankruptcy of the company. In addition, the subordinated creditor will be repaid after the ordinary creditors, but before the shareholders. - Callable perpetuals: These instruments are issued as perpetual instruments, callable at predetermined levels only with the approval of the competent authority - valuation / yield: The attractive yield on these securities can be seen as a complexity premium.
Counterparty risk	This is the risk associated with the Fund's use of over-the-counter financial futures instruments. These transactions, entered into with one or more eligible counterparties, potentially expose the Fund to a risk of default by one of its counterparties, which could lead to an event of default that would no longer allow the Fund to honour its commitments under these transactions.
Liquidity risk	Liquidity risk measures the difficulty that the fund may have in selling certain assets within a short timeframe in order to meet the need to raise cash or deal with a fall in their market value. Please note that over-the-counter markets do not offer immediate liquidity or enable assets to be sold at the price expected by the Fund.
Risk associated with the use of derivatives	The use of derivatives can lead to significant variations in the net asset value over short periods, both upwards and downwards.
Specific risk associated with subordinated debt securities	A debt is said to be subordinated when its repayment depends on the initial repayment of other creditors (preferred creditors, unsecured creditors). The subordinated creditor will therefore be repaid after the ordinary creditors, but before the shareholders. The interest rate on this type of debt will be higher than on other debt. In the event of the triggering of one or more clauses provided for in the issue documentation for the said subordinated debt securities and, more generally in the event of a credit event affecting the issuer concerned, there is a risk that the net asset value of the Fund will fall. The use of subordinated bonds may expose the Fund to the risks of coupon cancellation or deferral (at the sole discretion of the issuer), uncertainty over the redemption date, or valuation/return (the attractive yield of these securities may be considered a complexity premium).
Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none"> 1) lower revenues; 2) higher costs; 3) damage or depreciation in asset value; 4) higher cost of capital; 5) reputational risks and 6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Lgal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

This sub-fund is primarily intended for investors seeking a means of diversifying their investments in the euro-denominated interest rate markets, with an attractive yield over government bonds.

"A" shares are intended for all investors, in particular retail investors and investors who subscribe through a distributor (wealth management advisor...).

The "I" shares are intended for all subscribers, and are more particularly intended for institutional investors who have received the prior agreement of the Management Company and whose initial minimum subscription is 1,000,000 euros (except for the Management Company which may subscribe 1 part).

Shares "N" are reserved for the following category of subscribers whose minimum initial subscription amount is 5,000 euros:

- to marketing networks that have received the prior approval of the Management Company;
- Or to distributors and intermediaries who have received the prior approval of the Management Company and provide a service of: - independent advice within the meaning of MIF2 regulations;
- Individual management under mandate.

The founding shareholders, "F" are intended for all subscribers who subscribed during the initial subscription period (the first six months following the creation of the compartment), whose initial subscription is 100,000 euros and having received prior approval from the Management Company.

The "Z" shares are exclusively reserved: to the Management Company;

- to the staff of the Management Company (permanent employees and managers) as well as their spouses who are not separated from body, parents and children.
- employee mutual funds for the Management Company's staff;
- to life insurance companies or capitalization for the counterclaim the value of the amount that would be invested in a unit of account representing the Z shares of the subfund within a life insurance contract or a capitalisation contract subscribed by a member of the staff of the Management Company and their spouses not separated from body parents and children.

The sub-fund may be used to support variable capital life insurance contracts denominated in units of account.

11.2 Minimum recommended investment period

3 years

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the issuer selection process and the determination of issuers' weight in the portfolio.

The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future 3 years cash requirements and your risk aversion. It is also advisable to diversify investments sufficiently to avoid excessive exposure to this Fund risk.

In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

13. Distribution frequency

Non applicable

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares).

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR001400TGU4 Share A ACC	100 €	1 share(s)
FR001400TGV2 Share N ACC	100 €	5,000 €
FR001400TGW0 Share I ACC	100 €	1,000,000 €
FR001400TGX8 Share F ACC	100 €	100,000 €
FR001400TGY6 Share Z	100 €	1 share(s)

Subscriptions are accepted either in number of shares (expressed in thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in thousandths of shares).

The Sub-Fund has not implemented a redemption cap mechanism (known as "Gates") so in the event of exceptional circumstances, the absence of a redemption cap mechanism may result in The UCITS being unable to honour redemption requests and thus increase the risk of a complete suspension of subscriptions and redemptions on The UCITS.

The Sub-Fund implements several complementary DNSH schemes to ensure that its investments do not cause significant environmental and social harm.

16. Fees and commissions**16.1 Subscription and redemption fees**

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid To the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
Subscription fee not earned To the Sub-Fund	Net asset value x number	A ACC	1.00%
		N ACC	5.00%
		I ACC	5.00%
		F ACC	5.00%
		Z	None

Subscription fee earned To the Sub-Fund	Net asset value x number	A ACC	None
		N ACC	None
		I ACC	None
		F ACC	None
		Z	None
Redemption fee not earned To the Sub-Fund	Net asset value x number	A ACC	None
		N ACC	None
		I ACC	None
		F ACC	None
		Z	None
Redemption fee earned To the Sub-Fund	Net asset value x number	A ACC	None
		N ACC	None
		I ACC	None
		F ACC	None
		Z	None

Subscription and redemption fees are not subject to VAT.

Exemptions:

It is possible to proceed, free of commissions, with simultaneous redemptions/subscriptions on the basis of the same net asset value for a zero balance transaction volume.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)
Financial management fees	Net asset	A ACC	1.30% (incl. tax) maximum
		N ACC	0.8% (incl. tax) maximum
		I ACC	0.60% (incl. tax) maximum
		F ACC	0.40% (incl. tax) maximum
		Z	N/A
Operating Expenses and other services (flat-rate assessment of costs detailed below)	Net asset	Applied to the Fund	¹

indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	A ACC	15% (inclusive of tax) of the performance of the Sub-Fund in excess of its benchmark index plus 240BP.
		N ACC	15% (inclusive of tax) of the performance of the Sub-Fund in excess of its benchmark index plus 280BP.
		I ACC	15% (inclusive of tax) of the performance of the Sub-Fund in excess of its benchmark index plus 300BP.
		F ACC	15% (inclusive of tax) of the performance of the Sub-Fund in excess of its benchmark index plus 320BP.
		Z	None

1

Detail of operating expenses and other services:

Operating expenses and other services include:

- (i) Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- (ii) Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- (iii) Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);
 - Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);
 - Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and messaging functions of Bloomberg).

- (iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.
- (v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring breaches of thresholds, exceeding ratios etc.).
- vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-financial constraints arising from specific client requests and specific to the UCITS).
- (vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French Monetary and Financial Code,
- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

How the performance fee is calculated (A, N, I and F shares)

The performance fee is based on a comparison between the performance of the sub-fund and its benchmark index over the financial year.

Variable management fees are deducted, for the benefit of the Management Company according to the following procedures:

The sub-fund's performance is calculated on the basis of changes in net asset value: if, over the year, the sub-fund's performance is positive and exceeds its benchmark, i.e.:

- €STR (OIS-Ester) capitalised +2.40% for A ACC shares;
- €STR (OIS-Ester) capitalised +2.80% for N ACC shares;
- €STR (OIS-Ester) capitalised +3% for I ACC shares;
- €STR (OIS-Ester) capitalised + 3.20% for F ACC shares.

The variable portion of the management fee will represent 15% (inclusive of tax) of the difference between the performance of the sub-fund and the benchmark.

The first calculation of the variable management fee will be carried out for the period from the date of creation of the sub-fund until 31 December 2025.

- If, over the year, the sub-fund's performance is negative or below its benchmark, the variable component will be zero.

The performance fee is calculated on the basis of the net assets on which the performance was achieved and the sub-fund's subscriptions and redemptions. This method involves comparing the assets of the Sextant Optimal Income sub-fund with the assets of a sub-fund that follows the benchmark index, applying the same subscription and redemption flows.

If, during the financial year, the sub-fund's performance since the beginning of the financial year is positive and greater than the benchmark threshold calculated over the same period, this outperformance will be subject to a provision for variable management fees when calculating the net asset value.

In the event that the sub-fund underperforms the benchmark between two net asset values or achieves a negative performance, any provision previously set aside will be readjusted by reversing the provision. Reversals of provisions are capped at the amount of previous allocations.

This variable portion will only be definitively received at the end of the financial year, if the sub-fund's performance is positive and above the benchmark threshold.

In the event of share redemptions, if there is a provision for variable management fees, the part which is proportional to the shares redeemed is paid immediately to the Management Company. These fees (fixed and, where applicable, variable portions) are charged directly to the sub-fund's income statement.

Any underperformance of the sub-fund relative to the benchmark index is offset before performance fees become payable. To this end, the catch-up period is set at 5 years. If, during the catch-up period, a new underperformance is observed, this will trigger a new catch-up period of 5 years from the date of the observation in respect of this underperformance. Finally, if the underperformance has not been made up after 5 years, it is no longer taken into account for the 6th year.

Illustration:

Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment	Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment
Year 1	5	0	Yes	Year 7	5	0	Yes
Year 2	0	0	No	Year 8	-10	-10	No
Year 3	-5	-5	No	Year 9	2	-8	No
Year 4	3	-2	No	Year 10	2	-6	No
Year 5	2	0	No	Year 11	2	-4	No
Year 6	5	0	Yes	year 12	0	0*	No

* The underperformance to be compensated in year 12 is reset to 0 and not -4 given the application of the catch-up period of 5 years from year 8.

The past performances of the sub-fund are available on the Amiral Gestion website.

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

Swing Pricing NAV adjustment method with trigger threshold

In order not to penalise shareholders who remain in the Sub-Fund, an adjustment factor will be applied to those who subscribe or redeem significant amounts of the Sub-Fund's assets, which is likely to generate costs for holders entering or leaving the Sub-Fund that would otherwise be charged to shareholders present in the Sub-Fund. Thus, if on any NAV calculation day the total number of net subscription/redemption orders from investors for all of the Sub-Fund's share categories exceeds a threshold predetermined by the Management Company and determined on the basis of objective criteria as a percentage of the Sub-Fund's net assets, the NAV may be adjusted upwards or downwards to take into account the readjustment costs attributable to the net subscription/redemption orders respectively. The NAV of each share category is calculated separately, but any adjustment has an identical percentage impact on the overall NAV of each share category of the Sub-Fund.

The cost and trigger threshold parameters are determined by the Management Company and reviewed periodically, but this period may not exceed six months. These costs are estimated by the Management Company on the basis of transaction costs, buy/sell ranges and any taxes applicable to the Sub-Fund.

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and assesses them periodically to ensure the quality of the services provided. Consequently, it is also not possible to predict exactly how often the Management Company will have to make such adjustments, which may not exceed 2.5% of the NAV. Investors are informed that the volatility of the NAV of the Sub-fund may not reflect only the volatility of the securities held in the portfolio due to the application of swing pricing.

4. Management objective and investment strategy**4.1 Management objective**

The SEXTANT FRANCE ENGAGEMENT Sub-Fund is a dynamic fund whose objective is to achieve, over the recommended investment period of five years, a performance net of management fees higher than the CAC All Tradable Index, net dividends reinvested, through a selection of French equities of all capitalisation sizes. The Sub-Fund also aims to invest in companies that stand out for their good ESG practices, according to a ESG selectivity based on a best- in-class approach , but also to support those with good potential for improvement, according to a best-effort approach based on shareholder engagement.

4.2 Benchmark index

Cac All Tradable Index, dividends net reinvested.

The Cac All Tradable Index, dividends net reinvested (NR), (ticker bloomberg : SBF250NT), includes small, medium and large French market capitalisation stocks.

The Cac All Tradable Index is administered by Euronext, a registered administrator in accordance with Article 34 of Regulation (EU) 2016/1011 and listed in the register of reference index administrators maintained by ESMA. Further information on the benchmark index is available on the Euronext website at the following address : <https://live.euronext.com/en/products-indices/index-rules>.

Investors should note that, as the management style (see below) is discretionary, the composition of the portfolio will never seek to replicate the composition of the benchmark index, either geographically or by sector.

4.3 Investment strategy**❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE**

The managers of the SEXTANT FRANCE ENGAGEMENT Sub-fund apply a management philosophy that aims to achieve the best possible long-term performance while minimizing risk, through a fundamental approach focused on value analysis. The sub-fund's managers select companies that they believe are significantly undervalued in relation to their intrinsic value, and whose management strategy and business model are convincing. This is a genuine "stock-picking" strategy, applied in accordance with the principles of "Value Investing" inherited from great American investors such as Benjamin Graham, Philip Fisher and Warren Buffett.

Socially responsible investment (SRI) approach applicable to the sub-fund

The investment process fully integrates ESG criteria at the heart of its fundamental analysis. The Sub-fund aims to invest in companies that stand out for their good ESG practices, using a best-in-class approach, but also to support those with good potential for improvement by conducting an active dialogue with them, in order to guide them towards a process of progress on the main key ESG issues in their sector of activity (sources of significant impact, existing levers for improvement). This approach is based on a dual responsibility that underpins the management team's efforts and sums up their philosophy of responsible investment:

- the fiduciary responsibility of the management team through the central role of ESG analysis in understanding and identifying the material risks of the company and its sources of value creation;
- their societal and shareholder responsibility as an investor.

Sextant France Engagement's SRI approach is mainly based on an ESG Selectivity approach, i.e. extra-financial filters leading to a

reduction of at least 20% in the initial investment universe, made up of around 350 French stocks, divided into groups of small, medium and large market capitalisations, using data from the Gaia Ratings database of our partner extra-financial rating agency Ethifinance. This allocation is consistent with the sub-fund's investment strategy¹.

In accordance with the requirements of the Reliance Label (the French "Recovery" Label) and the SRI label held by the sub-fund. The Sextant France Engagement Sub-fund is also committed to being better rated than its investment universe. This commitment to quality is reflected in the 4 approaches described below: 1 adopting an ESG rating approach, 2 adopting an indicator approach.

1. An ESG indicator aggregated within the overall ESG Performance Score: this score translates into the average ESG score of the portfolio on all the E, S and G criteria taken into account in the Amiral Gestion ESG analysis grid
2. The portfolio's performance on 2 indicators of environmental impact and respect for human rights
 - Intensity of Human Rights controversies
 - For the portfolio: Number of human rights controversies² / Total number of companies in the portfolio*100
 - For the universe: Number of human rights controversies / Total number of companies in the universe*100
 - Carbon intensity (WACI measure)³: Weighted average of carbon intensity ratios per turnover (sum of weight * intensity ratio for each security), for Scope 1, Scope 2 and Scope 3 upstream.

4 other social and governance progress indicators are also tracked with the aim of improving the portfolio's performance relative to its investment universe : the Sextant France Engagement Sub-Fund is committed to targeting portfolio companies for their performance on these indicators and/or through its engagement actions to help them improve in order to reduce the gap with the universe if the portfolio is underperforming and/or to exceed it in order to widen the gap within 3 years. The four indicators concerned are

- Promoting gender equality:
 - Average number of women on the Executive Committee
 - Average number of women managers
- Sharing value
 - Proportion of companies with employee share ownership
 - Average proportion of capital held by employees

Investment process

The investment process for this sub-fund is structured around the following stages: (i) definition of the eligible investment universe using a combination of screenings, including a best-in-class filter; (ii) fundamental analysis of companies and their business models, including ESG criteria and shareholder engagement; (iii) valuation work, leading to (iv) an investment decision, followed by (v) verification of the ESG quality of the portfolio.

(i). Definition of the universe of eligible securities

The universe of eligible securities of the SEXTANT FRANCE ENGAGEMENT sub-fund is determined according to :

- **Compliance with the sub-fund's sectoral exclusion policy**(coal, conventional and non-conventional fossil fuels, controversial weapons, conventional and nuclear armaments, tobacco, pornography)⁴
- **Compliance with our normative exclusion policy** : Exclusion of companies in violation of the principles of the United Nations Global Compact and/or the OECD Guidelines for Multinational Enterprises, and placing on watchlist companies according to Sustainalytics and whose status is confirmed by the Controversy Monitoring Committee after internal review.
- **Ineligibility of the worst-rated stocks in terms of ESG and a commitment to minimum portfolio coverage** : to ensure that the companies included in the sub-fund's portfolio meet a minimum threshold of requirements, the ratings of the stocks in the universe are screened by the management team using its proprietary evaluation method based in particular on Ethifinance's Gaia Ratings database. At least 90%5 of the companies in the portfolio are thus covered by an ESG analysis; the maximum 10% not covered is intended to take into account exceptional cases that do not allow for immediate coverage (small caps for which ESG information is not available or is not readily available, IPOs, etc.). The minimum ESG rating applied to the Sextant France Engagement SRI Sub-Fund is 35/100.

The investment ban and the exclusion of companies exposed to controversies of high to severe gravity, (i) respectively of levels 4 and 5 according to the Sustainalytics classification and/or (ii) after an internal review and analysis by the Controversy Monitoring Committee aimed at assessing and confirming the reality and the level of severity of the controversies. Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities. The combination of these screenings leads to a selective approach to the entry of the Sub-fund for all new investments, but also to close and continuous monitoring of the portfolio that can lead to the exclusion of certain stocks in case of non-compliance with these criteria. **The investment universe is thus reduced by a minimum of 20%.**

The sources and methodologies of these various ESG screenings are described on the Amiral Gestion website: <https://www.amiralgestion.com/investissement-responsable/>

In addition, when the portfolio invests in UCITS (excluding cash management), the company will give preference, where possible, to UCITS with the same SFDR classification as that of the Sub-Fund and which have the SRI label.

(ii). Fundamental analysis including ESG criteria and shareholder commitment

The SEXTANT FRANCE ENGAGEMENT sub-fund is based on a rigorous selection of securities obtained after an internal fundamental analysis summarised in Amiral Gestion's global " Quality rating ". During this phase, whenever possible, the managers contact the company and its managers to perfect their understanding of its activities and business model, to address strategic issues, and finally to deal with issues related to the financial statements (income statement, cash flow statement, balance sheet). Where necessary, the Management Company supplements this strategic and financial understanding with on-site visits (e.g. to industrial sites) to form its

own opinion and to verify some of the information provided by the company.

This fundamental analysis is based on the study of various criteria:

- business model: recurrence, predictability, cyclicity, barriers to entry;
- quality of management: operational and financial track record, respect for minority shareholders, motivation, training and profit-sharing of employees, quality of relations with third parties;
- quality of financial structure: balance sheet, realisable assets, level of debt;
- criteria relating to social, environmental and governance aspects which are the subject of a specific independent rating called the "Internal ESG rating" integrated into the overall quality rating.

The study of these different criteria determines what Amiral Gestion calls its "Quality rating", which varies from 0 to 10. A high rating reflects strong company fundamentals. This rating is one of the factors used to guide the investment decision (see point 4) and can be used to fuel ongoing dialogue with companies, or even the implementation of engagement actions when this proves necessary in the context of potentially material ESG risks.

Supporting companies in their progress is a central objective of the sub-fund's SRI approach, and shareholder engagement is at the heart of Sextant France Engagement's investment process. This **best-effort** approach takes the form of an **active dialogue**, which may be conducted with all the companies in the portfolio, but which gives priority to targeting those :

- Where ESG analysis reveals :
 - Particularly material issues that could impact the company's development potential (for example, adapting the product mix to environmental or social issues exposed to existing or future regulatory changes).
 - The **shortcomings on certain criteria**, likely to cause strong negative externalities and/or a management risk over the long term.
- Which would be exposed to an ESG controversy, in particular in connection with a violation of the United Nations Global Compact, determining the level of seriousness and/or recurrence.
- Which would be among the main contributors to the carbon intensity of the sub-fund, or for those with high stakes vis-à-vis the energy transition.
- Which could improve their performance on the 4 social and governance indicators mentioned below, with the Sextant France Engagement sub-fund committing to an objective of improving the portfolio's performance in relation to its investment universe:
 - Social / Promotion of gender equality :
 - Average number of women on the Executive Committee
 - Average number of women in managerial staff
 - Governance / Value sharing
 - Part of companies with employee shareholding
 - Average share of capital held by employees

With this in mind, the Sextant France Engagement sub-fund is committed to helping the companies in its portfolio to progress, in order to reduce the gap with the universe if the portfolio is underperforming and/or to exceed it in order to widen the gap within 3 years.

These dialogue and commitment initiatives enable us to closely monitor the progress made by companies, to adjust their ESG ratings and may lead us, in certain cases, to disinvest if an improvement is deemed insufficient.

The shareholder commitment approach applied to the sub-fund is also embodied in systematic participation in general meetings, in accordance with Amiral Gestion's proprietary voting policy.

(iii). Valuation

Each company monitored is subject to a valuation model that incorporates historical accounts, forecasts, valuation ratios and a discounted cash flow model (hereafter "DCF"). Amiral Gestion believes that a company's valuation is linked to its ability to generate free cash flow, which is why the management team uses a DCF model to assess a company's intrinsic value. This model includes a history of the accounts over 5 to 10 years:

- with: a detailed analysis of sales and their breakdown by geographical area and by activity;
- an analysis of the income statement, balance sheet and cash flow statement, using all the information available, particularly in the annual reports, to make all the restatements necessary for an economic reading of the accounts that is consistent between our different files;
- detailed forecasts based on various assumptions supported by our surveys.

(iv). Investment decision

All of this analysis is used to define a target intrinsic valuation (see valuation model above, DCF), as well as an Internal Quality Score (see above), which also includes the Internal ESG Score. These factors make it possible to deduce the risks and attractiveness of each company. The Potential, which is based on the target intrinsic value, combined with the Internal Quality Score, enables us to rank each company in terms of investment interest within the sub-fund.

Investment decisions also depend on the existence of a 'margin of safety' made up of the difference between the company's market value, as assessed by the managers, and its market value (market capitalisation).

It should be noted that Environmental, Social and Governance (ESG) criteria are one of the components of management, but their weighting in the final decision is not defined upstream.

The investment process is documented and an investment case is drawn up incorporating the various elements of analysis mentioned above.

The positions are set up with a view to holding them for the medium to long term (more than two years).

(v). Monitoring the ESG quality of the portfolio, in accordance with the requirements of the SRI Label and the Relance Label (the French "Recovery" Label), which the sub-fund holds

In order to ensure that the ESG characteristics of the portfolio are consistent with the sub-fund's extra-financial objective, Amiral Gestion relies on:

- The monitoring of an ESG Performance Score in respect of which the sub-fund's portfolio is committed to being rated better than the investment universe and whose breakdown by capitalisation size is consistent with the sub-fund's investment strategy.

The source data for the ESG Performance Score comes from our internal analysis and from indicators selected by our teams from Ethifinance's Gaïa Ratings database. This rating helps to determine the eligible universe and to calculate the ESG quality of the Sextant France Engagement portfolio, in respect of which the sub-fund is committed to having an ESG Performance Rating higher than that of its investment universe of around 350 stocks, in accordance with the requirements of the Relance Label Charter (the French "Recovery" Label), which the sub-fund has been awarded⁶.

In practice, the average ESG rating of SEXTANT FRANCE ENGAGEMENT will be compared with the average ESG performance of the investment universe, weighted by the weight of the pockets of market capitalisations represented in the sub-fund.

- Monitoring the performance of 2 environmental quality indicators and respect for human rights for which the sub-fund's portfolio is committed to being rated higher than the investment universe:
 - Human Rights: Intensity of human rights controversies
 - Environment: Carbon intensity

The Sextant France Engagement Sub-Fund includes these extra-financial impact indicators in its semi-annual report, including those on which the Sub-Fund is committed to performing better than its investment universe. Its monthly reporting also includes at least the Sub-fund's average ESG performance rating compared to its universe, as well as its carbon footprint.

The UCI is subject to a sustainability risk as defined in the risk profile. These sustainability risks are taken into account through the environmental and social characteristics of the sub-fund mentioned below, and through the application of a common set of responsible investment practices applicable to all the UCIs managed by Amiral Gestion, described in the document "Extra-financial communication under the SFDR Disclosure regulation, at the entity level" available on its website: <https://www.amiralgestion.com/investissement-responsable/>.

The UCI does not have a sustainable investment objective, but it promotes environmental and social characteristics while ensuring good corporate governance practices, via its non-financial approaches (compliance with minimum thresholds for portfolio coverage by an ESG analysis, SRI selectivity of at least 20%, ESG integration in the fundamental analysis, commitment to an average ESG performance rating higher than that of its universe, commitment to a better performance of the portfolio than its universe on certain non-financial impact indicators, normative and sectoral exclusions specific to the Sub-Fund, shareholder commitment) described above in the investment strategy, thus qualifying it as an "Article 8" Sub-Fund according to the classification of the "SFDR Disclosure" regulation. The SRI Transparency Code, specifying this transparency of the environmental and social characteristics of the Sub-fund, is available on the website page devoted to the Sub-fund: <https://www.amiralgestion.com/fr/sextant-france-engagement>.

Sustainable investment

Although it does not have an investment strategy focused on a sustainable investment objective within the meaning of the SFDR Disclosure regulation, the sub-fund undertakes to hold a minimum of 30% in sustainable investments. Amiral Gestion⁷ defines a sustainable investment as the acquisition of a financial instrument that is involved in one or several of the following economic activities:

- contributing substantially to the environmental objectives: (i) mitigating climate change in order to achieve carbon neutrality by 2050 in accordance with the Paris Climate Agreements; (ii) adapting⁹ to the effects of climate change;
- making a net positive contribution to one or more of the United Nations Sustainable Development Goals (SDGs) of a social nature by 2030;

Provided that these investments do not cause significant harm to any other environmental or social objectives, and that the companies in which the investments are made apply good governance practices. as detailed in pre-contractual appendix 2 of the SFDR RTS

Part verte - Taxonomie européenne

The principle of "cause no significant harm" applies only to investments underlying the financial product that take into account the European Union's criteria for environmentally sustainable economic activities.

The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

DNSH¹⁰ SFDR and consideration of Key Adverse Impacts¹¹

The Sub-Fund implements several complementary DNSH schemes to ensure that its investments do not cause significant environmental and social harm. These include: i) a set of investment rules for the whole portfolio (sectoral and normative exclusions and controversies; ineligibility of companies below the minimum ESG score threshold set for the Sub-Fund; and consideration of the Principal Adverse Impacts); ii) stricter requirements for sustainable investments; iii) monitoring of governance practices by tracking "G" ratings and controversies, which in some cases may lead to dialogue with the company. These requirements are described in Appendix 2 of the Sub-Fund's SFDR.

Within the scope of DNSH, the Sub-Fund has, since the end of 2022, notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) of its investments on sustainability factors, in order to identify and to take appropriate action. The Sub-Fund thus follows 14 mandatory SFDR PAI indicators and 2 additional indicators selected from the list of optional PAI from Appendix 1 of the SFDR RTS.

The methods by which the PAI indicators are taken into account by the Sub-Fund are detailed in its pre-contractual SFDR Appendix 2, and Amiral Gestion's more global policy on the subject, including details of the sources and methods of taking each indicator into account, is available on its website, under the heading "Responsible Investment": <https://www.amiralgestion.com/fr/investissement-responsable/>

The metrics and information on how the main negative impacts have been taken into account will be published annually in the Sub-Fund's periodic 'Appendix 4 SFDR' document, for the first time in 2024 for the 2023 financial year. The extra-financial approaches

applied to the sub-fund are described in more detail in the pre-contractual appendix 2 of the Sextant France Engagement sub-fund, under the "SFDR Disclosure" regulation, which is available on the Amiral Gestion website: <https://www.amiralgestion.com/fr/sextant-france-engagement>

¹ The detailed methodology for defining the universe and for calculating the sub-fund's ESG performance in relation to the universe is described in the sub-fund's SRI Transparency Code, which is available on the website.

² Human rights controversies, identified through the Sustainalytics database, include all incidents related to employees, the supply chain, civil society and communities.

³ Source of analysis: S&P - Trucost database

⁴ Details of the exclusion policy, including sub-criteria and turnover thresholds, can be found in the Sextant France Engagement Transparency Code, which is updated regularly and accessible on the page dedicated to the sub-fund on the Amiral Gestion website.

⁵ This rate may be expressed as a percentage of the sub-fund's net assets or in terms of the number of issuers in the UCI.

The voting policy is available on the website: <https://www.amiralgestion.com/investissement-responsable/>

⁶ The voting policy is available on the website: <https://www.amiralgestion.com/investissement-responsable/>

⁷ Sextant France Engagement has held the "Relance" Label (Label Relance | economie.gouv.fr) since 3 November 2020. This label aims to direct French savings towards collective investment schemes that are committed to rapidly mobilizing new resources to support the equity and quasi-equity of French companies (SMEs and ETIs), whether listed or not. The objective is to direct the savings of households and professional investors towards these investments which meet the financing needs of the French economy following the health crisis. Labelled funds must also comply with a set of environmental, social and good governance (ESG) criteria, including in particular a ban on financing coal-fired activities and the monitoring of an ESG rating or indicator.

⁸ The full methodology paper on sustainable investment is available on the Amiral Gestion website: amiral_gestion_investissement_durable_note_methodologique_012023_public_version_vf.pdf (amiralgestion.com)

⁹ The substantial contribution to the objective of adapting to climate change will constitute an effective criterion for Sustainable Investment qualification from 1 January 2024.

¹⁰ DNSH = Do No Significant Harm

¹¹ Principal adverse impacts ('PAIs') are defined as impacts of investment decisions that result in significant or potentially significant adverse impacts on sustainability factors (environmental, social and labour issues, respect for human rights and anti-corruption and bribery).

✦ ELIGIBLE ASSETS

Shares

Shares

The SEXTANT FRANCE ENGAGEMENT sub-fund is exposed between 60% and 100% of its net assets to French equities of all capitalisation sizes. Small and mid-cap stocks and mid-sized companies (SME/Mid-sized companies) will represent at least 10% of the assets. These may be shares listed on the French regulated markets of Euronext and/or Euronext Growth. At least 75% of the net assets of the SEXTANT FRANCE ENGAGEMENT Sub-fund are invested in shares of the European Union and the European Economic Area, mainly through French securities (thus allowing eligibility for the PEA).

However, exposure to non-French markets must remain incidental, i.e. less than 10% of the sub-fund's net assets. This limit does not apply to companies listed on a foreign market whose registered office is in France.

Within this investment universe, certain companies may be excluded, as mentioned above (description of the investment strategy). The portion of assets not invested in equities, due to a lack of opportunities offering a sufficient margin of safety according to the managers' assessment, is invested in fixed income products, deposits or cash.

Debt securities and money market instruments

The sub-fund may invest up to 10% of its net assets in bonds and money market instruments.

Investments in money market instruments are denominated in Euros and have a maximum maturity of twelve months. The short-term securities used will have a minimum rating (Standard & Poor's A3 / Moody's P-3 / Fitch Ratings F3) or, where they are not rated, will be deemed equivalent according to the Management Company's analysis.

The Management Company will, however, give preference to investing cash in "money-market" or "short-term money-market" UCITS/AIFs up to a limit of 10% of the net assets.

The sub-fund also reserves the right to invest in all bond securities denominated in euro, irrespective of their credit rating, including convertible bonds, speculative "high yield" bonds (i.e. bonds with a non-investment grade credit rating) and unrated bonds.

Investments in convertible bonds and "high yield" bonds and securities with a Standard & Poor's rating of less than BBB or a rating deemed equivalent by the management company, or securities that are not rated, will remain incidental, i.e. less than 10% of the net assets.

As regards fixed-income securities, the management company carries out its own credit and market risk analysis when selecting securities on acquisition and during their lifetime. It therefore does not rely exclusively on ratings provided by rating agencies.

Investments in securities of other UCITS, AIFs and/or investment funds

The Sub-fund may invest up to 10% of its net assets in securities of other French or European UCITS or AIFs or foreign investment funds (holding no more than 10% of the units of foreign UCIs or investment funds) that meet the criteria set out in article R.214-13 of the French Monetary and Financial Code, mainly in the investment of cash via money market UCITS/AIFs and short-term money

market UCITS/AIFs, as well as in UCITS/AIFs that are classified as French equities or bonds that are compatible with the sub-fund's management.

These UCIs and investment funds may be managed by the Management Company.

The sub-fund will never invest in FCPR (venture capital funds) or similar funds, or in securitisation vehicles.

Derivatives and securities with embedded derivatives

Derivatives

Transactions involving derivatives (purchases of call or put options on equities, indices, interest rates or currencies, and purchases or sales of futures, forward exchange contracts or swaps on equities, indices, interest rates or currencies) and securities that are part of derivatives shall be carried out in order to expose or partially hedge the Sub-fund against favourable or unfavourable trends in equities, indices, interest rates and currencies. These instruments will be traded on regulated and/or organised or over-the-counter markets.

There will be no overexposure. Futures (contracts on financial instruments) relating to commodity indices will be carried out in compliance with the 5/10/20/40 ratio.

Call options on securities will be written while holding the underlying security as part of strategies to optimise the return of the securities in the portfolio:

Put options on securities will be written as part of strategies to potentially acquire such securities at a price below the market price at the time the strategy is implemented.

These transactions will not involve derivatives with underlyings outside the EU.

Securities with embedded derivatives:

The Sub-fund may hold products incorporating derivatives (preferential rights/warrants, warrants, convertible bonds) as part of its equity portfolio management:

- when these securities are detached from the shares held in the portfolio;
- when it is more advantageous to acquire shares by purchasing and then exercising these securities (e.g. participation in a capital increase by first purchasing Preferential Subscription Rights on the market).

Deposits and cash

The Sub-fund may use deposits to optimise the management of the Sub-fund's cash and to manage the different subscription/redemption value dates of the underlying UCIs. It may place up to 20% of its net assets in deposits a single credit institution. The sub-fund may hold cash on an ancillary basis, in particular to cover share redemptions by investors. The cash holding threshold may be raised to 20% of net assets when justified by exceptional market conditions.

Cash lending is prohibited.

Cash Borrowings

The Sub-fund may borrow cash. Although the Sub-fund is not intended to be a structural cash borrower, it may be in a debit position as a result of transactions linked to its payments (ongoing investments and divestments, subscriptions/redemptions, etc.), up to a limit of 10% of the Sub-fund's net assets

Temporary acquisition and sale of securities:

None

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

Non applicable

7. Special cases of UCIs with sub-funds

Non applicable

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk	The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.
Discretionary management risk	The discretionary management style is based on anticipating trends in the financial markets. The Fund's performance will depend on the issuers selected and the asset allocation defined by the manager. There is a risk that the Management Company will not select the best-performing securities and that the net asset value of the Fund will therefore fall.
Equity market risk	Fluctuations in equity markets may lead to significant changes in net assets, which may have a negative impact on the performance of the Fund. The net asset value of the fund may fall significantly.
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk.
Risk related to the size of the capitalisation of the selected securities	The Fund may invest in small- and mid-cap markets, as the volume of securities listed on the stock exchange is reduced, and market movements are therefore more pronounced on the downside and faster than in large-cap markets. The fund's net asset value may therefore fall more quickly and more sharply.
Liquidity risk	Liquidity risk measures the difficulty that the fund may have in selling certain assets within a short timeframe in order to meet the need to raise cash or deal with a fall in their market value. Please note that over-the-counter markets do not offer immediate liquidity or enable assets to be sold at the price expected by the Fund.
Credit risk	The Fund may invest in fixed income products. Credit risk is the potential risk of issuer default or credit downgrade, which may lead to a fall in net asset value.
Counterparty risk	This is the risk associated with the Fund's use of over-the-counter financial futures instruments. These transactions, entered into with one or more eligible counterparties, potentially expose the Fund to a risk of default by one of its counterparties, which could lead to an event of default that would no longer allow the Fund to honour its commitments under these transactions.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.
Risk associated with the use of derivatives	The use of derivatives can lead to significant variations in the net asset value over short periods, both upwards and downwards.
Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none">1) lower revenues;2) higher costs;3) damage or depreciation in asset value;4) higher cost of capital;5) reputational risks and6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Lgal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

Because of the high risk associated with an investment in equities, this sub-fund is intended primarily for investors who are prepared to withstand the sharp fluctuations inherent in equity markets and who have a minimum investment horizon of five years.

"A" shares are aimed at all subscribers, in particular retail investors and investors who subscribe through a distributor (asset management advisor, etc.).

"I" shares are open to all subscribers, and are more specifically intended for institutional investors who have received prior approval from the Management Company and whose minimum initial subscription is €1,000,000 (except for the Management Company, which may subscribe for 1 share).

"N" shares are reserved for the category of subscribers listed below whose minimum initial subscription is €5,000:

- marketing networks that have received prior approval from the management company
- Or to distributors and intermediaries who have received prior approval from the management company and who provide an independent advisory service within the meaning of MiFID 2
- individual management under mandate regulations.

"F" founder shareholders are intended for all subscribers who have subscribed during the initial subscription period (the first six months following the creation of the sub-fund), whose initial subscription is 100,000 euros and who have received prior approval from the Management Company.

"L" shares are reserved for insurance companies and their distribution networks that have received prior approval from the Management Company.

"Z" shares are reserved exclusively for:

- the Management Company
- the Management Company's staff (permanent employees and managers) and their unmarried spouses, parents and children.
- FCPEs for the staff of the Management Company
- life insurance or capitalisation companies for the equivalent value of the amount invested in a unit of account representing the sub-fund's Z shares within a life insurance or capitalisation contract taken out by a member of the Management Company's staff, as well as their unmarried spouses, parents and children.

SEXTANT FRANCE ENGAGEMENT may be used as a vehicle for unit-linked variable capital life insurance policies.

11.2 Minimum recommended investment period

5 years

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the valuation models via the beta used to set the weighted average cost of capital (WACC). The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future 5 years cash requirements and your risk aversion. It is also advisable to diversify investments

sufficiently to avoid excessive exposure to this Fund risk.

In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

Allocation of distributable income : Accumulation

13. Distribution frequency

Non applicable

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares).

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR0013529203 Share A	100 €	1 share(s)
FR0013529245 Share N	100 €	5,000 €
FR0013529237 Share I	100 €	1,000,000 €
FR0013529211 Share F	100 €	100,000 €
FR0013529252 Share L	100 €	1 share(s)
FR0013529229 Share Z	100 €	1 share(s)

Subscriptions are accepted either in number of shares (expressed in thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in thousandths of shares).

How to submit subscription requests

Subscription and redemption requests are centralised each day of valuation before 11:00 with the custodian: CACEIS BANK , whose registered office is located at 89-91 rue Gabriel Péri – 92120 Montrouge RCS Nanterre.

Postal addresses of offices: CACEIS BANK.

They are executed on the basis of the next net asset value calculated on the basis of the closing price on the day on which the requests are centralised. Subscription and redemption requests received after 11:00 are processed on the basis of the net asset value calculated according to the method described above. The relevant payments will be made 2 business days after the valuation.

In the event of a public holiday or stock market closure, it will be calculated on the previous business day.

Shareholders' attention is drawn to the fact that orders transmitted to marketers other than the institutions mentioned above must take into account the fact that the order centralisation cut-off time applies to said marketers vis-à-vis CACEIS BANK

Consequently, these marketers may apply their own cut-off time, earlier than that mentioned above, in order to take account of their deadline for transmitting orders to CACEIS BANK.

Orders are centralised in accordance with the table below:

D business day	Day on which the NAV is established (D)	D+1 to D+3	D+2 business days	D+2 business days
Daily reception of orders and centralisation ^{Daily} before 11:00 (Paris time) of subscription* and redemption orders.	Orders are executed no later than day D	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions D-1 before 4pm

**Unless otherwise agreed with your financial institution.*

The Management Company monitors liquidity risk by Sub-Fund in order to ensure an appropriate level of liquidity for each Sub-Fund, particularly with regard to the risk profile, investment strategies and redemption policies in force for the funds. An analysis of the liquidity risk of the Sub-Fund## is carried out to ensure that the investments and funds have sufficient liquidity to honour the redemption of unitholders under normal and extreme market conditions. The Management Company has set up a liquidity management system and tools to ensure that investors are treated fairly.

The sub-fund has introduced a redemption cap mechanism (known as a "gate") as described below:

Redemption Capping Mechanism ("gate"):

The Management Company has implemented a liquidity management mechanism known as a "gate" or "redemption capping" to protect its investors. This mechanism allows, if necessary, the capping of redemptions when the redemption threshold objectively established by the Management Company is reached. The redemption threshold set by the Management Company for this Sub-Fund is 10% of the net assets. To determine the level of this threshold, the Management Company takes into account the frequency of calculating the net asset value of the UCITS, the investment orientation of the Sub-Fund, and the liquidity of its assets.

The trigger threshold for the gates corresponds to the ratio between:

- - the observed difference, on the same consolidation date, between the number of shares in the Sub-Fund for which redemption is requested or the total amount of these redemptions, and the number of shares in the Sub-Fund for which subscription is requested or the total amount of these subscriptions; and
- the net assets of the fund or the total number of units in the sub-fund.

In the event of triggering the gate, the Management Company reserves the right to spread redemptions over several net asset values. The capping of redemptions can be triggered, at the discretion of the Management Company, only in the case of exceptional market circumstances and if the interests of investors so require.

When redemption requests exceed the triggering threshold, and if liquidity conditions permit, the Management Company may decide to honour redemption requests beyond this threshold, thus partially or fully executing orders that may be blocked. Unexecuted redemption requests at a net asset value will be automatically carried over to the next consolidation date and executed on the next net asset value date. They cannot be revoked by the unit holders or shareholders.

For example, if the total redemption requests for shares represent 5% of the net assets of the Sub-Fund while the triggering threshold is set at 10% of the net assets, the Sub-Fund may decide to honour redemption requests up to 8% of the net assets (thus executing 80% of redemption requests) and thereby carry over the balance of unexecuted redemptions to the next consolidation.

The maximum duration of the redemption capping mechanism is set at 20 net asset values over 3 months for a UCITS with a daily valuation frequency .

Notification Procedures for Unit holders:

In the event of activating the "gate" mechanism, Sub-Fund investors will be informed by any means through the website <https://www.amiralgestion.com/fr>.

Sub-Fund investors whose redemption orders have not been executed will be informed promptly and in a special manner.

Treatment of Unexecuted Orders:

During the period of application of the "gate" mechanism, redemption orders will be executed in the same proportions for UCITS unit holders who have requested redemption at the same net asset value. The redemption orders thus carried over will not have priority over subsequent redemption requests. Unexecuted and automatically carried-over redemption orders cannot be revoked by UCITS unit holders.

Exemption from the "gates" mechanism:

Subscription and redemption transactions, for the same number of shares, based on the same net asset value and for the same investor or economic beneficiary (known as round-trip transactions), are not subject to a "gate."

This exclusion also applies to the transition from one class of shares to another class of shares, at the same net asset value, for the same amount and for the same investor or economic beneficiary.

16. Fees and commissions

16.1 Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid to the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
---	------------	-------	-------------

Subscription fee not earned To the Sub-Fund	Net asset value x number	A	2.00%
		N	5.00%
		I	5.00%
		F	5.00%
		L	2.00%
		Z	None
Subscription fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		I	None
		F	None
		L	None
		Z	None
Redemption fee not earned To the Sub-Fund	Net asset value x number	A	1.0%
		N	1.0%
		I	1.0%
		F	1.0%
		L	1.0%
		Z	None
Redemption fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		I	None
		F	None
		L	None
		Z	None

Subscription and redemption fees are not subject to VAT.

Exemptions:

It is possible to proceed, free of commissions, with simultaneous redemptions/subscriptions on the basis of the same net asset value for a zero balance transaction volume.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)
Financial management fees	Net asset	A	1.9% (incl. tax) maximum
		N	1.10% (incl. tax) maximum
		I	0.90% (incl. tax) maximum
		F	0.50% (incl. tax) maximum
		L	1.6% (incl. tax) maximum
		Z	None
		of which 0.1% including tax will be donated to the Sextant Foundation, except for the "Z" part	
Operating Expenses and other services (flat-rate assessment of costs detailed below)	Net asset	Applied to the Fund	0.1% incl. tax maximum (any excess being borne by the Management Company) ¹
indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	Accessories
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	A N I F L	15% (incl. tax) of the annual performance of the sub-fund's "A", "N", "I", "L" or "F" shares in excess of the performance of the Cac All Tradable Index (net dividend reinvested), subject to the "high water mark" described below.
		Z	None

¹ any surplus being borne by the Management Company

Detail of operating expenses and other services:

Operating expenses and other services include:

- (i) Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- (ii) Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- (iii) Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);
 - Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);
 - Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and messaging functions of Bloomberg).

(iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.

(v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring breaches of thresholds, exceeding ratios etc.).

vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-

financial constraints arising from specific client requests and specific to the UCITS).

(vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French Monetary and Financial Code,
- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

Calculation of the performance fee ("A", "N", "I", "L", "F"):

The outperformance fee is based on the comparison between the performance of the "A", "N", "I", "L" or "F" shares of the Sub-fund and the benchmark Cac All Tradable Index, net dividends reinvested over the financial year.

Variable management fees are deducted for the benefit of the Management Company as follows:

For A, N, I, L and F shares, the performance fee is a maximum of 15% inc VAT of the annual performance of the sub-fund's "A", "N", "I", "L" or "F" shares in excess of the performance of the Benchmark Index, provided that the annual performance of the sub-fund's "A", "N", "I", "L" or "F" shares corresponds to the high water mark principle.

Any underperformance of the Sub-fund relative to the benchmark is made up before outperformance fees become payable. To this end, the catch-up period is set at five years. If, during the catch-up period, a new underperformance is observed, this will trigger a new catch-up period of 5 years from the date of the observation in respect of this underperformance. Finally, if the underperformance has not been caught up after five years, it is no longer taken into account for the sixth year.

Illustration:

Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment	Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment
Year 1	5	0	Yes	Year 7	6.5	0	Yes
Year 2	0	0	No	Year 8	-10	-10	No
Year 3	-5	-5	No	Year 9	2	-8	
Year 4	3	-2	No	Year 10	2	-6	Non
Year 5	2	0	No	Year 11	2	-4	Non
Year 6	6	0	Yes	Year 12	0	0*	Non

*The underperformance to be offset in year 12 is reset to 0 and not to -4 due to the application of the 5-year catch-up period starting in year 8.

High Water Mark principle:

Performance fees follow the "High Water Mark" principle, i.e. no performance fee is charged as long as the performance of the sub-fund's "A", "N", "I", "L" or "F" shares does not exceed the performance of the benchmark index since the performance fee was last charged. When this level is reached, the performance fee is deducted if the performance of the sub-fund's "A", "N", "I", "L" or "F" shares is positive over the current financial year. This level becomes the new High Water Mark.

The performance of the sub-fund's "A", "N", "I", "L" or "F" shares is calculated on the basis of changes in net asset value:

- if, over the financial year, the performance of the sub-fund's "A", "N", "I", "L" or "F" shares is positive and exceeds the performance of the Cac All Tradable Index and complies with the High Water Mark principle, a performance fee will be paid to the Management Company, representing a maximum of 15% (inclusive of tax) for A, N, I, L and F shares, of the difference between the performance of the sub-fund's "A", "N", "I", "L" or "F" shares and the benchmark index.
- if, over the financial year, the performance of the sub-fund's "A", "N", "I", "L" or "F" shares is positive but less than that of the benchmark index, the variable portion will be zero.
- if, over the financial year, the performance of the sub-fund's "A", "N", "I", "L" or "F" shares is positive and greater than that of the benchmark index, but does not meet the High Water Mark condition, the variable portion will be nil.
- if, over the financial year, the performance of the sub-fund's "A", "N", "I", "L" or "F" shares is negative or below that of the benchmark index, the variable portion will be nil.

The performance fee is calculated on the basis of the net assets of the "A", "N", "I", "L" or "F" shares on which the performance was achieved and of subscriptions and redemptions made on the sub-fund's "A", "N", "I", "L" or "F" shares. This method involves comparing the assets of the "A", "N", "I", "L" or "F" shares of the SEXTANT FRANCE ENGAGEMENT sub-fund with the assets of another sub-fund following the benchmark indicator, applying the same subscription and redemption flows.

- If, during the year, the performance of the "A", "N", "I", "L" or "F" shares of the Sub-Fund since the beginning of the year is positive and exceeds the benchmark index calculated over the same period, and meets the High Water Mark condition, this outperformance shall be subject to a provision for variable management fees when calculating the net asset value.
- If, during the year, the performance of the "A", "N", "I", "L" or "F" shares of the Sub-Fund is lower than the performance of the Index

over the same period, any provision previously made will be readjusted by a reversal of provision. Reversals of provisions are capped at the amount of previous allocations since the last payment of a performance fee.

This variable component will only be definitively received at the end of the financial year if the performance of the "A", "N", "I", "L" or "F" shares of the Sub-fund is positive and greater than the benchmark index and the High Water Mark principle.

In the event of a share redemption, if there is a provision for variable management fees, the portion proportional to the shares redeemed is paid immediately to the management company.

The first performance fee calculation period ends at the close of December 2021, except for the L unit which ends at the close of December 2022.

These costs (fixed and possibly variable) are charged directly to the income statement of the Sub-Fund

The past performances of the Sub-Fund are available on the website of Amiral Gestion.

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and evaluates them periodically to ensure the quality of the services provided. Research fees are included in the transaction fees and are deducted from the Fund for each transaction.

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

1. ISIN code

Share A	FR00140023U1
Share N	FR00140023W7
Share I	FR00140023X5
Share F	FR00140023Y3
Share Z	FR00140023Z0

2. Classification

International equities

At least 60% of the Sub-Fund is permanently exposed to international equities markets.

3. Delegation of financial management

Non applicable

4. Management objective and investment strategy**4.1 Management objective**

The SEXTANT ASIA EX-JAPAN Sub-Fund is a dynamic UCI whose objective is to outperform its benchmark (MSCI AC Asia Ex-Japan Index) net dividends reinvested, over the recommended investment period of five years, through a selection of international equities of all capitalisation sizes and in particular equities from countries in Asia including Japan up to 15% of its assets.

4.2 Benchmark index

MSCI AC Asia Ex-Japan Index, net dividends reinvested.

The MSCI AC Asia Ex-Japan Index, net dividends reinvested (NR), (Bloomberg ticker : MXASJ Index), is a composite of large and mid-cap stocks in developed market countries (except Japan) and emerging market countries in Asia. On September 2024, it includes 1,129 stocks and covers approximately 85% of the free float adjusted market capitalisation in each country. This indicator is published in dollars, net dividends reinvested, then converted into euros. The benchmark is administered by MSCI Limited, a registered administrator pursuant to Article 34 of Regulation (EU) 2016/1011 and listed in the register of benchmark administrators maintained by ESMA. Further information on the benchmark index is available on the Euronext website at the following address : <https://live.euronext.com/en/products-indices/index-rules>.

Investors should note that, as the management style (see below) is discretionary, the composition of the portfolio will never seek to replicate the composition of the benchmark index, either geographically or by sector.

4.3 Investment strategy**❖ INVESTMENT STRATEGY TO MEET THE MANAGEMENT OBJECTIVE**

In order to achieve its investment objective, the SEXTANT ASIA Ex-Japan sub-fund is mainly exposed to international equities and, in particular, to a minimum of 60% of the net assets of the Fund in equities of companies having their registered office in one of the countries in the Asian zone, including Japan, with a limit of 15% of the net assets.

The manager of the SEXTANT ASIA Ex-Japan sub-fund applies a management philosophy aimed at achieving the best possible long-term performance while minimising risk, using a fundamental approach centred on value analysis. The fund managers select companies that they believe to be significantly undervalued in relation to their intrinsic value and whose management strategy and business model quality support them. It is a genuine “stock-picking” strategy, applied in accordance with the principles of “value investing” inherited from great American investors such as Benjamin Graham, Philip Fisher and Warren Buffett.

Thus, the investment process for this sub-fund is structured around different stages, namely (i) fundamental analysis of companies and their business models, (ii) valuation work, and concluding with (iii) an investment decision.

(i). Fundamental analysis

The SEXTANT ASIA Ex-Japan sub-fund is based on a rigorous selection of securities obtained after an internal fundamental analysis summarised in the overall Amiral Gestion “quality rating”. During this phase, whenever possible, the managers contact the company and its managers to perfect their understanding of its activities and business model, to address strategic issues, and finally to deal with issues related to the financial statements (income statement, cash flow statement, balance sheet). Where necessary, the Management Company supplements this strategic and financial understanding with on-site visits (e.g. to industrial sites) to form its own opinion and to verify certain information provided by the company.

This fundamental analysis is based on the study of various criteria:

- business model: recurrence, predictability, cyclicity, barriers to entry;
- quality of management: operational and financial track record, respect for minority shareholders, employee motivation, training and profit-sharing, quality of relations with third parties;
- quality of the financial structure: balance sheet, realisable assets, level of debt;
- ESG criteria (see the section on extra-financial approaches applicable to the sub-fund)

The study of these different criteria determines what Amiral Gestion calls its "Quality score", which varies from 0 to 10. A high rating reflects strong company fundamentals. This rating is one of the elements that guide the investment decision (see point iii).

(ii). Valuation

Each company monitored is subject to a valuation model that incorporates historical accounts, forecasts, valuation ratios and a discounted cash flow model (hereafter "DCF"). Amiral Gestion considers that the valuation of a company is linked to the measurement of its capacity to generate free cash flows, which is why the management team uses a DCF model to assess the intrinsic value of a company. This model includes a history of accounts generally over 5 to 10 years with:

- a detailed analysis of sales and their breakdown by geographical area and business activity;
- an analysis of the income statement, balance sheet and cash flow statement, drawing on all the information available, particularly in the annual reports, in order to make all the restatements necessary for an economic reading of the accounts that is consistent between our different files;
- detailed forecasts based on various assumptions supported by our surveys.

(iii). Investment decision

All of this analysis work makes it possible to define a target intrinsic valuation (see valuation model above, DCF), as well as an Internal Quality Score (see above). These factors make it possible to deduce the risks and attractiveness of each company.

Potential, which is based on the target intrinsic value, combined with the Internal Quality Score, enables us to rank each company in terms of investment interest within the sub-fund.

Investment decisions also depend on the existence of a "margin of safety" made up of the difference between the market value of the company as assessed by the managers and its market value (market capitalisation).

It should be noted that environmental, social and governance (ESG) criteria are one of the components of management, but their weighting in the final decision is not defined upstream.

This investment process is documented and is the subject of an investment case incorporating the various elements of analysis mentioned.

The positions are set up with a view to holding them over the medium to long term (more than two years).

The Sextant ASIA Ex-Japan sub-fund may be managed in sub-portfolios. This management method is specific to Amiral Gestion. It is based on the free decision-making of each manager-analyst and relies on collective expertise. The Sub-fund's assets are divided into several sub-portfolios, each of which is managed independently by one of the team's manager-analysts. All the investment cases issued are studied, debated and analysed as a group. All the investment cases put forward are studied, debated and criticised by the group.

At the end of this process, everyone is free to decide whether or not to invest in their sub-portfolio according to their own convictions, or to follow the views championed by another manager. A coordinating manager ensures that investments are consistent with the sub-fund's strategy.

The portion of assets not invested in equities, due to a lack of opportunities with a sufficient margin of safety, is invested in fixed income products, money market or bonds.

Extra-financial approaches applicable to the sub-fund

The sub-fund's extra-financial approach is not backed by a specific sustainable benchmark, but it promotes environmental and social characteristics while ensuring good corporate governance practices via a combination of extra-financial approaches, including:

- Tracking the portfolio's average external ESG score relative to the average external ESG score of its benchmark index (Main source: MSCI ESG Rating). The benchmark used to compare ESG performance is an index that is consistent with the Sub-Fund's investment strategy and is made up of around 1170 companies: the MSCI Daily Small cap Growth TR Pacific USD.
- The inclusion of environmental, social and governance (ESG) criteria in the fundamental analysis, via the internal Quality Score, which is made up of around one third ESG criteria.
- Compliance with the sub-fund's sectoral exclusion policy: thermal coal, tobacco, controversial weapons, pornography, non-conventional fossil fuels with the exception of North American oil and shale gas, in accordance with the criteria and thresholds of the Amiral Gestion sectoral policy applicable to the Sub-Fund. This policy is available on the Amiral Gestion website: <https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>
- The compliance with the normative exclusion policy: exclusion/non-investment in issuers that violate the principles of the United Nations Global Compact and/or the OECD Guidelines for Multinational Enterprises, after internal verification and confirmation of non-compliance by the Controversies Monitoring Committee. Monitoring of companies with Sustainalytics Watchlist status, and whose status is confirmed by the Controversies Monitoring Committee following an internal review.
- Exclusion/non-investment in issuers exposed to severe controversies, i.e. level 5 according to the Sustainalytics severity scale and research confirmed following an internal review by the Controversies Monitoring Committee. Particular attention is also paid to controversies relating to climate change, biodiversity, fundamental human rights and fiscal responsibility

In addition,

- the Sub-Fund undertakes to systematically participate in the voting of companies it has invested in, applying the principles of the Management Company's proprietary voting policy
- when the portfolio invests in UCITS (excluding cash management), the company will, where possible, give preference to UCITS

with the same SFDR classification as that of the Sub-Fund.

These extra-financial approaches are described in more detail in the Sub-Fund's pre-contractual SFDR Appendix 2.

Part verte - Taxonomie européenne

The principle of "cause no significant harm" applies only to investments underlying the financial product that take into account the European Union's criteria for environmentally sustainable economic activities.

The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

Sustainable investment

Although it does not have an investment strategy centred on a sustainable investment objective within the meaning of the Disclosure SFDR regulations, the Sub-Fund undertakes to present a minimum proportion of 0% sustainable investments.

Please see the pre-contractual Appendix 2 of the SFDR RTS for information about the criteria used by Amiral Gestion to determine the share of sustainable assets held in the portfolio.

DNSH³ SFDR and consideration of Key Negative Impacts

The sub-fund follows various steps in its investment process to demonstrate consideration of the portfolio's Principal Adverse Impacts (PAIs) (14 mandatory and 2 selected PAIs).

In addition, we also monitor the rating level of the companies in the portfolio, as well as exposure to controversies under the Governance pillar.

This combination of extra-financial approaches, described in detail in the pre-contractual appendix 2 of the SFDR RTS (available as an appendix to this prospectus or on the Amiral Gestion website: <https://www.amiralgestion.com/fr/nos-fonds-sextant>), classifies the sub-fund in the "Article 8" category according to the classification of the "SFDR Disclosure" regulations.

¹ *Mainly MSCI ESG and failing that the ESG Performance Score of the Admiral benchmark from Ethifinance's Gaïa database to complete the coverage if necessary*

Exclusion of activities directly linked to thermal coal

² *Except in the case of a technical constraint preventing a vote in exceptional circumstances*

³ *DNSH = Do No Significant Harm*

♣ ELIGIBLE ASSETS

Shares

Equities

The minimum level of exposure to equities is 60% of the sub-fund's net assets. The sub-fund's investments depend exclusively on the investment opportunities presented to the managers on a case-by-case basis, and not on macroeconomic considerations.

The sub-fund may invest in equities listed on all regulated markets throughout the world, including a minimum of 60% of the sub-fund's net assets in equities of companies having their registered office in one of the countries in the Asian zone, including Japan, within the limit of 15% of the net assets, irrespective of their market capitalisation or sector. The sub-fund may also invest up to 10% of its net assets in companies that are not admitted to trading on unorganised or unregulated markets.

SEXTANT ASIA EX-JAPAN tends to invest in international equity markets outside the eurozone. In particular, the sub-fund may invest up to 110% of its net assets in companies in Asia and/or originating from Asia, which are listed or whose activities are mainly focused on so-called "emerging" regions, i.e. countries whose GDP per capita is lower than that of the major industrialised countries but whose economic growth is higher.

The sub-fund may also invest in equity equivalent securities (non-voting preference shares, investment certificates, founders' shares).

Debt securities and money market instruments

Depending on market opportunities, the sub-fund may invest up to 40% of its net assets in bonds and money market instruments.

Investments in money market instruments are denominated in euros and have a maximum maturity of twelve months. They shall have a minimum rating (Standard & Poor's A3 / Moody's P-3 / Fitch Ratings F3) or, where they are not rated, shall be deemed equivalent according to the analysis of the Management Company.

However, the Management Company prefers to invest cash in "money market" or "short-term money market" UCITS/FIAs or AMF-classified UCITS/AIFs.

The sub-fund may invest in all types of bonds, regardless of currency or credit rating. The sub-fund may also invest in fixed income securities, regardless of currency or credit rating.

Investments in "high yield" bonds (speculative securities) will remain below 20% of net assets.

The sub-fund may also invest in securities treated as bonds (convertible bonds, bonds with warrants, equity securities).

As regards fixed-income securities, the management company carries out its own credit and market risk analysis when selecting securities on acquisition and during their lifetime. It therefore does not rely exclusively on ratings provided by rating agencies.

Investments in securities of other UCITS, AIFs and/or investment funds

The Sub-fund may invest up to 10% of its net assets in securities of other French or European UCITS or AIFs or foreign investment funds (holding no more than 10% of the units of foreign UCIs or investment funds) that meet the criteria set out in article R.214-13 of the French Monetary and Financial Code, mainly in the investment of cash via money market UCITS/AIFs and short-term money market UCITS/AIFs, as well as in UCITS/AIFs that are classified as French equities or bonds that are compatible with the sub-fund's management.

These UCIs and investment funds may be managed by the Management Company.

The sub-fund will never invest in FCPR (venture capital funds) or similar funds, or in securitisation vehicles.

Derivatives and securities with embedded derivatives

Transactions involving derivatives (purchases of call or put options on equities, indices, interest rates or currencies, and purchases or sales of futures, forward exchange contracts or swaps on equities, indices, interest rates or currencies) and securities that are part of derivatives shall be carried out on a discretionary basis in order to expose or partially hedge the Sub-fund against favourable or unfavourable trends in equities, indices, interest rates and currencies. These instruments will be traded on regulated and/or organised or over-the-counter markets

There will be no overexposure. Futures (forward contracts on financial instruments) relating to commodity indices will be carried out in compliance with the 5/10/20/40 ratio.

Call options on securities will be written while holding the underlying security as part of strategies to optimise the return of the securities in the portfolio:

Put options on securities will be written as part of strategies to potentially acquire such securities at a price below the market price at the time the strategy is implemented.

The sub-fund may hold products incorporating derivatives (preferential rights/warrants, warrants, convertible bonds, EMTNs and, more generally, all puttable/callable products) as part of its equity portfolio management:

- when these securities are detached from the shares held in the portfolio;
- when it is more advantageous to acquire shares by purchasing and then exercising these securities (e.g. participation in a capital increase by first purchasing Preferential Subscription Rights on the market).

Deposits and cash

The Sub-fund may use deposits to optimise the management of the Sub-fund's cash and to manage the different subscription/redemption value dates of the underlying UCIs. It may place up to 20% of its net assets in deposits a single credit institution.

The sub-fund may hold cash on an ancillary basis, in particular to cover share redemptions by investors. The cash holding threshold may be raised to 20% of net assets when justified by exceptional market conditions.

Cash lending is prohibited.

Cash Borrowings

The Sub-fund may borrow cash. Although the Sub-fund is not intended to be a structural cash borrower, it may be in a debit position as a result of transactions linked to its payments (ongoing investments and divestments, subscriptions/redemptions, etc.), up to a limit of 10% of the Sub-fund's net assets

Temporary acquisition and sale of securities:

None

5. Contracts constituting financial guarantees

The SICAV grants financial guarantees in connection with the use of derivatives.

Information on financial guarantees:

In the context of carrying out OTC derivative transactions and temporary acquisitions/sales of securities, the UCI may receive financial assets as guarantees,

The fund does not have a correlation policy as it will only receive cash as collateral.

Any financial guarantee received must comply with the following requirements:

The financial guarantees received in cash will be:

- placed on deposit with eligible entities,
- invested in high quality government bonds;
- invested in money market funds.

The risks associated with reinvesting cash depend on the type of assets or the type of transaction and may consist of liquidity risks or counterparty risks.

6. Special cases of feeder funds

7. Special cases of UCIs with sub-funds

Non applicable

8. Risk profile

These instruments will be subject to market changes and hazards. The risks identified by the Management Company and presented below are not limitative. It is the responsibility of each investor to analyse the risk of any investment they make with the help of a financial investment adviser, if necessary, and to check that the investment envisaged is in line with their financial situation and their capacity to take financial risks.

The main risks to which investors are exposed by subscribing to the units or shares of the UCI are as follows:

Capital risk	The Fund does not benefit from any guarantee or protection, and it is therefore possible that the capital initially invested may not be fully returned.
Discretionary management risk	The discretionary management style is based on anticipating trends in the financial markets. The Fund's performance will depend on the issuers selected and the asset allocation defined by the manager. There is a risk that the Management Company will not select the best-performing securities and that the net asset value of the Fund will therefore fall.
Equity market risk	Fluctuations in equity markets may lead to significant changes in net assets, which may have a negative impact on the performance of the Fund. The net asset value of the fund may fall significantly.
Foreign exchange risk	The Fund may invest in instruments denominated in foreign currencies outside the euro zone. Fluctuations in these currencies against the euro may have a negative impact on the net asset value of the Fund. A fall in the exchange rate of these currencies against the euro corresponds to the exchange rate risk.
Emerging markets risk	The Fund may invest in equities listed on emerging markets. Investors' attention is drawn to the fact that the operating and supervisory conditions of these markets may deviate from the standards prevailing in the major international markets.
Liquidity risk	Liquidity risk measures the difficulty that the fund may have in selling certain assets within a short timeframe in order to meet the need to raise cash or deal with a fall in their market value. Please note that over-the-counter markets do not offer immediate liquidity or enable assets to be sold at the price expected by the Fund.
Risk related to the size of the capitalisation of the selected securities	The Fund may invest in small- and mid-cap markets, as the volume of securities listed on the stock exchange is reduced, and market movements are therefore more pronounced on the downside and faster than in large-cap markets. The fund's net asset value may therefore fall more quickly and more sharply.
Counterparty risk	This is the risk associated with the Fund's use of over-the-counter financial futures instruments. These transactions, entered into with one or more eligible counterparties, potentially expose the Fund to a risk of default by one of its counterparties, which could lead to an event of default that would no longer allow the Fund to honour its commitments under these transactions.
Credit risk	The Fund may invest in fixed income products. Credit risk is the potential risk of issuer default or credit downgrade, which may lead to a fall in net asset value.
Interest rate risk	The interest rate risk corresponds to the risk linked to a rise in bond market rates, which causes a fall in bond prices and consequently a fall in the net asset value of the Fund.
Risk associated with the use of derivatives	The use of derivatives can lead to significant variations in the net asset value over short periods, both upwards and downwards.
Sustainability risk [Article 8 and 9]	<p>This is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. The occurrence of such an event or situation may also have an impact on investment decisions, including the exclusion of the securities of certain issuers, in accordance with the Fund's investment strategy, which excludes companies that violate the United Nations Global Compact Principles and/or the OECD Guidelines for Multinational Enterprises, those involved in sectors prohibited by the investment strategy or those exposed to significant controversies as described above.) The quest to anticipate this type of sustainability risk can also take the form of integrating ESG criteria into the fundamental analysis of Admiral Gestion equity portfolios, in order to identify the most significant sustainability risks. The negative effects of sustainability risks can affect issuers through a range of mechanisms, including:</p> <ol style="list-style-type: none"> 1) lower revenues; 2) higher costs; 3) damage or depreciation in asset value; 4) higher cost of capital; 5) reputational risks and 6) fines or regulatory risks. <p>Given the growing awareness of the challenges of sustainable development and the increasingly strict regulatory and standard-setting framework for these issues, particularly on specific subjects such as climate change, the likelihood of sustainability risks having an impact on the returns on financial products is likely to increase in the longer term.</p>

9. Warranty or protection

The Fund offers no guarantee or protection.

10. Lgal consequences of subscribing to equities

None

11. Eligible subscribers and typical investor profile

11.1 Eligible subscribers

Because of the high risk associated with an investment in equities, this sub-fund is intended primarily for investors who are prepared to withstand the sharp fluctuations inherent in equity markets and who have a minimum investment horizon of five years.

"A" shares are aimed at all subscribers, in particular retail investors and investors who subscribe through a distributor (asset management advisor, etc.).

"I" shares are open to all subscribers, and are more specifically intended for institutional investors who have received prior approval from the Management Company and whose minimum initial subscription is €1,000,000 (except for the Management Company, which may subscribe for 1 share).

"N" shares are reserved for the category of subscribers listed below whose minimum initial subscription is €5,000:

- marketing networks that have received prior approval from the Management Company
- Or distributors and intermediaries that have received prior approval from the Management Company and provide:
 - independent advice within the meaning of MiFID 2
 - individual management under mandate regulations.

The "F" founder shares are intended for all subscribers who have subscribed during the initial subscription period (the first six months following the creation of the sub-fund), whose initial subscription is 100,000 euros and who have received prior approval from the Management Company.

"Z" shares are reserved exclusively for:

- the Management Company
- the Management Company's staff (permanent employees and managers) and their unmarried spouses, parents and children.
- FCPEs for the staff of the Management Company
- life insurance or capitalisation companies for the equivalent value of the amount that would be invested in a unit of account representing the sub-fund's Z shares within a life insurance or capitalisation contract taken out by a member of the Management Company's staff, as well as their unmarried spouses, parents and children.

SEXTANT ASIA EX-JAPAN may be used as a vehicle for unit-linked variable capital life insurance policies.

11.2 Minimum recommended investment period

5 years

11.3 Specific rules relating to the Common Reporting Standard (CRS)

The UCI is subject to European rules and treaties concluded by France relating to administrative cooperation in tax matters, allowing automatic exchange of information for tax purposes. These rules require the Fund to collect certain information concerning the tax residence of its Investors. In addition, if the Investor's tax residence is outside France in a European Union country or in a country with which an automatic information exchange agreement is applicable, the Fund may be required, in application of the legislation in force, to transmit certain information relating to Investors to the French tax authorities for transmission to the foreign tax authorities concerned. This information, which will be transmitted on an annual basis in computerised form, concerns in particular the Investor's country of tax residence, tax identification number, any income from transferable securities and the balances of declarable financial accounts.

11.4 FATCA

The units of this UCITS have not been and will not be registered in the United States under the U.S. Securities Act of 1933, as amended (the "Securities Act of 1933"), or admitted to trading under any US law. These units may not be offered, sold or transferred in the United States (including its territories and possessions) nor may they benefit, directly or indirectly, a US Person (within the meaning of Regulation S of the Securities Act of 1933) and assimilated persons (as referred to in the US "HIRE" law of 18 March 2010 and in the FATCA system).

11.5 Specific provisions

Pursuant to EU regulation No.833/2014, subscriptions to the shares of each sub-fund are prohibited for all Russian or Belarus nationals, for all persons resident in Russia or Belarus and to any company, entity or organisation established in Russia or in Belarus, except nationals of a member state and physical persons holding a temporary or permanent residency permit in a member state.

11.6 Profile of the typical investor

These internal ESG ratings are built into the valuation models via the beta used to set the weighted average cost of capital (WACC). The reasonable amount to invest depends on the investor's personal situation. To determine this, you need to take into account your personal assets, your current and future 5 years cash requirements and your risk aversion. It is also advisable to diversify investments sufficiently to avoid excessive exposure to this Fund risk.

In any case, it is strongly recommended to diversify investments sufficiently so as not to expose them solely to the risks of the Funds.

12. Methods for determining and allocating distributable amounts

Allocation of distributable income : Accumulation

13. Distribution frequency

Non applicable

14. Characteristics of equities

The equities are denominated in euros and decimalised in ten-thousandths of shares).

15. Subscription / redemption terms and conditions applicable to equities

ISIN code	Initial NAV	Minimum initial subscription amount
FR00140023U1 Share A	100 €	1 share(s)
FR00140023W7 Share N	100 €	5,000 €
FR00140023X5 Share I	100 €	1,000,000 €
FR00140023Y3 Share F	100 €	100,000 €
FR00140023Z0 Share Z	100 €	1 share(s)

Subscriptions are accepted either in number of shares (expressed in thousandths of shares), or in amount (unknown number of shares).

Redemptions may be made in numbers of shares (expressed in thousandths of shares).

How to submit subscription requests

Subscription and redemption requests are centralised the day before the valuation day before 16:00 with the custodian: CACEIS BANK. , whose registered office is located at 89-91 rue Gabriel Péri – 92120 Montrouge RCS Nanterre.

Postal addresses of offices: CACEIS BANK.

They are executed on the basis of the next net asset value calculated on the basis of the closing price on the day on which the requests are centralised. Subscription and redemption requests received after 16:00 are processed on the basis of the net asset value calculated according to the method described above. The relevant payments will be made 2 business days after the valuation.

In the event of a public holiday or stock market closure, it will be calculated on the previous business day.

Shareholders' attention is drawn to the fact that orders transmitted to marketers other than the institutions mentioned above must take into account the fact that the order centralisation cut-off time applies to said marketers vis-à-vis CACEIS BANK

However, in the case of subscription applications in pure registered form (for an unknown amount and number of units), the corresponding Funds must reach the custodian before the order is taken into account.

As a result, these marketers may apply their own cut-off time, earlier than that mentioned above, in order to take account of their deadline for transmitting orders to CACEIS BANK.

Subscriptions for "F" shares will be open for 6 months from the date of creation of the sub-fund, but may be extended at the discretion of the Management Company.

Orders are centralised in accordance with the table below:

D-1 business day	Day on which the NAV is established (D)	D+1 to D+3	D+2 business days	D+2 business days
Daily reception of orders and centralisation Daily before 16:00 (Paris time) of subscription and redemption orders.	Orders are executed no later than day D	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions D-1 before 4pm

The Management Company monitors liquidity risk by Sub-Fund in order to ensure an appropriate level of liquidity for each Sub-Fund, particularly with regard to the risk profile, investment strategies and redemption policies in force for the funds. An analysis of the liquidity risk of the Sub-Fund## is carried out to ensure that the investments and funds have sufficient liquidity to honour the redemption of unitholders under normal and extreme market conditions. The Management Company has set up a liquidity management system and tools to ensure that investors are treated fairly.

The sub-fund has introduced a redemption cap mechanism (known as a "gate") as described below:

Redemption Capping Mechanism ("gate"):

The Management Company has implemented a liquidity management mechanism known as a "gate" or "redemption capping" to protect its investors. This mechanism allows, if necessary, the capping of redemptions when the redemption threshold objectively established by the Management Company is reached. The redemption threshold set by the Management Company for this Sub-Fund is 10% of the net assets. To determine the level of this threshold, the Management Company takes into account the frequency of calculating the net asset value of the UCITS, the investment orientation of the Sub-Fund, and the liquidity of its assets.

The trigger threshold for the gates corresponds to the ratio between:

- - the observed difference, on the same consolidation date, between the number of shares in the Sub-Fund for which redemption is requested or the total amount of these redemptions, and the number of shares in the Sub-Fund for which subscription is requested or the total amount of these subscriptions; and
- the net assets of the fund or the total number of units in the sub-fund.

In the event of triggering the gate, the Management Company reserves the right to spread redemptions over several net asset values. The capping of redemptions can be triggered, at the discretion of the Management Company, only in the case of exceptional market circumstances and if the interests of investors so require.

When redemption requests exceed the triggering threshold, and if liquidity conditions permit, the Management Company may decide to honour redemption requests beyond this threshold, thus partially or fully executing orders that may be blocked. Unexecuted redemption requests at a net asset value will be automatically carried over to the next consolidation date and executed on the next net asset value date. They cannot be revoked by the unit holders or shareholders.

For example, if the total redemption requests for shares represent 10% of the net assets of the Sub-Fund while the triggering threshold is set at 15% of the net assets, the Sub-Fund may decide to honour redemption requests up to 12% of the net assets (thus executing 80% of redemption requests) and thereby carry over the balance of unexecuted redemptions to the next consolidation.

The maximum duration of the redemption capping mechanism is set at 20 net asset values over 3 months for a UCITS with a daily valuation frequency .

Notification Procedures for Unit holders:

In the event of activating the "gate" mechanism, Sub-Fund investors will be informed by any means through the website <https://www.amiralgestion.com/fr>.

Sub-Fund investors whose redemption orders have not been executed will be informed promptly and in a special manner.

Treatment of Unexecuted Orders:

During the period of application of the "gate" mechanism, redemption orders will be executed in the same proportions for UCITS unit holders who have requested redemption at the same net asset value. The redemption orders thus carried over will not have priority over subsequent redemption requests. Unexecuted and automatically carried-over redemption orders cannot be revoked by UCITS unit holders.

Exemption from the "gates" mechanism:

Subscription and redemption transactions, for the same number of shares, based on the same net asset value and for the same investor or economic beneficiary (known as round-trip transactions), are not subject to a "gate."

This exclusion also applies to the transition from one class of shares to another class of shares, at the same net asset value, for the same amount and for the same investor or economic beneficiary.

16. Fees and commissions

16.1 Subscription and redemption fees

Subscription and redemption fees will increase the subscription price paid by the investor or reduce the redemption price. Fees paid To the Sub-Fund are used to offset the costs incurred by The Sub-Fund when investing or divesting the assets entrusted to it. Fees not

paid to the Sub-Fund are paid to the Management Company or any other person (marketer, etc.) that has signed an agreement with Amiral Gestion.

Fees payable by the investor and charged at the time of subscription and redemption	Net assets	Share	Maximum fee
Subscription fee not earned To the Sub-Fund	Net asset value x number	A	2.00%
		N	5.00%
		I	5.00%
		F	5.00%
		Z	None
Subscription fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		I	None
		F	None
		Z	None
Redemption fee not earned To the Sub-Fund	Net asset value x number	A	1.0%
		N	1.0%
		I	1.0%
		F	1.0%
		Z	None
Redemption fee earned To the Sub-Fund	Net asset value x number	A	None
		N	None
		I	None
		F	None
		Z	None

Subscription and redemption fees are not subject to VAT.

Exemptions:

It is possible to proceed, free of commissions, with simultaneous redemptions/subscriptions on the basis of the same net asset value for a zero balance transaction volume.

16.2 Operating and management costs (excluding transaction costs)

These costs include all costs billed directly to To the Sub-Fund , with the exception of transaction costs (see below). Transaction fees include intermediation costs (brokerage, stock exchange tax, etc.) and the turnover fee charged by the custodian and the Management Company.

The following may be added to the operating and management fees:

- performance fees. These remunerate the Management Company when The Sub-Fund has exceeded its targets for turnover fees charged To the Sub-Fund
- a share of income from temporary acquisitions and sales of securities,

For more details on the fees actually charged To the Sub-Fund, please refer to the Key Investor Information Document. Management fees are provisioned when each net asset value is established.

Fees charged	Net assets	Share	Base Rate Scale (incl. tax maximum)

Financial management fees	Net asset	A	2% (incl. tax) maximum
		N	1.2% (incl. tax) maximum
		I	1% (incl. tax) maximum
		F	0.5% (incl. tax) maximum
		Z	None
Operating Expenses and other services (flat-rate assessment of costs detailed below)	Net asset	Applied to the Fund	0.1% incl. tax maximum (Any excess is borne by the Management Company) ¹
indirect expenses (management expenses and fees)	Net asset	Applied to the Fund	Accessories
Transaction fees (excluding brokerage fees) : collected by the custodian	Levy on each transaction	Applied to the Fund	Varies according to the place of the transaction: From €6 (incl. VAT) for financial instruments and money market products issued on the ESES Market to €90 (incl. VAT) for instruments issued on non-mature foreign markets.
Performance fee	Net asset	A N I F	15% (inclusive of tax) of the annual performance of the sub-fund's "A", "N", "I" or "F" shares in excess of the performance of the benchmark index (net dividend reinvested), subject to the "high water mark" described below.
		Z	None

¹ The fixed maximum rate may be charged even if the actual fees are lower than it, and conversely, if the actual fees exceed the displayed rate, the excess beyond this rate will be borne by the Management Company

Detail of operating expenses and other services:

Operating expenses and other services include:

- (i) Costs of registration, listing, agents in foreign countries (local representative, local paying agent, centralising correspondent/facilities service), distribution platform costs;
- (ii) Regulatory information costs for clients and distributors (i.e. website administration costs, information for unitholders (except in the case of mergers and liquidations), costs of compiling, distributing and translating KIID/KID/prospectus documents and regulatory reporting);
- (iii) Data costs, which include in particular benchmark index licensing costs, costs of auditing and promoting labels, costs of data used for redistribution to third parties (e.g. reuse of issuer ratings, index compositions, data, etc.);
 - Costs resulting from specific client requests (e.g. requests to include specific extra-financial indicators in reporting);
 - Data costs for unique products that cannot be amortised over several portfolios.

Example: a fund requiring specific indicators;

Excluded are research fees and financial and non-financial data for financial management purposes (e.g., data visualisation and messaging functions of Bloomberg).

(iv) Custodian fees, delegated administrative and accounting management fees, auditor, legal fees, audit fees, directors' fees, tax fees (including expert tax recovery fees), guarantee fees, etc.

(v) Fees related to compliance with regulatory obligations (i.e., mandatory contributions to professional associations, operating expenses for voting policies at General Meetings) and reporting to regulators (i.e., AIFM reporting, operating expenses for monitoring breaches of thresholds, exceeding ratios etc.).

vi) Operational expenses (i.e., operational costs related to regulatory reporting, compliance monitoring, and control of financial and non-financial constraints arising from specific client requests and specific to the UCITS).

(vii) Expenses related to customer knowledge (Customer compliance operating expenses: due diligence and the creation/updating of client files).

Other fees charged to the UCITS:

- contributions due to the AMF for the management of the UCITS pursuant to d) of 3) of II of article L. 621-5-3 of the French Monetary and Financial Code,
- exceptional and non-recurring taxes, fees and government duties (in relation to the UCITS);
- exceptional and non-recurring costs for debt recovery or proceedings to enforce a right (e.g. class action proceedings). The information relating to these costs is also described ex post in the annual report of the UCITS.

The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

Calculation of the performance fee ("A", "N", "I", "F"):

The performance fee is based on the comparison between the performance of the sub-fund's "A", "N", "I" or "F" shares and the MSCI AC Asia Ex-Japan Index, net dividends reinvested, over the financial year.

Variable management fees are deducted for the benefit of the Management Company as follows:

The performance fee is a maximum of 15% (inclusive of tax) for A, N, I and F shares of the sub-fund's annual performance in excess of the performance of the Benchmark Index, provided that the annual performance of the sub-fund's A, N, I or F shares complies with the high water mark principle described below, this variable component will only be paid definitively at the end of the financial year if the performance of the sub-fund's "A", "N", "I" or "F" shares over the financial year is positive and exceeds the Benchmark Index and the High Water Mark principle (annual crystallisation of the fee).

Any underperformance of the "A", "N", "I" or "F" shares of the Sub-fund in relation to its benchmark index must be made up for before the performance fee is calculated again. To this end, the catch-up period is set at five years. If, during the catch-up period, a new underperformance is observed, this will trigger a new catch-up period of 5 years from the date of the observation in respect of this underperformance. Finally, if the underperformance has not been caught up after five years, it is no longer taken into account for the sixth year.

Illustration:

Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment	Reference period	Performance gap vs index	Underperformance to be offset the following year	Commission payment
Year 1	5	0	Yes	Year 7	6.5	0	Yes
Year 2	0	0	No	Year 8	-10	-10	No
Year 3	-5	-5	No	Year 9	2	-8	No
Year 4	3	-2	No	Year 10	2	-6	No
Year 5	2	0	No	Year 11	2	-4	No
Year 6	6	0	Yes	Year 12	0	0*	No

*The underperformance to be offset in year 12 is reset to 0 and not to -4 due to the application of the 5-year catch-up period starting in year 8.

The past performances of the Sub-fund are available on the website of Amiral Gestion.

High Water Mark Principle:

No performance fee is charged as long as the performance of the sub-fund does not exceed the performance of the benchmark index since the last performance fee was charged or reset to zero, as specified below. When this level is reached, the performance fee shall be deducted if the performance of the "A", "N", "I" or "F" shares of the Sub-Fund is positive over the current financial year. This level becomes the new High Water Mark. If this level is not reached during an observation/reference period of five years, the level is reset to zero after five years without the performance fee being charged.

The performance of the sub-fund is calculated according to the following principle:

- if, over the financial year, the performance of the sub-fund's "A", "N", "I" or "F" shares is positive and greater than the performance of the MSCI AC Asia Ex-Japan Index and complies with the High Water Mark principle, a performance fee will be paid to the Management Company representing a maximum of 15% inclusive of tax for the A, N, I and F shares, of the difference between the sub-fund's performance and the benchmark index.
- if, over the year, the performance of the sub-fund's "A", "N", "I" or "F" shares is positive but below that of the benchmark index, the variable portion will be nil.
- if, over the financial year, the performance of the sub-fund's "A", "N", "I" or "F" shares is positive and greater than that of the benchmark index, but does not meet the High Water Mark condition, the variable portion will be nil.
- if, over the financial year, the performance of the sub-fund's "A", "N", "I" or "F" shares is negative or below that of the benchmark index, the variable portion will be nil..

The performance fee is calculated on the basis of the amount of the net assets of the "A", "N", "I" or "F" shares on which the performance was achieved, as well as the subscriptions and redemptions made in the sub-fund. This method is equivalent to comparing the assets of the "A", "N", "I" or "F" shares of the SEXTANT ASIA EX-JAPAN Sub-Fund with the assets of another fund that follows the benchmark index by applying the same subscription and redemption flows..

- If, during the year, the performance of the "A", "N", "I" or "F" shares of the Sub-Fund is lower than the performance of the Index over the same period, any provision previously made will be readjusted by a reversal of provision. Reversals of provisions are capped at the amount of previous allocations since the last payment of a performance fee.

In the event of share redemption, if there is a provision for variable management fees, the portion proportional to the shares redeemed is paid immediately to the Management Company .

The first performance fee calculation period ends at the close of December 2022.

These costs (fixed and possibly variable) are charged directly to the income statement of the Sub-Fund

16.3 Transaction fees

Brokers are chosen based on their particular expertise in the field of equities and bonds and their ability to handle blocks of small and medium-sized stocks, but also on the basis of the quality of order execution and research, the assurance of being offered best execution, the regularity and quality of the commercial relationship and market information.

For more information on the intermediary selection policy, you can consult the full policy on the AMIRAL GESTION website. www.amiralgestion.com

As regards the use of the research service, Amiral Gestion also selects its research providers carefully and evaluates them periodically to ensure the quality of the services provided. Research fees are included in the transaction fees and are deducted from the Fund for each transaction.

Transactions in SICAV are not subject to any charges other than the issuer's subscription and redemption fees. The Management Company gives preference to UCITS/AIFs for which it has been able to negotiate a total exemption from fees not accruing to the Sub-Fund.

For further information, investors may refer to the Fund's annual report.

IV - MARKETING INFORMATION

1. Disseminating information about the UCI

Requests for information and documents relating to the Fund, its net asset value and the centralisation of subscriptions and redemptions may be obtained directly from the Management Company.

The latest annual report, the latest periodic statement and the latest net asset value are sent within 8 working days on written request from the shareholder to:

AMIRAL GESTION, 103 rue de Grenelle - 75007 Paris

Additional explanations may also be obtained if necessary from:

Benjamin BIARD - Tél: +33 (0) 1 40 74 35 61 - E-mail: bb@amiralgestion.com

The AMF website www.amf-France.org contains additional information on the list of regulatory documents and all the provisions relating to investor protection.

2. Supporting Information - ESG criteria

As a financial market player, the Management Company of the UCI is subject to Regulation 2019/2088 of 27 November 2019 on the publication of sustainability information in the financial services sector (the so-called Disclosure Regulation).

This Regulation establishes harmonised rules for financial market participants relating to transparency with regard to the integration of sustainability risks (Article 6 of the Regulation), the consideration of negative sustainability impacts, the promotion of environmental or social characteristics in the investment process (Article 8 of the Regulation) or sustainable investment objectives (Article 9 of the Regulation).

The classification of each sub-fund is available in their respective sections and on our website . www.amiralgestion.com

V - INVESTMENT RULES

The UCITS complies with the investment rules relating to funds complying with European Directive 2009/65/EC set out in the regulatory part of the Monetary and Financial Code (Articles R214-9 et seq.).

The investment rules specific to the SICAV's sub-funds and the specific ratios are set out in the ""Special Provisions"" section of the prospectus.

Each sub-fund may depart from the statutory ratios within 6 months of approval.

The investment rules are considered at the level of each sub-fund in accordance with article R. 214-2 of the French Monetary and Financial Code

VI - OVERALL RISK

The overall risk on financial contracts is calculated using the commitment method.

VII - ASSET VALUATION RULES

1. ASSET VALUATION RULES

♣ Valuation method

Financial instruments and securities traded on a regulated market are valued at market price.

♣ Specific methods

- European bonds and equities are valued at the closing price, foreign securities at the last known price- for the Sextant 2027 sub-fund: The sub-fund's bonds will be valued at the mid price throughout the subscription period and at the low price when subscriptions are closed.

- Negotiable debt securities and similar securities that are not traded in significant volumes are valued using an actuarial method, with the rate used being that for issues of equivalent securities, adjusted, where appropriate, by a spread reflecting the intrinsic characteristics of the issuer and the security; however, negotiable debt securities with a residual maturity of less than or equal to three months and in the absence of any particular sensitivity may be valued using the straight-line method.

- Negotiable debt securities with a residual maturity of less than three months are valued at the purchase negotiation rate; the discount or premium is amortised on a straight-line basis over the life of the negotiable debt security.

- Negotiable debt securities with a maturity of more than three months are valued at market rates- UCITS/AIF units or shares are valued at the last known net asset value.

- "CoCos" are valued at their mid-range price, which is used when a sufficiently reliable market price exists (bid-ask spread, etc.).

Financial instruments whose price has not been recorded on the valuation day or whose price has been corrected are valued at their probable trading value under the responsibility of the Management Company's Board of Directors. These valuations and their justification are communicated to the auditor during audits."

2. ACCOUNTING METHODS

The accounting method used to record income from financial instruments is based on the coupon received.

Transaction costs are recorded as excluded costs.

Credit default swaps (CDS) are valued as follows:

- for the leg representing the premium: pro rata temporis value of this premium,
- for the leg representing the credit risk: according to the market price (mid-point of the range of "quotations" published by the counterparty).

Regarding the Sextant 2027 sub-fund: The net asset value is calculated on the basis of "mid" prices with possible application of swing pricing. Nevertheless, in order to preserve the interest of the shareholders in the sub-fund and to spread the transaction costs caused by the movements of its liabilities, Amiral Gestion reserves the right to adopt a valuation policy for the sub-fund specific to buy and hold funds. Any such change in policy will be subject to prior notification to the shareholders before implementation.

VII - REMUNERATION

Amiral Gestion implements a remuneration policy that complies with the requirements of the AIFM and UCITS V directives and the ESMA guidelines. This remuneration policy is coherent and promotes sound and efficient risk management and does not encourage risk-taking that would be incompatible with the risk profiles, regulations and constitutive documents of the UCIs it manages. This policy is also in line with the interests of the UCIs and its investors.

Amiral Gestion staff may be remunerated on a fixed and variable basis. Nevertheless, the variable portion remains marginal in the total remuneration paid to individuals identified as risk-takers or equivalent within the meaning of these regulations. Furthermore, given the growing importance of extra-financial issues, Amiral Gestion has decided to make each member of its team responsible for taking ESG dimensions into account. Each member of staff, in particular within the management team, is thus encouraged to contribute to the Responsible Investment Strategy, according to the specificities of their functions. This contribution is taken into account in employees' annual appraisals and in determining their variable remuneration.

All staff benefit from profit-sharing and incentive schemes. Every employee is also an Amiral Gestion shareholder. The increase in capital is progressive and depends on the individual contribution of each employee to the company. In this way, the interests of investors and Amiral Gestion employees are aligned: the aim is to achieve the best possible long-term performance, and to ensure the long-term future of the company.

All members of the company have a direct interest in the success of the funds as a whole and in the company's results, in order to avoid any ill-considered risk-taking.

The full remuneration policy for Amiral Gestion employees and the total amount of remuneration paid for the financial year, broken down according to regulatory criteria, are available free of charge on written request to your fund manager: AMIRAL GESTION 103 rue de Grenelle - 75007 Paris

ARTICLES OF ASSOCIATION of SICAV SICAV SEXTANT

SICAV SEXTANT
Variable Capital Investment Company - Société d'Investissement à Capital Variable "SICAV"
Société par Actions Simplifiée
Head office : 103 rue de Grenelle - 75007 Paris
848 538 757 RCS PARIS
Date of last update : 01/07/2024

SECTION I - FORM, PURPOSE, NAME, REGISTERED OFFICE, DURATION OF THE COMPANY

ARTICLE 1 - FORM

A Société d'Investissement à Capital Variable (SICAV) is hereby formed between the holders of the shares hereinafter created and those which will be created subsequently, governed in particular by the provisions of the French Commercial Code relating to sociétés anonymes (Book II - Title II - Chapter V), the French Monetary and Financial Code (Book II - Title I - Chapter IV - Section I - Subsection I), their implementing regulations, subsequent regulations and by these Articles of Association

In accordance with article L. 214-5 of the Monetary and Financial Code, the SICAV comprises several sub-funds. Each sub-fund gives rise to the issue of a category of shares representing the assets of the SICAV allocated to it.

ARTICLE 2 - PURPOSE

The purpose of this company is the constitution and management of a portfolio of financial instruments and deposits.

ARTICLE 3 - NAME

The company's name is: SICAV SEXTANT Followed by the words "Société d'Investissement à Capital Variable", whether or not accompanied by the term "SICAV".

ARTICLE 4 - REGISTERED OFFICE

The registered office is located at 103 rue de Grenelle, 75007 Paris.

ARTICLE 5 - DURATION

The company is established for a term of 99 years, as of the date of its registration with the Trade and Companies Registry, unless it is prematurely dissolved or its term is extended as provided for in these articles of incorporation.

SECTION II - CAPITAL, CHANGES IN CAPITAL, CHARACTERISTICS OF SHARES

ARTICLE 6 - SHARE CAPITAL

The initial capital of the SICAV amounts to 1,961,536,316.6100 euros divided into 5,705,836.4718 fully paid-up shares of the same class.

Sextant Global Smaller Companies sub-fund:

The initial capital of the sub-fund is 75,669,715.11 Euros divided into 282,470.239 fully paid-up shares. It was formed on 10/02/2022 by absorbing all the assets of the Sextant Autour du Monde mutual fund.

Sextant Bond Picking sub-fund:

The initial capital of the sub-fund is EUR 244,074,350.84 divided into 1,311,682,048 fully paid-up shares. It was formed on 10/02/2022 by absorbing all the assets of the Sextant Bond Picking mutual fund.

Sextant Europe sub-fund (renamed Sextant Tech on 30/06/2022):

The initial capital of the sub-fund is €20,602,581.25 divided into 47,305,066 fully paid-up shares. It was formed on 10/02/2022 by absorbing all the assets of the Sextant Europe mutual fund.

Sextant Grand Large sub-fund:

The initial capital of the sub-fund is €1,082,547,817.01 divided into 2,328,963,315 fully paid-up shares. It was formed on 10/02/2022 by absorbing all the assets of the Sextant Grand Large mutual fund.

Sextant PEA sub-fund:

The initial capital of the sub-fund is EUR 195,915,706.94 divided into 165,134,461 fully paid-up shares. It was formed on 10/02/2022 by absorbing all the assets of the Sextant PEA mutual fund.

Sextant PME sub-fund:

The initial capital of the sub-fund is €213,975,993.79 divided into 451,394,7608 fully paid-up shares. It was formed on 10/02/2022 by absorbing all the

assets of the Sextant PME mutual fund.

Sextant France Engagement sub-fund:

The initial capital of the sub-fund is €70,544,455.80 divided into 536,207,250 fully paid-up shares. It was formed on 10/02/2022 by absorbing all the assets of the Sextant France Engagement mutual fund.

Sextant Asia Ex-Japan sub-fund:

The initial capital of the sub-fund is €58,205,695.87 divided into 582,679.332 fully paid-up shares. It was created on 10/2/2022, by absorption of all the assets of the FCP Sextant Asie.

The characteristics of the various share classes and the terms and conditions of their acquisition are set forth in the SICAV's prospectus.

The different categories of shares may, where applicable:

- * Benefit from different income distribution regimes (distribution or capitalisation);
- * Be denominated in different currencies;
- * Bear different management fees;
- * Bear different subscription and redemption fees;
- * Have a different nominal value;
- * Be systematically hedged against risk, in part or in full, as defined in the prospectus. This coverage is ensured by means of financial instruments that minimize the impact of hedging operations on other categories of shares of the AIF
- * Be reserved for one or more marketing networks.

Shares may be regrouped or divided by decision of the Extraordinary General Meeting. Shares may be split, by decision of the Chairman, into tenths, hundredths, thousandths and ten thousandths, known as fractions of a share. The provisions of the Articles of Association governing the issue and redemption of shares shall apply to fractional shares, the value of which shall always be proportional to that of the share they represent. All other provisions of the Articles of Association relating to shares shall apply to fractional shares without it being necessary to specify this, except where otherwise provided.

ARTICLE 7 - CHANGES IN CAPITAL

The amount of share capital is subject to change as a result of the issue by the Company of new shares and decreases following the repurchase of shares by the Company from shareholders who request them.

ARTICLE 8 - ISSUE AND REDEMPTION OF EQUITIES

Shares are issued at any time at the request of shareholders on the basis of their net asset value plus any subscription fees.

Redemptions and subscriptions are carried out in accordance with the terms and conditions set out in the prospectus.

Redemptions may be made in cash and/or in kind. If the redemption in kind corresponds to a representative share of the assets of the Sub-Funds, only the signed written agreement of the outgoing unitholder must be obtained by the UCITS or the Management Company. Where the redemption in kind does not correspond to a representative proportion of the assets of the sub-funds, all the shareholders must give their written agreement authorising the outgoing shareholder to redeem his shares in exchange for certain specific assets, as explicitly defined in the agreement.

In general, the assets redeemed are valued in accordance with the rules set out in Article 9 and the redemption in kind is carried out on the basis of the first net asset value following acceptance of the securities concerned. All subscriptions for new shares must, at the risk of being null and void, be fully paid up and the shares issued shall carry the same rights as the shares existing on the day of issue.

Pursuant to Article L. 214-7-4 of the French Monetary and Financial Code, the Board of Directors may temporarily suspend the redemption of shares and the issue of new shares in exceptional circumstances and in the interests of shareholders. Pursuant to Articles L. 214-7-4 of the French Monetary and Financial Code and 411-20-1 of the AMF General Regulation, the Management Company may decide to cap redemptions if exceptional circumstances so require and if it is in the shareholders' interest to do so.

When the net assets of the SICAV (or, where applicable, of a sub-fund) are less than the amount set by regulations, no shares may be redeemed (in the sub-fund concerned, where applicable).

Minimum subscription conditions may apply, in accordance with the terms set out in the prospectus.

Pursuant to the third paragraph of Article L. 214-7-4 of the Monetary and Financial Code, the UCITS may cease to issue shares, either temporarily or permanently, in whole or in part, in objective situations that lead to the closure of subscriptions, such as a maximum number of shares issued, a maximum amount of assets reached or the expiry of a given subscription period. Existing shareholders will be informed by any means of the activation of this tool, as well as of the threshold and the objective situation that led to the decision of partial or total closure. If subscriptions are partially suspended, the aforementioned notification must explicitly indicate the terms and condition under which the shareholders may continue to subscribe for shares throughout the partial suspension period. Shareholders are also informed by any means of the decision of the UCITS or the Management Company either to put an end to the total or partial closure of subscriptions (when the triggering threshold is crossed), or not to put an end to it (in case of a change of threshold or a modification of the objective situation having led to the implementation of this tool). A change in the objective situation invoked or in the triggering threshold of the tool must always be made in the interest of the shareholders. The information by all means specifies the exact reasons for these modifications.

ARTICLE 9 - CALCULATION OF NET ASSET VALUE

The net asset value of the shares will be calculated pursuant to the valuation rules set forth in the prospectus. Moreover, an indicative instantaneous net asset value will be calculated by the market undertaking in case of admission to trading. Contributions in kind will consist solely of securities or contracts that undertakings for collective investment are authorised to invest in and must be valued in accordance with the valuation rules applying to the calculation of the net asset value.

ARTICLE 10 - FORM OF SHARES

The shares may be in bearer or registered form, at the option of the subscribers.

Pursuant to Article L. 211-4 of the French Monetary and Financial Code, the securities must be registered in accounts held by the issuer or an authorised intermediary, as applicable.

The rights of the holders will be represented by a book entry in their name: - With the intermediary of their choice for bearer shares; - With the issuer, and if they so wish, with the intermediary of their choice for registered shares.

In exchange for payment at its expense, the Company can request the names, nationalities and addresses of the Fund's shareholders, as well as the quantity of shares held by each of them, in accordance with article L.211-5 of the French Monetary and Financial Code.

ARTICLE 11 - ADMISSION TO TRADING ON A REGULATED MARKET AND/OR A MULTILATERAL TRADING FACILITY

The shares may be admitted to trading on a regulated market and/or a multilateral trading facility in accordance with the regulations in force.

If the SICAV whose shares are admitted to trading on a regulated market has a management objective based on an index, it must have put in place a mechanism to ensure that its share price does not deviate significantly from its net asset value.

ARTICLE 12 - RIGHTS AND OBLIGATIONS ATTACHED TO THE SHARES

Each share entitles its holder to share in the ownership of the Company's assets and in the distribution of profits, in proportion to the fraction of the share capital it represents.

The rights and obligations attached to the share follow the share certificate, regardless of where it is held.

Ownership of a share automatically entails acceptance of the Company's Articles of Association and the decisions of the General Meeting.

Whenever it is necessary to own several shares in order to exercise any right whatsoever, and in particular in the event of an exchange or consolidation, the owners of individual shares, or a smaller number than that required, may only exercise these rights on condition that they personally arrange for the consolidation and, if necessary, the purchase or sale of the necessary shares.

ARTICLE 13 - INDIVISIBILITY OF SHARES

All undivided holders of a share or their successors are required to be represented before the company by one and the same person appointed by agreement between them, or failing that by the President of the Commercial Court of the place of the registered office.

The owners of fractions of shares may group together. In this case, they must be represented under the conditions set out in the previous paragraph by one and the same person who will exercise, for each group, the rights attached to the ownership of a whole share.

Possibility of providing for the distribution of voting rights at the meetings, between usufructuary and bare owner, or of leaving this choice to the interested parties, on condition that they notify the company.

SECTION III - ADMINISTRATION AND MANAGEMENT OF THE COMPANY

ARTICLE 14 - ADMINISTRATION

The company is administered by a Board of Directors of at least three and no more than eighteen members appointed by the General Meeting. During the life of the Company, one-third of the directors are appointed or reappointed every two years by the Ordinary General Meeting of Shareholders, after obtaining the approval of two-thirds of the members of the Board of Directors of the Fund.

Directors may be natural persons or legal entities. The latter must, at the time of their appointment, designate a permanent representative who is subject to the same conditions and obligations and incurs the same civil and criminal liability as if he were a member of the Board of Directors in his own name, without prejudice to the liability of the legal entity he represents.

This mandate of permanent representative is given for the duration of the mandate of the legal entity that it represents. If the legal entity revokes the mandate of its representative, it must notify the SICAV of this revocation without delay, by registered letter, as well as the identity of its new permanent representative. The same shall apply in the event of the death, resignation or prolonged incapacity of the permanent representative.

ARTICLE 15 - TERM OF OFFICE OF DIRECTORS - RENEWAL OF THE BOARD

Subject to the provisions of the last paragraph of this article, the term of office of the directors shall be three years for the first directors and six years at the most for the following directors, each year being understood as the interval between two consecutive annual General Meetings. If one or more directors' seats become vacant between two General Meetings, due to death or resignation, the Board of Directors may make provisional appointments.

A director appointed by the board to temporarily replace another director will only remain on the board for the remaining term of office of his/her predecessor. The appointment is subject to ratification by the next General Meeting. Any outgoing director is eligible for re-election. They can be dismissed at any time by the ordinary general assembly.

The term of office of each member of the Board of Directors shall expire at the close of the ordinary General Meeting of shareholders called to approve the financial statements for the previous fiscal year and held in the year in which his or her term of office expires, it being understood that, if the meeting is not held in that year, the said term of office of the member concerned shall expire on December 31 of the same year, subject to the exceptions set forth below.

Any director may be appointed for a term of less than six years when it is necessary to keep the renewal of the board as regular as possible and complete in each six-year period. This shall apply in particular if the number of directors is increased or decreased and the regularity of the renewal is affected. When the number of members of the Board of Directors falls below the legal minimum, the remaining member(s) shall immediately convene an ordinary General Meeting of shareholders to appoint the number of members necessary for a full Board.

In accordance with the regulations, the number of directors over the age of 70 may not exceed one third of the directors in question.

The Board of Directors may be renewed by fraction.

In the event of the resignation or death of a director and where the number of directors remaining in office is greater than or equal to the minimum required under the articles of association, the Board may, on a provisional basis and for the remainder of the term of office, provide for a replacement.

ARTICLE 16 - BOARD COMMITTEE

The Board elects from among its members, for a period it determines, but without this period exceeding the duration of his or her term of office as a director, a Chairman who must be a natural person.

The Chairman of the Board of Directors organises and directs the work of the Board and reports to the General Meeting. He or she ensures the proper functioning of the company's bodies and, in particular, that the directors are able to perform their duties.

The Board of Directors also appoints a vice-chair, if it deems it necessary, and may also choose a secretary, even from outside the Board.

If the Chairman is absent or unable to attend, the meeting of the Board shall be chaired by the Chief Executive Officer. Failing that, the Board shall appoint a chairman from among its members.

ARTICLE 17 - BOARD MEETINGS AND PROCEEDINGS

The Board of Directors shall meet at the call of the president as often as the interests of the company require, either at the registered office or at any other place indicated in the notice of meeting.

If the Board of Directors has not met for more than two months, at least one third of its members may ask the Chairman to convene the Board on a specific agenda. The Director General may also request the Chairperson to convene a meeting of the Board of Directors to discuss a specific agenda. The president is bound by such requests.

In accordance with the applicable statutory and regulatory provisions, the company's rules of procedure may provide for the organisation of board meetings via videoconference, except for those decisions that the French code of commerce expressly specifies cannot be taken at videoconference meetings.

The convocations are made by simple letter or any other means (e-mail) and even verbally in case of emergency.

The presence of at least half of the members is necessary for the validity of the deliberations. Decisions are taken by a majority of the votes of the members present or represented.

Each director will have one vote. In the event of a tie, the chairman of the meeting has the casting vote.

Where video-conferencing is permitted, the internal regulations may provide, in accordance with the regulations in force, that directors who participate in the Board meeting by video-conference are deemed to be present for the purposes of calculating the quorum and the majority.

ARTICLE 18 - MINUTES

The minutes are drawn up and the copies or extracts of the deliberations are issued and certified in accordance with the law.

ARTICLE 19 - POWERS OF THE BOARD OF DIRECTORS

The Board of Directors determines the orientations of the company's activity and ensures their implementation. Within the limits of the company's purpose and subject to the powers expressly granted by law to the shareholders' meetings, it deals with any issue concerning the proper operation of the company and settles, through its deliberations, matters that concern it. The Board of Directors carries out such controls and verifications as it deems appropriate. The Chief Executive Officer of the company is required to provide each director with all documents and information necessary for the performance of his or her duties.

A director may give a written proxy to another director to represent him at a meeting of the Board of Directors. Each director may, however, hold only one proxy at any one meeting.

ARTICLE 20 - GENERAL MANAGEMENT - NON-VOTING DIRECTORS

The general management of the company is assumed under its responsibility either by the chairman of the Board of Directors or by another natural person appointed by the Board of Directors and bearing the title of general manager.

The choice between the two methods of exercising general management is made by the Board of Directors in accordance with the conditions set out in these Articles of Association for a period ending with the expiry of the term of office of the Chairman of the Board of Directors in office. The shareholders and third parties are informed of this choice under the conditions defined by the legal and regulatory provisions in force.

Depending on the choice made by the Board of Directors in accordance with the provisions set out above, the general management is carried out either by the Chairperson or by a Chief Executive Officer.

When the Board of Directors chooses to separate the functions of Chairman and Chief Executive Officer, it appoints the Chief Executive Officer and sets the term of office.

Where the general management of the corporation is assumed by the Chairman of the Board of Directors, the following provisions relating to the Chief Executive Officer shall apply to him.

Subject to the powers expressly granted by law to the shareholders' meetings and to the powers specially reserved for the Board of Directors, and within the limits of the corporate purpose, the Chief Executive Officer is vested with the broadest powers to act in the name of the company in all circumstances. He exercises these powers within the limits of the corporate purpose and subject to those powers expressly granted by law to the shareholders' meetings and the Board of Directors. He represents the company in its relations with third parties.

The Chief Executive Officer may grant any partial delegation of his powers to any person of his choice.

The Chief Executive Officer may be dismissed at any time by the Board of Directors.

At the chief executive officer's proposal, the Board of Directors may appoint up to five natural persons to assist the chief executive officer and who have the title of deputy chief executive officer.

Deputy chief executive officers may be dismissed by the Board of Directors at any time, on the proposal of the chief executive officer.

In agreement with the Chief Executive Officer, the Board of Directors determines the scope and duration of the powers granted to the Deputy Chief Executive Officers.

These powers may include the option of partial delegation. In the event that the Chief Executive Officer ceases to hold office or is prevented from doing so, they retain their functions and powers until the appointment of a new Chief Executive Officer, unless the Board decides otherwise.

The Deputy Chief Executive Officers have the same powers with respect to third parties as the Chief Executive Officer.

The Shareholders' Meeting may appoint one or more Non-Voting Directors to the company, who may or may not be chosen from among the shareholders.

The Board of Directors may appoint non-voting members subject to ratification by the next General Meeting.

The Shareholders' Meeting may allocate remuneration to the Non-Voting Directors, the amount of which it determines.

Non-Voting Directors are appointed for a period of three years expiring at the end of the Shareholders' Meeting called to approve the financial statements for the third fiscal year following their appointment.

The Non-Voting Directors, responsible for ensuring the strict application of the Articles of Association, are invited to attend meetings of the Board of Directors; they take part in the deliberations in an advisory capacity.

The Board of Directors may decide to create committees to assist the Board in the preparation of its work.

ARTICLE 21 - ALLOWANCES AND REMUNERATION OF THE BOARD

The General Meeting may allocate to the directors, as remuneration for their activity, a fixed annual sum as directors' fees, the amount of which is charged to the general expenses of the company and which is distributed at the discretion of the board among its members. The compensation of the Chairman of the Board of Directors and that of the Chief Executive Officer(s) are determined by the Board, as are the fees of the non-voting directors.

ARTICLE 22 - DEPOSITARY

The custodian is appointed by the Board of Directors.

The custodian shall perform the tasks incumbent upon it under the laws and regulations in force, as well as those contractually entrusted to it by the SICAV. In particular, it must ensure that the decisions of the portfolio Management Company are in order. It shall, where appropriate, take any precautionary measures it deems necessary. In the event of a disagreement with the asset Management Company, the depositary shall inform l'Autorité des marchés financiers.

ARTICLE 23 - THE PROSPECTUS

The board of directors is fully empowered to make any changes that may be necessary to ensure that the company is properly managed, within the scope of the statutory and regulatory rules that apply to SICAV funds.

SECTION IV - STATUTORY AUDITOR

ARTICLE 24 - APPOINTMENT - POWERS - REMUNERATION

The auditor is appointed for six financial years by the Board of Directors after approval by the Autorité des marchés financiers (AMF), from among the persons authorised to perform these functions in commercial companies.

It certifies the regularity and sincerity of the accounts.

The auditor may be reappointed.

The statutory auditor is required to report as soon as possible to the Autorité des marchés financiers any fact or decision concerning the undertaking for collective investment in transferable securities of which it has become aware in the course of his assignment, of a nature:

- 1° constitute a breach of the legal or regulatory provisions applicable to this body and likely to have a significant effect on its financial position, results or assets and liabilities;
- 2° undermine the conditions or continuity of its operations; or
- 3° Lead to the issuing of reservations or the refusal to certify the accounts.

The valuation of assets and the determination of exchange ratios in transformation, merger or demerger operations are carried out under the supervision of the statutory auditor.

It assesses any contribution or redemption in kind under its responsibility, except in the case of redemptions in kind for an ETF on the primary market.

It checks the composition of the assets and other elements before publication.

Fees will be agreed between the statutory auditor and the Fund's Board of Directors, on the basis of the estimated auditing work required.

The auditor certifies the situations that serve as a basis for the payment of interim dividends.

An alternate auditor may be appointed to replace the principal auditor in case of impediment, refusal, resignation or death.

SECTION V - GENERAL MEETINGS

ARTICLE 25 - GENERAL MEETINGS

General meetings are convened and deliberate under the conditions provided for by law.

The annual General Meeting, which must approve the company's accounts, must be held within four months of the end of the financial year.

Meetings are held either at the registered office or at another location specified in the notice of meeting.

Any shareholder may participate, personally or by proxy, in the meetings upon proof of identity and ownership of his shares, either by registration in the registered share accounts kept by the company, or by registration in the bearer share accounts, at the places mentioned in the notice of meeting; the period during which these formalities must be completed expires two days before the date of the meeting.

A shareholder may be represented in accordance with the provisions of Article L. 225-106 of the French Commercial Code.

A shareholder may also vote by correspondence under the terms and conditions provided for by the regulations in force.

The meetings are chaired by the Chairman of the Board of Directors, or in his absence, by a vice-chairman or by a director delegated for this purpose by the board or the management board. Failing that, the meeting shall elect its own chairman.

Minutes of shareholder meetings will be prepared and all copies thereof will be certified and issued pursuant to the law.

Specify the terms and conditions for shareholder participation and voting by videoconference.

The General Meeting deliberates on the agenda set by the Board of Directors. One or more directors representing at least 25% of the share capital may, at least four days before the date set for a decision, request by registered letter with acknowledgement of receipt addressed to the Chairman of the Board of Directors, the inclusion of draft resolutions on the agenda of this decision. Any draft resolution shall only be validated by the Board of Directors by a two-thirds majority of its members.

SECTION VI - ANNUAL ACCOUNTS

ARTICLE 26 - FISCAL YEAR

The financial year begins the day after the last net asset value of December and ends on the last net asset value of the same month of the following year.

However, as an exception, the first fiscal year will include all transactions carried out from the date of creation until the last trading day of December 2020.

ARTICLE 27 - ALLOCATION OF DISTRIBUTABLE AMOUNTS

The net income for the year is equal to the amount of interest, arrears, dividends, premiums and lots, directors' fees and all income relating to the

securities in the sub-fund's portfolio, plus the proceeds of sums temporarily available, less management expenses, the cost of borrowings and any depreciation allowances.

Distributable amounts comprise the following:

1° Net income plus retained earnings plus or minus the balance of the income adjustment account;

2° Realised capital gains, net of expenses, less realised capital losses, net of expenses, recorded during the fiscal year, plus net capital gains of the same nature recorded during previous fiscal years that have not been distributed or capitalised, less or increased by the balance of the capital gains adjustment account.

The amounts mentioned in 1° and 2° may be distributed, in whole or in part, independently of each other.

The distributable amounts are paid out within a maximum of five months following the end of the financial year.

The Management Company decides on the allocation of income. The methods of allocating the results and distributable sums are specified in the prospectus.

As regards distribution shares, the Management Company of the SICAV may decide to distribute one or more interim dividends on the basis of situations certified by the auditor.

SECTION VII - EXTENSION - DISSOLUTION - LIQUIDATION

ARTICLE 28 - EXTENSION OR EARLY DISSOLUTION

The Board of Directors may, at any time and for any reason whatsoever, propose to an Extraordinary General Meeting that the Fund be extended, dissolved early or liquidated.

The issuance of new shares and the redemption of shares by the Fund to shareholders who request it shall cease on the date of publication of the notice of the general meeting at which the early dissolution and liquidation of the company are proposed, or at the expiration of the company's term.

ARTICLE 29 - LIQUIDATION

The liquidation procedures are established in accordance with the provisions of article L. 214-12 of the French Monetary and Financial Code.

The net proceeds of the liquidation, after payment of liabilities, are distributed in cash or in securities among the respective shareholders of the sub-funds.

The General Assembly, duly constituted, retains during the liquidation the same attributions as during the course of the company; it has in particular the power to approve the accounts of the liquidation and to give discharge to the liquidator.

SECTION VIII - DISPUTES

ARTICLE 30 - COMPETENT COURTS - JURISDICTION

Any disputes relating to the SICAV which may arise during its period of operation or during its liquidation, either between the shareholders or between the latter and the management company or the custodian, shall be submitted to the jurisdiction of the competent courts.

Document last updated: 01/07/2024

Appendix II¹

Pre-contractual information model for the financial products covered by paragraphs 1, 2 and 2b, of (EU) regulation 2019/2088 and article 6, first sub-paragraph, of (EU) regulation 2020/852

Name of the product: **SEXTANT 2027**
Legal entity identifier: **9695005MQGXERXHAGO65**
Management company: **Amiral Gestion**

Environmental and/or social characteristics

Sustainable investment implies an investment in an economic activity that contributes to an environmental or social objective, provided it does not have any major adverse impact on such objectives, and the company in which the financial product invests implements good governance practices.

EU taxonomy is a system of classification arising from (EU) regulation 2020/852, which drew up a **list of environmentally-sustainable economic activities**. This regulation does not include a list of socially-sustainable economic activities. Sustainable investments that have an environmental objective are not necessarily aligned with the taxonomy.

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: ____%

in economic activities that qualify as environmentally sustainable under the EU taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU taxonomy

It will make a minimum of **sustainable investments with a social objective**: ____%

It promotes **Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy

with a social objective

It promotes E/S characteristics, **but will not make any sustainable investments**

¹ Publication date of the document: January 2024

Which environmental and/or social issues does this financial product support?

The Sextant 2027 Sub-fund promotes environmental and social issues, while keeping a watchful eye on company governance practices by means of non-financial metrics applied to the Sub-fund and materialised by the areas monitored by “Sustainability Indicators”, set out in the following section of this document. **These ESG issues are notably factored into results-based monitoring of the portfolio’s ESG performance**, including ESG analysis of the Sub-fund based on the ‘MSCI ESG Ratings’ methodology of data agency MSCI*. To round this out, **greater inclusion of certain environmental, social and governance (ESG) challenges in the analysis of issuers is currently being deployed**, resulting in increased consideration of ESG issues in credit research in 2024.

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. **However, the fund management team tracks ESG characteristics and performances of the portfolio relative to an index **** that is coherent with the Sub-fund’s investment strategy and comprises 3,470 issuers: the **Global HY (LG30TRUU Index)**.

**The “MSCI ESG Ratings” methodology of the MSCI agency is described in more detail in Amiral Gestion’s Sustainability Report (appendix II) : <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>*

*** Note that the Sub-fund adopted this ESG reference universe in 2023 as part of its commitment to monitor the relative performance of the portfolio on the basis of PAI each quarter from 31 March 2023. Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023.*

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Sub-fund relies on the following sustainability indicators to assess alignment of the portfolio with the environmental and social characteristics that it promotes:

- **An average external ESG score for the portfolio relative* to that of its benchmark index described in the previous section.** This ex-post monitoring is mainly based on data supplied by MSCI ESG Rating, but it may also use the ESG performance ratings of Ethifinance’s Gaïa database to complete coverage if necessary.
- **Compliance with the Sub-fund’s policy of excluding controversies:** monitoring of controversies relies on information supplied by the Sustainalytics agency, which assesses and classified incidents according to how serious they are on a scale from 1 (least serious) to 5 (most severe).
- **Compliance with sectoral policy:** filters are applied to identify issuers exposed to sectors whose activity is prohibited by the Sub-fund’s investment policy.
- **Compliance with the UN Global Compact and the OECD’s Guidelines for Multinational Enterprises,** relies on the Sustainalytics agency for application of the normative exclusion policy implemented by the Sub-fund.
- **Monitoring average carbon intensity of the portfolio relative* to a benchmark index described in the previous section** (emissions in tons of CO₂ / € m of revenue), **as well as climate and environmental footprint metrics** that meet TCFD requirements. These metrics are contained in a periodic report "Appendix 4 - SFDR" attached to the Sub-fund’s annual report.
- **Reporting of our traceable ESG dialogue** ESG with issuers represented in the portfolio on:
 - i) Awareness of best ESG practices, regular discussions on ESG topics via identification of potential factors of value creation and/or risks
 - ii) Special attention to - and possible surveillance of - issuers whose transparency on ESG practices does not meet our analysis criteria.

Moreover, the Sub-fund has committed to monitoring and appraising Principal Adverse Impacts (PAI).

The sources and methodologies relative to these indicators are described in more detail on the Amiral Gestion website under the heading “Responsible Investment”: <https://www.amiralgestion.com/en/investissement-responsible>

* Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023

Sustainability indicators are used to check whether the financial product complies with the environmental and social issues in question.

● **Which sustainable investment goals does the financial product intend to pursue, and how can the investments made contribute to these objectives?**

The SEXTANT 2027 Sub-fund promotes environmental and social issues. At this stage, however, **the Sub-fund has not committed to a minimum share of sustainable investments. On the other hand, the Sub-fund may reveal its share of sustainable investments** based on the characteristics listed below.

DEFINITION OF SUSTAINABLE INVESTMENT: AMIRAL GESTION APPROACH

Amiral Gestion defines sustainable investment as: *“An investment in a financial instrument that is involved in one or several economic activities:*

- *Contributing significantly to environmental objectives to: i) mitigate climate change with the goal of reaching carbon neutrality by 2050, in accordance with the Paris Agreement on Climate; ii) adapt* to the effects of climate change.*
- *Making a net positive contribution to one or several of the United Nations Sustainable Development Goals (SDG) at the social level by 2030.*

These investments must not have any major adverse impact on other environmental or social objectives, and the companies in which the investments are made must respect the principles of good governance.”

The criteria to assess quality of a Sustainable investment under this definition are described in detail in the Sustainable Investment Methodology Note which is available on the Amiral Gestion website:

<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

**The substantial contribution to the objective of adapting to climate change has been an effective criterion for Sustainable Investment qualification since 1 January 2024*

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Sub-fund has several other criteria to ensure that its investments do not seriously harm the environment or people. These are:

- **Investment rules that apply to all funds and mandates classed SFDR 8 and 9 and to the whole portfolio:** exclusion policies, Principal Adverse Impact (PAI) considerations, good governance practices.
- **A set of reinforced requirements for sustainable investments*** to confirm the contribution to an environmental or social objective and ensure that no harm is done to other sustainability objectives.

This whole DNSH principle, and whether the various measures are applied ex ante and/or ex post, is described in more detail in the Methodology note on our definition of Sustainable Investment and is available on our website:

<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

ESG investment rules specific to this Sub-fund are described under the heading “ESG constraints” and complete the DNSH principle.

** As mentioned previously, the Sub-fund has not committed to a minimum share of sustainable investments, but it will disclose its share of ex-post sustainable investments in its periodic report.*

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — How have the indicators for adverse impacts on sustainability factors been taken into account?

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) on sustainability factors, through 16 PAI indicators stemming from the European SFDR regulation. **Taking these indicators into consideration is part of Amiral Gestion's PAI policy.** This policy, including the global approach, the sources and measures put in place for each PAI indicator, is available on the Company website under the heading "Responsible Investment":

<https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

This document includes:

- **In appendix I: measures implemented across the whole portfolio**
- **In appendix II: additional measures applied to sustainable investments*.**

** The Sub-fund has not committed to a minimum share of sustainable investments, but it will disclose the percentage of ex-post sustainable investments in its periodic report in Appendix 4 SFDR.*

● — — How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

To ensure that the Sub-fund's investments, including those which are considered sustainable*, comply with the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, **Amiral Gestion's normative exclusion policies are implemented ex-ante and ex-post** on the basis of Sustainalytics research, whose conclusions may be confirmed or adjusted following an internal analysis by the fund manager and approved by Amiral Gestion's committee for surveillance of controversies. If a company in the portfolio is added to the Sustainalytics Watchlist, it is put on surveillance.

In addition, the portfolio excludes the most serious controversies** including those that may be linked to the principles of these two international standards, and the ESG and management teams are particularly vigilant when assessing and monitoring the quality of company ESG profiles, especially their exposure to events, controversies or other risk factors related to the following issues:

- Human rights (notably forced and child labour)
- Controversies related to climate change and biodiversity
- Fiscal responsibility and transparency

The normative exclusion policy contained in DNSH SFDR applies to sub-funds classed SFDR 8 and 9, as mentioned above.

** As mentioned previously, the Sub-fund has not committed to a minimum share of sustainable investments, but it will disclose its share of ex-post sustainable investments in its periodic report.*

*** The levels excluded are specified under the heading "ESG constraints" of the present document*

The EU taxonomy contains a principle of "Do No Significant Harm" according to which investments aligned with the Taxonomy should not seriously damage EU Taxonomy objectives, in addition to the EU's own criteria.

The principle of 'Do No Significant Harm' applies exclusively to the investments underlying a financial product that takes account of EU criteria with respect to environmentally sustainable economic activity. The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

No other sustainable investment should do significant harm to environmental or social objectives.

Does the financial product consider how Principle Adverse Impacts affect sustainability factors?

☒ Yes

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts of its investments (PAI SFDR) on sustainability factors, to identify and gradually take appropriate action. The Sub-fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

Amiral Gestion's PAI policy, including details of sources and methods for taking account of each indicator, is available on the company website under the heading "Responsible Investment":
<https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

The metrics and information for taking account of PAIs will be disclosed in the periodic document "Appendix 4 - SFDR" of the Sub-fund, for the first time in 2024 and concerning 2023.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The SEXTANT 2027 Sub-fund seeks to achieve a performance net of costs and estimated default risk calculated by the Management Company, annualised, equal to the November 2027 German Euro Bond rate +200bps, i.e. 3.37% annualised based on 6 June 2022 conditions. This return shall be achieved by investing chiefly in bonds issued by state and semi-state companies and financial institutions.

The Sub-fund's investment strategy is based mainly on a hold or buy-and-hold policy (acquisition of securities with the intention of holding them in the portfolio until the first date of final maturity or early redemption following a decision by the issuer or holder). Nevertheless, the Management Company is free to manage the portfolio actively, for example by selling securities, buying new ones, for one or several bonds in the portfolio in case of early redemption, OST, a deterioration in the issuer's credit profile or even an improvement which causes the bond to become unattractive. To construct the portfolio, the fund manager carries out his own qualitative analysis of bonds. He also refers to agency ratings, although he does not rely on these systematically and exclusively.

As the bonds in the portfolio gradually mature and are redeemed, the Management Company may reinvest:

- In bonds whose maturity (final, or because the holder exercises a redemption option) is no later than 31 December 2027
- In credit notes (maturing on or before 31 December 2027) or money market instruments up to 100% of the Sub-fund's assets,
- The Sub-fund may have up to 10% exposure to contingent convertibles for the purposes of diversification and yield, but this exposure is carefully monitored.
- Up to 10% of the Sub-fund's net assets in bonds whose final maturity is after 31 December 2027, provided the holder has an option to redeem before 31 December 2027.

The selection of bonds is based on an internal fundamental analysis of the risk of each issuer. Risk analysis takes into consideration:

- The cyclical nature and operational risks of the business line
- The company's past results and its reputation
- Regularity of cash generation (or equity for financial institutions)
- The reasonable nature of debt ratios (net debt/Ebitda, gearing) with regard to the business line, the Sub-fund's working capital requirements and any tangible and transferable assets that may be held by the issuer
- The issuer's resources, liquidity requirements and debt structure
- Quality of the shareholder base.

Securities are selected after this analysis and following application of the ESG requirements described in the section entitled "Constraints defined to achieve each of the environmental or social characteristics".

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The universe of securities eligible for inclusion in Sextant 2027 is determined after application of the global DNSH principle described previously, and after taking into consideration the following constraints which are specific to the Sub-fund:

- **Compliance with the sectoral exclusion policy:** thermal coal, tobacco, controversial weapons, civilian firearms, pornography, unconventional fossil fuels (except North American shale oil and gas). Particular attention is also paid to the gambling and alcohol sectors. The criteria, thresholds and procedures for applying this due diligence and exclusion policy are specified in the Amiral Gestion sector policy available on its website:
<https://api.amiralgestion.com/documents/permalink/2675/doc.pdf>
- **Compliance with the normative exclusion policy*:** exclusion/non-investment in companies in violation of the UN Global Compact and/or the OECD Guidelines for Multinational Enterprises, following an internal review and confirmation of the violation by the committee for monitoring of controversies. Surveillance of companies that appear on the Sustainalytics Watchlist where this status has been confirmed by the committee for monitoring of controversies following an internal review.
- **Exclusion / non-investment in companies exposed to severe controversies (i.e. Level 5 on the Sustainalytics scale)** if confirmed by the committee for monitoring of controversies following an internal review. Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities.

Furthermore,

- the Sub-fund has committed to monitoring PAI indicators (for more detail, see the sections devoted to these themes in the present document)
- when the portfolio invests in unit trusts, the latter must have the same SFDR classification as the Sub-fund.

**When issuers in which the Sub-fund has invested are found to be exposed to severe (level 5) controversies, or to no longer comply with the UN Global Compact and/or OECD principles, their case shall be put to the committee for monitoring of controversies in order to verify severity/non-compliance and decide on possible exclusion from the portfolio, or to put the company on surveillance in the hope that the level of severity will decrease following an internal analysis.*

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

The Sub-fund **has not set a minimal rate of exclusions** from the investment universe arising from use of this filter and non-financial approaches.

● **What is the policy to assess good governance practices of the investee companies?**

Managers of the Sub-fund assess governance via an external ESG Score (Source: MSCI ESG Ratings)*, which is used to monitor the portfolio's ESG performance and which verifies six aspects of governance: Ownership and control, Board of Directors, Payments, Accounting, Business ethics and Fiscal transparency.

These criteria allow us to assess and to factor into our analysis the dimensions necessary for sound management structures, good relations with – and fair remuneration of – employees and respect for fiscal commitments.

In terms of commitment, we may reopen dialogue issuers in the following cases:

- Those with an external ESG Rating** below 4/10 for Governance
- Those exposed to controversies related to fiscal responsibility and transparency.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

This dialogue takes the following approach:

- Improvement recommendations are drawn up in writing by the fund manager and/or the ESG team when the shortcomings were identified (Year N)
- An initial intermediate report is submitted after one year (N+1)
- A final report is submitted after two years (N+2), which may lead to disinvestment in some high-risk cases if the issuer have not shown improvement (or not made an effort to improve)***

Moreover, to qualify as a Sustainable Investment, issuers cannot have a governance rating that is lower than 5/10. And in accordance with the policy of normative exclusion, the Sub-fund cannot invest in companies that are in violation of the United Nations Global Compact or the OECD Guidelines, or ones which are exposed to severe (Level 5) controversies, notably concerning governance.

* This rating is described in the Amiral Gestion Sustainability Report (appendix II):

<https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

** If the issuer is not covered by this Sub-fund's main external non-financial rating agency (MSCI ESG Ratings), verification will be done by means of internal analysis

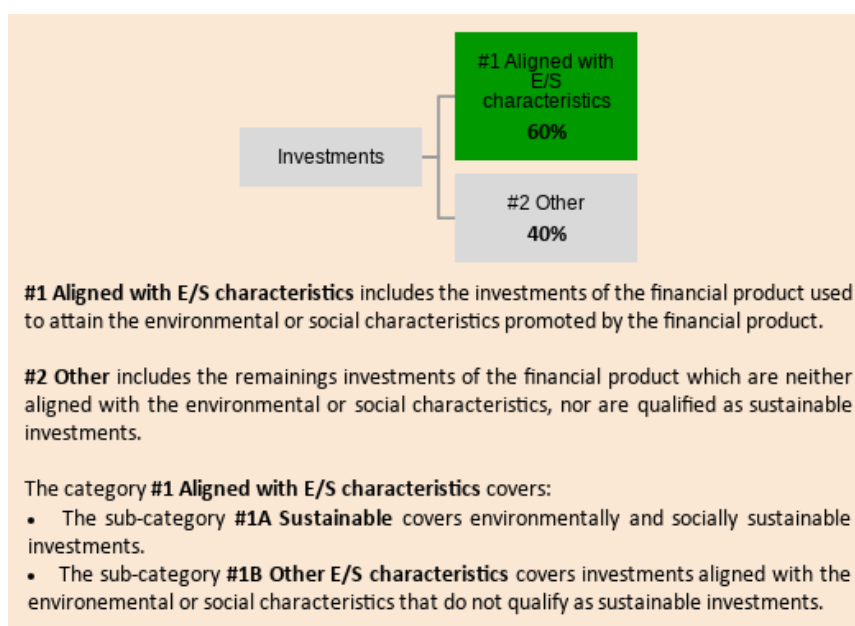

*** Qualitative and/or quantitative analysis

What is the asset allocation planned for this financial product?

In order to calculate alignment with E/S characteristics, we focus on all instruments except cash, derivatives, and short-term debt. At least 60% of securities in the portfolio have passed the exclusion filter applicable to the Sub-fund and are covered by ESG analysis that results in a non-financial rating.

To calculate the percentage of sustainable investments*, we only include investments that meet the sustainability criteria mentioned previously. The denominator is the portfolio's net assets.

* As mentioned previously, the Sub-fund has not committed to a minimum share of sustainable investments, but it will disclose the share of ex-post sustainable investments in its periodic report.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Sextant 2027 Sub-fund may use derivatives to gain exposure to favourable (or partially hedge unfavourable) trends in equities, indices, interest rates and forex. These instruments are not used to achieve the environmental or social characteristics promoted by the product.

Asset allocation

refers to the share of investment in a given asset class.

Taxonomy aligned activities are expressed as a share of:

- **turnover** to reflect the share derived from green activities of companies in which the Sub-fund has invested;
- **capital expenditure** (CapEx) to show green investments by companies in which the financial product invests, for a transition to a green economy, for example;
- **operating costs** (OpEx) to reflect green operations of companies in which the Sub-fund has invested

To what minimum extent are sustainable investments with an environmental objective aligned with the EU taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments, and therefore is not compelled to invest in sustainable investments that have an environmental objective aligned with EU green taxonomy. The Sub-fund has acquired positions in sustainable investments as defined by the taxonomy, up to the minimum aligned green share representing 0% of its assets. To date, communication of alignment data remains partial due to gradual deployment of the CSRD directive.

However, this Sub-fund will communicate its green share in its annual report on the basis of data reported by companies.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?²

Not applicable, as the portfolio has no commitment to a minimum share of investments aligned with EU taxonomy.

☐

Yes:

☐

In gas

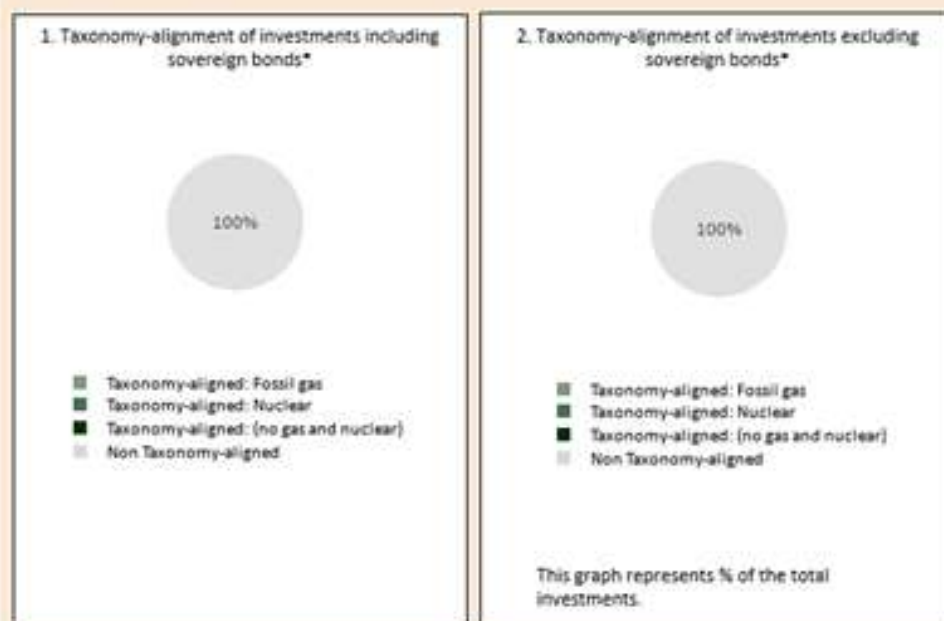

☐

In nuclear energy

☒

No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

Not applicable

² Activities related to fossil gas and/or nuclear only comply with EU taxonomy if they help to limit climate change (mitigation of climate change) and do no major harm to any objective of EU taxonomy – see the explanatory note in the left-hand margin. All the criteria applicable to economic activities in the fossil gas and nuclear sectors that comply with EU taxonomy are defined in (EU) regulation 2022/1214 of the Commission

This symbol represents sustainable investments that have an environmental objective but do **not take into account** criteria applicable to environmentally sustainable economic activities as defined by EU taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sextant 2027 Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective but not aligned with EU taxonomy.

What is the minimum share of socially sustainable investments?

The SEXTANT 2027 Sub-fund **has not committed to a minimum share** of investment in sustainable investment that have a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The instruments in the “#2 Others” category are diversification tools principally used to manage the portfolio’s cash holdings and to counter unfavourable short-term market trends. This category includes hedging and exposure derivatives, securities with derivatives attached, deposits and cash holdings and borrowed funds. It may also include equities that are not rated by external agencies (very small capitalisations, IPOs etc.). These investments may be subject to the requirements of the Sub-fund’s sectoral and normative exclusions and Amiral Gestion’s policy with respect to controversies mentioned above and included in the DNSH SFDR, subject to data availability.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. **However, the fund management team tracks ESG characteristics and performances of the portfolio relative to an index **** that is coherent with the Sub-fund’s investment strategy and comprises 3,470 issuers: **the Global HY (LG30TRUU Index).**

** Note that the Sub-fund adopted this ESG reference universe in 2023 as part of its commitment to monitor the relative performance of the portfolio on the basis of PAI each quarter from 31 March 2023. Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023*

- **How is the benchmark index permanently aligned with each of the environmental or social characteristics promoted by the financial product?**

Not applicable

- **How is alignment of investment strategy with the methodology of the index guaranteed on a permanent basis?**

Not applicable

- **How is the index different from a general market index?**

Where can I find more product specific information online?

More product-specific information can be found on the website:
[Sextant 2027 – Amiral Gestion](#)

Pre-contractual information model for the financial products covered by paragraphs 1, 2 and 2b, of (EU) regulation 2019/2088 and article 6, first subparagraph, of (EU) regulation 2020/852

Name of the product: **SEXTANT PEA**

Identity of the legal entity: 969500NI589D2W087C86

Name of the Management Company: Amiral Gestion

Environmental and/or social issues

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of sustainable investments with an environmental objective: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of sustainable investments with a social objective: ____%

It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of **30%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, **but will not make any sustainable investments**

EU taxonomy is a system of classification arising from (EU) regulation 2020/ 852, which drew up a **list of environmentally-sustainable economic activities**. This regulation does not include a list of socially-sustainable economic activities. Sustainable investments that have an environmental objective are not necessarily aligned with the taxonomy.

¹ Publication date of the document: October 2024

Which environmental and/or social issues does this financial product support?

SEXTANT PEA is a sub-fund of the SEXTANT SICAV which has a dual objective:

- **Financial:** to optimise performance via a selection of international securities (mainly international equities, largely from the EU including France) without reference to an index, and with the objective of outperforming, over the recommended investment period, the MSCI France Small Cap Gross Total Return Index, dividends reinvested (TR).
- **Non-financial:** build a portfolio of companies with good practices in terms of sustainability, notably by focusing on improving the ESG rating and by having a minimum level of sustainable investments. The Sub-fund pays particular attention to companies that contribute actively to the fight against climate change and limit the impact of their activity on biodiversity.

Sextant PEA seeks out and invests in companies that proactively strive to limit and reduce their Greenhouse Gas (GHG) emissions. As an engaged shareholder, the Sub-fund also highlights potential to progress in terms of reducing climate impact engagement, as well as negative impacts of sustainability factors that exceed sector norms.

These objectives result in ESG issues being taken into consideration at two levels:

- **An ESG* performance rating, used to materialise the approach to improving the ESG score**, i.e. an average weighted ESG performance score that is significantly above that of the fund's initial investment universe after elimination of 30% of the worst-performing securities on the basis of ESG score and all exclusions applied by the fund.
- **An internal Global Quality Rating* established by the management team as part of fundamental analysis and notably guiding our selection of investments**, notably embracing 18 financial criteria.

This Global Quality Rating makes it possible to quantify risk on the basis of elements related to company fundamentals:

- Business model: recurrence, predictability, cyclicity, barriers to entry
- Quality of management: operational and financial history, respect for minorities, motivation, training and employee profit-sharing, quality of relations with third parties
- Quality of the financial structure: balance sheet, realizable assets, level of debt.

These 18 financial criteria yield a **"Business Rating"** that accounts for two-thirds of the Global Quality Rating.

This financial assessment is rounded out by **the ESG performance rating described above** which accounts for one-third of the final Global Quality Rating (a score out of 10).

This ESG integration approach allows our investment teams to identify non-financial issues that could have a significant impact in terms of sustainability and/or finances. The impact may take the form of new investment opportunities stemming from rising awareness of the importance of sustainability issues, creating fertile ground for the development of certain products and services (e.g. energy efficiency solutions that mitigate climate change). On the other hand, the impact may take the form of risks arising from regulatory changes, normative or behavioural, resulting from these same sustainability issues.

All of these criteria lead to a score between 0 and 10. The higher the score, the lower the risk for a given valuation level.

- Moreover, Sextant PEA excludes investing in certain sectors that have significant negative environmental and/or social impacts, or in companies involved in serious controversies or ones that do not respect international guidelines concerning**. The Sub-fund therefore implements sectoral and normative exclusion policies and avoids controversies, as described under the heading "ESG constraints" of this document.

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. However, the fund management team tracks ESG characteristics and performances of the portfolio relative to an initial investment universe that is coherent with the Sub-fund's investment strategy and comprises 700 French companies of all capitalisation. This universe is filtered for ESG performance to track changes in the portfolio's ESG rating relative to the universe.

** For more information about the methodology underlying these two ratings and characteristics of the universe, please see the Methodology Note applicable to SRI-labelled funds and available on the company website.*

*** Those which violate the United Nations Global Compact and/or OECD Guidelines for Multinational Enterprises as well as the lists of EU companies that have failed to cooperate on tax matters and the FATF lists of companies that have taken insufficient measures to combat money laundering and terrorist financing.*

Which sustainability indicators are used to measure success in supporting the environmental or social issues promoted by the financial product?

The Sub-fund relies on the following sustainability indicators to assess alignment of the portfolio with the environmental and social characteristics that it promotes:

- **An average weighted ESG performance rating*** that is significantly higher than that of the fund's initial investment universe** after elimination of 30% of the worst-performers in terms of ESG rating and all exclusions applicable to the fund (i.e. sectoral and normative exclusions related to severity and on two governance criteria). This assessment of ESG criteria is carried out internally using Amiral Gestion's proprietary fundamental analysis which targets key ESG challenges for each sector via a new methodology developed within the scope of double materiality². This rating is based on information collected by our teams and on data from external data suppliers used in qualitative fundamental ESG analysis by fund managers/analysts. The latter can thus refer to ratings and quantitative elements supplied by non-financial agency partners (EthiFinance, MSCI ESG Research, Sustainalytics, S&P Trucost, etc), as well as tracking PAI performance and any public information and company meetings. The analysis strives to select 2-5 Environmental (E) and Social (S) issues that are most material for a given company, using several key data sources to identify these challenges such as the 14 challenges highlighted by the European Financial Reporting Advisory Group (EFRAG) and presented in the table below. These challenges are assessed qualitatively by fund managers/analysts who rate them from 1 to 10. To attribute this rating, fund managers analyse the issue selected at three levels: (1) transparency of the company, (2) its related good practices, monitoring indicators and objectives, and (3) governance concerning the issue. Weightings of the E and S elements in the ESG performance rating are at least 20%.
- **The average Global Quality Rating*** of the portfolio, reflecting ESG integration into fundamentals.
- **Compliance with the Sub-fund's exclusion policy according to the seriousness of controversies*****: monitoring of controversies relies on information supplied by the Sustainalytics agency, which assesses and classifies incidents according to how serious they are on a scale from 1 (least serious) to 5 (most severe).
- **Compliance with sectoral policy*****: filters are applied to identify companies exposed to sectors whose activity is prohibited by the Sub-fund's investment policy.
- **Compliance with the UN Global Compact and the OECD's Guidelines for Multinational Enterprises*****, relies on the Sustainalytics agency for application of the normative exclusion policy implemented by the Sub-fund.
- **Two climate-related quality indicators selected from the PAI (« Principal Adverse Impact »)******, on which the portfolio has committed to being better rated than the initial universe**.

² The European Financial Reporting Advisory Group (EFRAG) defines double materiality as a combination of "financial aspects" and "material impact". An analysis of double materiality therefore involves "identifying the most appropriate sustainable development issues in view of the impact of the entities activities and its value chain." It also involves analysing both the impact of ESG risks for the company and the company's impact on society in general.

Sustainability indicators are used to check whether the financial product complies with the environmental and social issues in question.

- **PAI 3** – Climate: carbon intensity (t CO2eg/€m of sales)
- **PAI 7** – Biodiversity impact: percentage of issuers having activities or operations in or near zones identified as sensitive in terms of biodiversity
- **Taking all 16 PAIs into consideration via****:**
 - Sectoral (PAI 4 and 14) and normative (PAI 10) exclusions for some of them
 - Policy of engagement and dialogue with issuers to encourage them to improve transparency and strive for progress
- **Taking climate issues into consideration**
Investment policy takes account of climate issues via closer monitoring of companies represented in the portfolio and materialised by:
 1. identification of issuers (by means of the NACE code of their main activity) that have a strong climate impact as defined by Regulation 2022/1288,
 2. an analysis, by September 2025, of climate transition strategy of companies (highlighted by their ESG performance score) which could be clarified by a Climate Maturity score.

Concerning this group of companies with a strong climate impact, Sextant PEA has promised that by 1 January 2026:

 - 15% of companies represented in the portfolio will have a credible transition plan in line with the objectives set by the Paris Agreement, endorsed for example by SBTi approval (effective or in progress) of their decarbonisation targets,
 - 20% of companies being monitored closely that have not presented a credible transition plan will be the object of shareholder engagement urging them to adopt a credible transition plan within three years.

Details of the methodology applied is described in the Methodology note applicable to SRI-labelled funds.

Furthermore, for the overall portfolio, this review is rounded out by monitoring of climate metrics and described in “SFDR Appendix 4” attached to the Sub-fund’s annual report. For example, the indicators reported may be:

- Carbon intensity per million euros generated (i.e. one of the ESG quality indicators mentioned above).
- Alignment with 1.5°C. This metric is an objective of the Paris Agreement to limit global warming to 1.5°C relative to pre-industrial levels by 2100. It reveals the portfolio’s climate trajectory.
- Green assets, representing the percentage alignment of the Sub-fund with the European taxonomy.
- Brown assets, reflecting the portfolio’s exposure to fossil fuels (as a percentage)
- **Our traceable ESG activity dialogue with companies**
As supporting companies in their progress is a central objective of the Sub-fund's SRI approach, shareholder engagement is at the heart of Sextant PEA's investment process. This best-effort approach takes the form of an active dialogue, which can be conducted with all the companies in the portfolio, but which focuses on those:
 - whose transparency and performance in terms of the two PAI quality indicators is unsatisfactory,
 - operating in sectors that have a high climate impact,
 - and more generally, depending on how appropriate, engagement themes mentioned below and highlighted by Amiral Gestion’s engagement policy.

Key Engagement Themes of Sextant PEA

- **Reporting of the Sub-fund's voting policy:** the Sub-fund has committed to participate systematically***** in voting of companies in which it has invested, applying the principles of the Management Company's proprietary voting policy that aims for exemplary policies concerning governance and social and environmental issues
- **Moreover, the Sub-fund has committed to monitoring and reporting the share of sustainable investments in the portfolio**, in order to ensure that the Sub-fund has achieved the minimum level required, based on Amiral Gestion's own methodology to qualify sustainable investments, available on the website: <https://api.amiralgestion.com/documents/permalink/2357/doc.pdf>

* Sources and methodologies relative to the ESG Performance Rating and the Global Quality Rating are described in the Methodology Note applicable to SRI-labelled funds

** The investment universe is described previously under "ESG characteristics" and in the Methodology Note applicable to SRI-labelled funds

*** These exclusions are described in the section "Constraints of the investment strategy" in this document.

More globally, commitments to coverage and/or performance are associated with certain indicators mentioned above and are detailed where necessary in the section "Constraints of the investment strategy" in this document

**** These indicators of quality and progress are described in more detail in the Methodology Note applicable to SRI-labelled funds

***** The PAI indicators are described in the section "How indicators of negative impacts are taken into consideration" of this document

***** Except in cases where technical issues prevent voting

Which sustainable investment goals does the financial product intend to pursue, and how can the investments made contribute to these objectives?

The SEXTANT PEA Sub-fund promotes environmental and social issues. Although it does not have an investment strategy focused on a sustainable investment objective as defined by the SFDR Disclosure regulation, the Sub-fund has committed to investing at least **30% of its assets in sustainable investments**, according to the qualification criteria below stemming from the Amiral Gestion approach described below.

DEFINITION OF SUSTAINABLE INVESTMENT: AMIRAL GESTION

APPROACH:

Amiral Gestion defines sustainable investment as: *"An investment in a financial instrument that is involved in one or several economic activities:*

- *Contributing significantly to environmental objectives to: i) mitigate climate change with the goal of reaching carbon neutrality by 2050, in accordance with the Paris Agreement on Climate; ii) adapt to the effects of climate change.*
- *Making a net positive contribution to one or several of the United Nations Sustainable Development Goals (SDG) at the social level by 2030.*

These investments must not have any major adverse impact on other environmental or social objectives, and the companies in which the investments are made must respect the principles of good governance. "

The criteria to assess quality of a Sustainable investment under this definition are described in detail in the Sustainable Investment Methodology Note which is available on the Amiral Gestion website: <https://api.amiralgestion.com/documents/permalink/2195/doc.pdf>

● **To what extent do the financial product's sustainable investments have a significant adverse impact on a sustainable investment objective in environmental or social terms?**

The Sub-fund has several other requirements to ensure that its investments do not seriously harm the environment or people. These requirements take the form of investment rules applicable to all products classified as Article 8 and Article 9 SFDR, including Sextant PEA, across the entire portfolio, and a set of reinforced requirements on sustainable investments.

The measures presented in the chart below are implemented **both ex-post and ex-ante when they affect eligibility of companies in the portfolio** (sectoral and normative exclusions, controversies, etc).

The following tools are used exclusively on an ex-post basis:

- **Requirement to confirm the sustainable nature of investments for portfolios classed SFDR Article 8 (including Sextant PEA)**, as this verification allows the company to be qualified a "Sustainable Investment" without affecting inclusion of the security in the portfolio if company policies are in line with ESG characteristics.
- **PAIs taken into consideration**, to track externalities of investments and not an ex-ante selection criteria (except PAI 4, 10 and 14 which concern exclusions)
- **Monitoring of governance practices for SFDR Article 8 portfolios (including Sextant PEA):** *for more information refer to the section "How does the Sub-fund assess governance practices at the companies in which it has invested?" of this document*

The principle adverse impacts are the negative consequences arising from investment decisions for sustainability factors related to environmental and social issues, human resources, respect for human rights, the fight against corruption and acts of corruption

- + Surveillance of good governance (G) practices and engagement in the following cases:
- G score of 4/10 or lower (or 50/100 depending on procedure applied to portfolio)
 - Shortcomings revealed by monitoring PAI related to Governance
 - Controversies linked to fiscal transparency
- For more detail, see Focus Appendix 3.bis

1. **Respect for Amiral Gestion's sectoral policy**, i.e. companies in the portfolio should not have links to tobacco, controversial arms, pornography, thermal coal, unconventional fossil energies except North American shale oil and gas
The exclusion criteria and thresholds are contained in Amiral Gestion's Sectoral Policy which is available on the company website: <https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>
& additional sectoral exclusions specific to certain portfolios
Where appropriate, the criteria are detailed in the precontractual document « Appendix 2 SFDR » of each portfolio

+
2. **Respect for Amiral Gestion's normative policy**, i.e. compliance with the UN Global Compact and OECD Key Guidelines for Multinationals

+
3. **Surveillance and exclusion of controversies**: Exclusion of companies exposed to ESG controversies that are severe (level 5)* or even serious (level 4)* for some portfolios
Exclusion levels are listed in the precontractual document « SFDR Appendix 2 » of each portfolio
And special attention is paid to all controversies related to the following themes, irrespective of gravity level:

- Human rights
- Climate and biodiversity
- Fiscal responsibility

+
4. **Taking into consideration Principal Adverse Impacts: Bedrock of practices applicable across the portfolio**
For more detail, see Amiral Gestion's Policy for taking PAI into consideration (Appendix II), on the company website, under « Responsible Investment »:
<https://www.amiralgestion.com/fr/investissement-responsable>

* According to the Sustainalytics scale, severity levels may be reviewed by the Committee for Surveillance of Controversies in cases where internal analysis provides evidence to suggest that the severity of the controversy should be raised or lowered.

** For more information about the MSCI SDG methodology, please refer to Appendix II

*** Climate change mitigation and adaptation, biodiversity, the transition to a circular economy, sustainable use and protection of marine resources and reducing pollution, protecting and restoring biodiversity and ecosystems

For taxonomy-aligned investments

REINFORCED DNSH

APPLIED TO SUSTAINABLE INVESTMENTS**

5. **Confirmation of the contribution to the E or S objective by verifying absence of harm to other sustainability objectives**

Taking PAI into consideration: additional methods applicable to sustainable investments
For more detail, see Amiral Gestion's Policy for taking PAI into consideration (Appendix II).

Specific DNSH / Social objective:

A positive DNSH SDG filter: the company must obtain a neutral score for the Product Alignment and Operational Alignment criteria on all social SDGs i.e. = or > -1 ** (Source: MSCI ESG Research)

Specific DNSH / Environmental objective:

Alignment with Taxonomy: Systematic verification by the non-financial partner of absence of harm to other environmental objectives to confirm alignment of eligible investments (Source : Sustainalytics)

Absence of environmental controversies that are significant (3), serious (4) or severe (5)*, particularly where related to the 6 environmental themes of the taxonomy***. (Source: Sustainalytics)

Minimum social safeguards: Absence of exposure to social controversies that are serious (4) or severe (5)* ;
Loss of Sustainable Investment status for companies placed on the Watchlist UN Global Compact and/or OECD Key Guidelines, and exclusion for cases of non-compliance (source : Sustainalytics)

+ Minimum governance score to qualify as a « Sustainable Investment »:
> or = 5/10
(or 50/100 depending on the procedure applicable to the portfolio)

ESG investment rules specific to this Sub-fund are described under the heading “ESG constraints” and complete the DNSH principle.

How are indicators concerning adverse impacts taken into consideration?

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) on sustainability factors through 16 PAI indicators stemming from the European SFDR regulation. **Taking these indicators into consideration is part of Amiral Gestion's PAI policy.** This policy, including the global approach, the sources and measures put in place for each PAI indicator, is available on the Amiral Gestion website under the heading "Responsible Investment":

<https://api.amiralgestion.com/documents/permalink/2693/doc.pdf>

This document includes:

- In appendix I: measures implemented across the whole portfolio
- In appendix II: additional measures applied to sustainable investments.

Taking PAIs into consideration is materialised by:

- Sectoral³ (PAI 4 and 14) and normative⁴ (ex. PAI 10) exclusions for some of them
- The policy of shareholder engagement and dialogue with issuers⁵ to encourage transparency and progress where their performance is below the sector average.

To what extent do sustainable investments comply with OECD Guidelines for Multinational Enterprises and United Nations

³ Amiral Gestion sectoral policy: <https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>

⁴ Amiral Gestion normative exclusion and surveillance policy: <https://api.amiralgestion.com/documents/permalink/2397/doc.pdf>

⁵ <https://api.amiralgestion.com/documents/permalink/758/doc.pdf>

Principles on Business and Human Rights?

Detailed description:

To ensure that the Sub-fund's investments, including those which are considered sustainable, comply with the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, **Amiral Gestion's normative exclusion policies are implemented ex-ante and ex-post on the basis of Sustainalytics research**, whose conclusions may be confirmed or adjusted following an internal analysis by the fund manager and approved by Amiral Gestion's committee for surveillance of controversies. If a company in the portfolio is added to the Sustainalytics Watchlist, it is put on surveillance.

In addition, the portfolio excludes the most serious controversies**, including those that may be linked to the principles of these two international standards, and the ESG and management teams are particularly vigilant when assessing and monitoring the quality of company ESG profiles, especially their exposure to events, controversies or other risk factors related to the following issues:

- Human rights (notably forced and child labour)
- Environmental controversies related to climate change and biodiversity
- Fiscal responsibility and transparency

The normative exclusion policy contained in DNSH SFDR applies to sub-funds classed SFDR 8 and 9, as mentioned above.

**The levels excluded are specified in the section "Constraints defined to respect all environmental or social characteristic" section of this document.*

The EU taxonomy contains a principle of "Do No Significant Harm" according to which investments aligned with the taxonomy should not seriously damage EU taxonomy objectives, in addition to the EU's own criteria.

The principle of 'Do No Significant Harm' applies exclusively to the investments underlying a financial product that takes account of EU criteria with respect to environmentally sustainable economic activity. The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

No other sustainable investment should do significant harm to environmental or social objectives.

Does the financial product take into consideration the Principle Adverse Impacts on sustainability factors?

☒ Yes

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts of its investments (PAI SFDR) on sustainability factors, in order to identify and gradually take appropriate action. The Sub-fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

Amiral Gestion's PAI policy, which includes details of sources and the method for taking each indicator into consideration, is available on the website under "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2693/doc.pdf>

The metrics and the information whereby PAIs are taken into consideration will be published annually in the Sub-fund's periodic document "SFDR Appendix 4", starting in 2024 for the year 2023.

☐ No

What investment strategy is followed for this financial product?

To meet its management objective, the Sextant PEA Sub-fund invests mainly in French companies with market capitalisation between €500m and €10bn and, occasionally, in capitalisations under €500m. The remaining assets not invested in capitalisations under €10bn, due to a shortage of opportunities offering sufficient safety margin, are invested in companies with capitalisation in excess of €10bn.

SEXTANT PEA is based on rigorous selection of securities, obtained after an internal fundamental analysis of the management company whose main criteria are:

- quality of company management and quality of its financial structure
- visibility for the company's future earnings and growth prospects for the business
- the company's policy towards its minority shareholders (transparency of information, distribution of dividends, etc.)
- to a lesser extent, the speculative aspect of a security linked to a special situation (takeover bids, public exchange offers, public stock buyback offers, and their equivalents in the countries concerned).

The management team endeavours, as far as possible, to meet directly with the companies in which the Sub-fund invests or is likely to invest.

Investment decisions then depend essentially on the existence of a "margin of safety" constituted by the difference between the market value of the company as assessed by the managers and its market value (market capitalization). In this sense, it is possible to speak of 'value investing'. The investment process fully integrates the consideration of ESG criteria into its fundamental analysis. The Sub-fund aims to build a portfolio of companies with good practices in terms of sustainability, notably by focusing on improving the ESG rating and by having a minimum level of sustainable investments. The Sub-fund pays particular attention to companies that contribute actively to the fight against climate change. Sextant PEA seeks to identify and invest in companies that proactively strive to limit and reduce their Greenhouse Gas (GHG) emissions. The Sub-fund also strives, via its policy of shareholder engagement, to encourage companies with potential to reduce their climate impact to make progress, and tries to influence those lagging behind their sector in terms of sustainability issues.

This approach is based on a dual responsibility that fuels the management team's efforts and summarizes their philosophy of responsible investment:

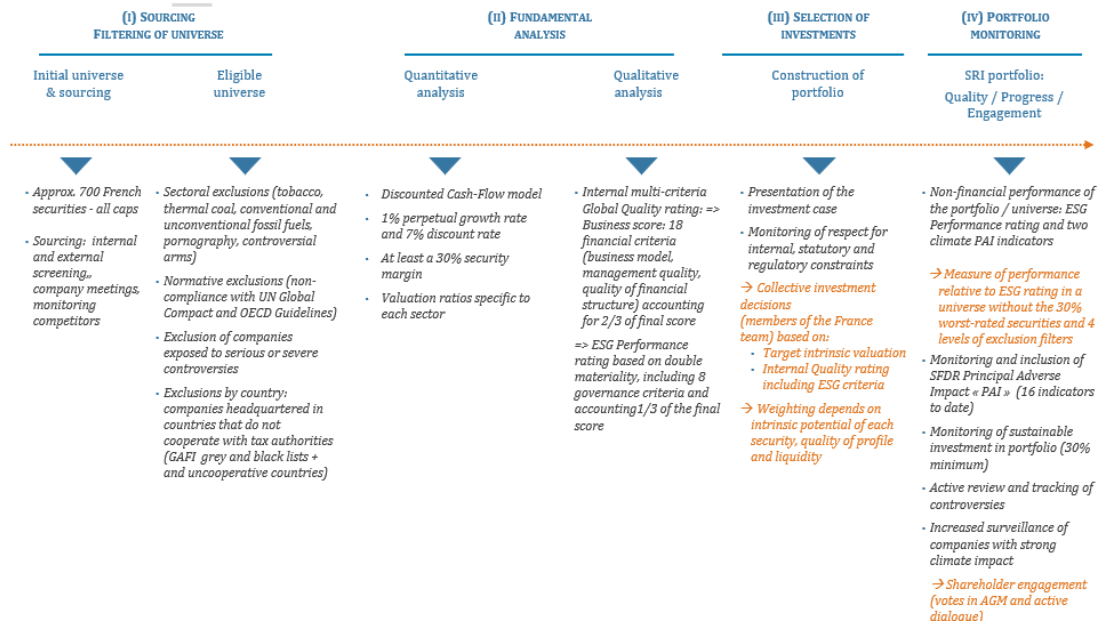

- The fiduciary responsibility of the management team through the central role of ESG analysis in understanding and identifying the material risks of the company and its sources of value creation.
- Their social and shareholder responsibility as an investor.

The Sub-fund implements the investment procedure illustrated below, notably with upstream ESG filters (sectoral exclusions related to controversies and according to two governance criteria), taking ESG criteria into consideration when selecting securities by means of the Global Quality Rating based on our fundamental analysis for which one-third on the ESG performance Rating, and checking the portfolio against several ESG indicators.

The Investment strategy guides investment decisions, taking into account factors such as investment objectives and risk tolerance.

Sextant PEA management policy: An overview

The ESG constraints associated with this SRI procedure are detailed in the section below.

What are the constraints of the investment strategy when selecting investments that respect all the environmental and social issues promoted by this financial product?

The universe of securities eligible for inclusion in SEXTANT PEA is determined after application of the global DNSH principle described previously, and after taking into consideration the following constraints which are specific to the Sub-fund:

- **Respect for the Sub-fund's exclusion policy:** thermal coal, tobacco, controversial arms, pornography, unconventional fossil energies (except North American shale oil and gas) in line with the terms and thresholds of the Amiral Gestion exclusion policy applicable to the Sub-fund. This policy is available on the Amiral Gestion website under "Responsible Investment".
- **Compliance with the normative exclusion:** exclusion/non-investment in companies in breach of the UN Global Compact and/or the OECD Guidelines for Multinational Enterprises, following an internal review and confirmation of the breach by the committee for monitoring of controversies. Surveillance of companies that appear on the Sustainalytics Watchlist where this status has been confirmed by the committee for monitoring of controversies following an internal review.
- **Exclusion / non-investment* in companies exposed to severe controversies (i.e. Level 4 5 on the Sustainalytics scale)** if confirmed by the committee for monitoring of controversies following an internal review. Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities.
- **Exclusion / non investment* in companies on the EU list of companies that do not cooperate with tax policy and the GAFI black or grey lists of companies that have not taken sufficient action to fight money laundering or funding of terrorism.**
- **Commitment to minimum coverage of the portfolio by an ESG analysis** (ESG performance rating): in order to ensure that the companies included in the Sub-fund's portfolio meet a minimum threshold, the management team screens the stocks in the

universe using its own proprietary evaluation method based on Ethifinance's Gaïa Ratings database. **At least 90%** of the companies in the portfolio are thus covered by an ESG analysis;** the maximum 10% not covered is intended to take into account exceptional cases that do not allow for immediate coverage (small caps for which ESG information is not available or is not readily available, IPOs, etc.).

In addition, the Sub-fund has committed to respecting:

- **An ESG performance commitment:** In accordance with the requirements of the SRI label, Sextant PEA is also committed to being better assessed than its investment universe in three areas:
 - i) An ESG indicator aggregated within the Global ESG Performance Score: this score translates into the average ESG score of the portfolio on all E, S and G criteria taken into account in the ESG analysis grid of Amiral Gestion.
 - ii) A Quality/Environment indicator: carbon intensity based on WACI measure (commitment to a coverage rate dependent on weighting of issuers represented in the Sextant PEA portfolio: at least 70% at end 2024, 80% at end 2025, 90% at end-2026).
 - iii) A Quality/ Biodiversity indicator: % of issuers with activities or operations in or near zones identified as sensitive in terms of biodiversity (commitment on coverage rate dependent on weighting of issuers represented in the Sextant PEA portfolio: at least 50% at end-2024, 55% at end-2025, 60% at end-2026)

For more detail on these three metrics and the portfolio/investment universe rating***, see "Sustainability indicators" in this document

- **Taking climate issues into consideration via increased monitoring of issuers that have a high climate impact:**

Concerning this group of high climate impact companies, the Sextant PEA Sub-fund has promised that by 1 January 2026:

- 15% of companies represented in the portfolio will have a credible transition plan in line with the objectives set by the Paris Agreement,
- 20% of companies that are being monitored closely and have presented a credible transition plan will be the object of shareholder engagement urging them to implement a credible transition plan within three years.

Furthermore,

- the Sub-fund has committed to hold a **minimum share of sustainable investments of 30% and to monitoring PAI indicators** (for more detail, see the sections devoted to these themes in the present document)
- When the portfolio invests in **unit trusts**, and when possible, the latter must have the **same SFDR rating** as the Sub-fund and they must also be SRI labelled.

**When companies in which the Sub-fund has invested are found to be exposed to serious (level 4) to severe (level 5) controversies, or to no longer comply with the UN Global Compact and OECD principles, their case shall be put to the committee for surveillance of controversies in order to verify the severity/non-compliant status and decide on possible exclusion from the portfolio, or to put the company on surveillance in the hope that the level of severity will decrease following an internal analysis.*

***This rate may be expressed as a percentage of the sub-fund's net assets or in terms of the number of issuers in the UCI*

**** The detailed methodologies for definition of the universe and for calculation of the Sub-fund's ESG performance relative to its universe are described in the Sub-fund's Methodology Note for SRI labelled funds which is available on the website*

● **What is the minimum rate the financial product commits to in reducing the scope of planned investments before implementation of this investment strategy?**

The Sub-fund **has not set a minimal rate of exclusions** from the investment universe arising from use of this filter and non-financial approaches.

● **What policy is implemented to assess good governance practices at the companies in which the financial product has invested?**

Good governance practices for sound management structures, good relations with – and remuneration of – employees and respect for tax commitments

Managers of the Sub-fund assess governance by means of an ESG performance rating from our fundamental analysis* which influences our stock-picking as this ESG rating account for one-third of the **Global Quality Rating**. The eight criteria in the governance pillar assessed by this rating are management quality, respect for minority shareholders, transparency and the quality of financial communication, responsible compensation for directors and employees, exposure to controversy, assessment of governance structure, fiscal responsibility and business ethics.

All of these criteria allow us to assess and to factor into our analysis the dimensions necessary for sound management structures, good relations with – and fair remuneration of – employees and respect for fiscal commitments.

In terms of commitment, we may reopen dialogue issuers in the following cases:

- Those which have a Governance rating of below 4/10.
- Those which are exposed to controversies related to fiscal responsibility and transparency.

This dialogue may take the following approach:

- Improvement recommendations are drawn up in writing by the fund manager and/or the ESG team when the shortcomings were identified (Year N);
- An initial intermediate report is submitted after one year (N+1);
- A final report is submitted after two years (N+2), which may lead to disinvestment in some high-risk cases if the issuer have not shown improvement (or made an effort to improve)**

Moreover, to qualify as a Sustainable Investment, issuers cannot have a Governance rating that is lower than 5/10. And in accordance with the policy of normative exclusion, the Sub-fund cannot invest in companies that are in violation of the United Nations Global Compact or the OECD Guidelines, or which are exposed to serious or severe controversies, notably concerning governance.

* This rating is described in the Methodology Note applicable to SRI-labelled funds

** Qualitative and/or quantitative analysis

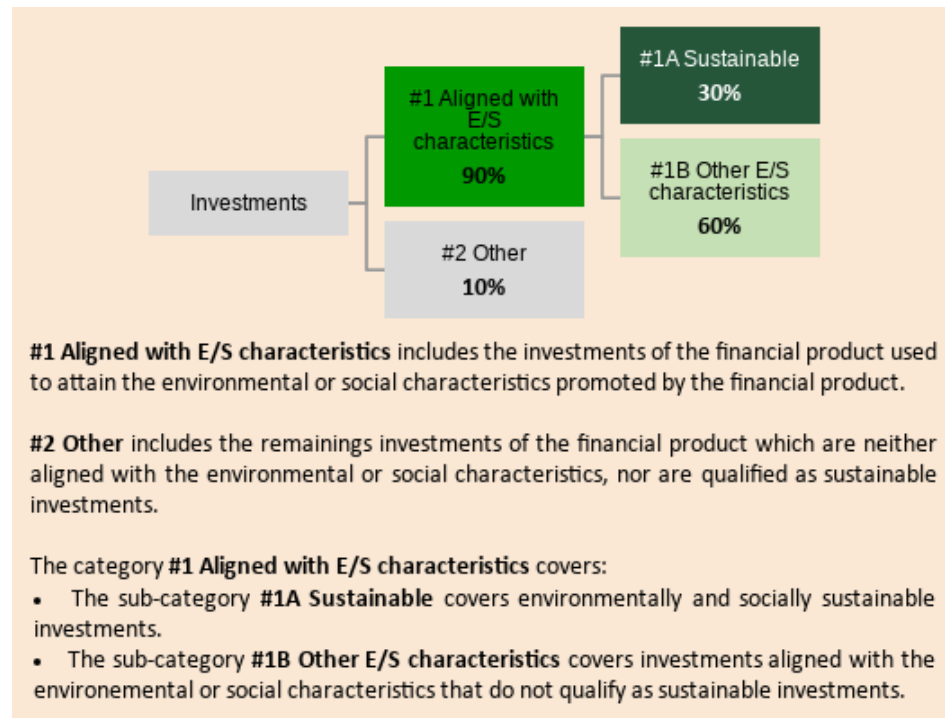

Asset allocation refers to the share of investment in a given asset class.

What asset allocation is planned for this financial product?

For calculation of alignment with E/S characteristics, we mainly consider securities invested in equities as long as other instruments remain negligible (i.e. less than 10% of the sub-fund's net assets), i.e. money market instruments, exposure derivatives linked to a corporate underlying, fund units and other off-balance sheet diversification assets mentioned above. The instruments excluded from the calculation are included in “#2 Others” in the following chart. At least 90% of securities in the portfolio have passed the exclusion filter applicable to the Sub-fund and are covered by ESG analysis that results in a non-financial rating.

To calculate the percentage of sustainable investments, representing at least 30% of investments in the portfolio, we only include investments that meet the sustainability criteria mentioned previously. The denominator is the portfolio's net assets.

How does the use of derivatives help to achieve the environmental and social objectives promoted by the financial product?

The SEXTANT PEA Sub-fund may use derivatives in order to gain exposure to – or partially hedge against – favourable or unfavourable trends in equities, indices, interest rates and forex. These instruments are not used to achieve the environmental or social characteristics promoted by the product.

Furthermore, investment in derivatives is conditional*:

- The portfolio must not be overexposed
- Provisional nature of exposure (use of derivatives for hedging or exposure)
- The derivatives must also be ESG assessed (same for counterparties to OTC instruments)
- Derivatives cannot be used for shorting non-ESG securities.

**The conditions for use of derivatives are detailed in the Sub-fund's prospectus, which is available on the Amiral Gestion website: <https://www.amiralgestion.com/fr/sextant-PEA>*

What is the minimum level to which sustainable investments with an environmental objective are aligned with EU taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective but not aligned with EU Taxonomy. The Sub-fund has acquired positions in sustainable investments as defined by the taxonomy, up to the minimum aligned green share representing 0% of its assets. To date, communication of alignment data remains partial due to gradual deployment of the CSRD directive.

However, the Sub-fund will communicate its green share ex-post in its annual report on the basis of the data reported by the companies.

To comply with EU taxonomy, the criteria applicable to **fossil gas** include limitations on emissions and the switch to fully renewable electricity or low carbon fuels by end-2035. As for **nuclear energy**, the criteria include rules

- Does the financial product invest in activities related to fossil gas and/or nuclear energy that are in compliance with EU Taxonomy?⁶

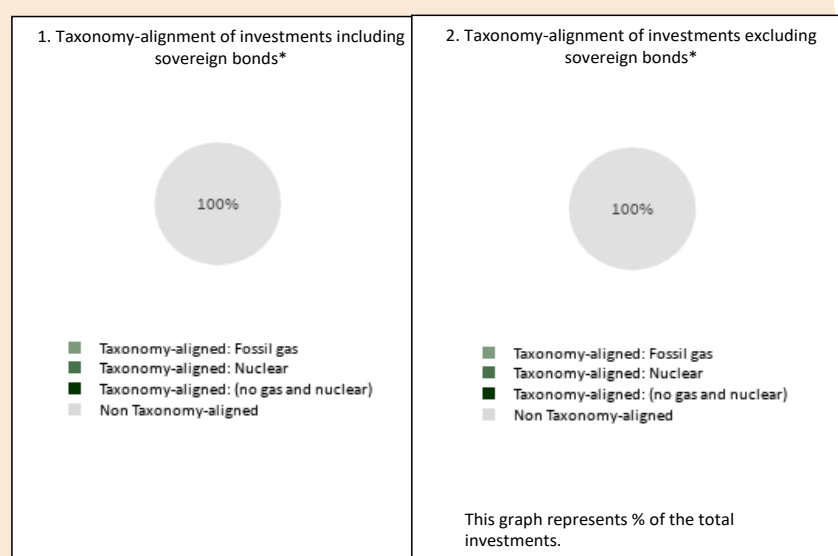

Not applicable, as the portfolio has no commitment to a minimum share of investments aligned with EU Taxonomy.

☐ Yes :

☐ In gas ☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum proportion of net assets invested in transitory and enabling activities?

Not applicable

What is the minimum proportion of sustainable investments with an environmental objective non-aligned with EU taxonomy?

The Sub-Fund has an overall minimum sustainable investment commitment of 10%, but **has not committed to a minimum share of sustainable investments that are not aligned with the EU green taxonomy.**

This symbol represents sustainable investments that have an environmental objective but do **not take into account criteria** applicable to environmentally sustainable economic activities as defined by EU

⁶ Activities related to fossil gas and/or nuclear only comply with EU Taxonomy if they help to limit climate change (mitigation of climate change) and do no major harm to any objective of EU Taxonomy – see the explanatory note in the left-hand margin. All the criteria applicable to economic activities in the fossil gas and nuclear sectors that comply with EU Taxonomy are defined in (EU) regulation 2022/1214 of the Commission.

What is the minimum share of sustainable investments with a social objective?

The Sub-Fund has an overall minimum sustainable investment commitment of 30%, but **has not committed to a minimum share** of investment in sustainable investment that have a social objective.

Which investments are included in the “#2 Others” category? What is their purpose and are there any minimum environmental and social guarantees?

The instruments in the “#2 Others” category are diversification tools principally used to manage the portfolio’s cash holdings and to counter unfavourable short-term market trends. This category includes hedging and exposure derivatives, securities with derivatives attached, deposits and cash holdings and borrowed funds. It may also include equities that are not rated by external agencies (very small capitalisations, IPOs etc.). These investments may be subject to the requirements of the Sub-fund’s sectoral and normative exclusions and Amiral Gestion’s policy with respect to controversies mentioned above and included in the DNSH SFDR, subject to data availability

Has an index been selected as a benchmark to determine if this financial product is aligned with the environmental and/or social objectives it promotes?

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index.

However, the fund management team tracks ESG characteristics and performances of the portfolio relative to an **initial investment universe that is coherent with the Sub-fund’s investment strategy and comprises 700 French companies** of all capitalisation sizes without taking ESG performance into account when compiling it.

The investment universe stems from Amiral Gestion’s issuer database, which embraces all available data for over 90,000 issuers. Several filters are applied to obtain a universe of roughly 700 securities: a filter to include issuers followed by the MSCI agency, a country filter to include only companies headquartered in France as well as issuers not headquartered in France in the portfolio and a market capitalisation filter. The companies are then divided into four groups by market capitalisation: micro (<€500m), small (€500m to €2bn), medium (€2bn to €10bn) and large (>€10bn). This breakdown is coherent with the investment strategy of the Sub-fund. The calculation of performance by ESG rating and indicator is carried out with weightings for each category similar to market capitalisation of the portfolio in order to ensure there is no rating bias.

Characteristics of the investment universe and calculation methodologies that are applied to the universe are described in the Methodology note applicable to SRI-labelled funds.

- **How is the benchmark index permanently aligned with each of the environmental or social characteristics promoted by the financial product?**

Not applicable

- **How is alignment of investment strategy with the methodology of the index guaranteed on a permanent basis?**

Not applicable

- **How is the index different from a general market index?**

Not applicable

- **Where can one find the method used to calculate the selected index?**

Not applicable

Benchmark indices allow us to ascertain if a financial product has the environmental or social characteristics that it promotes

Where on the web can information be found that is specifically for the product?

More detailed information on the product is available on the website:
<https://www.amiralgestion.com/fr/sextant-PEA>

Appendix II¹

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2b of (EU) regulation 2019/2088 and Article 6, first subparagraph, of (EU) Regulation 2020/852

Name of the product: **SEXTANT TECH**

Identity of the legal entity: 969500RN8DGG7SQBZR33

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of sustainable investments with an environmental objective: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It will make a minimum of sustainable investments with a social objective: ____%

It promotes E/S characteristics, but will not make any sustainable investments

Sustainable investment implies an investment in an economic activity that contributes to an environmental or social objective, provided it does not have any major adverse impact on such objectives, and the company in which the financial product invests implements good governance practices.

EU taxonomy is a system of classification arising from (EU) regulation 2020/ 852, which drew up a list of environmentally-sustainable economic activities. This regulation does not include a list of socially-sustainable economic activities. Sustainable investments that have an environmental objective are not necessarily aligned with the taxonomy.

¹ Publication date of the document: January 2024

What environmental and/or social characteristics are promoted by this financial product?

Sextant Tech promotes environmental and social issues, while keeping a watchful eye on company governance practices by means of non-financial metrics, applied to the Sub-fund and materialised by the areas monitored by “Sustainability Indicators”, set out in the following section of this document. **These ESG issues are notably factored into:**

- **Amiral Gestion’s own ex-ante fundamental analysis** expressed as a Quality Rating* which embraces 10 ESG criteria out of 28 analysed qualitatively. These criteria focus on social utility, the nature of the business activity, the motivation and pride of company employees and respect for team members (training policy and career development, corporate culture etc.), a global assessment of the company’s environmental policy in the light of sectoral exposure, the existence of controversies, governance policy and alignment of the company’s interests with those of minority shareholders, communication and transparency, incentives to encourage directors to act responsibly and to promote sustainable development, respect for the interests of stakeholders, clients and other parties concerned (suppliers, government, fiscal transparency etc.).
- **Results-based monitoring of the portfolio’s ESG performance**, including ESG analysis of the Sub-fund based on the ‘**MSCI ESG Ratings’ methodology of data agency MSCI***. This independent external score identifies the ESG risks and opportunities inherent in the sectors to which the companies assessed belong, focusing on the key ESG issues in each industry. ‘MSCI ESG Ratings’ identifies 3 to 8 key issues per sector among 35 ESG issues from which companies in the industry generate significant externalities. The Sub-Fund therefore promotes ESG characteristics based on the MSCI ESG Ratings analysis methodology, which is based on a selection of criteria appropriate to the sector, in the areas of climate change, natural capital, pollution and waste, environmental opportunities, human capital, product responsibility, stakeholder opposition and corporate governance and behaviour. The final score is established on a scale ranging from AAA (best) to CCC (worst).

Moreover, the Sub-fund excludes investments in certain sectors that have significant negative environmental and/or social impacts, or in companies involved in serious controversies or ones that do not respect international guidelines concerning Responsibility.** The Sub-fund therefore implements sectoral and normative exclusion policies and avoids controversies, as described under the heading “ESG constraints” of this document.

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. The fund management team tracks ESG characteristics and performances of the portfolio relative to benchmark universe that is a **coherent with the Sub-fund’s investment strategy, and comprises 1,900** international companies with large and medium-sized capitalisations from the technologies and associated sectors***, without taking ESG performance into account when compiling it.

* The methodology of these two ESG Scores established by MSCI ESG Rating is described in more detail in the Amiral Gestion Sustainability Report (II) : <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

**Those which violate the United Nations Global Compact and/or OECD Guidelines for Multinational Enterprises

***Equipments, instruments and electronic components, software and services, semi-conductors and semi-conductor equipment, IT material/storage/accessories, telecom services and telecom integrated services, media and entertainment, media and interactive services

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Sub-fund relies on the following sustainability indicators to assess alignment of the portfolio with the environmental and social characteristics that it promotes:

- **The average internal Quality Rating of the portfolio**, reflecting ESG integration into fundamental.
- **The average external ESG performance rating of the portfolio, which must be higher than that of its universe**, in compliance with the Sub-fund’s ESG commitments.** Monitoring this commitment is based mainly*** on the scores established by MSCI ESG Rating.
- **Compliance with the Sub-fund’s policy of excluding****:** monitoring of controversies relies on information supplied by the Sustainability agency, which assesses and classified incidents according to how serious they are on a scale from 1 (least serious) to 5 (most severe).

Sustainability indicators are used to check whether the financial product complies with the environmental and social issues in question.

- **Compliance with the sectoral policy***:** filters are applied to identify companies exposed to sectors whose activity is prohibited by the Sub-fund's investment policy.
- **Compliance with the UN Global Compact and the OECD's Guidelines for Multinational Enterprises***,** relies on the Sustainalytics agency for application of the normative exclusion policy implemented by the Sub-fund.
- **Monitoring of climate and environmental footprint metrics* as required by TCFD and summarised in our periodic "Appendix 4 – SFDR" report attached to the Sub-fund's annual report:**
 - i) **The average carbon footprint of the portfolio, which must be better than that of its reference universe** for this Sub-Fund.** Carbon intensity ("WACI measurement) corresponding to the weighted average of carbon footprint ratios per revenue (sum of weight footprint ratio for each share).. The measure is expressed in tonnes of CO2 equivalent per €M of revenue.
 - ii) **Alignment with 2°C.** This metric is an objective of the Paris Agreement to limit global warming to 2°C relative to pre-industrial levels by 2100. It reveals the portfolio's climate trajectory.
 - iii) **Green assets,** representing the percentage alignment of the subfund with the European taxonomy.
 - iv) **Brown assets,** reflecting the portfolio's exposure to fossil fuels (as a percentage)
 - v) **Environmental footprint,** which quantifies different sources of impact related to the company's activity in a monetary form. This mainly involves measuring the value of negative externalities arising from greenhouse gas emissions, the use of water resources, waste production, air/soil/water pollution and the use of natural resources. This metric is expressed as a percentage of revenues, reflecting the cost of these externalities.
 - vi) **Exposure to Transition 2030 risks** related to higher prices per ton of carbon emissions. This metric is expressed as a % of EBITDA, reflecting the additional cost of these risks.
 - vii) **Exposure to physical risks** related to climate change (water stress, fires, floods, heatwaves, hurricanes, coastal flooding) summarised by a mark out of 100.
- **Reporting of the Sub-fund's voting policy:** the Sub-fund has committed to participate systematically***** in voting of companies in which it has invested, applying the principles of the Management Company's proprietary voting policy that aims for exemplary policies in governance and social and environmental responsibility
- **Reporting of our traceable ESG dialogue** ESG with issuers represented in the portfolio on:
 - i) **Awareness of best ESG practices,** regular discussions on ESG topics via identification of potential factors of value creation and/or risks.
 - ii) **Special attention to - and possible surveillance of - issuers** whose transparency on ESG practices does not meet our analysis criteria.

Moreover, the Sub-fund has committed to monitoring and reporting:

- **its Principle Adverse Impacts (PAI),** described in the section "How indicators of negative impacts are taken into consideration" of this document.
- **the share of sustainable investments in the portfolio,** in order to ensure that the Sub-fund has achieved the minimum level required, based on Amiral Gestion's own methodology to qualify sustainable investments, available on the website:
<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

** Methodologies and sources for these indicators are described in more detail in Amiral Gestion's Sustainability Report (respectively in section 2.3 and in Appendix II): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>*

*** The reference universe is described above in the section "ESG characteristics"*

****This ex-post monitoring is mainly based on data supplied by MSCI ESG Rating, but it may also use the ESG performance ratings of Ethifinance's Gaia database to complete coverage if necessary.*

***** Exclusions are described in the section "Constraints of the investment strategy" in this document.*

****** Except in cases where technical issues prevent voting*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The SEXTANT TECH Sub-fund promotes environmental and social issues. Although it does not have an investment strategy focused on a sustainable investment objective as defined by the SFDR Disclosure regulation, the Sub-fund has committed to investing at least **20% of its assets in sustainable investments**, according to the qualification criteria below stemming from the Amiral Gestion approach.

DEFINITION OF SUSTAINABLE INVESTMENT: AMIRAL GESTION APPROACH

Amiral Gestion defines a sustainable investment as *instrument that is involved in one or several of the following economic activities*:

- *Contributing significantly to environmental objectives to: i) mitigate climate change with the goal of reaching carbon neutrality by 2050, in accordance with the Paris Agreement on Climate; ii) adapt to the effects of climate change.*
- *Making a net positive contribution to one or several of the United Nations Sustainable Development Goals (SDG) at the social level by 2030;*

These investments must not have any major adverse impact on other environmental or social objectives, and the companies in which the investments are made must respect the principles of good governance. "

Presented below are the indicators that assess the real contribution of companies in the portfolio to the objective of mitigating climate change and adapting* to its effects:

1) Temperature alignment: $< \text{ or } = 2^{\circ}\text{C}$ (Source: Iceberg Data Lab and - when not available - S&P Trucost)

or

2) Taxonomy alignment – minimal green share $> \text{ or } = 10\%$ of revenues (Source: Sustainalytics, prioritising data supplied by companies, otherwise estimated data)

or

3) Companies that have accepted SBTi ("Target set") or have made a public commitment ("Committed") to the process, or supplied a letter of intent to join the SBT initiative within 12 months following a traceable engagement action by the Management

Source: SBT <https://sciencebasedtargets.org/reports/sbti-progress-report-2021/progress-data-dashboard#datadashboard>;

Amiral Gestion

or

4) Companies that derive at least 25% of revenues from enabling or transitory activities that contribute to an objective that is environmental, but not yet identified in the taxonomy due to their innovative nature or very specific usefulness

Source: Amiral Gestion. Companies whose securities qualify as a sustainable investment under this criteria will be documented by the fund manager and approval will be requested from the IR/RSE team and/or the IR/RSE Pilot Committee

** The substantial contribution to the objective of adapting to climate change will be an effective criterion for Sustainable Investment qualification from January 1, 2024.*

On the social front, the Sustainable Investment qualification criteria are established on the basis of the net positive contribution to the social SDGs assessed using MSCI ESG - Sustainable Impact Metrics research and according to an approach described in detail in the Amiral Gestion Sustainable Investment Methodological Note available on its website:

[Rhttps://api.amiralgestion.com/documents/permalink/2192/doc.pdf](https://api.amiralgestion.com/documents/permalink/2192/doc.pdf)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

Amiral Gestion has several other requirements to ensure that its investments do not seriously harm the environment or people. These requirements take the form of investment rules applicable to all products classified as Article 8 and Article 9 SFDR, including Sextant TECH, across the entire portfolio, and a set of reinforced requirements on sustainable investments.

The measures presented in the chart below are implemented **both ex-post and ex-ante when they affect eligibility of companies in the portfolio** (sectoral and normative exclusions, controversies, etc).

The following tools are used exclusively on an ex-post basis:

- **Requirement to confirm the sustainable nature of investments for portfolios classed SFDR Article 8 (including Sextant TECH)**, as this verification allows the company to be qualified a "Sustainable Investment" without affecting inclusion of the security in the portfolio if company policies are in line with ESG characteristics.
- **PAIs taken into consideration**, to track externalities of investments and not an ex-ante selection criteria (except PAI 4, 10 and 11 which concern exclusions)
- **Monitoring governance practices for portfolios classified under Article 8 SFDR (including Sextant TECH)**: for more information refer to the section "How does the Sub-fund assess governance practices at the companies in which it has invested?" of this document.

ESG rules for this Sub-fund are listed under "ESG constraints" and complete the DNSH principle.

DNSH PROCEDURE APPLIED ACROSS THE PORTFOLIO

+ Assessing good governance practices

For more detail, please see under the heading:
« What is the policy to assess good governance policies of investee companies? »
in this document

1. Respect for Amiral Gestion's Sectoral policy, i.e. non-involvement of companies in the portfolio in activities connected with tobacco, controversial arms, pornography, thermal coal, unconventional fossil energies (except N. American shale oil and gas).

Exclusion criteria and thresholds are detailed in Amiral Gestion's Sectoral Policy, available on the Company website:

<https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>

& additional sectoral exclusions specific to certain portfolios

The criteria are detailed where appropriate in the section entitled « What are the binding elements of investment strategy » in this SFDR pre-contractual document

+

2. Respect Amiral Gestion's Normative Policy, i.e. compliance with the United Nations Global Compact and the OECD Guidelines for Multinational Enterprises

+

3. Controversy monitoring and exclusions: Exclusion of companies exposed to severe (Level 5)* ESG controversies, and even to serious (Level 4)* for certain portfolios.

The exclusion levels for each portfolio are detailed in the section entitled « What are the binding elements of investment strategy »

And special attention is paid to all controversies related to the following themes, irrespective of the level of gravity:

- Human rights
- Climate and biodiversity
- Fiscal responsibility

+

4. Taking into account Principal Adverse Impacts: Set of practices applicable to all portfolios

For more information, please refer to Amiral Gestion's policy for taking PAI into consideration (Appendix I) on the Company website under « Responsible Investment »:
<https://www.amiralgestion.com/fr/investissement-responsable>

**REINFORCED DNSH
APPLIED TO SUSTAINABLE INVESTMENTS****

5. Confirmation of the contribution to objective E or S by checking that no harm is caused to other sustainability objectives**

Taking PAI indicators into consideration: additional methods applicable to Sustainable Investment (SI)

For more information, see Amiral Gestion's Policy for taking PAI into consideration (Appendix II)

Specific DNSH / Social Objective:

A favourable DNSH SDG filter: the company must attain a neutral score for the Product Alignment and Operational Alignment criteria in all social SDGs i.e. = or > -1 ** (Source: MSCI ESG Research)

Specific DNSH / Environmental objective:

Absence of environmental controversies for which the level of gravity is significant (3), serious (4) or severe (5)*, especially when related to the 6 environmental themes of the taxonomy. (Source: Sustainalytics)

Minimum social safeguards: Absence of exposure to social controversies for which the level of gravity is serious (4) or severe (5)*;
Removal of « Sustainable Investment » status for companies placed on the Watchlist of the UN Global Compact and/or OECD Guidelines, and exclusion in cases of non-compliance (Source: Sustainalytics)

+ Minimum Governance Rating to qualify as a « Sustainable Investment »:
5/10

* On the Sustainalytics scale

** The criteria for positive contribution positive were detailed previously in the question concerning the objectives of sustainable investment

*** For more information, please refer to Amiral Gestion proprietary methodology to qualify Sustainable Investment on the website:
<https://api.amiralgestion.com/documents/permalink/2357/doc.pdf>

— — *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) on sustainability factors through 16 PAI indicators stemming from the European SFDR regulation. **Taking these indicators into consideration is part of Amiral Gestion's PAI policy.** This policy, including the global approach, the sources and measures put in place for each PAI indicator, is available on the Amiral Gestion website under the heading "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

This document includes:

- **In appendix I: measures implemented across the whole portfolio**
- **In appendix II: additional measures applied to sustainable investments.**

— — *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

To ensure that the Sub-fund's investments, including those which are considered sustainable, comply with the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, Amiral Gestion's normative exclusion policies are implemented ex-ante and ex-post on the basis of Sustainalytics research, whose conclusions may be confirmed or adjusted following an internal analysis by the fund manager and approved by Amiral Gestion's committee for surveillance of controversies. If a company in the portfolio is added to the Sustainalytics Watchlist, it is put on surveillance.

In addition, the portfolio excludes the most serious controversies*, including those that may be linked to the principles of these two international standards, and the ESG and management teams are particularly vigilant when assessing and monitoring the quality of company ESG profiles, especially their exposure to events, controversies or other risk factors related to the following issues:

- Human rights (notably forced and child labour)
- Environmental controversies related to climate change and biodiversity
- Fiscal responsibility and transparency

The normative exclusion policy contained in DNSH SFDR applies to sub-funds classed SFDR 8 and 9, as mentioned above.

**excluded levels are specified under the heading "ESG constraints" of the present document*

The EU taxonomy contains a principle of "Do No Significant Harm" according to which investments aligned with the taxonomy should not seriously damage EU taxonomy objectives, in addition to the EU's own criteria.

The principle of 'Do No Significant Harm' applies exclusively to the investments underlying a financial product that takes account of EU criteria with respect to environmentally sustainable economic activity. The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

No other sustainable investment should do significant harm to environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts of its investments (PAI SFDR) on sustainability factors, in order to identify and gradually take appropriate action. The Sub-fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

For Amiral Gestion's PAI policy, which includes details of sources and the method for taking each indicator into consideration, see "Responsible Investment" on:

<https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

The metrics and the information whereby PAIs are taken into consideration will be published annually in the Sub-fund's periodic document "SFDR Appendix 4", starting in 2024 for the year 2023.

☐ No

What investment strategy does this financial product follow?

In order to meet its management objectives, the Sextant Tech Sub-fund invests in equities issued around the world, but mainly ones issued in Europe or in companies headquartered in Europe. Positions are acquired with a long-term retention objective (greater than two years). To be included in the universe of Sextant Tech, a company must pass through Amiral Gestion's eligibility filters (innovation, R&D, market etc.) and be approved by the Tech management team. To be considered Tech companies, they must be innovative, present in high-growth markets, and invest heavily in R&D. Typical positions are companies that operate in video games, Digital Services, robotization, IT/AI, industry 4.0 etc). The analysis and selection for this universe is done locally by each team (France, Europe, Asia and the US).

All our investment ideas are the object of financial and non-financial analysis that is both profound and proprietary and seeks to maximise inter-actions within the investment team. Sextant Tech is based on rigorous selection of securities, obtained after an internal fundamental analysis of the management company whose main criteria are:

- the quality of the company's management
- the quality of its financial structure
- visibility of the company's future results
- growth prospects for the business
- the company's policy towards its minority shareholders (transparency of information, distribution of dividends, etc.)
- to a lesser extent, the speculative aspect of a security linked to a special situation (takeover bids, public exchange offers, public stock buyback offers, and their equivalents in the countries concerned).

This fundamental analysis also embraces environmental, social and de governance criteria, which account for about one-third of the overall rating (i.e. 10 of the 28 criteria).

The management team endeavours, as far as possible, to meet directly with the companies in which the Sub-fund invests or is likely to invest. The management team endeavours, as far as possible, to meet directly with the companies in which the sub-fund invests or is likely to invest. This may include site visits, but it is sometimes more appropriate to test products directly in technology sectors. In order to perfect its analysis of the quality of the management team and refine its understanding of the company's business model, the management team then extends its due diligence to partners, customers and suppliers, etc. Investment decisions are then made mainly in companies whose share price is lower than the intrinsic value estimated by the management company within the restricted universe resulting from the ESG filters described in the next section "*Constraints defined in the investment strategy used to select investments*".

The part of assets that has not been invested in equities is invested in fixed income products (money market instruments and debt securities).

The **Investment strategy** guides investment decisions, taking into account factors such as investment objectives and risk tolerance.

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The universe of securities eligible for inclusion in Sextant TECH is determined after application of the global DNSH principle described previously, and after taking into consideration the following constraints which are specific to the Sub-fund:

- **Respect for the Sub-fund's exclusion policy:** thermal coal, tobacco, controversial arms, pornography, unconventional fossil energies (except North American shale oil and gas) in line with the terms and thresholds of the Amiral Gestion exclusion policy applicable to the Sub-fund. This policy is available on the Amiral Gestion website under "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2675/doc.pdf>
- **Compliance with the normative exclusion policy of the Sub-fund:** exclusion/non-investment in companies in breach of the UN Global Compact and/or the OECD Guidelines for Multinational Enterprises, following an internal review and confirmation of the breach by the committee for monitoring of controversies. Surveillance of companies that appear on the Sustainalytics Watchlist where this status has been confirmed by the committee for monitoring of controversies following an internal review.
- **Exclusion / non-investment* in companies exposed to severe controversies (i.e. Level 4 and 5 on the Sustainalytics scale)** if confirmed by the committee for monitoring of controversies following an internal review. Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities..
- **Non-financial analysis and ratings** covering **90%** of equity investments equities issued by large caps headquartered in "developed" countries and a minimum of 75% for equities issued by large caps headquartered in "emerging" countries, equities issued by small and medium caps, debt securities and money market instruments with a high yield credit rating.
- **A commitment to an average ESG score** for the portfolio that is higher than that of the Fund's ESG benchmark universe.***
- **A commitment to a better carbon intensity** of the portfolio than that of the Sub-Fund's ESG reference universe***.

(Source S&P Trucost: WACI measure: Weighted average of carbon footprint ratios per revenue (sum of weight footprint ratio for each title), on extended Scope 1, Scope 2 and Scope 3 upstream.)

- Furthermore,
 - The Sub-fund has committed to hold a **minimum share of sustainable investments of 20%** and to **monitoring PAI indicators** (for more detail, see the sections devoted to these themes in the present document)
 - When the portfolio invests in **unit trusts**, the latter must have the **same SFDR classification** as the Sub-fund.

**When issuers in which the Sub-fund has invested are found to be exposed to severe (level 4 5) controversies, or to no longer comply with the UN Global Compact and OECD principles, their case shall be put to the committee for surveillance of controversies in order to verify the severity/non-compliant status and decide on possible exclusion from the portfolio, or to put the company on surveillance in the hope that the level of severity will decrease following an internal analysis.*

*** In accordance with the applicable ESG analysis coverage rates recommended by the AMF in its Doctrine 2020-03. Coverage may be derived from several external ESG ratings (MSCI ESG Ratings, and failing that, the ESG performance rating of the Admiral benchmark derived from Ethifinance's Gaïa database, etc.). These two score methodologies are described in the Amiral Gestion Sustainability Report (appendix II): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>*

**** The Sub-fund ESG reference universe is described above in the section "ESG characteristics"*

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

The Sub-fund **has not set a minimal rate of exclusions** from the investment universe arising from use of this filter and non-financial approaches.

● **What is the policy to assess good governance practices of the investee companies?**

Managers of the Sub-fund assess governance on two levels:

- **The internal Quality Rating arising from our fundamental analysis*** which guides our stock picking: an ex-ante qualitative assessment in our fundamental analysis which covers 10 out of 28 ESG-related criteria. The governance criteria assessed by this rating are management quality, respect for minority shareholders, transparency and the quality of financial communication, responsible compensation for directors and employees. Note that this list has been enriched by adding three new criteria: appraisal of the governance structure, fiscal responsibility and business ethics.
- **External ESG rating*** (source: MSCI ESG Ratings), used to monitor the portfolio's ESG performance and which verifies six aspects of governance: Ownership and control, Board of Directors, Payments, Accounting, Business ethics and Fiscal transparency. All of these criteria allow us to assess and to factor into our analysis the dimensions necessary for sound management structures, good relations with – and fair remuneration of – employees and respect for fiscal commitments.

In terms of commitment, we may reopen dialogue issuers in the following cases:

- **Those whose External ESG rating** (source: MSCI ESG Ratings) is below 4/10 for Governance**, if the verification by our internal teams reveals major shortcomings that could affect the Company's global profile especially if the weaknesses concern Governance (i.e. PAI 10-13)***
- **Those which are exposed to controversies related to fiscal responsibility and transparency**, if the importance of the incident harbours a shareholding commitment need. We are particularly vigilant on this question and pay close attention to all such controversies, however serious.

This dialogue takes the following approach:

- Improvement recommendations are drawn up in writing by the fund manager and/or the ESG team when the shortcomings were identified (Year N);
- An initial intermediate report is submitted after one year (N+1) as part of the analysis of the company and if no progress is noted: a reminder is issued and the manager may vote against if the shortcoming identified is linked to one or more resolutions tabled at the general meeting;
- A final report is submitted after two years (N+2), which may lead to divestment in some high-risk cases if the companies have not shown improvement (or made an effort to improve****)

Moreover, to qualify as a Sustainable Investment, issuers cannot have a governance rating that is lower than 5/10.

And in accordance with the policy of normative exclusion, the Sub-fund cannot invest in companies that are in violation of the United Nations Global Compact or the OECD Guidelines, or ones which are exposed to serious (Level 4) and severe (Level 5) controversies, notably concerning governance.

*These two ratings are described in the section "ESG characteristics" in this document and in more detail in our Sustainability Report (Appendix II): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

** If the issuer is not covered by this Sub-fund's main external non-financial rating agency, verification will be done by means of internal analysis

*** Dialogue on PAIs from 2024; **** Analyse qualitative et/ou quantitative

Good governance practices for sound management structures, good relations with – and remuneration of – employees and respect for tax commitments

Asset allocation refers to the share of investment in a given asset class.

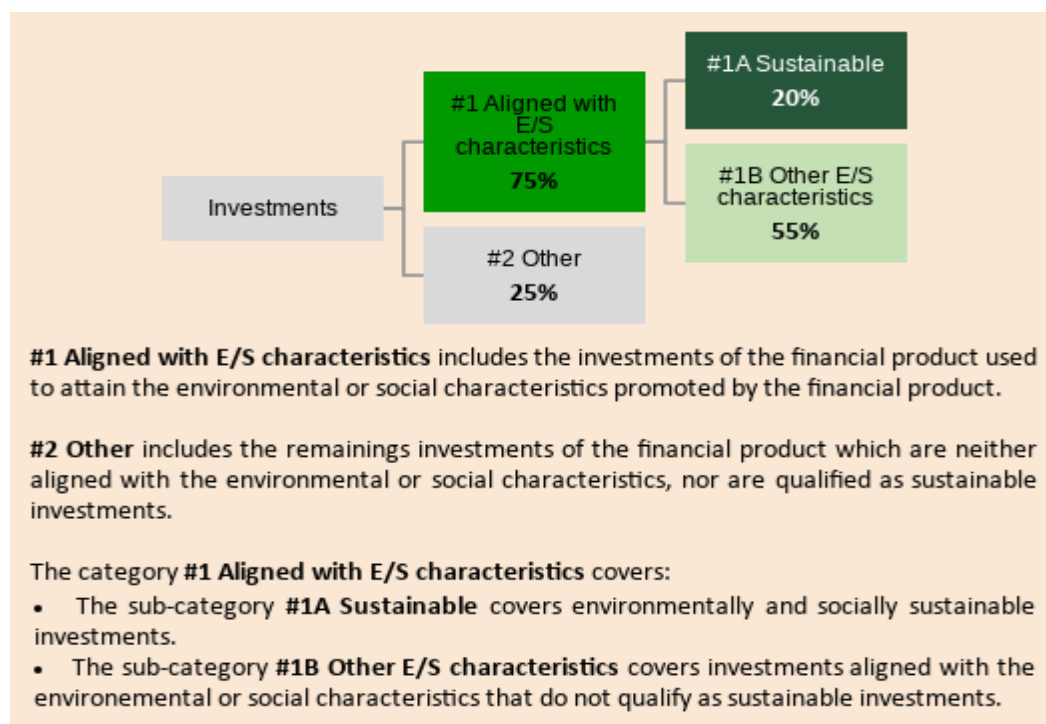

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

What is the asset allocation planned for this financial product?

In order to calculate alignment with E/S characteristics, we focus on all instruments except cash, derivatives, and short-term debt. **At least 75%** of securities in the portfolio have passed the exclusion filter applicable to the Sub-fund and are covered by ESG analysis that results in a non-financial rating.

To calculate the percentage of sustainable investments, representing at least 20% of investments in the portfolio, we only include investments that meet the sustainability criteria mentioned previously. The denominator is the portfolio's net assets.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Sextant Tech Sub-fund may use derivatives in order to gain exposure to – or partially hedge against – favourable or unfavourable trends in equities, indices, interest rates and forex. These instruments are not used to achieve the environmental or social characteristics promoted by the product.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sextant Tech Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective but not aligned with EU Taxonomy. The Sub-fund has acquired positions in sustainable investments as defined by the taxonomy, up to the minimum aligned green share representing 0% of its assets. To date, communication of alignment data remains partial due to gradual deployment of the CSRD directive.

However, this Sub-fund will communicate its green share in its annual report on the basis of data reported by companies.

- Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?²

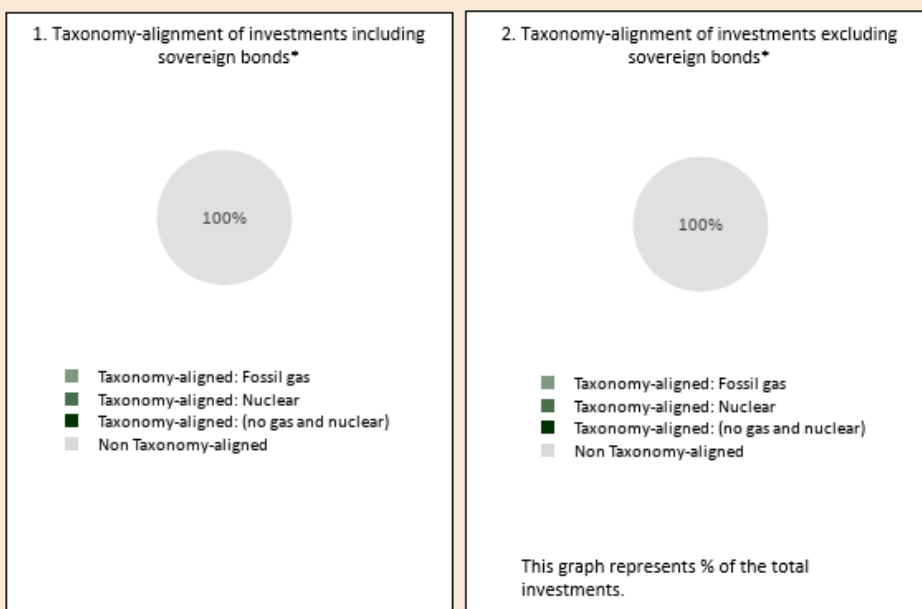

Not applicable, as the portfolio has no commitment to a minimum share of investments aligned with EU Taxonomy.

☐ Yes:

☐ In gas ☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What is the minimum proportion of net assets invested in transitory and enabling activities?

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund has a minimum sustainable investment commitment of 20%, but **has not committed to a minimum share of sustainable investments that are not aligned with the EU green taxonomy.**

² Activities related to fossil gas and/or nuclear only comply with EU Taxonomy if they help to limit climate change (mitigation of climate change) and do no major harm to any objective of EU Taxonomy – see the explanatory note in the left-hand margin. All the criteria applicable to economic activities in the fossil gas and nuclear sectors that comply with EU Taxonomy are defined in (EU) regulation 2022/1214 of the Commission.

What is the minimum share of socially sustainable investments?

The Sub-Fund has an overall minimum sustainable investment commitment of 20%, but **has not committed to a minimum share** of investment in sustainable investment that have a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The instruments in the “#2 Others” category are diversification tools principally used to manage the portfolio’s cash holdings and to counter unfavourable short-term market trends. This category includes hedging and exposure derivatives, securities with derivatives attached, deposits and cash holdings and borrowed funds. It may also include equities that are not rated by external agencies (very small capitalisations, IPOs etc.). These investments may be subject to the requirements of the Sub-fund’s sectoral and normative exclusions and Amiral Gestion’s policy with respect to controversies mentioned above and included in the DNSH SFDR, subject to data availability.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The non-financial approach adopted by the SEXTANT TECH Sub-fund is not benchmarked against any specific index. The fund management team tracks ESG characteristics and performances of the portfolio relative to a **benchmark universe that is coherent with the Sub-fund’s investment strategy and comprises 1,900** international companies with large and medium-sized capitalisations without taking ESG performance into account when compiling it.

** Equipment, instruments and electronic components, software and services, semi-conductors and semi-conductor equipment, IT material/storage/accessories, telecom services and telecom integrated services, media and entertainment, media and interactive services*

- **How is the benchmark index permanently aligned with each of the environmental or social characteristics promoted by the financial product?**

Not applicable

- **How is alignment of investment strategy with the methodology of the index guaranteed on a permanent basis?**

Not applicable

- **How is the index different from a general market index?**

Not applicable

- **Where can I find the method used to calculate the selected index?**

Not applicable

Where can I find more product specific information online?

More detailed information on the product is available on the Management Company website:

<https://www.amiralgestion.com/en/sextant-tech>

Appendix II¹

Pre-contractual information model for the financial products described
in Article 8 paragraphs 1, 2 and 2b, of (EU) regulation 2019/2088 and article 6, first subparagraph,
of (EU) regulation 2020/852

Name of the product: **SEXTANT GLOBAL SMALLER COMPANIES**

Identity of the legal entity: 969500FRANCEASXED494

Management company: Amiral Gestion

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of sustainable investments with an environmental objective: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of sustainable investments with a social objective: ____%

It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 5% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but will not make any sustainable investments

Sustainable investment implies an investment in an economic activity that contributes to an environmental or social objective, provided it does not have any major adverse impact on such objectives, and the company in which the financial product invests implements good governance practices

EU taxonomy is a system of classification arising from (EU) regulation 2020/852, which drew up a **list of environmentally-sustainable economic activities**. This regulation does not include a list of socially-sustainable economic activities. Sustainable investments that have an environmental objective are not necessarily aligned with the taxonomy.

¹ Publication date of the document: January 2024

What environmental and/or social characteristics are promoted by this financial product?

Sextant Global Smaller Companies promotes environmental and social issues, while keeping a watchful eye on company governance practices by means of non-financial metrics applied to the Sub-fund and materialised by the areas monitored by “Sustainability Indicators”, set out in the following section of this document. These ESG issues are notably factored into:

- **Amiral Gestion’s own ex-ante fundamental analysis** expressed as a Quality Rating* which embraces 10 ESG criteria out of 28 analysed qualitatively
- **results-based monitoring of the portfolio’s ESG performance**, including ESG analysis of the Sub-fund based on the ‘MSCI ESG Ratings’ methodology of data agency MSCI*.

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. However, the fund management team tracks ESG characteristics and performances of the portfolio relative to an index** that is coherent with the Sub-fund’s investment strategy and comprises 4,260 issuers: the MSCI Small Cap World Local.

* Methodology indicators are described in the Amiral Gestion Sustainability Report (appendix II):

<https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

** Note that the Sub-fund adopted this ESG reference universe in 2023 as part of its commitment to monitor the relative performance of the portfolio on the basis of PAI each quarter from 31 March 2023. Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Sub-fund relies on the following sustainability indicators to assess alignment of the portfolio with the environmental and social characteristics that it promotes:

- **The average internal Quality Rating of the portfolio**, reflecting ESG integration into fundamental.
- **An average external ESG score for the portfolio relative* to that of its benchmark index described in the previous section.** This ex-post monitoring is mainly based on data supplied by MSCI ESG Rating, but it may also use the ESG performance ratings of Ethifinance’s Gaia database to complete coverage if necessary.
- **Compliance with the Sub-fund’s policy of excluding controversies:** monitoring of controversies relies on information supplied by the Sustainability agency, which assesses and classified incidents according to how serious they are on a scale from 1 (least serious) to 5 (most severe).
- **Compliance with sectoral policy:** filters are applied to identify companies exposed to sectors whose activity is prohibited by the Sub-fund’s investment policy.
- **Compliance with the UN Global Compact and the OECD’s Guidelines for Multinational Enterprises,** relies on the Sustainability agency for application of the normative exclusion policy implemented by the Sub-fund.
- **Monitoring average carbon intensity of the portfolio relative* to a benchmark index described in the previous section** (emissions in tons of CO₂/€m of revenue), as well as climate and environmental footprint metrics that meet TCFD requirements. These metrics are contained in a periodic report "Appendix 4 - SFDR" attached to the Sub-fund’s annual report.
- **Reporting of the Sub-fund’s voting policy:** the Sub-fund has committed to participate systematically** in voting of companies in which it has invested, applying the principles of the Management Company’s proprietary voting policy that aims for exemplary policies in governance and social and environmental responsibility.

Sustainability indicators are used to check whether the financial product complies with the environmental and social issues in question.

- **Reporting of our traceable ESG dialogue** ESG with issuers represented in the portfolio on:
 - i) Awareness of best ESG practices, regular discussions on ESG topics via identification of potential factors of value creation and/or risks.
 - ii) Special attention to - and possible surveillance of - issuers whose transparency on ESG practices does not meet our analysis criteria.

Moreover, the Sub-fund has committed to monitoring and appraising Principal Adverse Impacts (PAI).

The sources and methodologies relative to these indicators are described in more detail on the Amiral Gestion website under the heading "Responsible Investment": [Responsible Investment – Amiral Gestion](#)

*Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023

**Except in cases where technical issues prevent voting

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

Sextant Global Smaller Companies promotes environmental and social issues. Although it does not have an investment strategy focused on a sustainable investment objective as defined by the SFDR Disclosure regulation, the Sub-fund has committed to investing at least **5% of its assets in sustainable investments**, *, according to the qualification criteria below stemming from the Amiral Gestion approach.

*The minimum share of sustainable investments is set from 1 January 2024.

DEFINITION OF SUSTAINABLE INVESTMENT: AMIRAL GESTION APPROACH:

Amiral Gestion defines sustainable investment as: "An investment in a financial instrument that is involved in one or several economic activities:

- Contributing significantly to environmental objectives to: i) mitigate climate change with the goal of reaching carbon neutrality by 2050, in accordance with the Paris Agreement on Climate; ii) adapt** to the effects of climate change.
 - Making a net positive contribution to one or several of the United Nations Sustainable Development Goals (SDG) at the social level by 2030.
- These investments must not have any major adverse impact on other environmental or social objectives, and the companies in which the investments are made must respect the principles of good governance. "

The criteria to assess quality of a Sustainable investment under this definition are described in detail in the Sustainable Investment Methodology Note which is available on the Amiral Gestion website: <https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

**The substantial contribution to the objective of adapting to climate change will be an effective criterion for Sustainable Investment qualification from 1 January 2024

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Sub-fund has several other requirements to ensure that its investments do not seriously harm the environment or people. These are:

- **Investment rules that apply to all funds and mandates classed SFDR 8 and 9 and to the whole portfolio:** exclusion policies, Principal Adverse Impact (PAI) considerations, good governance practices.
- **A set of reinforced requirements for sustainable investments** to confirm the contribution to an environmental or social objective and ensure that no harm is done to other sustainability objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

This whole DNSH principle, and whether the various measures are applied ex ante and/or ex post, is described in more detail in the Methodology note on our definition of Sustainable Investment and is available on our website:

<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

ESG investment rules specific to this Sub-fund are described under the heading “ESG constraints” and complete the DNSH principle.

— — *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) on sustainability factors through 16 PAI indicators stemming from the European SFDR regulation. **Taking these indicators into consideration is part of Amiral Gestion’s PAI policy.** This policy, including the global approach, the sources and measures put in place for each PAI indicator, is available on the Amiral Gestion website under the heading “Responsible Investment”: <https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

This document includes:

- **In appendix I: measures implemented across the whole portfolio**
- **In appendix II: additional measures applied to sustainable investments.**

— — *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

To ensure that the Sub-fund’s investments, including those which are considered sustainable, comply with the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, **Amiral Gestion’s normative exclusion policies are implemented ex-ante and ex-post on the basis of Sustainalytics research**, whose conclusions may be confirmed or adjusted following an internal analysis by the fund manager and approved by Amiral Gestion’s committee for surveillance of controversies. If a company in the portfolio is added to the Sustainalytics Watchlist, it is put on surveillance.

In addition, the portfolio excludes the most serious controversies**, including those that may be linked to the principles of these two international standards, and the ESG and management teams are particularly vigilant when assessing and monitoring the quality of company ESG profiles, especially their exposure to events, controversies or other risk factors related to the following issues:

- Human rights (notably forced and child labour)
- Environmental controversies related to climate change and biodiversity
- Fiscal responsibility and transparency

The normative exclusion policy contained in DNSH SFDR applies to sub-funds classed SFDR 8 and 9, as mentioned above.

**The levels excluded are specified in the section “ESG constraints defined to respect all environmental or social characteristic” section of this document.*

The EU taxonomy contains a principle of “Do No Significant Harm” according to which investments aligned with the taxonomy should not seriously damage EU taxonomy objectives, in addition to the EU’s own criteria.

The principle of ‘Do No Significant Harm’ applies exclusively to the investments underlying a financial product that takes account of EU criteria with respect to environmentally sustainable economic activity. The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

No other sustainable investment should do significant harm to environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts of its investments (PAI SFDR) on sustainability factors, in order to identify and gradually take appropriate action. The Sub-fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

Amiral Gestion's PAI policy, including details of sources and methods for taking account of each indicator, is available on the company website under the heading "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

The metrics and information for taking account of PAIs will be disclosed in the periodic document "Appendix 4 - SFDR" of the Sub-fund, for the first time in 2024 and concerning 2023.

☐ No

What investment strategy does this financial product follow?

The SEXTANT GLOBAL SMALLER COMPANIES Sub-fund is mainly invested in international equities, and in particular in equities of emerging countries. SEXTANT GLOBAL SMALLER COMPANIES relies on a rigorous selection of equities (and partly on convertible bonds), obtained after an internal fundamental analysis of the management company, whose main criteria are:

- the quality of the company's management
- the quality of its financial structure
- visibility of the company's future results
- growth prospects for the business
- the company's policy towards its minority shareholders (transparency of information, distribution of dividends, etc.)
- to a lesser extent, the speculative aspect of a security linked to a special situation (takeover bids, public exchange offers, public stock buyback offers, and their equivalents in the countries concerned).

This fundamental analysis also embraces environmental, social and de governance criteria, which account for about one-third of the overall rating (i.e. 10 of the 28 criteria).

The management team endeavours, as far as possible, to meet directly with the companies in which the Sub-fund invests or is likely to invest. Investment decisions then depend essentially on the existence of a "margin of safety" constituted by the difference between the market value of the company as assessed by the managers and its market value (market capitalization). In this sense, it is possible to speak of "value investing". The portion of the assets not invested in equities, due to a lack of opportunities with a sufficient margin of safety, is invested in fixed income, money market or bond products.

Securities are selected after this analysis and following application of the ESG requirements described in the section below entitled "Constraints defined to respect all the environmental or social issues".

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The universe of securities eligible for inclusion in Sextant Global Smaller Companies is determined after application of the global DNSH principle described previously, and after taking into consideration the following constraints which are specific to the Sub-fund:

- **Respect for the Sub-fund's exclusion policy:** thermal coal, tobacco, controversial arms, pornography, unconventional fossil energies (except North American shale oil and gas) in line with the terms and thresholds of the Amiral Gestion exclusion policy applicable to the Sub-fund. This policy is available on the Amiral Gestion website under "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2675/doc.pdf>

- **Compliance with the normative exclusion* policy:** exclusion/non-investment in companies in breach of the UN Global Compact and/or the OECD Guidelines for Multinational Enterprises, following an internal review and confirmation of the breach by the committee for monitoring of controversies. Surveillance of companies that appear on the Sustainability Watchlist where this status has been confirmed by the committee for monitoring of controversies following an internal review.
- **Exclusion / non-investment in companies exposed to severe controversies (i.e. Level 5 on the Sustainability scale) if confirmed by the committee for monitoring of controversies following an internal review.** Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities.

Furthermore,

- the Sub-fund has committed to hold a **minimum share of sustainable investments of 5% and to monitoring PAI indicators** (for more detail, see the sections devoted to these themes in the present document)
- when the portfolio invests in **unit trusts**, the latter must have the **same SFDR classification** as the Sub-fund.

**When issuers in which the Sub-fund has invested are found to be exposed to severe (level 5) controversies, or to no longer comply with the UN Global Compact and OECD principles, their case shall be put to the committee for surveillance of controversies in order to verify the severity/non-compliant status and decide on possible exclusion from the portfolio, or to put the company on surveillance in the hope that the level of severity will decrease following an internal analysis.*

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

The Sub-fund **has not set a minimal rate of exclusions** from the investment universe arising from use of this filter and non-financial approaches.

● **What is the policy to assess good governance practices of the investee companies?**

Managers of the Sub-fund assess governance on two levels:

- **The internal Quality Rating arising from our fundamental analysis*** which guides our stock picking: an ex-ante qualitative assessment in our fundamental analysis which covers 10 out of 28 ESG-related criteria. The governance criteria assessed by this rating are management quality, respect for minority shareholders, transparency and the quality of financial communication, responsible compensation for directors and employees. Note that this list has been enriched by adding three new criteria: appraisal of the governance structure, fiscal responsibility and business ethics.
- **External ESG rating* (source: MSCI ESG Ratings), used to monitor the portfolio's ESG performance** and which verifies six aspects of governance: Ownership and control, Board of Directors, Payments, Accounting, Business ethics and Fiscal transparency.

All these criteria allow us to assess and to factor into our analysis the dimensions necessary for sound management structures, good relations with – and fair remuneration of – employees and respect for fiscal commitments.

In terms of commitment, we may reopen dialogue issuers in the following cases:

- **Those with an external ESG Rating** below 4/10 for Governance**
- **Those exposed to controversies related to fiscal responsibility and transparency.**

This dialogue takes the following approach:

- Improvement recommendations are drawn up in writing by the fund manager and/or the ESG team when the shortcomings were identified (Year N);
- An initial intermediate report is submitted after one year (N+1);
- A final report is submitted after two years (N+2), which may lead to disinvestment in some high-risk cases if the issuer have not shown improvement (or made an effort to improve)***

Good governance practices for sound management structures, good relations with – and remuneration of – employees and respect for tax commitments

Moreover, to qualify as a Sustainable Investment, issuers must have a governance rating of at least 5/10. And in accordance with the policy of normative exclusion, the Sub-fund cannot invest in companies that are in violation of the United Nations Global Compact or the OECD Guidelines, or ones which are exposed to severe (Level 5) controversies, notably concerning governance.

* These two scores are described in the Amiral Gestion Sustainability Report (appendix II):

<https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

** If the issuer is not covered by this Sub-fund's main external non-financial rating agency (MSCI ESG Ratings), verification will be done by means of internal analysis

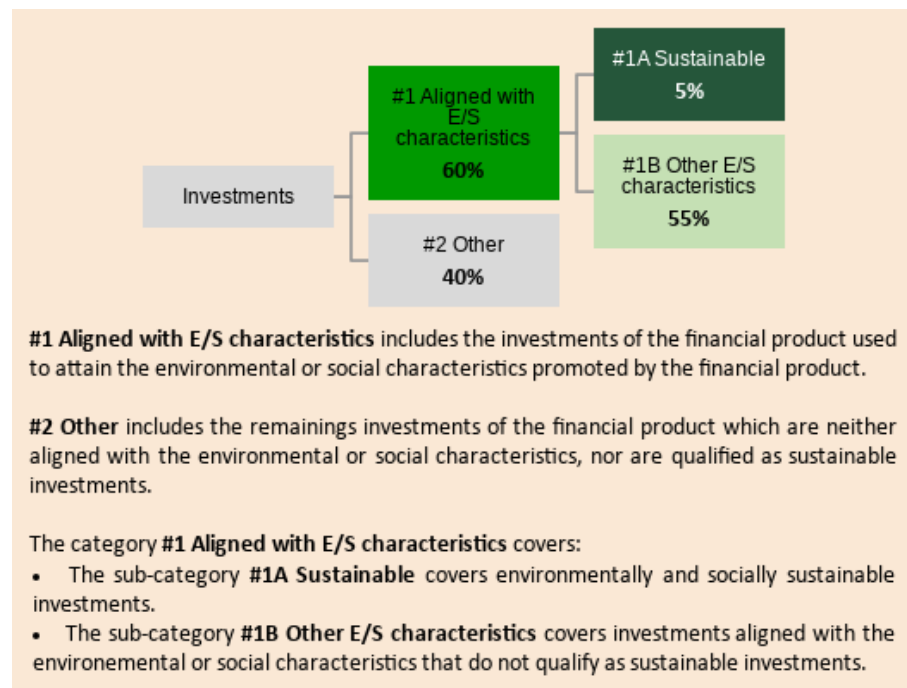

*** Qualitative and/or quantitative analysis

What is the asset allocation planned for this financial product?

In order to calculate alignment with E/S characteristics, we focus on all instruments except cash, derivatives, and short-term debt. **At least 60%** of securities in the portfolio have passed the exclusion filter applicable to the Sub-fund and are covered by ESG analysis that results in a non-financial rating.

To calculate the percentage of sustainable investments, representing at least 5% of investments in the portfolio, we only include investments that meet the sustainability criteria mentioned previously. The denominator is the portfolio's net assets

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Sextant Global Smaller Companies Sub-fund may use derivatives in order to gain exposure to – or partially hedge against – favourable or unfavourable trends in equities, indices, interest rates and forex. These instruments are not used to achieve the environmental or social characteristics promoted by the

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective but not aligned with EU Taxonomy. The Sub-fund has acquired positions in sustainable investments as defined by the taxonomy, up to the minimum aligned green share representing 0% of its assets. To date, communication of alignment data remains partial due to gradual deployment of the CSRD directive.

However, **this Sub-fund will communicate its green share in its annual report** on the basis of data reported by companies.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy ?²

Not applicable, as the portfolio has no commitment to a minimum share of investments aligned with EU Taxonomy.

☐

Yes:

☐

In

gas

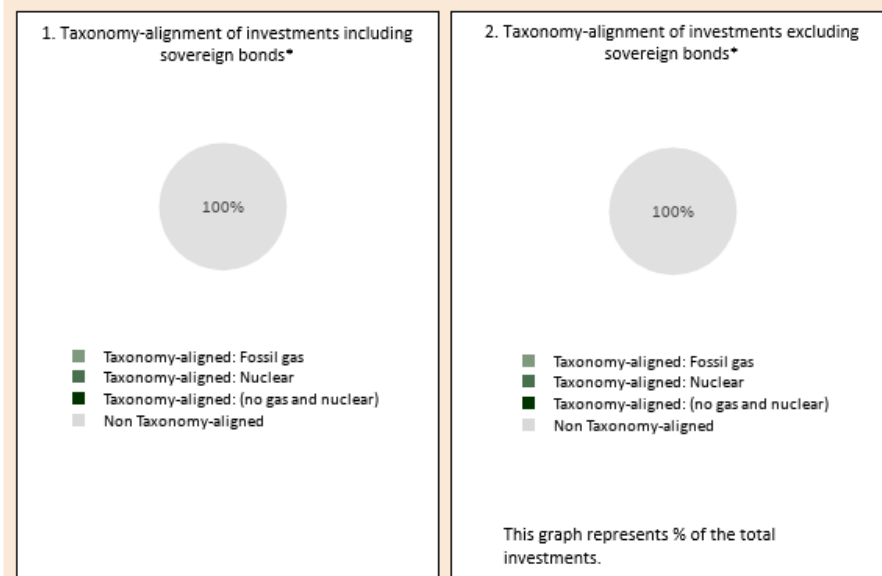

☐

In nuclear energy

☒

No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What is the minimum share of investments in transitional and enabling activities?

Not applicable

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What is the minimum proportion of sustainable investments with an environmental objective non-aligned with EU taxonomy?

The Sub-Fund has an overall minimum sustainable investment commitment of 5% but has **not committed to a minimum share of sustainable investments that are not aligned with the EU green taxonomy.**

What is the minimum share of socially sustainable activities?

The Sub-Fund has an overall minimum sustainable investment commitment of 5% but has **not committed to a minimum share of investment in sustainable investment that have a social objective.**

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The instruments in the “#2 Others” category are diversification tools principally used to manage the portfolio’s cash holdings and to counter unfavourable short-term market trends. This category includes hedging and exposure derivatives, securities with derivatives attached, deposits and cash holdings and borrowed funds. It may also include equities that are not rated by external agencies (very small capitalisations, IPOs etc.). These investments may be subject to the requirements of the Sub-fund’s sectoral and normative exclusions and Amiral Gestion’s policy with respect to controversies mentioned above and included in the DNSH SFDR, subject to data availability.

This symbol represents sustainable investments that have an environmental objective but do **not take into account criteria** applicable to environmentally sustainable economic activities as defined by EU taxonomy.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. **However, the fund management team tracks ESG characteristics and performances of the portfolio relative to an index*** that is coherent with the Sub-fund’s investment strategy and comprises 4,260 issuers: **the MSCI Small Cap World Local.**

** Note that the Sub-fund adopted this ESG reference universe in 2023 as part of its commitment to monitor the relative performance of the portfolio on the basis of PAI each quarter from 31 March 2023. Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023.*

- **How is the benchmark index permanently aligned with each of the environmental or social characteristics promoted by the financial product?**
Not applicable
- **How is alignment of investment strategy with the methodology of the index guaranteed on a permanent basis?**
Not applicable
- **How is the index different from a general market index?**
Not applicable
- **Where can the methodology used for the calculation of the designated index be found?**
Not applicable

Appendix II¹

Precontractual information for the financial products paragraphs 1, 2 and 2b, of (EU) regulation 2019/2088 and article 6, first subparagraph, of (EU) regulation 2020/852

Name of the product: **SEXTANT GRAND LARGE**
 Identity of the legal entity: 969500UU4SV9P2UY7B40

Environmental and/or social characteristics

Sustainable investment implies an investment in an economic activity that contributes to an environmental or social objective, provided it does not have any major adverse impact on such objectives, and the company in which the financial product invests implements good governance practices.

EU taxonomy is a system of classification arising from (EU) regulation 2020/ 852, which drew up a **list of environmentally-sustainable economic activities**. This regulation does not include a list of socially-sustainable economic activities. Sustainable investments that have an environmental objective are not necessarily aligned with the taxonomy.

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective: ____%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective: ____%**

It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of **10%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, **but will not make any sustainable investments**

¹ Publication date of the document: January 2024

What environmental and/or social characteristics are promoted by this financial product?

Sextant Grand Large promotes environmental and social issues, while keeping a watchful eye on company governance practices by means of non-financial metrics applied to the Sub-fund and materialised by the areas monitored by “Sustainability Indicators” set out in the following section of this document. These ESG issues are notably factored into:

- **Amiral Gestion’s own ex-ante fundamental analysis** expressed as a Quality Rating* which embraces 10 ESG criteria out of 28 analysed qualitatively. To round this out, **greater inclusion of certain environmental, social and governance (ESG) challenges in the analysis of issuers is currently being deployed**, resulting in increased consideration of ESG issues in credit research in 2024.
- **Results-based monitoring of the portfolio’s ESG performance**, including ESG analysis of the Sub-fund based on the ‘MSCI ESG Ratings’ methodology of data agency MSCI*.

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. However, the fund management team tracks ESG characteristics and performances of the portfolio relative to an index **of bonds and shares that is coherent with the Sub-fund’s investment strategy and comprises 17,000 securities, without taking ESG performance into account when compiling it.

* Methodology indicators are described in the Amiral Gestion Sustainability Report (appendix II): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

** Note that the Sub-fund adopted this ESG reference universe in 2023 as part of its commitment to monitor the relative performance of the portfolio on the basis of PAI each quarter from 31 March 2023. Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023.

Which sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Sub-fund relies on the following sustainability indicators to assess alignment of the portfolio with the environmental and social characteristics that it promotes:

- **The average internal Quality Rating of the portfolio**, reflecting ESG integration into the fundamental analysis applied to investments in equities.
- **An average external ESG score for the portfolio relative* to that of its benchmark universe described in the previous section.** This ex-post monitoring is mainly based on data supplied by MSCI ESG Rating, but it may also use the ESG performance ratings of Ethifinance’s Gaïa database to complete coverage if necessary.
- **Compliance with the Sub-fund’s policy of excluding controversies:** monitoring of controversies relies on information supplied by the Sustainalytics agency, which assesses and classified incidents according to how serious they are on a scale from 1 (least serious) to 5 (most severe).
- **Compliance with sectoral policy:** filters are applied to identify companies exposed to sectors whose activity is prohibited by the Sub-fund’s investment policy.
- **Compliance with the UN Global Compact and the OECD’s Guidelines for Multinational Enterprises,** relies on the Sustainalytics agency for application of the normative exclusion policy implemented by the Sub-fund.
- **Monitoring average carbon intensity of the portfolio relative* to a benchmark index described in the previous section** (emissions in tons of CO₂/€m of revenue), **as well as climate and environmental footprint metrics** that meet TCFD requirements. These metrics are contained in a periodic report "Appendix 4 - SFDR" attached to the Sub-fund’s annual report.

Sustainability indicators are used to check whether the financial product complies with the environmental and social issues in question.

- **Reporting of the Sub-fund's voting policy:** the Sub-fund has committed to participate systematically** in voting of companies in which it has invested, applying the principles of the Management Company's proprietary voting policy that aims for exemplary policies in governance and social and environmental responsibility.
- **Reporting of our traceable ESG dialogue** ESG with issuers represented in the portfolio on:
 - i) Awareness of best ESG practices, regular discussions on ESG topics via identification of potential factors of value creation and/or risks.
 - ii) Special attention to - and possible surveillance of - issuers whose transparency on ESG practices does not meet our analysis criteria.

Moreover, the Sub-fund has committed to monitoring and appraising Principal Adverse Impacts (PAI).

The sources and methodologies relative to these indicators are described in more detail on the Amiral Gestion website under the heading "Responsible Investment":

<https://www.amiralgestion.com/en/investissement-responsable>

* Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023

**Except in cases where technical issues prevent voting

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The Sextant Grand Large Sub-fund promotes environmental and social issues. Although it does not have an investment strategy focused on a sustainable investment objective as defined by the SFDR Disclosure regulation, the Sub-fund has committed to investing at least **10% of its assets in sustainable investments**, according to the qualification criteria below stemming from the Amiral Gestion approach described below.

DEFINITION OF SUSTAINABLE INVESTMENT: AMIRAL GESTION APPROACH:

Amiral Gestion defines sustainable investment as: "An investment in a financial instrument that is involved in one or several economic activities:

- Contributing significantly to environmental objectives to: i) mitigate climate change with the goal of reaching carbon neutrality by 2050, in accordance with the Paris Agreement on Climate; ii) adapt* to the effects of climate change.
- Making a net positive contribution to one or several of the United Nations Sustainable Development Goals (SDG) at the social level by 2030.
These investments must not have any major adverse impact on other environmental or social objectives, and the companies in which the investments are made must respect the principles of good governance."

The criteria to assess quality of a Sustainable investment under this definition are described in detail in the Sustainable Investment Methodology Note which is available on the Amiral Gestion website:

<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

*A substantial contribution to the objective of adapting to climate change will be an effective criterion for Sustainable Investment qualification from 1 January 2024

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Sub-fund has several other requirements to ensure that its investments do not seriously harm the environment or people. These are:

- **Investment rules that apply to all funds and mandates classed SFDR 8 and 9 and to the whole portfolio:** exclusion policies, Principal Adverse Impact (PAI) considerations, good governance practices.
- **A set of reinforced requirements for sustainable investments** to confirm the contribution to an environmental or social objective and ensure that no harm is done to other sustainability objectives.

This whole DNSH principle, and whether the various measures are applied ex ante and/or ex post, is described in more detail in the Methodology note on our definition of Sustainable Investment and is available on our website:

<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

ESG investment rules specific to this Sub-fund are described under the heading “ESG constraints” and complete the DNSH principle.

— — ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) on sustainability factors through 16 PAI indicators stemming from the European SFDR regulation. **Taking these indicators into consideration is part of Amiral Gestion’s PAI policy.** This policy, including the global approach, the sources and measures put in place for each PAI indicator, is available on the Amiral Gestion website under the heading “Responsible Investment”:

<https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

This document includes:

- **In appendix I: measures implemented across the whole portfolio**
- **In appendix II: additional measures applied to sustainable investments.**

— — ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

To ensure that the Sub-fund’s investments, including those which are considered sustainable, comply with the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, **Amiral Gestion’s normative exclusion policies are implemented ex-ante and ex-post on the basis of Sustainalytics research**, whose conclusions may be confirmed or adjusted following an internal analysis by the fund manager and approved by Amiral Gestion’s committee for surveillance of controversies. If a company in the portfolio is added to the Sustainalytics Watchlist, it is put on surveillance.

In addition, the portfolio excludes the most serious controversies**, including those that may be linked to the principles of these two international standards, and the ESG and management teams are particularly vigilant when assessing and monitoring the quality of company ESG profiles, especially their exposure to events, controversies or other risk factors related to the following issues:

- Human rights (notably forced and child labour)
- Environmental controversies related to climate change and biodiversity
- Fiscal responsibility and transparency

The normative exclusion policy contained in DNSH SFDR applies to sub-funds classed SFDR 8 and 9, as mentioned above.

**The levels excluded are specified in the section "Constraints defined to respect all environmental or social characteristic" section of this document.*

The EU taxonomy contains a principle of "Do No Significant Harm" according to which investments aligned with the taxonomy should not seriously damage EU taxonomy objectives, in addition to the EU's own criteria.

The principle of 'Do No Significant Harm' applies exclusively to the investments underlying a financial product that takes account of EU criteria with respect to environmentally sustainable economic activity. The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

No other sustainable investment should do significant harm to environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

The Sub-fund commits to monitoring and taking into consideration the Principal Adverse Impacts of its investments (PAI SFDR) on sustainability factors, in order to identify and gradually take appropriate action. The Sub-fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

Amiral Gestion's PAI policy, which includes details of sources and the method for taking each indicator into consideration, is available on the website under "Responsible Investment":
<https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

The metrics and the information whereby PAIs are taken into consideration will be published annually in the Sub-fund's periodic document "SFDR Appendix 4", starting in 2024 for the year 2023.

☐ No

What investment strategy does this financial product follow?

Management of the Sextant Grand Large Sub-fund is at the sole discretion of the manager.

Asset allocation depends exclusively on investment opportunities, particularly in equities, which present themselves to the managers on a case-by-case basis and not on macroeconomic considerations.

The achievement of Sextant Grand Large's management objective is based, in the case of equities (and partly in the case of convertible bonds), on a rigorous selection of securities, obtained after an internal fundamental analysis by the management company, the main criteria of which are:

- the quality of the company's management
- the quality of its financial structure
- visibility of the company's future results
- growth prospects for the business
- the company's policy towards its minority shareholders (transparency of information, distribution of dividends, etc.)
- to a lesser extent, the speculative aspect of a security linked to a special situation (takeover bids, public exchange offers, public stock buyback offers, and their equivalents in the countries concerned).

The **Investment strategy** guides investment decisions, taking into account factors such as investment objectives and risk tolerance.

This fundamental analysis also embraces environmental, social and de governance criteria, which account for about one-third of the overall rating (i.e. 10 of the 28 criteria).

The management team endeavours, as far as possible, to meet directly with the companies in which the Sub-fund invests or is likely to invest.

The Sub-fund may have up to 15% exposure to contingent convertibles for the purposes of diversification and yield, but this exposure is carefully monitored.

Investment decisions then depend essentially on the existence of a "margin of safety" constituted by the difference between the market value of the company as assessed by the managers and its market value (market capitalization). In this sense, it is possible to speak of "value investing".

The portion of the assets not invested in equities, due to a lack of opportunities with a sufficient margin of safety, is invested in fixed income, money market or bond products.

Securities are selected after this analysis **and following application of the ESG requirements described in the section below entitled "Constraints defined to respect all the environmental or social issues"**.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The universe of securities eligible for inclusion in Sextant Grand Large is determined after application of the global DNSH principle described previously, and after taking into consideration the following constraints which are specific to the Sub-fund:

- **Respect of the Sub-fund's sector exclusion policy:** thermal coal, tobacco, controversial weapons, civilian firearms, pornography, unconventional fossil fuels with the exception of North American shale oil and gas. Particular attention is also paid to the gambling and alcohol sectors. The criteria, thresholds and procedures for applying this due diligence and exclusion policy are specified in the Amiral Gestion sector policy on the website: <https://api.amiralgestion.com/documents/permalink/2675/doc.pdf>
- **Compliance with the normative exclusion* policy:** exclusion/non-investment in companies in breach of the UN Global Compact and/or the OECD Guidelines for Multinational Enterprises, following an internal review and confirmation of the breach by the committee for monitoring of controversies. Surveillance of companies that appear on the Sustainalytics Watchlist where this status has been confirmed by the committee for monitoring of controversies following an internal review.
- **Exclusion / non-investment in companies exposed to severe controversies (i.e. Level 5 on the Sustainalytics scale)** if confirmed by the committee for monitoring of controversies following an internal reviews. Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities.

Furthermore,

- the Sub-fund has committed to hold a **minimum share of sustainable investments of 10%** and to **monitoring PAI indicators** (for more detail, see the sections devoted to these themes in the present document)
- When the portfolio invests in **unit trusts**, the latter must have the **same SFDR rating** as the Sub-fund.

**When issuers in which the Sub-fund has invested are found to be exposed to severe (level 5) controversies, or to no longer comply with the UN Global Compact and OECD principles, their case shall be put to the committee for surveillance of controversies in order to verify the severity/non-compliant status and decide on possible exclusion from the portfolio, or to put the company on surveillance in the hope that the level of severity will decrease following an internal analysis.*

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

The Sub-fund **has not set a minimal rate of exclusions** from the investment universe arising from use of this filter and non-financial approaches.

● **What is the policy to assess good governance practices of the investee companies?**

Managers of the Sub-fund assess governance on two levels:

- The internal Quality Rating arising from our fundamental analysis* which guides our stock picking: an ex-ante qualitative assessment in our fundamental analysis which covers 10 out of 28 ESG-related criteria. The governance criteria assessed by this rating are management quality, respect for minority shareholders, transparency and the quality of financial communication, responsible compensation for directors and employees. Note that this list has been enriched by adding three new criteria: appraisal of the governance structure, fiscal responsibility and business ethics.
- **External ESG rating*** (source: MSCI ESG Ratings), used to monitor the portfolio's ESG performance and which verifies six aspects of governance: Ownership and control, Board of Directors, Payments, Accounting, Business ethics and Fiscal transparency.

All these criteria allow us to assess and to factor into our analysis the dimensions necessary for sound management structures, good relations with – and fair remuneration of – employees and respect for fiscal commitments.

In terms of commitment, we may reopen dialogue issuers in the following cases:

- Those with an external ESG Rating** below 4/10 for Governance
- Those which are exposed to controversies related to fiscal responsibility and transparency.

This dialogue takes the following approach:

- Improvement recommendations are drawn up in writing by the fund manager and/or the ESG team when the shortcomings were identified (Year N);
- An initial intermediate report is submitted after one year (N+1);
- A final report is submitted after two years (N+2), which may lead to disinvestment in some high-risk cases if the issuer have not shown improvement (or made an effort to improve)***

Moreover, to qualify as a Sustainable Investment, issuers cannot have a governance rating that is lower than 5/10. And in accordance with the policy of normative exclusion, the Sub-fund cannot invest in companies that are in violation of the United Nations Global Compact or the OECD Guidelines, or ones which are exposed to severe (Level 5) controversies, notably concerning governance.

* These two scores are described in the Amiral Gestion Sustainability Report (appendix II):

<https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

** If the issuer is not covered by this Sub-fund's main external non-financial rating agency (MSCI ESG Ratings), verification will be done by means of internal analysis

*** Qualitative and/or quantitative analysis

Good governance practices for sound management structures, good relations with – and remuneration of – employees and respect for tax commitments

Asset allocation refers to the share of investment in a given asset class.

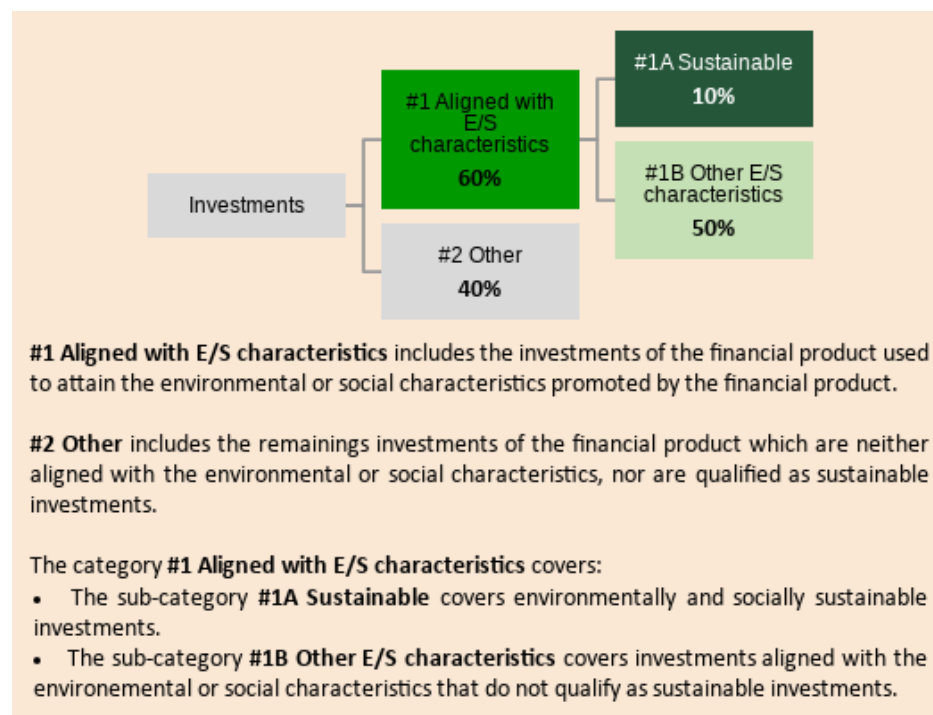

Taxonomy-aligned activities are expressed as a share of:

- **turnover** to reflect the share derived from green activities of companies in which the Sub-fund has invested;
- **capital expenditure** (CapEx) to show green investments by companies in which the financial product invests, for a transition to a green economy, for example;
- **operating costs** (OpEx) to reflect green operations of companies in which the Sub-fund has invested

What is the asset allocation planned for this financial product?

In order to calculate alignment with E/S characteristics, we focus on all instruments except cash, derivatives, and short-term debt. **At least 60%** of securities in the portfolio have passed the exclusion filter applicable to the Sub-fund and are covered by ESG analysis that results in a non-financial rating.

To calculate the percentage of sustainable investments, representing at least 10% of investments in the portfolio, we only include investments that meet the sustainability criteria mentioned previously. The denominator is the portfolio's net assets.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Sextant Grand Large Sub-fund may use derivatives in order to gain exposure to or partially hedge against favourable or unfavourable trends in equities, indices, interest rates and forex. These instruments are not used to achieve the environmental or social characteristics promoted by the product.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments, and therefore is not compelled to invest in sustainable investments that have an environmental objective aligned with EU green taxonomy. The portfolio therefore makes sustainable investments as defined by the taxonomy, with a green share equal to 0% of net assets, notably in view of investments in Asia that are not subject to EU regulations concerning sustainability, especially European taxonomy

However, **this Sub-fund will communicate its green share in its annual report** on the basis of data reported by companies.

- Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?²

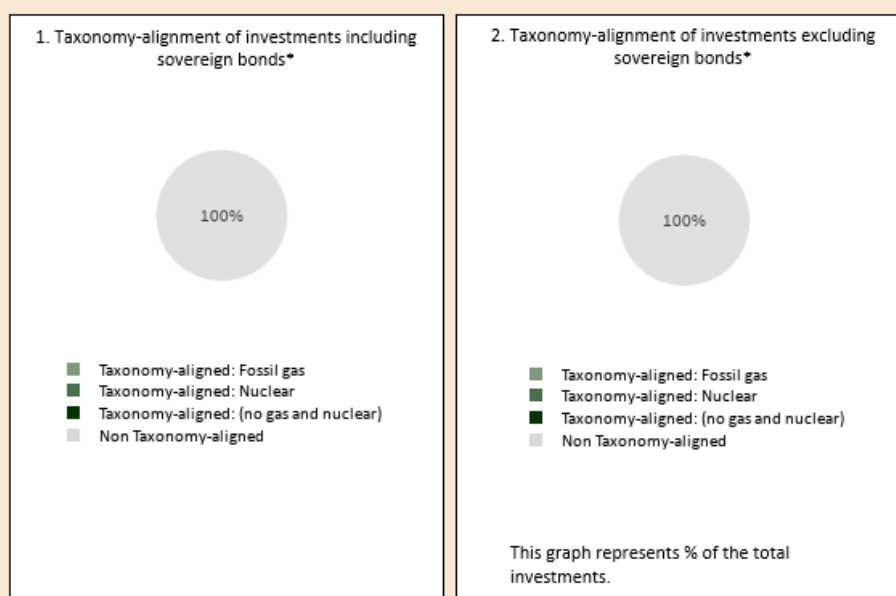

Not applicable, as the portfolio has no commitment to a minimum share of investments aligned with EU Taxonomy.

☐ Yes:

☐ In gas ☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What is the minimum share of investments in transitional and enabling activities?

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund has an overall minimum sustainable investment commitment of 10% but has **not committed to a minimum share of sustainable investments that are not aligned with the EU green taxonomy.**

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What is the minimum share of socially sustainable investments?

The Sub-Fund has an overall minimum sustainable investment commitment of 10% but has **not committed to a minimum share** of investment in sustainable investment that have a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The instruments in the “#2 Others” category are diversification tools principally used to manage the portfolio’s cash holdings and to counter unfavourable short-term market trends. This category includes hedging and exposure derivatives, securities with derivatives attached, deposits and cash holdings and borrowed funds. It may also include equities that are not rated by external agencies (very small capitalisations, IPOs etc.). These investments may be subject to the requirements of the Sub-fund’s sectoral and normative exclusions and Amiral Gestion’s policy with respect to controversies mentioned above and included in the DNSH SFDR, subject to data availability.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. However, the fund management team tracks ESG characteristics and performances of the portfolio relative to an index* of bonds and shares that is coherent with the Sub-fund’s investment strategy and comprises 17,000 securities, without taking ESG performance into account when compiling it.

** Note that the Sub-fund adopted this ESG reference universe in 2023 as part of its commitment to monitor the relative performance of the portfolio on the basis of PAI each quarter from 31 March 2023. Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023.*

- **How is the benchmark index permanently aligned with each of the environmental or social characteristics promoted by the financial product?**

Not applicable

- **How is alignment of investment strategy with the methodology of the index guaranteed on a permanent basis?**

Not applicable

- **How is the index different from a general market index?**

Not applicable

- **Where can I find methodology used for the calculation of the designated index?**

Not applicable

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.amiralgestion.com/en/sextant-grand-large>

Appendix II¹

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Name of the product: **SEXTANT PME**

Identity of the legal entity: 969500COE5KXR78IT826

Environmental and/or social characteristics

Sustainable investment implies an investment in an economic activity that contributes to an environmental or social objective, provided it does not have any major adverse impact on such objectives, and the company in which the financial product invests implements good governance practices.

EU taxonomy is a system of classification arising from (EU) regulation 2020/ 852, which drew up a **list of environmentally-sustainable economic activities**. This regulation does not include a list of socially-sustainable economic activities. Sustainable investments that have an environmental objective are not necessarily aligned with the taxonomy.

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective: ____%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective: ____%**

It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but will not make any sustainable investments

¹ Publication date of the document: January 2024

What environmental and/or social characteristics are promoted by this financial product?

Sextant PME is a sub-fund of the SEXTANT SICAV labelled SRI, which has a dual objective:

- **Financial:** to achieve performance net of management fees higher than the benchmark (MSCI EMU (European Economic and Monetary Union) Micro Cap Net Return)) through a selection of European SMEs.
- **Non-financial:** to invest in companies that stand out for their good ESG practices, according to a best-in-class approach, but also to support those with good potential for improvement, especially in terms of environmental impacts, according to a best-effort approach based on shareholder engagement.

These objectives entail ESG characteristics that are taken into consideration at two levels:

- **An ESG Performance Rating*** that is used on the one hand ex-ante to determine a universe of securities eligible to investment and on the other hand for an ex-post verification of the portfolio's ESG quality. This rating, whose criteria comply with the charter of the Relance label** which the Sub-fund holds, is based on our fundamental analysis and leads to an internal ESG quality rating and indicators selected by our teams on the basis of Ethifinance Gaïa Ratings and constitutes an external ESG Performance rating.

Environment 5 criteria - 22 indicators

- Positive environmental impact of the company's business activity and initiatives in this area (0-25%)
- Overall environmental strategy (12%)
- Controlling environmental impacts (37%)
- Managing climate-related risks and contributing to the energy transition (19%)
- Responsible supply chain: Environment (8%)

Social 4 criteria - 18 indicators

- Positive social and societal impact of the company's business activity and initiatives in this area (0-25%)
- Social policy and job preservation (39%)
- Improving health and safety conditions (19%)
- Responsible supply chain: Social (17%)

Governance 4 criteria - 25 indicators

- Integrity of governance bodies, quality of communication and transparency (25%)
- Governance best practices (48%)
- Business Ethics (14%)
- Gender equality (14%)

Criteria assessed qualitatively by Amiral Gestion's portfolio managers & analysts

- **An internal Quality Rating*** established by the management team as part of fundamental analysis and notably guiding our selection of investments. This Quality Rating takes account of 10 ESG criteria of the 28 analysed qualitatively. These criteria focus on social utility, the nature of the business activity, the motivation and pride of company employees and respect for team members (training policy and career development, corporate culture etc.), a global assessment of the company's environmental policy in the light of sectoral exposure, the existence of controversies, governance policy and alignment of the company's interests with those of minority shareholders, communication and transparency, incentives to encourage directors to act responsibly and to promote sustainable development, respect for the interests of stakeholders, clients and other parties concerned (suppliers, government, fiscal transparency etc).

Moreover, Sextant PME refuses to invest in certain sectors that have significant negative environmental and/or social impacts, or in companies involved in serious controversies or ones that do not respect international guidelines concerning Responsibility***. The Sub-fund therefore implements sectoral and normative exclusion policies and avoids controversies, as described under the heading “ESG constraints” of this document.

Lastly, as required by the Relance label, the Sub-fund promotes job creation and favours participation in primary market operations.

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. The fund management team tracks ESG characteristics and performances of the portfolio relative to a benchmark universe that is coherent with the Sub-fund’s investment strategy and comprises 1220 French and European companies with small and medium-sized capitalisations without taking ESG performance into account when compiling it.

*For details of the methodology underlying these two ESG ratings, see Appendix II of the Amiral Gestion Sustainability Report on the Company website: <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

** For more information about the relance label charter: https://www.economie.gouv.fr/files/files/directions_services/plan-de-relance/Charte_label_relance.pdf?v=1694094995

*** Those which violate the United Nations Global Compact and/or OECD Guidelines for Multinational Enterprises

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Sub-fund relies on the following sustainability indicators to assess alignment of the portfolio with the environmental and social characteristics that it promotes:

- **The average ESG performance rating of the portfolio**, which must be higher than that of its benchmark universe**, in compliance with the Sub-fund’s ESG commitments. The score is based on source data from our internal analysis as well as from indicators selected by our teams from the Gaïa Ratings database of Ethifinance.
- **The average internal Quality Rating of the portfolio**, reflecting ESG integration into fundamental analysis.
- **SRI selectivity**, reflecting the percentage reduction in the benchmark universe** following application of the various non-financial filters (sectoral and normative exclusions, exclusion based on controversies, minimum ESG rating applied to the Sextant PME SRI fund), and should be at least 20% to comply with the Sub-fund’s ESG commitments
- **Compliance with the Sub-fund’s policy of excluding controversies*****: monitoring of controversies relies on information supplied by the Sustainalytics agency, which assesses and classified incidents according to how serious they are on a scale from 1 (least serious) to 5 (most severe).
- **Compliance with the sectoral policy*****: filters are applied to identify companies exposed to sectors whose activity is prohibited by the Sub-fund’s investment policy.
- **Compliance with the UN Global Compact and the OECD’s Guidelines for Multinational Enterprises*****, relies on the Sustainalytics agency for application of the normative exclusion policy implemented by the Sub-fund.
- **Two quality indicators****** on which the Sub-fund has committed to being more highly rated than its universe**:
 - i) Governance/Formalisation of a business conduct and anti-corruption policy: Indicator expressed as a percentage of companies in the portfolio and in the universe that have formalised a policy.
 - ii) Environment/climate change: Carbon intensity (WACI measurement) corresponding to the weighted average of carbon footprint ratios per revenue (sum of weight footprint ratio for each share).
- **Two social and human rights progress indicators****** on which the portfolio is committed to improving relative to its benchmark universe** over 3 years:
 - i) Social/promoting gender equality: Average percentage of women on the Executive Committee
 - ii) Human Rights: Publication of a policy in favour of human rights

Sustainability indicators are used to check whether the financial product complies with the environmental and social issues in question.

- **Total number of people employed in France** by companies represented in the portfolio (an indicator of the France Relance label)
- **Number of primary market operations** in which the portfolio has participated (an indicator of the France Relance label)
- **Monitoring of climate and environmental footprint metrics* as required by TCFD and summarised in “Appendix 4 – SFDR” attached to Sextant PME’s annual report:**
 - i) Carbon intensity per million euros generated (i.e. one of the ESG quality indicators mentioned above).
 - ii) Alignment with 2°C. This metric is an objective of the Paris Agreement to limit global warming to 2°C relative to pre-industrial levels by 2100. It reveals the portfolio’s climate trajectory.
 - iii) Green assets, representing the percentage alignment of the Sub-fund with the European taxonomy.
 - iv) Brown assets, reflecting the portfolio’s exposure to fossil fuels (as a percentage)
 - iv) Environmental footprint, which quantifies different sources of impact related to the company’s activity in a monetary form. This mainly involves measuring the value of negative externalities arising from greenhouse gas emissions, the use of water resources, waste production, air/soil/water pollution and the use of natural resources. This metric is expressed as a percentage of revenues, reflecting the cost of these externalities.
 - v) Exposure to Transition 2030 risks related to higher prices per ton of carbon emissions. This metric is expressed as a % of EBITDA, reflecting the additional cost of these risks.
 - vi) Exposure to physical risks related to climate change (water stress, fires, floods, heatwaves, hurricanes, coastal flooding) summarised by a mark out of 100.
- **Reporting of our traceable ESG Dialogue-Engagement** with issuers represented in the portfolio on:
 - i) Awareness of ESG best practices, regular discussions on ESG questions with identification of potential factors of value creation and/or risks (notably in terms of their impact on global warming);
 - ii) Special attention to - and possible surveillance of - issuers whose transparency on ESG practices does not meet our analysis, with the possibility of divestment in certain cases
- **Reporting of the Sub-fund’s voting policy:** the Sub-fund has committed to participate systematically***** in voting of companies in which it has invested, applying the principles of the Management Company’s proprietary voting policy that aims for exemplary policies in governance and social and environmental responsibility

Moreover, the Sub-fund has committed to monitoring and reporting:

- **its Principle Adverse Impacts (PAI)**, described in the section "How indicators of negative impacts are taken into consideration" of this document.
- **the share of sustainable investments in the portfolio**, in order to ensure that the Sub-fund has achieved the minimum level required, based on Amiral Gestion’s own methodology to qualify sustainable investments, available on the website: [Responsible Investment– Amiral Gestion](https://www.amiralgestion.com/en/sextant-pme)

** Methodologies and sources for these indicators are described in more detail in Amiral Gestion’s Sustainability Report (respectively in section 2.3 and in Appendix II): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>*

*** The reference universe is described above in the section “ESG characteristics”*

**** These exclusions are described in the section “Constraints of the investment strategy” in this document.*

More globally, commitments to coverage and/or performance are associated with certain indicators mentioned above and are detailed where necessary in the section “Constraints of the investment strategy” in this document.

***** These indicators of quality and progress are described in more detail in the Sub-fund’s SRI Transparency Code, available on the Amiral Gestion website: <https://www.amiralgestion.com/en/sextant-pme>*

****** Except in cases where technical issues prevent voting*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

The SEXTANT PME Sub-fund promotes environmental and social issues. Although it does not have an investment strategy focused on a sustainable investment objective as defined by the SFDR Disclosure regulation, the Sub-fund has committed to investing at least **30% of its assets in sustainable investments**, according to the qualification criteria below stemming from the Amiral Gestion approach.

DEFINITION OF SUSTAINABLE INVESTMENT: AMIRAL GESTION APPROACH:

Amiral Gestion defines a sustainable investment as instrument that is involved in one or several of the following economic activities:

- Contributing significantly to environmental objectives to: i) mitigate climate change with the goal of reaching carbon neutrality by 2050, in accordance with the Paris Agreement on Climate; ii) adapt* to the effects of climate change
- Making a net positive contribution to one or several of the United Nations Sustainable Development Goals (SDG) at the social level by 2030.

These investments must not have any major adverse impact on other environmental or social objectives, and the companies in which the investments are made must respect the principles of good governance. "

Criteria for qualification as a sustainable investment (Source: Amiral Gestion's Methodological Note on sustainable investment is available on its website:

<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>)

Presented below are the indicators that assess the real contribution of companies in the portfolio to the objective of mitigating climate change and adapting* to its effects:

1) Temperature alignment: < or = 2°C (Source: Iceberg Data Lab and - when not available - S&P Trucost)

or

2) Taxonomy alignment – minimal green share > or = 10 % of revenues (Source: Sustainalytics, prioritising data supplied by companies, otherwise estimated data)

or

3) Companies that have accepted SBTi ("Target set") or have made a public commitment ("Committed") to the process, or supplied a letter of intent to join the SBT initiative within 12 months following a traceable engagement action by the Management

Source: SBT – <https://sciencebasedtargets.org/reports/sbti-progress-report-2021/progress-data-dashboard#datadashboard>; Amiral Gestion

or

4) Companies that derive at least 25% of revenues from enabling or transitory activities that contribute to an objective that is environmental, but not yet identified in the taxonomy due to their innovative nature or very specific usefulness

Source: Amiral Gestion. Companies whose securities qualify as a sustainable investment under this criteria will be documented by the fund manager and approval will be requested from the IR/RSE team and/or the IR/RSE Pilot Committee

* The substantial contribution to the objective of adapting to climate change will be an effective criterion for Sustainable Investment qualification from January 1, 2024.

Criteria for qualification as a sustainable investment on the basis of net positive contribution to the social SDGs are presented below. Source: MSCI ESG - Sustainable Impact Metrics)

Of the 17 Sustainable Development Goals, seven SDGs with social objectives are selected to measure the net positive contribution:

- SDG 1: No poverty - Eradicate poverty in all its forms
- SDG 2: Zero hunger - Put an end to global hunger, attain food security, improve nutrition, promote sustainable agriculture
- SDG 3: Good health and well-being - Allow people to live in good health and promote well-being for all age groups
- SDG 4: Good quality education - Access to good, inclusive education; apprenticeship opportunities for all throughout the working life

- SDG 5: Equality of sexes - Achieve gender equality and promote autonomy of women and girls
 - SDG 8: Decent working conditions and economic growth - Promote sustainable, inclusive economic growth, full productive employment, and a good job for all
 - SDG 10: Reduce inequalities - Reduce inequalities between and within countries
- ⇒ **On the basis of SDGs 1, 2, 3, 4, 5, 8, 10, for a company to qualify as a sustainable investment under the Management Company's definition, it must obtain:**
- ⇒ **A Net Alignment score = or > 2 for one or several SDGs**
- +
- ⇒ **A positive DNSH SDG filter: the company must have a neutral score (i.e. = or > -1) on the Product Alignment and Operational Alignment criteria for all social SDGs.**

This research assesses alignment of companies in the portfolios of our Sub-funds with social SDGs via:

- identification of companies supplying potential solutions to the challenges mentioned above, thanks to products and services that generate revenues related to these objectives and by estimating the percentage of underlying revenues ("Product alignment score").
- an analysis of the ways in which companies contribute to SDGs through their business activities by improving operational practices, drawing up long-term strategies and being transparent about their progress ("Operational alignment score").

To determine their net alignment contributions, the methodology includes a measure of the positive contribution, but also another key component of DNSH by identifying as the adverse impacts cases of non-alignment by the company due to major ESG controversies, key metrics related to the SDG in question, or exposure to controversial activities. The net alignment score corresponds to the average between the Product Alignment score and the Operational Alignment score. The DNSH of social SDGs is included in each of the scores.

Scores range from -10 ("strongly misaligned") to +10 ("strongly aligned") on the basis of two assessment levels: Product Alignment, which is balance between positive contribution / adverse impacts of goods and services, and Operational Alignment, which is the balance between positive contribution / adverse impacts on social SDGs in business and operations.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Sub-fund has several other requirements to ensure that its investments do not seriously harm the environment or people. These requirements take the form of investment rules applicable to all products classified as Article 8 and Article 9 SFDR, including Sextant PME, across the entire portfolio, and a set of reinforced requirements on sustainable investments.

The measures presented in the chart below are implemented **both ex-post and ex-ante when they affect eligibility of companies in the portfolio** (sectoral and normative exclusions, controversies, etc).

The following tools are used exclusively on an ex-post basis:

- **Requirement to confirm the sustainable nature of investments for portfolios classed SFDR Article 8 (including Sextant PME)**, as this verification allows the company to be qualified a "Sustainable Investment" without affecting inclusion of the security in the portfolio if company policies are in line with ESG characteristics.
- **PAIs taken into consideration**, to track externalities of investments and not an ex-ante selection criteria (except PAI 4, 10 and 11 which concern exclusions)
- **Monitoring governance practices for portfolios classified under Article 8 SFDR (including Sextant PME)**: for more information refer to the section "*How does the Sub-fund assess governance practices at the companies in which it has invested?*" of this document.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

DNSH PROCEDURE APPLIED ACROSS THE PORTFOLIO

+ Assessing good governance practices

For more detail, please see under the heading:
« What is the policy to assess good governance
policies of investee companies? »
in this document

1. Respect for Amiral Gestion's Sectoral policy, i.e. non-involvement of companies in the portfolio in activities connected with tobacco, controversial arms, pornography, thermal coal, unconventional fossil energies (except N. American shale oil and gas). **Exclusion criteria and thresholds are detailed in Amiral Gestion's Sectoral Policy, available on the Company website:** <https://api.amiralgestion.com/documents/permalink/2398/doc.pdf> & **additional sectoral exclusions specific to certain portfolios**
The criteria are detailed where appropriate in the section entitled « What are the binding elements of investment strategy » in this SFDR pre-contractual document

+

2. Respect Amiral Gestion's Normative Policy, i.e. compliance with the United Nations Global Compact and the OECD Guidelines for Multinational Enterprises

+

3. Controversy monitoring and exclusions: Exclusion of companies exposed to severe (Level 5)* ESG controversies, and even to serious (Level 4)* for certain portfolios.
The exclusion levels for each portfolio are detailed in the section entitled « What are the binding elements of investment strategy »

And special attention is paid to all controversies related to the following themes, irrespective of the level of gravity:

- Human rights
- Climate and biodiversity
- Fiscal responsibility

+

4. Taking into account

Principal Adverse Impacts:
Set of practices applicable to all portfolios

For more information, see table 1 under:

« How have the indicators for adverse impacts on sustainability factors been taken into account? »
in this document

REINFORCED DNSH APPLIED TO SUSTAINABLE INVESTMENTS**

5. Confirmation of the contribution to objective E or S by checking that no harm is caused to other sustainability objectives**

Taking PAI indicators into consideration: additional methods applicable to Sustainable Investment (SI)
For more information, see Amiral Gestion's Policy for taking PAI into consideration (Appendix II)

Specific DNSH / Social Objective:

A favourable DNSH SDG filter: the company must attain a neutral score for the Product Alignment and Operational Alignment criteria in all social SDGs i.e. = or > -1** (Source: MSCI ESG Research)

Specific DNSH / Environmental objective:

Absence of environmental controversies for which the level of gravity is significant (3), serious (4) or severe (5)*, especially when related to the six environmental themes of the taxonomy. (Source: Sustainalytics)

Minimum social safeguards: Absence of exposure to social controversies for which the level of gravity is serious (4) or severe (5)*; Removal of « Sustainable Investment » status for companies placed on the Watchlist of the UN Global Compact and/or OECD Guidelines and exclusion in cases of non-compliance (Source: Sustainalytics)

+ Minimum Governance Rating to qualify as a « Sustainable Investment »: 50/100

* On the Sustainalytics scale

** The criteria for positive contribution positive were detailed previously in the question concerning the objectives of sustainable investment

*** For more information, please refer to Amiral Gestion proprietary methodology to qualify Sustainable Investment on the website: <https://api.amiralgestion.com/documents/permalink/2357/doc.pdf>

ESG investment rules specific to this Sub-fund are described under the heading «ESG constraints» and complete the DNSH principle.

— — How have the indicators for adverse impacts on sustainability factors been taken into account?

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) on sustainability factors through 16 PAI indicators stemming from the European SFDR regulation. **Consideration of these indicators is based on:**

The Amiral Gestion PAI Policy. This policy, including the global approach, the sources and measures put in place for each PAI indicator, is available on the Amiral Gestion website under the heading "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

- Table 1 describes measures implemented across the whole portfolio
- Table 2 points out additional measures applied to sustainable investments.

Table 1: Measures implemented across the whole portfolio.

"Reference and name of PAI indicator"		Measures to take account of PAIs across the entire Sextant PME portfolio
PAI 1	GHG emissions <i>Expressed in T/CO2eq</i>	Measuring and monitoring emission indicators, carbon footprint and intensity of the portfolio as part of TCFD climate analysis, notably ahead of definition of a 2030 decarbonisation target by Amiral Gestion in 2024, as a component of Climate Strategy. Inclusion in ESG analysis, especially for the highest-emission sectors, in a double materiality logic. Dialogue with companies falling short on these metrics, especially small and mid capitalisations, as part of our shareholder engagement approach to encourage them to: - improve transparency on their carbon impact and encourage them to publish these metrics ahead of full deployment of the CSRD Directive* - implement a strategy to reduce their carbon emissions, including a set of written objectives. These engagement initiatives take the form of individual dialogue and/or collaborative initiatives in which Amiral Gestion participates (CDP, SBTi notably)** A commitment to outperformance by the portfolio relative to its benchmark index. "WACI": Weighted average of carbon intensity ratios by turnover (sum weight * intensity ratio for each stock) (Source: S&P - Trucost database)
PAI 2	Carbon footprint <i>Expressed in T/CO2e/EURm invested</i>	Inclusion of Climate issues in voting policy: analysis of measures taken by the Board of Directors to combat climate change effectively influences votes concerning re-election of the directors.*** *The scope of application will be extended gradually from 11,600 companies in 2023 to almost 50,000 by 2028 ** For more information, please see the Activist Shareholder Report on the Amiral Gestion website: https://api.amiralgestion.com/documents/permalink/2392/doc.pdf *** For more information, please see the Amiral Gestion voting policy on the Company website: https://api.amiralgestion.com/documents/permalink/2165/doc.pdf https://api.amiralgestion.com/documents/permalink/2165/doc.pdf
PAI 3	Carbon intensity <i>Expressed in tCO2e/EURm turnover</i>	
PAI 4	Exposure to companies active in fossil energies <i>Expressed as a percentage of investments</i>	Sector exclusions: The Sub-Fund excludes coal and conventional and unconventional oil & gas. Exclusion criteria and thresholds are detailed in the SRI transparency Code which is available on the Amiral Gestion website: https://www.amiralgestion.com/fr/sextant-pme
PAI 5	Share of renewable energies (Production and consumption) <i>Expressed as a percentage</i>	The energy mix of operations and the intensity of energy consumption are taken into consideration in ESG analysis where appropriate for the sector, in a double materiality logic (i.e. respectively, PAI 5: companies that have the largest share of non-renewable energy consumption or production; PAI 6: companies operating in sectors that emit the highest levels of GHG and which have the highest energy consumption). Shareholder engagement: dialogue with companies potentially concerned and whose transparency is inadequate, notably small and mid capitalisations, to persuade them to improve transparency on energy consumption and on production / consumption of non-renewable energies and encourage them to publish these metrics ahead of full deployment of the CSRD Directive*. These engagement initiatives take the form of individual dialogue and/or collaborative initiatives in which Amiral Gestion participates (CDP notably)**
PAI 6	Energy consumption <i>Expressed in MWh/EURm of turnover</i>	Apart from the points mentioned above, Amiral Gestion has not at this stage set a target for improvement on these metrics, and will define a more detailed procedure for these PAI after a period of observation of results on these indicators for optimal targeting of the measures. *The scope of application will be extended gradually from 11,600 companies in 2023 to almost 50,000 by 2028 ** For more information, please see the Activist Shareholder Report on the Amiral Gestion website: https://api.amiralgestion.com/documents/permalink/2392/doc.pdf https://api.amiralgestion.com/documents/permalink/2392/doc.pdf
PAI 7	Biodiversity <i>Share expressed as percentage of companies with an impact</i>	Impact on biodiversity is taken into consideration qualitatively in ESG analysis if the activity of the company is likely to generate such negative externalities in protected areas and/or ones rich in biodiversity. The involvement of governance bodies in biodiversity issues is notably monitored by dedicated indicators produced by the CDP (when data is available). Special attention is also paid to all controversies related to biodiversity, however serious. This vigilance may lead to surveillance, dialogue or exclusion, depending on how serious the incident is deemed. Moreover, as part of our environmental policy, Amiral Gestion has committed* to open a reflection in 2025 to set 2030 biodiversity objectives, in accordance with the principles of the Convention on biological diversity. *For more information, please see section 5.3 of the Sustainability Report: https://api.amiralgestion.com/documents/permalink/2391/doc.pdf
PAI 8	Water pollution <i>Expressed in tonnes</i>	These metrics are taken into consideration in ESG analysis where appropriate for the sector, in a double materiality logic (i.e. respectively, PAI 8: as industrial activities produce large amounts of effluents and other sources of water pollution; PAI 9: activities that generate large quantities of hazardous waste).
PAI 9	Production of hazardous waste <i>Expressed in tonnes</i>	Apart from taking this into account when appraising companies, Amiral Gestion has not at this stage set a target for improvement on these metrics, and will define a more detailed procedure for these PAI after a period of observation of results on these indicators for optimal targeting of the measures.

Table 1: Measures implemented across the whole portfolio
(continued)

"Reference and name of PAI indicator"		Measures to take account of PAIs across the entire Sextant PME portfolio
PAI 10	Violations of the United Nations Global Compact and/or OECD Guidelines for Multinational Enterprises <i>Expressed as a percentage of investments</i>	The Sub-fund excludes investment in any company exposed to: - a verified and proven violation of the UN Global Compact or the OECD Guidelines for Multinational Enterprises - a controversy that is serious (Level 4) or severe (Level 5)* indicating a significant violation of the fundamental principles of Responsibility, including those of the two international references mentioned here. *On the Sustainalytics scale which runs from 1 (least serious) to 5 (most serious)
PAI 11	Lack of processes and compliance mechanisms to ensure compliance with the United Nations Global Compact and/or OECD Guidelines for Multinational Enterprises <i>Expressed as a percentage of investments</i>	We closely monitor companies whose practices are insufficient to ensure respect for the UN Global Compact and OECD Guidelines for Multinational Enterprises: - those for which the risk of controversy related to these references is judged "high" by our agency partner Ethifinance - those on the Watchlist of our agency partner Sustainalytics. This surveillance may lead to a dialogue if we deem the risk significant.
PAI 12	Compensation differences according to gender <i>Expressed as average percentage pay gap</i>	This metric is included in ESG analysis, especially for sectors where human capital is a key factor. Apart from taking this into account when appraising companies, Amiral Gestion has not at this stage set a target for improvement on this metric, and will define a more detailed procedure for these PAI after a period of observation of results on this indicator for optimal targeting of the measures.
PAI 13	Gender diversity on the Board of Director <i>Expressed as an average percentage of women directors</i>	Gender parity on the Board of Directors is taken into consideration in ESG analysis when assessing the diversity of governance bodies. Moreover, we make full use of our voting rights* and frequently initiate a dialogue ahead of shareholders' meetings where we see a necessity, to encourage greater awareness of gender parity issues in the composition of Boards of Directors. * For more information, please see the Amiral Gestion voting policy on the Company website: https://api.amiralgestion.com/documents/permalink/2165/doc.pdf
PAI 14	Exposure to controversial arms <i>Expressed as percentage of investments</i>	Exclusion of controversial arms, in accordance with Amiral Gestion's global sectoral policy: any company involved in the development, production, maintenance or commerce of controversial arms or some key components (clusterbombs; antipersonnel mines; chemical and biological arms; incendiary weapons (including white phosphorus); depleted-uranium arms; non-treaty nuclear arms; laser blinding weapons; incendiary devices; undetectable fragments). Sextant PME also excludes conventional and nuclear arms. * Exclusion criteria and thresholds are detailed in the Sub-fund's SRI transparency Code which is available on the Amiral Gestion website: https://www.amiralgestion.com/fr/sextant-pme
PAI S additional	Absence of a human rights management policy <i>Expressed as a percentage</i>	The existence of a written policy for management of human rights is taken into consideration in ESG analysis, especially for companies exposed to these issues due to geographic location of operations and/or the structure of their supply chain. Amiral Gestion participates in a working party devoted to this theme, chaired by the FIR and supported by Human Rights Without Borders, the objective of which is to co-construct with several investors a methodology for analysis of this theme, notably forced and child labour. Publication of a human rights policy is one of the indicators of progress monitored by Sextant PME, with an objective to improve performance of the portfolio relative to the investment universe. In addition, close attention is paid to controversies related to human rights, however serious. This vigilance may lead to surveillance, dialogue or exclusion, depending on how serious the incident is deemed.
PAI E additional	Water consumption and recycling <i>Expressed in m3</i>	This metric is taken into consideration in ESG analysis where appropriate for the sector, in a double materiality logic (i.e. companies whose activities are intensive in water consumption and located in areas of water stress). Apart from taking this into account when appraising companies, Amiral Gestion has not at this stage set a target for improvement on these metrics, and will define a more detailed procedure for this PAI after a period of observation of results on this indicator for optimal targeting of the measures.

Table 2: Additional measures applied to sustainable investments.

PAI concerned	Additional measures applicable to Sustainable Investments <i>These measures round out those already implemented when taking into account PAI for all products classified Article 8 and Article 9 across the whole portfolio</i>		
All PAI indicators except PAI 4, 10 and 14 give rise to exclusions. These indicators are contained in the previous table.	DNSH / Social or environmental objective	Dialogue arising from monitoring of PAI metrics and ESG analysis	<p>Dialogue with companies whose activity is highly exposed to the PAI (i.e. significant impacts and existing improvement avenues) and whose safeguards against negative externalities are insufficient or non-existent.</p> <p>=> Identification* of priority targets for dialogue on the basis of these criteria.</p> <p>The dialogue takes the following approach:</p> <ul style="list-style-type: none"> - Initiation of dialogue in year N (i.e. the year the engagement target is identified) - First interim report in N+1: if no improvement is noted and no action has been taken** a reminder is issued and there is a possibility of a negative vote at the shareholders' meeting if a related resolution is on the agenda*** - Final report in N+2: if no improvement is noted and no action has been taken** <p>=> loss of Sustainable Investment status.</p> <p><i>*Identification takes place after a period of observation and analysis of 2023 PAI indicators. The first rounds of structured DNSH dialogues will begin in 2024.</i></p> <p><i>**Based on quantitative and/or qualitative analysis</i></p> <p><i>*** Voting principles concerning PAI 1, 2, 3 and 13 are detailed in Amiral Gestion's voting policy.</i></p>
PAI 7 Biodiversity "Proportion of companies in the portfolio that declare or are estimated to have activities that impact protected areas and/or ones rich in biodiversity" This indicator is set out in the previous table	DNSH / environmental objective	Dialogue arising from controversies	<p>Special attention is paid to all controversies related to biodiversity, however serious.</p> <p>In cases of sustainable investments, this vigilance causes the team to begin a dialogue with the company if an internal review of the controversy confirms the risk of a major negative impact on biodiversity and ecosystems.</p> <p>In which case, the dialogue is conducted along the following lines:</p> <ul style="list-style-type: none"> - Initiation of dialogue in year N (i.e. the year the controversy is identified) - First interim report in N+1: <p>If satisfactory answers are provided, the dialogue is concluded and the company remains in the portfolio</p> <p>If no corrective measures has been noted and no action has been taken* a reminder is sent to the company.</p> <p>- Final report in N+2: if no corrective has been noted and no action has been taken*</p> <p>=> loss of Sustainable Investment status.</p> <p><i>*Based on a quantitative and/or qualitative analysis</i></p>
PAI 11 "Lack of processes and compliance mechanisms to ensure compliance with the United Nations Global Compact and/or OECD Guidelines for Multinational Enterprises" This indicator is set out in the previous table	DNSH / Social objective & Minimum Social Safeguards	Declassification of companies on the Watchlist	<p>We closely monitor companies whose practices are insufficient to ensure respect for the UN Global Compact and OECD Guidelines.</p> <p>Inclusion on the Watchlist* of these international standards leads to loss of a company's Sustainable Investment status.</p> <p>In cases of non-compliance, the company is excluded** from the portfolio in accordance with Amiral Gestion's normative exclusion policy*** which applies to all investments (in addition to Sustainable Investments).</p> <p><i>* Source: Sustainalytics</i></p> <p><i>**Based on quantitative and/or qualitative analysis</i></p> <p><i>***For more information, please see Amiral Gestion's normative exclusion and surveillance policy on the Company website: https://api.amiralgestion.com/documents/permalink/2397/doc.pdf</i></p>
PAI S "Policy for management of human rights" This indicator can be found in the previous table	DNSH / Social objective & Minimum Social Safeguards	Dialogue arising from controversies	<p>Close attention is paid to controversies related to human rights, however serious.</p> <p>In cases of sustainable investments, this vigilance causes the team to begin a dialogue with the company if an internal review of the controversy confirms the risk of a major impact on fundamental human rights.</p> <p>In which case, the dialogue is conducted along the following lines:</p> <ul style="list-style-type: none"> - Initiation of dialogue in year N (i.e. the year the controversy is identified) - First interim report in N+1: <p>If satisfactory answers are provided, the dialogue is concluded and the company remains in the portfolio</p> <p>If no corrective measures has been noted and no action has been taken* a reminder is sent to the company.</p> <p>- Final report in N+2: if no corrective has been noted and no action has been taken*</p> <p>=> loss of Sustainable Investment status.</p> <p><i>*Based on a quantitative and/or qualitative analysis</i></p>

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

To ensure that the Sub-fund's investments, including those which are considered sustainable, comply with the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, **Amiral Gestion's normative exclusion policies are implemented ex-ante and ex-post on the basis of Sustainalytics research**, whose conclusions may be confirmed or adjusted following an internal analysis by the fund manager and approved by Amiral Gestion's committee for surveillance of controversies. If a company in the portfolio is added to the Sustainalytics Watchlist, it is put on surveillance.

In addition, the portfolio excludes the most serious controversies**, including those that may be linked to the principles of these two international standards, and the ESG and management teams are particularly vigilant when assessing and monitoring the quality of company ESG profiles, especially their exposure to events, controversies or other risk factors related to the following issues:

- Human rights (notably forced and child labour)
- Environmental controversies related to climate change and biodiversity
- Fiscal responsibility and transparency

The normative exclusion policy contained in DNSH SFDR applies to sub-funds classed SFDR 8 and 9, as mentioned above.

** levels excluded are specified under the heading "ESG constraints" of the present document*

The EU taxonomy contains a principle of "Do No Significant Harm" according to which investments aligned with the taxonomy should not seriously damage EU taxonomy objectives, in addition to the EU's own criteria.

The principle of 'Do No Significant Harm' applies exclusively to the investments underlying a financial product that takes account of EU criteria with respect to environmentally sustainable economic activity. The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

No other sustainable investment should do significant harm to environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Since 31/12/2022, the Sub-fund has notably committed to monitoring and taking into consideration the **Principal Adverse Impacts of its investments (PAI SFDR) on sustainability factors**, in order to identify and gradually take appropriate action. The Sub-fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

The methods by which each indicator is taken into account by this Sub-Fund are presented above, in the question "How are indicators concerning adverse impacts taken into consideration"

The metrics and the information whereby PAIs are taken into consideration will be published annually in the Sub-fund's periodic document "SFDR Appendix 4", starting in 2024 for the year 2023.

☐ No

What investment strategy does this financial product follow?

The PME SEXTANT Sub-fund is invested in small and mid-cap stocks. Investment decisions then depend essentially on the existence of a "margin of safety" constituted by the difference between the market value of the company as assessed by the managers and its market value (market capitalization). In this sense, it is possible to speak of "value investing". Positions are acquired with a long-term holding objective (more than two years) and the portfolio is relatively concentrated. The portion of the assets not invested in equities, due to a lack of opportunities with a sufficient margin of safety, is invested in fixed income, money market or bond products. SEXTANT PME invests at least 75% of its assets in equities and securities eligible for the PEA, with a preponderant share of French companies (at least 30% of the Sub-fund's assets in equity instruments issued by companies whose registered office is located in France), and at least 50% of its assets in the European Union's small and mid-sized segment, with at least 10% of its assets invested in equity instruments, as defined in the previous paragraph, of listed French small and mid-sized companies. The fund is eligible for PEA/PME/ETI equity savings plans. Exposure to markets other than those of the European Union is limited to 10% of the assets.

The Sextant PME Sub-fund can be managed in sub-portfolios. This management method is specific to Amiral Gestion. It is based on the free decision-making of each manager-analyst and relies on collective expertise. The Sub-fund's assets are divided into several sub-portfolios, each of which is managed independently by one of the team's manager-analysts. All investment cases are studied, debated and analysed as a group. At the end of this process, each investor is free to invest or not in his sub-portfolio according to his own convictions or to follow the ideas defended by another manager. A coordinating manager ensures that investments are consistent with the Sub-fund's strategy.

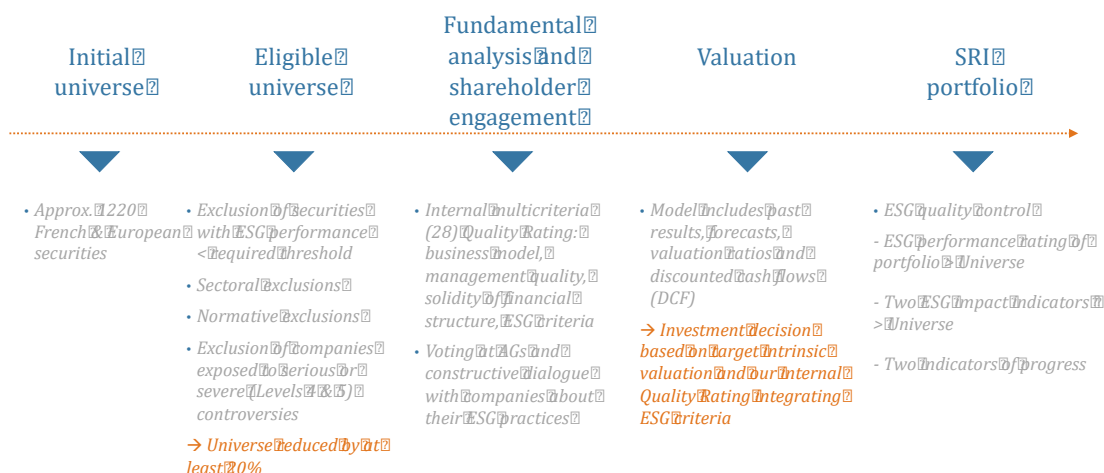

The investment process fully integrates the consideration of ESG criteria into its fundamental analysis. The Sub-fund aims to invest in companies that stand out for their good ESG practices, using a best-in-class approach, but also to support those with good potential for improvement by conducting an active dialogue with them, in order to guide them towards a process of progress on the main key ESG issues in their sector of activity (sources of

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

significant impact, existing levers for improvement). This approach is based on a dual responsibility that fuels the management team's efforts and summarizes their philosophy of responsible investment:

- The fiduciary responsibility of the management team through the central role of ESG analysis in understanding and identifying the material risks of the company and its sources of value creation;
- Their social and shareholder responsibility as an investor

The Sub-fund implements the investment procedure illustrated below, notably with upstream ESG filters (ESG performance rating, sectoral and normative exclusions and exclusions related to controversies), taking ESG criteria into consideration when selecting securities by means of an internal, fundamental analysis Quality Rating for which one-third of criteria are ESG and checking the portfolio against several ESG indicators.

The ESG constraints entailed by this SRI procedure are detailed below.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The universe of securities eligible for inclusion in Sextant PME is determined after application of the global DNSH principle described previously, and after taking into consideration the following constraints which are specific to the Sub-fund:

- **Compliance with the Sub-fund's sectoral exclusion policy:** coal, unconventional and conventional fossil fuels, controversial weapons, conventional and nuclear weapons, tobacco, pornography. *The exclusion criteria and thresholds are detailed in the SRI Transparency Code on the Company website, on the page dedicated to the Sub-fund: <https://www.amiralgestion.com/en/sextant-pme>*
- Compliance with the **normative exclusion policy***: exclusion of companies in violation of the UN Global Compact and/or the OECD Guidelines for Multinational Enterprises, following an internal review and confirmation of the violation by the committee for monitoring of controversies. Surveillance of companies that appear on the Sustainalytics Watchlist where this status has been confirmed by the committee for monitoring of controversies following an internal review.
- **Exclusion/non-investment in companies exposed to severe controversies (i.e. Level 4 and 5 on the Sustainalytics scale)** if confirmed by the committee for monitoring of controversies following an internal review. Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities.
- **Ineligibility of the lowest-rated ESG stocks and a commitment to minimum portfolio coverage through an ESG analysis:** in order to ensure that the companies included in the Sub-fund's portfolio meet a minimum threshold, the management team screens the stocks in the universe using its own proprietary

evaluation method based on Ethifinance's Gaïa Ratings database. **At least 90%** of the companies in the portfolio are thus covered by an**

ESG analysis; the maximum 10% not covered is intended to take into account exceptional cases that do not allow for immediate coverage (small caps for which ESG information is not available or is not readily available, IPOs, etc.) **The minimum ESG rating applied to the Sextant PME SRI fund is 25/100.**

- **SRI selectivity of at least 20%:** Sextant PME's SRI approach is largely based on an ESG Selectivity methodology, i.e. non-financial filters that lead to a reduction of at least 20% in the initial investment universe, comprising 1,220 French and European stocks divided into four groups of small- and mid-caps covered using data from the Gaïa Ratings database of our non-financial ratings partner, the Ethifinance agency. This breakdown is coherent with the investment strategy of the Sub-fund***

In addition, the Sub-fund has committed to respecting:

- **An ESG performance commitment:** In accordance with the requirements of the France Relance Label and the SRI label the Sub-fund holds, Sextant PME is also committed to being better assessed than its investment universe in three areas:
 - i) An ESG indicator aggregated within the Global ESG Performance Score: this score translates into the average ESG score of the portfolio on all E, S and G criteria taken into account in the ESG analysis grid of Amiral Gestion
 - ii) A Quality / Governance (minimum coverage 90%): Formalisation of a business conduct and anti-corruption policy
 - ii) A Quality / Governance (minimum coverage 70%): Carbon footprint

For more detail on these three metrics, see "Sustainability indicators" in this document
- **An ESG progress commitment:** Two other progress indicators of a social and human rights nature are also monitored with the aim of improving the portfolio's performance in relation to its investment universe. The Sextant PME Sub-fund is thus committed to targeting portfolio companies for their performance on these indicators via its commitment actions to improve them in order to reduce the gap with the universe if the portfolio is underperforming and/or to exceed it in order to widen the gap within three years. The two indicators concerned are:
 - i) Promotion of gender equality: Average percentage of women on the Executive Committee
 - ii) Human Rights: Publication of a policy in favour of human rights

Furthermore,

- *The Sub-fund has committed to hold a **minimum share of sustainable investments of 30%** and to **monitoring PAI indicators** (for more detail, see the sections devoted to these themes in the present document)*
- When the portfolio invests in **unit trusts**, the latter must have the **same SFDR classification** as the Sub-fund and they must also be **SRI labelled**.

**When issuers in which the Sub-fund has invested are found to be exposed to severe (level 4 5) controversies, or to no longer comply with the UN Global Compact and OECD principles, their case shall be put to the committee for surveillance of controversies in order to verify the severity/non-compliant status and decide on possible exclusion from the portfolio, or to put the company on surveillance in the hope that the level of severity will decrease following an internal analysis.*

This rate may be expressed as a percentage of the sub-fund's net assets or in terms of the number of issuers in the UCI.

**** The detailed methodologies for definition of the universe and for calculation of the Sub-fund's ESG performance relative to its universe are described in the Sub-fund's SRI Transparency Code which is available on the website*

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

As detailed previously in the questions on investment strategy and ESG constraints, the combination of ESG non-financial filters applied to the Sub-fund (minimum ESG performance rating, sectoral and normative exclusions, exclusion of companies exposed to level 4 and 5 controversies) results in **SRI selectivity of at least 20% i.e. the Sub-fund's reference universe* is reduced by at least 20%.**

** The reference universe is described above in the section "ESG characteristics"*

● What is the policy to assess good governance practices of the investee companies?

Managers of the Sub-fund assess governance on two levels:

- **The internal Quality Rating arising from our fundamental analysis*** which guides our stock picking: an ex-ante qualitative assessment in our fundamental analysis which covers 10 out of 28 ESG-related criteria. The governance criteria assessed by this rating are management quality, respect for minority shareholders, transparency and the quality of financial communication, responsible compensation for directors and employees. Note that this list has been enriched by adding three new criteria: appraisal of the governance structure, fiscal responsibility and business ethics.
- **The ESG Performance Rating* used upstream to determine the eligible universe and ex-post to gauge ESG performance of the portfolio relative to its universe:**

1. Integrity of governance bodies, quality of communication and transparency

(Source: internal qualitative assessment from Amiral Gestion's fundamental analysis)

2. Best governance practices (source: Gaïa Rating database of Ethifinance)

3. Business ethics (source: Gaïa Rating database of Ethifinance)

4. Equal opportunities for men/women (source: Gaïa Rating database of Ethifinance)

All these criteria allow us to assess and to factor into our analysis the dimensions necessary for sound management structures, good relations with – and fair remuneration of – employees and respect for fiscal commitments.

As the Sub-fund enforces a **minimum ESG performance rating for portfolio** eligibility we check that company governance is satisfactory by excluding companies whose practices are poor and by monitoring the Governance rating of those in the portfolio.

In terms of shareholder engagement, we may reopen dialogue issuers in the following cases:

- **If the external ESG Rating** is below 4/10 for Governance**, if the verification by our internal teams reveals major shortcomings that could affect the Company's global profile especially if the weaknesses concern Governance (i.e. PAI 10-13)***
- Those which are exposed to controversies related to fiscal responsibility and transparency, if the importance of the incident harbours a shareholding commitment need.

This dialogue takes the following approach:

- Improvement recommendations are drawn up in writing by the fund manager and/or the ESG team when the shortcomings were identified (Year N);
- An initial intermediate report is submitted after one year (N+1) as part of the analysis of the company and if no progress is noted: a reminder is issued and the manager may vote against if the shortcoming identified is linked to one or more resolutions tabled at the general meeting;
- A final report is submitted after two years (N+2), which may lead to disinvestment in some high-risk cases if the companies have not shown improvement (or made an effort to improve****

Moreover, to qualify as a Sustainable Investment, issuers cannot have a governance rating that is lower than 50/100.

And in accordance with the policy of normative exclusion, the Sub-fund cannot invest in companies that are in violation of the United Nations Global Compact or the OECD Guidelines, or ones which are exposed to serious (Level 4) and severe (Level 5) controversies, notably concerning governance.

**These two ratings are described in the section "ESG characteristics" in this document and in more detail in our Sustainability Report (Appendix II): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>*

*** The Performance rating is based on internal analysis and on a selection of indicators tracked by Ethifinance.*

If the company is not followed by Ethifinance, verification is based on internal analysis

**** Dialogue on PAIs from 2024*

Asset allocation
refers to the share
of investment in a
given asset class.

What is the asset allocation planned for this financial product?

For calculation of alignment with E/S characteristics, we mainly consider securities invested in equities as long as other instruments remain negligible (i.e. less than 10% of the sub-fund's net assets), i.e. money market instruments (incl. UCITS/AIF), exposure derivatives linked to a corporate underlying, fund units and other off-balance sheet diversification assets mentioned above. The instruments excluded from the calculation are included in “#2 Others” in the following chart. **At least 90%** of securities in the portfolio have passed the exclusion filter applicable to the Sub-fund and are covered by ESG analysis that results in a non-financial rating.

To calculate the percentage of sustainable investments, representing at least 30% of investments in the portfolio, we only include investments that meet the sustainability criteria mentioned previously. The denominator is the portfolio's net assets.

Taxonomy aligned activities are in %:

- **of revenues** to reflect the share derived from green activities of companies in which the Sub-fund has invested;
- **of capital expenditure** (CapEx) to show green investments by companies in which the financial product invests, for a transition to a green economy, for example;
- **of operating costs** (OpEx) to reflect green operations of companies in which the Sub-fund has invested.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The SEXTANT PME Sub-fund may use derivatives in order to gain exposure to – or partially hedge against – favourable or unfavourable trends in equities, indices, interest rates and forex.

Investment in derivatives is conditional*:

- The portfolio must not be overexposed
- Provisional nature of exposure (use of derivatives for hedging or exposure)
- The derivatives must also be ESG assessed (same for counterparties to OTC instruments)
- Derivatives cannot be used for shorting non-ESG securities.

*The conditions for use of derivatives are detailed in the SRI transparency Code which is available on the Amiral Gestion website: <https://www.amiralgestion.com/en/sextant-pme>

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective but not aligned with EU Taxonomy. The Sub-fund has acquired positions in sustainable investments as defined by the taxonomy, up to the minimum aligned green share representing 0% of its

assets. To date, communication of alignment data remains partial due to gradual deployment of the CSRD directive.

However, **this Sub-fund will communicate its green share in its annual report** on the basis of data reported by companies.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?²

Not applicable, as the portfolio has no commitment to a minimum share of investments aligned with EU Taxonomy.

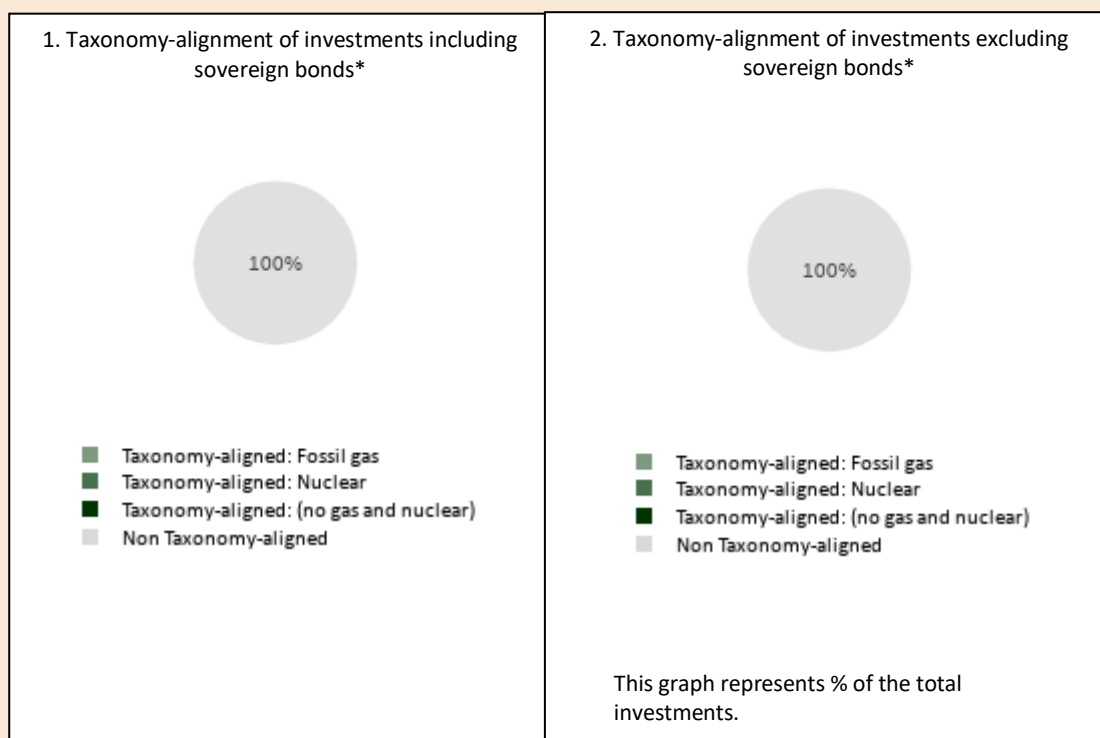

☐ Yes:

☐ In gas ☐ In nuclear energy

☒ No

To comply with EU taxonomy, the criteria applicable to **fossil gas** include limitations on emissions and the switch to fully renewable electricity or low carbon fuels by end-2035. As for **nuclear energy**, the criteria include rules for nuclear security and waste management. **Enabling activities** directly allow other activities to make a substantial contribution to an environmental objective. **Transitory activities** are activities for which there is still no low-carbon alternative and, among others, whose GHG emissions correspond to the best performances achievable.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What is the minimum share of investments in transitional and enabling activities?**

Not applicable

² Activities related to fossil gas and/or nuclear only comply with EU Taxonomy if they help to limit climate change (mitigation of climate change) and do no major harm to any objective of EU Taxonomy – see the explanatory note in the left-hand margin. All the criteria applicable to economic activities in the fossil gas and nuclear sectors that comply with EU Taxonomy are defined in (EU) regulation 2022/1214 of the Commission.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund has a minimum sustainable investment commitment of 30% but has **not committed to a minimum share of sustainable investments that are not aligned with the EU green taxonomy.**

What is the minimum share of socially sustainable investments?

The Sub-Fund has an overall minimum sustainable investment commitment of 30% but has **not committed to a minimum share** of investment in sustainable investment that have a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The instruments in the “#2 Others” category are diversification tools principally used to manage to counter unfavourable short-term market trends. This category includes hedging and exposure derivatives, securities with derivatives attached, deposits and cash holdings and borrowed funds. It may also include equities that are not rated by external agencies (very small capitalisations, IPOs etc.). These investments may be subject to the requirements of the Sub-fund’s sectoral and normative exclusions and Amiral Gestion’s policy with respect to controversies mentioned above and included in the DNSH SFDR, subject to data availability.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The non-financial metrics used by the Sub-fund are **not benchmarked against any specific sustainable index.**

However, the fund management team tracks ESG characteristics and performances of the portfolio relative to a **benchmark universe that is coherent with the Sub-fund’s investment strategy and comprises 1220 French and European companies** of all capitalisation sizes without taking ESG performance into account when compiling it.

- *How is the benchmark index permanently aligned with each of the environmental or social characteristics promoted by the financial product?*

Not applicable

- *How is alignment of investment strategy with the methodology of the index guaranteed on a permanent basis?*

Not applicable

- *How is the index different from a general market index?*

Not applicable

- *Where can one find the method used to calculate the selected index?*

Not applicable

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.amiralgestion.com/en/sextant-pme>

Benchmark indices allow us to ascertain if a financial product has the environmental or social characteristics that it promotes

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first sub-paragraph, of Regulation (EU) 2020/852

Name of the product: **SEXTANT QUALITY FOCUS**
Identity of the legal entity: 9695009DQ4GBBGXOH239

Environmental and/or social characteristics

Sustainable investment implies an investment in an economic activity that contributes to an environmental or social objective, provided it does not have any major adverse impact on such objectives, and the company in which the financial product invests implements good governance practices.

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of sustainable investments with an environmental objective: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of sustainable investments with a social objective: ____%

It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but will not make any sustainable investments

EU taxonomy is a system of classification arising from (EU) regulation 2020/ 852, which drew up a **list of environmentally-sustainable economic activities**. This regulation does not include a list of socially-sustainable economic activities. Sustainable investments that have an environmental objective are not necessarily aligned with the taxonomy.

¹ Publication date of the document: January 2024

What environmental and/or social characteristics are promoted by this financial product?

SEXTANT QUALITY FOCUS promotes environmental and social issues, while keeping a watchful eye on company governance practices by means of non-financial metrics applied to the Sub-fund and materialised by the areas monitored by “Sustainability Indicators”, set out in the following section of this document. These ESG issues are notably factored into results-based monitoring of the portfolio’s ESG performance, including ESG analysis of the Sub-fund based on the ‘**MSCI ESG Ratings**’ methodology of data agency **MSCI***. This independent external score identifies the ESG risks and opportunities inherent in the sectors to which the companies assessed belong, focusing on the key ESG issues in each industry. ‘MSCI ESG Ratings’ identifies 3 to 8 key issues per sector among 35 ESG issues from which companies in the industry generate significant externalities. The Sub-Fund therefore promotes ESG characteristics based on the MSCI ESG Ratings analysis methodology, which is based on a selection of criteria appropriate to the sector, in the areas of climate change, natural capital, pollution and waste, environmental opportunities, human capital, product responsibility, stakeholder opposition and corporate governance and behaviour. The final score is established on a scale ranging from AAA (best) to CCC (worst).

Moreover, the Sub-fund refuses to invest in certain sectors that have significant negative environmental and/or social impacts, or in companies involved in serious controversies or ones that do not respect international guidelines concerning**. The Sub-fund therefore implements sectoral and normative exclusion policies and avoids controversies, as described under the heading “*What are the binding elements of investment strategy*” of this document.

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. The fund management team tracks ESG characteristics and performances of the portfolio relative to a benchmark universe that is coherent with the Sub-fund’s investment strategy and comprises 8,200 international companies with large and medium-sized capitalisations without taking ESG performance into account when compiling it.

* The methodology of this ESG Score established by MSCI ESG Rating is described in more detail in the Amiral Gestion Sustainability Report (appendix II.c): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

*** Those which violate the United Nations Global Compact and/or OECD Guidelines for Multinational Enterprises

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Sub-fund relies on the following sustainability indicators to assess alignment of the portfolio with the environmental and social characteristics that it promotes:

- **An average external ESG score*** for the portfolio relative to that of its benchmark universe **. This monitoring is based mainly*** on the scores established by MSCI ESG Rating.
- **Compliance with the Sub-fund’s policy of excluding****:** monitoring of controversies relies on information supplied by the Sustainalytics agency, which assesses and classified incidents according to how serious they are on a scale from 1 (least serious) to 5 (most severe).
- **Compliance with the sectoral policy****:** filters are applied to identify companies exposed to sectors whose activity is prohibited by the Sub-fund’s investment policy.
- **Compliance with the UN Global Compact and the OECD’s Guidelines for Multinational Enterprises***,** relies on the Sustainalytics agency for application of the normative exclusion policy implemented by the Sub-fund.
- **Monitoring of climate and environmental footprint metrics*** as required by TCFD and summarised in our periodic “Appendix 4 – SFDR” report attached to the Sub-fund’s annual report:

Sustainability indicators are used to check whether the financial product complies with the environmental and social issues in question.

- i) **The average carbon footprint of the portfolio, which must be better than that of its reference universe** for this Sub-Fund.** These are tonnes of CO2 emissions per €M of enterprise value for Scope 1, Scope 2 and Scope 3 upstream.
 - ii) Alignment with 2°C. This metric is an objective of the Paris Agreement to limit global warming to 2°C relative to pre-industrial levels by 2100. It reveals the portfolio's climate trajectory.
 - iii) Green assets, representing the percentage alignment of the Sub-fund with the European taxonomy.
 - iv) Brown assets, reflecting the portfolio's exposure to fossil fuels (as a percentage)
 - v) Environmental footprint, which quantifies different sources of impact related to the company's activity in a monetary form. This mainly involves measuring the value of negative externalities arising from greenhouse gas emissions, the use of water resources, waste production, air/soil/water pollution and the use of natural resources. This metric is expressed as a percentage of revenues, reflecting the cost of these externalities.
 - vi) Exposure to Transition 2030 risks related to higher prices per ton of carbon emissions. This metric is expressed as a % of EBITDA, reflecting the additional cost of these risks.
 - vii) Exposure to physical risks related to climate change (water stress, fires, floods, heatwaves, hurricanes, coastal flooding) summarised by a mark out of 100.
- **Reporting of the Sub-fund's voting policy:** the Sub-fund has committed to participate systematically***** in voting of companies in which it has invested, applying the principles of the Management Company's proprietary voting policy that aims for exemplary policies in governance and social and environmental responsibility.
 - **Reporting of our traceable ESG dialogue** ESG with issuers represented in the portfolio on:
 - i) Awareness of ESG best practices, regular discussions on ESG questions with identification of potential factors of value creation and/or risks (notably in terms of their impact on global warming);
 - ii) Special attention to - and possible surveillance of - issuers whose transparency on ESG practices does not meet our analysis criteria.

Moreover, the Sub-fund has committed to monitoring and reporting:

- **its Principle Adverse Impacts (PAI)**, described in the section "How indicators of negative impacts are taken into consideration" of this document.
- **the share of sustainable investments in the portfolio**, in order to ensure that the Sub-fund has achieved the minimum level required, based on Amiral Gestion's own methodology to qualify sustainable investments, available on: <https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

** Methodologies and sources for these indicators are described in more detail in Amiral Gestion's Sustainability Report (respectively in section 2.3 and in Appendix II): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>*

*** The reference universe is described above in the section "ESG characteristics"*

****This ex-post monitoring is mainly based on data supplied by MSCI ESG Rating, but it may also use the ESG performance ratings of Ethifinance's Gaia database to complete coverage if necessary.*

***** exclusions are described in the section "What are the binding elements of the investment strategy" of the investment strategy" in this document. More globally, commitments to coverage and/or performance are associated with certain indicators mentioned above and are detailed where necessary in this same section of this document.*

****** Except in cases where technical issues prevent voting.*

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

Sextant Quality Focus promotes environmental and social issues. Although it does not have an investment strategy focused on a sustainable investment objective as defined by the SFDR Disclosure regulation, the Sub-fund has committed to investing at least **20% of its assets in sustainable investments**, according to the qualification criteria below stemming from the Amiral Gestion approach.

DEFINITION OF SUSTAINABLE INVESTMENT: AMIRAL GESTION APPROACH

Amiral Gestion defines a sustainable investment as *instrument that is involved in one or several of the following economic activities:*

- *Contributing significantly to environmental objectives to: i) mitigate climate change with the goal of reaching carbon neutrality by 2050, in accordance with the Paris Agreement on Climate; ii) adapt to the effects of climate change.*
- *Making a net positive contribution to one or several of the United Nations Sustainable Development Goals (SDG) at the social level by 2030.*

These investments must not have any major adverse impact on other environmental or social objectives, and the companies in which the investments are made must respect the principles of good governance. "

Presented below are the indicators that assess the real contribution of companies in the portfolio to the objective of mitigating climate change and adapting* to its effects:

1) Temperature alignment: < or = 2°C (Source: Iceberg Data Lab and - when not available - S&P Trucost)
or

2) Taxonomy alignment – minimal green share > or = 10 % of revenues (Source: Sustainalytics, prioritising data supplied by companies, otherwise estimated data)
or

3) Companies that have accepted SBTi ("Target set") or have made a public commitment ("Committed") to the process, or supplied a letter of intent to join the SBT initiative within 12 months following a traceable engagement action by the Management

Source: SBT – <https://sciencebasedtargets.org/reports/sbti-progress-report-2021/progress-data-dashboard#datadashboard>;
Amiral Gestion

or

4) Companies that derive at least 25% of revenues from enabling or transitory activities that contribute to an objective that is environmental, but not yet identified in the taxonomy due to their innovative nature or very specific usefulness

Source: Amiral Gestion. Companies approved as sustainable investments under this criteria will be documented by the fund manager and approval will be requested from the RI/CSR team and/or the RI/CSR Pilot Committee

** The substantial contribution to the objective of adapting to climate change will be an effective criterion for Sustainable Investment qualification from January 1, 2024.*

On the social front, the Sustainable Investment qualification criteria are established on the basis of the net positive contribution to the social SDGs assessed using MSCI ESG - Sustainable Impact Metrics research and according to an approach described in detail in the Amiral Gestion Sustainable Investment Methodological Note available on its website:

<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Sub-fund has several other requirements to ensure that its investments do not seriously harm the environment or people. These requirements take the form of investment rules applicable to all products classified as Article 8 and Article 9 SFDR, including Sextant PME, across the entire portfolio, and a set of reinforced requirements on sustainable investments.

The measures presented in the chart below are implemented both ex-post and ex-ante when they affect eligibility of companies in the portfolio (sectoral and normative exclusions, monitoring and exclusion of controversies, etc).

The following tools are used exclusively on an ex-post basis:

- **Requirement to confirm the sustainable nature of investments for portfolios classed SFDR Article 8 (including Sextant Quality Focus)**, as this verification allows the company to be qualified a "Sustainable Investment" without affecting inclusion of the security in the portfolio if company policies are in line with ESG characteristics.
- **PAI taken into consideration**, to track externalities of investments and not an ex-ante selection criteria (except PAI 4, 10 and 11 which concern exclusions)
- **Monitoring governance practices for portfolios classified under Article 8 SFDR (including Sextant Quality Focus)**: for more information refer to the section "How does the Sub-fund assess governance practices at the companies in which it has invested?" of this document.

ESG investment rules specific to this Sub-fund are described under the heading "What are the binding elements of the investment strategy" and complete the DNSH.

DNSH PROCEDURE APPLIED ACROSS THE PORTFOLIO

+ Assessing good governance practices

For more detail, please see under the heading:
« What is the policy to assess good governance policies of investee companies? »
in this document

1. Respect for Amiral Gestion's Sectoral policy, i.e. non-involvement of companies in the portfolio in activities connected with tobacco, controversial arms, pornography, thermal coal, unconventional fossil energies (except N. American shale oil and gas).
Exclusion criteria and thresholds are detailed in Amiral Gestion's Sectoral Policy, available on the Company website:
<https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>
& additional sectoral exclusions specific to certain portfolios
The criteria are detailed where appropriate in the section entitled « What are the binding elements of investment strategy » in this SFDR pre-contractual document

+

2. Respect Amiral Gestion's Normative Policy, i.e. compliance with the United Nations Global Compact and the OECD Guidelines for Multinational Enterprises

+

3. Controversy monitoring and exclusions: Exclusion of companies exposed to severe (Level 5)* ESG controversies, and even to serious (Level 4)* for certain portfolios.

The exclusion levels for each portfolio are detailed in the section entitled « What are the binding elements of investment strategy »

And special attention is paid to all controversies related to the following themes, irrespective of the level of gravity:

- Human rights
- Climate and biodiversity
- Fiscal responsibility

+

4. Taking into account Principal Adverse Impacts: Set of practices applicable to all portfolios

For more information, please refer to Amiral Gestion's policy for taking PAI into consideration (Appendix I) on the Company website under « Responsible Investment »:
<https://www.amiralgestion.com/fr/investissement-responsable>

**REINFORCED DNSH
APPLIED TO SUSTAINABLE INVESTMENTS****

5. Confirmation of the contribution to objective E or S by checking that no harm is caused to other sustainability objectives**

Taking PAI indicators into consideration: additional methods applicable to Sustainable Investment (SI)

For more information, see Amiral Gestion's Policy for taking PAI into consideration (Appendix II)

Specific DNSH / Social Objective:

A favourable DNSH SDG filter: the company must attain a neutral score for the Product Alignment and Operational Alignment criteria in all social SDGs i.e. = or > -1 ** (Source: MSCI ESG Research)

Specific DNSH / Environmental objective:

Absence of environmental controversies for which the level of gravity is significant (3), serious (4) or severe (5)*, especially when related to the 6 environmental themes of the taxonomy. (Source: Sustainalytics)

Minimum social safeguards: Absence of exposure to social controversies for which the level of gravity is serious (4) or severe (5)*;
Removal of « Sustainable Investment » status for companies placed on the Watchlist of the UN Global Compact and/or OECD Guidelines, and exclusion in cases of non-compliance (Source: Sustainalytics)

+ Minimum Governance Rating to qualify as a « Sustainable Investment »:
5/10

* On the Sustainalytics scale

** The criteria for positive contribution positive were detailed previously in the question concerning the objectives of sustainable investment

*** For more information, please refer to Amiral Gestion proprietary methodology to qualify Sustainable Investment on the website:
<https://api.amiralgestion.com/documents/permalink/2357/doc.pdf>

— — *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAI) on sustainability factors through 16 PAI indicators stemming from the European SFDR regulation. **These indicators are taken into consideration via Amiral Gestion's PAI policy.** This policy, including the global approach, the sources and measures put in place for each PAI indicator, is available on the Amiral Gestion website under the heading "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

This document includes:

- **In appendix I: measures implemented across the whole portfolio**
- **In appendix II: additional measures applied to sustainable investments.**

— — *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

To ensure that the Sub-fund's investments, including those which are considered sustainable, comply with the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, Amiral Gestion's normative exclusion policies are implemented ex-ante and ex-post on the basis of Sustainalytics research, whose conclusions may be confirmed or adjusted following an internal analysis by the fund manager and approved by Amiral Gestion's committee for surveillance of controversies. If a company in the portfolio is added to the Sustainalytics Watchlist, it is put on surveillance.

In addition, the portfolio excludes the most serious controversies**, including those that may be linked to the principles of these two international standards, and the ESG and management teams are particularly vigilant when assessing and monitoring the quality of company ESG profiles, especially their exposure to events, controversies or other risk factors related to the following issues:

- Human rights (notably forced and child labour)
- Environmental controversies related to climate change and biodiversity
- Fiscal responsibility and transparency.

The normative exclusion policy contained in DNSH SFDR applies to sub-funds classed SFDR 8 and 9, as mentioned above.

**Levels excluded are specified under the heading "ESG " of the present*

The EU taxonomy contains a principle of "Do No Significant Harm" according to which investments aligned with the taxonomy should not seriously damage EU taxonomy objectives, in addition to the EU's own criteria.

The principle of 'Do No Significant Harm' applies exclusively to the investments underlying a financial product that takes account of EU criteria with respect to environmentally sustainable economic activity. The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

No other sustainable investment should do significant harm to environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts of its investments (PAI SFDR) on sustainability factors, in order to identify and gradually take appropriate action. The Sub-fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAI in Appendix 1 of the SFDR RTS.

Amiral Gestion's PAI policy, which includes details of sources and the method for taking each indicator into consideration, is available on the website under "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

The metrics and the information whereby PAI are taken into consideration will be published annually in the Sub-fund's periodic document "SFDR Appendix 4", starting in 2024 for the year 2023.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The net assets of the SEXTANT QUALITY FOCUS Sub-fund are 90-110% exposed to international equities. The **Initial Investment Universe** comprises international equities (including French stocks) listed in a regulated market and with capitalisation (current or averaged over five years) in excess of one billion euros. The Sub-fund may, on an ancillary basis, invest in (i) stocks listed in non-OECD markets (emerging markets) and (ii) in international equities (including French stocks) listed in a regulated market and with capitalisation (current or averaged over five years) in excess of one billion euros.

Managers of the SEXTANT QUALITY FOCUS Sub-fund adhere to a management philosophy that strives for long-term capital appreciation via a fundamental approach. To achieve this objective, the Sub-fund invests in stock that the fund managers believe (i) was issued by high-quality companies and (ii) for which valuations are reasonable.

- (i) A company's quality is assessed at the discretion of fund managers. This approach changes over time and takes into consideration a great many characteristics to provide an overall view. For example, the criteria considered by fund managers may include the following.
- High returns on capital, with a business model that requires little capital to operate, so that the company generates substantial profits on capital invested (for example, inventories or plants).
 - High cash conversion, i.e. the share of profits carried forward by the company and accompanied by corresponding cash flows.
 - Intangible assets that act as a barrier to entry, e.g. a brandname, patents, installed base, distribution network etc.
 - Sources of growth that allow the company to reinvest profits at high returns.
 - Scope to raise prices without lowering market share or volumes (i.e. pricing power), notably to offset inflation.
 - A management team and board of directors that prioritise initiatives which yield the best return on capital when the company has to choose between financing organic growth projects, making acquisitions, divesting a division, paying dividends, or buying back shares.
 - The lifespan of the company, to the extent that it has a direct impact on the time during which it will be possible to generate profits. As a result, the Sub-fund favours companies whose business model is unlikely to be disrupted in the medium term, especially if the disruption stems from a technological innovation or an environmental constraint.
 - A management team that appreciates the long-term importance of taking the interests of clients and shareholders into consideration, as well as the interests of others concerned (employees, society, the environment).

(ii) The fund managers invest in companies whose valuations are, in their opinion, lower than the intrinsic value of the company. So, for companies that they judge to be good quality, fund managers create financial models to estimate the potential future free cash - flows they consider most probable. The fund managers then compare shares and invest in the companies of the universe whose stock-market valuations seem most attractive, in order to achieve capital appreciation that is higher than that of the index.

Having applied these investment criteria, and ESG requirements, the Sub-fund builds up a portfolio of about 20-40 shares.

**These requirements are described below in the section "What are the binding elements of investment strategy".*

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The universe of securities eligible for inclusion in Sextant Quality Focus is determined after application of the global DNSH principle described previously, and after taking into consideration the following constraints which are specific to the Sub-fund:

- **Respect for the Sub-fund's exclusion policy:** thermal coal, tobacco, controversial arms, pornography, unconventional fossil energies (except North American shale oil and gas) in line with the terms and thresholds of the Amiral Gestion exclusion policy applicable to the Sub-fund. This policy is available on the Amiral Gestion website under "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2675/doc.pdf>
- **Compliance with the normative exclusion* policy for the Sub-fund:** exclusion/non-investment in companies in breach of the UN Global Compact and/or the OECD Guidelines for Multinational Enterprises, following an internal review and confirmation of the breach by the committee for monitoring of controversies. Companies on the Sustainability Watchlist where this status has been confirmed by the committee for monitoring of controversies following an internal review.
- **Exclusion / non-investment in companies exposed to severe controversies (i.e. Level 5 on the Sustainability scale)** if confirmed by the committee for monitoring of controversies following an internal review. Issuers exposed to serious i.e. Level 4 controversies are placed on watch. Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities.
- **Compliance with minimum thresholds** for ESG analysis coverage of the portfolio:** minimum 75% for equities issued by large caps headquartered in "emerging" countries, equities issued by small and mid caps, debt securities and money market instruments with a high yield credit rating, minimum 90% for equities issued by large caps headquartered in "developed" countries.
- **A performance commitment on the carbon footprint of the portfolio relative to the ESG*** reference universe of the sub-fund.** (Source S&P Trucost: tonnes of CO2 emissions per €M of enterprise value for Scope 1, Scope 2 and Scope 3 upstream.)

Furthermore,

- The Sub-fund has committed to hold a **minimum share of sustainable investments of 20% and to monitoring PAI indicators** (for more detail, see the sections devoted to these themes in the present document)
- When the portfolio invests in **unit trusts**, the latter must have the **same SFDR classification** as the Sub-fund.

**When issuers in which the Sub-fund has invested are found to be exposed to severe (level 4-5) controversies, or to no longer comply with the UN Global Compact and OECD principles, their case shall be put to the committee for surveillance of controversies in order to verify the severity/non-compliant status and decide on possible exclusion from the portfolio, or to put the company on surveillance in the hope that the level of severity will decrease following an internal analysis.*

*** In accordance with the applicable ESG analysis coverage rates recommended by the AMF in its Doctrine 2020-03 for this category of portfolio (Category 2). Coverage may be based on several external ESG ratings (MSCI ESG Ratings, and failing that, the ESG performance rating of the Admiral reference system based on Ethifinance's Gaia database, etc.). These two score methodologies are described in the Amiral Gestion Sustainability Report (appendix II): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>*

**** The Sub-fund ESG reference universe is described above in the section "ESG characteristics"*

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

The Sub-fund **has not set a minimal rate of exclusions** from the investment universe arising from use of this filter and non-financial approaches.

● **What is the policy to assess good governance practices of the investee companies?**

Managers of the Sub-fund assess governance via an external ESG Score (Source: MSCI ESG Ratings)* used to monitor the portfolio's ESG performance and which verifies six aspects of governance: Ownership and control, Board of Directors, Payments, Accounting, Business ethics and Fiscal transparency.

All these criteria allow us to assess and to factor into our analysis the dimensions necessary for sound management structures, good relations with – and fair remuneration of – employees and respect for fiscal commitments.

In terms of commitment, we may reopen dialogue issuers in the following cases:

- **Those with an External ESG rating** (source: MSCI ESG Ratings) below 4/10 for Governance**, if the verification by our internal teams reveals major shortcomings that could affect the Company's global profile especially if the weaknesses concern Governance (i.e. PAI 10-13)***
- **Those exposed to controversies related to fiscal responsibility and transparency**, if the importance of the incident harbours a shareholding commitment need. We are particularly vigilant on this question and pay close attention to all such controversies, however serious.

This dialogue takes the following approach:

- Improvement recommendations are drawn up in writing by the fund manager and/or the ESG team when the shortcomings were identified (Year N);
- An initial intermediate report is submitted after one year (N+1) as part of the analysis of the company and if no progress is noted: a reminder is issued and the manager may vote against if the shortcoming identified is linked to one or more resolutions tabled at the general meeting;
- A final report is submitted after two years (N+2), which may lead to disinvestment in some high-risk cases if the companies have not shown improvement (or made an effort to improve****

Moreover, to qualify as a Sustainable Investment, issuers cannot have a governance rating that is lower than 5/10.

And in accordance with the policy of normative exclusion, the Sub-fund cannot invest in companies that are in violation of the United Nations Global Compact or the OECD Guidelines, or ones which are exposed to serious and severe (Level 5) controversies, notably concerning governance.

**This rating is described in the section "ESG characteristics" in this document and in more detail in our Sustainability Report (Appendix II): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>*

*** If the issuer is not covered by this Sub-fund's main external non-financial rating agency, verification will be done by means of internal analysis*

**** Dialogue on PAI from 2024*

***** Qualitative and/or quantitative analysis*

Good governance practices for sound management structures, good relations with – and remuneration of – employees and respect for tax commitments

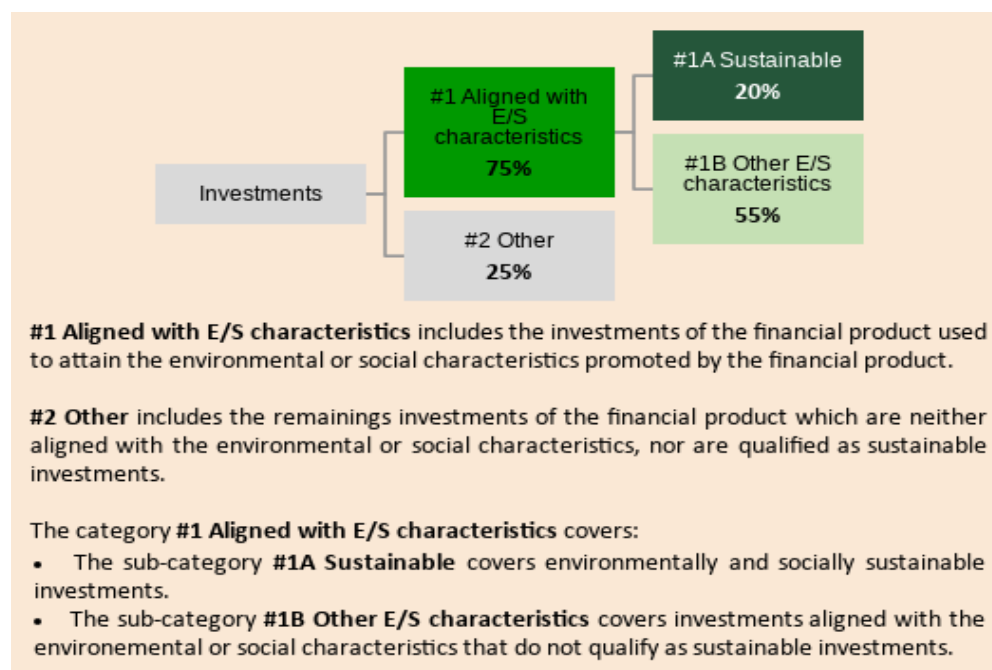

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

In order to calculate alignment with E/S characteristics, we focus on all instruments except cash, derivatives, and short-term debt. **At least 75%** of securities in the portfolio have passed the exclusion filter applicable to the Sub-fund and are covered by ESG analysis that results in a non-financial rating.

To calculate the percentage of sustainable investments, representing **at least 20%** of investments in the portfolio, we only include investments that meet the sustainability criteria mentioned previously. The denominator is the portfolio's net assets.

Taxonomy-aligned activities are expressed as a %:

- **of turnover** to reflect the share derived from green activities of companies in which the Sub-fund has invested;
- **of capital expenditure** (CapEx) to show green investments by companies in which the financial product invests, for a transition to a green economy, for example;
- **of operating costs** (OpEx) to reflect green operations of companies in which the Sub-fund has invested

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Not applicable - the SEXTANT QUALITY FOCUS Sub-fund does not use derivatives.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU taxonomy?

The SEXTANT QUALITY FOCUS Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective but not aligned with EU Taxonomy. The Sub-fund has acquired positions in sustainable investments as defined by the taxonomy, up to the minimum aligned green share representing 0% of its assets. To date, communication of alignment data remains partial due to gradual deployment of the CSRD directive.

However, this Sub-fund will communicate its green share in its annual report on the basis of data reported by companies.

● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?²

Not applicable, as the portfolio has no commitment to a minimum share of investments aligned with EU Taxonomy.

☐

Yes:

☐

In gas

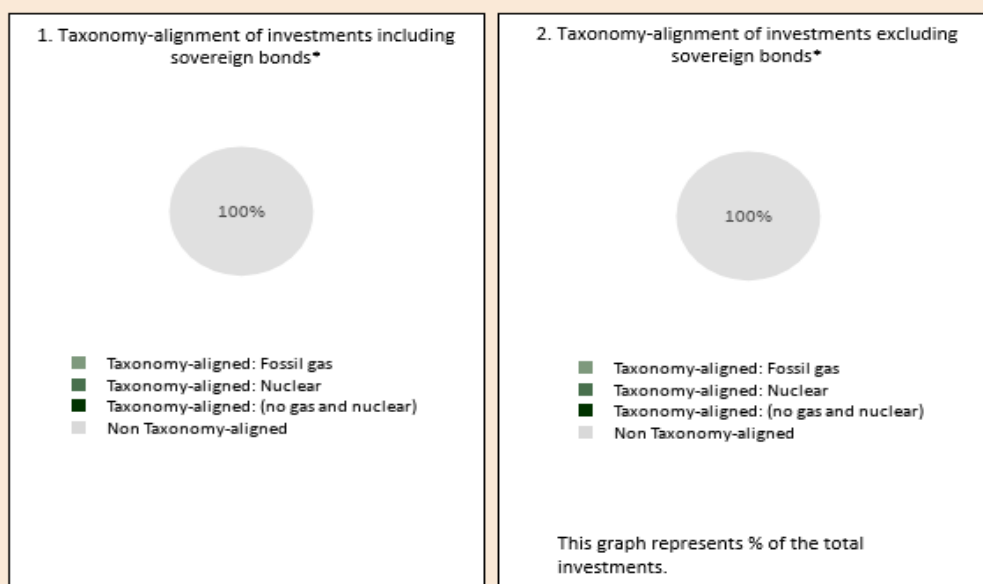

☐

In nuclear energy

☒

No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sub-Fund has an overall minimum sustainable investment commitment of 20% but has **not committed to a minimum share of sustainable investments that are not aligned with the EU green taxonomy.**

² Activities related to fossil gas and/or nuclear only comply with EU Taxonomy if they help to limit climate change (mitigation of climate change) and do no major harm to any objective of EU Taxonomy – see the explanatory note in the left-hand margin. All the criteria applicable to economic activities in the fossil gas and nuclear sectors that comply with EU Taxonomy are defined in (EU) regulation 2022/1214 of the Commission.

To comply with EU taxonomy, the criteria applicable to **fossil gas** include limitations on emissions and the switch to fully renewable electricity or low carbon fuels by end-2035. As for **nuclear energy**, the criteria include rules for nuclear security and waste management. **Enabling activities** directly allow other activities to make a substantial contribution to an environmental objective. **Transitory activities** are activities for which there is still no low-carbon alternative and, among others, whose GHG emissions correspond to the best performances achievable.

This symbol represents sustainable investments that have an environmental objective but do **not take into account criteria** applicable to environmentally sustainable economic activities as defined by EU taxonomy.

What is the minimum share of socially sustainable investments?

The Sub-Fund has an overall minimum sustainable investment commitment of 20% but has **not committed to a minimum share** of investment in sustainable investment that have a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The instruments in the “#2 Others” category are diversification tools principally used to manage the portfolio’s cash holdings and to counter unfavourable short-term market trends. This category includes hedging and exposure derivatives, securities with derivatives attached, deposits and cash holdings and borrowed funds. It may also include equities that are not rated by external agencies (very small capitalisations, IPOs etc.). These investments may be subject to the requirements of the Sub-fund’s sectoral and normative exclusions and Amiral Gestion’s policy with respect to controversies mentioned above and included in the DNSH SFDR, subject to data availability.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The non-financial approach adopted by the SEXTANT QUALITY FOCUS Sub-fund is **not benchmarked against any specific index.**

The fund management team tracks ESG characteristics and performances of the portfolio relative to benchmark universe that is coherent with the Sub-fund’s investment strategy and comprises 8200 international companies with large and medium-sized capitalisations without taking ESG performance into account when compiling it.

- ***How is the benchmark index permanently aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable

- ***How is alignment of investment strategy with the methodology of the index guaranteed on a permanent basis?***

Not applicable

- ***How is the index different from a general market index?***

Not applicable

- ***Where can I find the method used to calculate the selected index?***

Not applicable

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.amiralgestion.com/en/sextant-quality-focus>

Appendix II¹

Pre-contractual information model for the financial products covered by paragraphs 1, 2 and 2b, of (EU) regulation 2019/2088 and article 6, first subparagraph, of (EU) regulation 2020/852

Name of the product: **SEXTANT BOND PICKING**

Identity of the legal entity: 969500HUZ5Y3OLFW3U27

Management company: Amiral Gestion

Environmental characteristics

Sustainable investment implies an investment in an economic activity that contributes to an environmental or social objective, provided it does not have any major adverse impact on such objectives, and the company in which the financial product invests implements good governance practices.

EU taxonomy is a system of classification arising from (EU) regulation 2020/852, which drew up a **list of environmentally-sustainable economic activities**. This regulation does not include a list of socially-sustainable economic activities. Sustainable investments that have an environmental objective are not necessarily aligned with the taxonomy.

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective**: ____%

It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but will not make any sustainable investments

¹ Publication date of the document: January 2024

What environmental and/or social characteristics are promoted by this financial product?

Sextant Bond Picking promotes environmental and social issues, while keeping a watchful eye on company governance practices by means of non-financial metrics applied to the Sub-fund and materialised by the areas monitored by "Sustainability Indicators", set out in the following section of this document. These ESG issues are notably factored into results-based monitoring of the portfolio's ESG performance, including ESG analysis of the Sub-fund based on the 'MSCI ESG Ratings' methodology of data agency MSCI*. To round this out, **greater inclusion of certain environmental, social and governance (ESG) challenges in the analysis of issuers is currently being deployed**, resulting in increased consideration of ESG issues in credit research in 2024.

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. **However, the fund management team tracks ESG characteristics and performances of the portfolio relative to an index**** that is coherent with the Sub-fund's investment strategy and comprises 3,470 issuers: **the Global HY (LG30TRUU Index)**

* The "MSCI ESG Ratings" methodology is described in the Amiral Gestion Sustainability Report (appendix II): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

** Note that the Sub-fund adopted this ESG reference universe in 2023 as part of its commitment to monitor the relative performance of the portfolio on the basis of PAI each quarter from 31 March 2023. Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023.

Which sustainability indicators are used to measure success in supporting the environmental or social issues promoted by the financial product?

The Sub-fund relies on the following sustainability indicators to assess alignment of the portfolio with the environmental and social characteristics that it promotes:

- **An average external ESG score for the portfolio relative* to that of its benchmark index described in the previous section.** This ex-post monitoring is mainly based on data supplied by MSCI ESG Rating, but it may also use the ESG performance ratings of Ethifinance's Gaïa database to complete coverage if necessary.
- **Compliance with the Sub-fund's policy of excluding controversies: monitoring of controversies relies on information supplied by the Sustainalytics agency, which assesses and classified incidents according to how serious they are on a scale from 1 (least serious) to 5 (most severe).**
- **Compliance with sectoral policy:** filters are applied to identify issuers exposed to sectors whose activity is prohibited by the Sub-fund's investment policy.
- **Compliance with the UN Global Compact and the OECD's Guidelines for Multinational Enterprises,** relies on the Sustainalytics agency for application of the normative exclusion policy implemented by the Sub-fund.
- **Monitoring average carbon intensity of the portfolio relative* to a benchmark index described in the previous section.** Emissions in tons of CO₂/€m of revenue, as well as climate and environmental footprint metrics that meet TCFD requirements. These metrics are contained in a periodic report "Appendix 4 - SFDR" attached to the Sub-fund's annual report.
- **Reporting of our traceable ESG dialogue** ESG with issuers represented in the portfolio on:
 - i) Awareness of best ESG practices, regular discussions on ESG topics via identification of potential factors of value creation and/or risks
 - ii) Special attention to - and possible surveillance of - issuers whose transparency on ESG practices does not meet our analysis criteria.

Moreover, the Sub-fund has committed to monitoring and appraising Principal Adverse Impacts (PAI).

The sources and methodologies relative to these indicators are described in more detail on the Amiral Gestion website under the heading "Responsible Investment": [Responsible Investment – Amiral Gestion](#)

*Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023

Sustainability indicators are used to check whether the financial product complies with the environmental and social issues in question.

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

Sextant Bond Picking promotes environmental and social issues. Although it does not have an investment strategy focused on a sustainable investment objective as defined by the SFDR Disclosure regulation, the Sub-fund has committed to investing at least **10% of its assets in sustainable investments**, according to the qualification criteria below stemming from the Amiral Gestion approach described below.

DEFINITION OF SUSTAINABLE INVESTMENT: AMIRAL GESTION APPROACH:

Amiral Gestion defines sustainable investment as: *“An investment in a financial instrument that is involved in one or several economic activities:*

- *Contributing significantly to environmental objectives to: i) mitigate climate change with the goal of reaching carbon neutrality by 2050, in accordance with the Paris Agreement on Climate; ii) adapt* to the effects of climate change.*
- *Making a net positive contribution to one or several of the United Nations Sustainable Development Goals (SDG) at the social level by 2030.*

These investments must not have any major adverse impact on other environmental or social objectives, and the companies in which the investments are made must respect the principles of good governance. ”

The criteria to assess quality of a Sustainable investment under this definition are described in detail in the Sustainable Investment Methodology Note which is available on the Amiral Gestion website: <https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

**The substantial contribution to the objective of adapting to climate change will be an effective criterion for Sustainable Investment qualification from 1 January 2024*

● **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Sub-fund has several other requirements to ensure that its investments do not seriously harm the environment or people. These are:

- **Investment rules that apply to all funds and mandates classed SFDR 8 and 9 and to the whole portfolio:** exclusion policies, Principal Adverse Impact (PAI) considerations, good governance practices.
- **A set of reinforced requirements for sustainable investments** to confirm the contribution to an environmental or social objective and ensure that no harm is done to other sustainability objectives.

This whole DNSH principle, and whether the various measures are applied ex ante and/or ex post, is described in more detail in the Methodology note on our definition of Sustainable Investment and is available on our website:

<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

ESG investment rules specific to this Sub-fund are described under the heading “ESG constraints” and complete the DNSH principle.

The **principle adverse impacts** are the negative consequences arising from investment decisions for sustainability factors related to environmental and social issues, human resources, respect for human rights, the fight against corruption and acts of corruption

— — *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) on sustainability factors through 16 PAI indicators stemming from the European SFDR regulation. **Taking these indicators into consideration is part of Amiral Gestion's PAI policy.** This policy, including the global approach, the sources and measures put in place for each PAI indicator, is available on the Amiral Gestion website under the heading "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

This document includes:

- **In appendix I: measures implemented across the whole portfolio**
- **In appendix II: additional measures applied to sustainable investments.**

— — *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

To ensure that the Sub-fund's investments, including those which are considered sustainable, comply with the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, Amiral Gestion's normative exclusion policies are implemented ex-ante and ex-post on the basis of Sustainalytics research, whose conclusions may be confirmed or adjusted following an internal analysis by the fund manager and approved by Amiral Gestion's committee for surveillance of controversies. If a company in the portfolio is added to the Sustainalytics Watchlist, it is put on surveillance.

In addition, the portfolio excludes the most serious controversies**, including those that may be linked to the principles of these two international standards, and the ESG and management teams are particularly vigilant when assessing and monitoring the quality of company ESG profiles, especially their exposure to events, controversies or other risk factors related to the following issues:

- Human rights (notably forced and child labour)
- Environmental controversies related to climate change and biodiversity
- Fiscal responsibility and transparency

The normative exclusion policy contained in DNSH SFDR applies to sub-funds classed SFDR 8 and 9, as mentioned above.

**The levels excluded are specified in the section "Constraints defined to respect all environmental or social characteristic" section of this document.*

The EU taxonomy contains a principle of "Do No Significant Harm" according to which investments aligned with the taxonomy should not seriously damage EU taxonomy objectives, in addition to the EU's own criteria.

The principle of 'Do No Significant Harm' applies exclusively to the investments underlying a financial product that takes account of EU criteria with respect to environmentally sustainable economic activity. The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

No other sustainable investment should do significant harm to environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the **Principal Adverse Impacts of its investments (PAI SFDR) on sustainability factors**, in order to identify and gradually take appropriate action. The Sub-fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

Amiral Gestion's PAI policy, including details of sources and methods for taking account of each indicator, is available on the company website under the heading "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

The metrics and information for taking account of PAIs will be disclosed in the periodic document "Appendix 4 - SFDR" of the Sub-fund, for the first time in 2024 and concerning 2023.

☐ No

What investment strategy does this financial product follow?

SEXTANT BOND PICKING is primarily invested in international bonds. The investment universe includes public or private issuers, issuers not rated by rating agencies, issuers considered as speculative (high yield) or bonds with complex characteristics (convertible bonds, subordinated bonds, perpetual bonds, etc). The Sub-fund may have up to 15% exposure to contingent convertibles for the purposes of diversification and yield, but this exposure is carefully monitored.

The selection of bonds is based on an internal fundamental analysis of the risk of each issuer. Risk analysis takes into consideration:

- The cyclical nature and operational risks of the business line
- The company's past results and its reputation
- Regularity of cash generation (or equity for financial institutions)
- The reasonable nature of debt ratios (net debt/Ebitda, gearing) with regard to the business line, the Sub-fund's working capital requirements and any tangible and transferable assets that may be held by the issuer
- The issuer's resources, liquidity requirements and debt structure
- Quality of the shareholder base.

The construction of the sub-fund is carried out at the sole discretion of the manager according to the relationship between the yield offered, the credit risk and the sensitivity (interest rate risk and spreads) of the papers selected. The Sextant Bond Picking Sub-fund can be managed in sub-portfolios. This management method is specific to Amiral Gestion. It is based on the free decision-making of each manager-analyst and relies on collective expertise. The Sub-fund's assets are divided into several sub-portfolios, each of which is managed independently by one of the team's manager-analysts. All the investment cases issued are studied, debated and analysed as a group. All the investment cases issued are studied, debated and analysed as a group.

Following this process, **and after applying the ESG requirements described below in the section "Constraints defined to respect all the environmental or social issues"**, everyone is free to invest or not in their sub-portfolio according to their own convictions or to follow the ideas of another manager. A coordinating manager ensures that investments are consistent with the Sub-fund's strategy.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The universe of securities eligible for inclusion in Sextant ASIE is determined after application of the global DNSH principle described previously, and after taking into consideration the following constraints which are specific to the Sub-fund:

- **Compliance with the compartment's sectoral exclusion policy:** thermal coal, tobacco, controversial weapons, civilian firearms, pornography, unconventional fossil fuels with the exception of North American shale oil and gas. Particular attention is also paid to the gambling and alcohol sectors. The criteria, thresholds and procedures for applying this due diligence and exclusion policy are specified in the Amiral Gestion sector policy available on its website: <https://api.amiralgestion.com/documents/permalink/2675/doc.pdf>
- **Compliance with the normative exclusion* policy:** exclusion/non-investment in companies in violation of the UN Global Compact and/or the OECD Guidelines for Multinational Enterprises, following an internal review and confirmation of the violation by the committee for monitoring of controversies. Surveillance of companies that appear on the Sustainalytics Watchlist where this status has been confirmed by the committee for monitoring of controversies following an internal review.
- **Exclusion/non-investment in companies exposed to severe controversies (i.e. Level 5 on the Sustainalytics scale) if confirmed by the committee for monitoring of controversies following an internal review.** Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities.

Furthermore,

- the Sub-fund has committed to hold a **minimum share of sustainable investments of 10% and to monitoring PAI indicators** (for more detail, see the sections devoted to these themes in the present document)
- when the portfolio invests in **unit trusts**, the latter must have the **same SFDR rating** as the Sub-fund.

**When issuers in which the Sub-fund has invested are found to be exposed to severe (level 5) controversies, or to no longer comply with the UN Global Compact and OECD principles, their case shall be put to the committee for surveillance of controversies in order to verify the severity/non-compliant status and decide on possible exclusion from the portfolio, or to put the company on surveillance in the hope that the level of severity will decrease following an internal analysis..*

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

The Sub-fund **has not set a minimal rate of exclusions** from the investment universe arising from use of this filter and non-financial approaches.

● What is the policy to assess good governance practices of the investee companies?

Managers of the Sub-fund assess governance via an external ESG Score (Source: MSCI ESG Ratings)*, used to monitor the portfolio's ESG performance and which verifies six aspects of governance: Ownership and control, Board of Directors, Payments, Accounting, Business ethics and Fiscal transparency.

All these criteria allow us to assess and to factor into our analysis the dimensions necessary for sound management structures, good relations with – and fair remuneration of – employees and respect for fiscal commitments.

In terms of commitment, we may reopen dialogue issuers in the following cases:

- Those with an external ESG Rating** below 4/10 for Governance
- Those which are exposed to controversies related to fiscal responsibility and transparency.

This dialogue takes the following approach:

- Improvement recommendations are drawn up in writing by the fund manager and/or the ESG team when the shortcomings were identified (Year N);
- An initial intermediate report is submitted after one year (N+1);
- A final report is submitted after two years (N+2), which may lead to disinvestment in some high-risk cases if the issuer have not shown improvement (or made an effort to improve)***

Moreover, to qualify as a Sustainable Investment, issuers cannot have a governance rating that is lower than 5/10. And in accordance with the policy of normative exclusion, the Sub-fund cannot invest in companies that are in violation of the United Nations Global Compact or the OECD Guidelines, or ones which are exposed to severe (Level 5) controversies, notably concerning governance.

**This rating is described in the Amiral Gestion Sustainability Report (appendix II):*

<https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

*** if the issuer is not covered by this Sub-fund's main external non-financial rating agency (MSCI ESG Ratings), verification will be done by means of internal analysis*

**** Qualitative and/or quantitative analysis*

What is the asset allocation planned for this financial product?

In order to calculate alignment with E/S characteristics, we focus on all instruments except cash, derivatives, and short-term debt. At least 60% of securities in the portfolio have passed the exclusion filter applicable to the Sub-fund and are covered by ESG analysis that results in a non-financial rating.

To calculate the percentage of sustainable investments, representing at least 10% of investments in the portfolio, we only include investments that meet the sustainability criteria mentioned previously. The denominator is the portfolio's net assets.

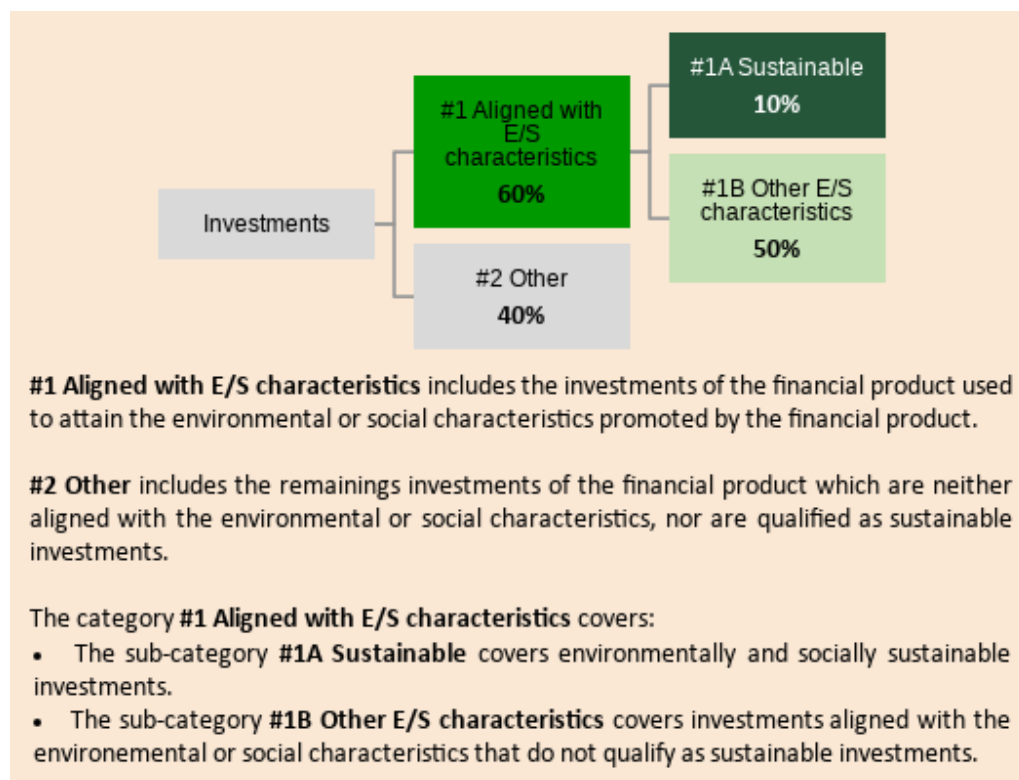

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** to reflect the share derived from green activities of companies in which the Sub-fund has invested;
- **capital expenditure** (CapEx) to show green investments by companies in which the financial product invests, for a transition to a green economy, for example;
- **operational expenditure** (OpEx) to reflect green operations of companies in which the Sub-fund has invested

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

The Sextant Bond Picking Sub-fund may use derivatives in order to gain exposure to or partially hedge against favourable or unfavourable trends in equities, indices, interest rates and forex. These instruments are not used to achieve the environmental or social characteristics promoted by the product.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective but not aligned with EU Taxonomy. The Sub-fund has acquired positions in sustainable investments as defined by the taxonomy, up to the minimum aligned green share representing 0% of its assets. To date, communication of alignment data remains partial due to gradual deployment of the CSRD directive.

However, this Sub-fund will communicate its green share in its annual report on the basis of data reported by companies.

- Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU taxonomy?²

☐

Yes:

☐

In gas

☐

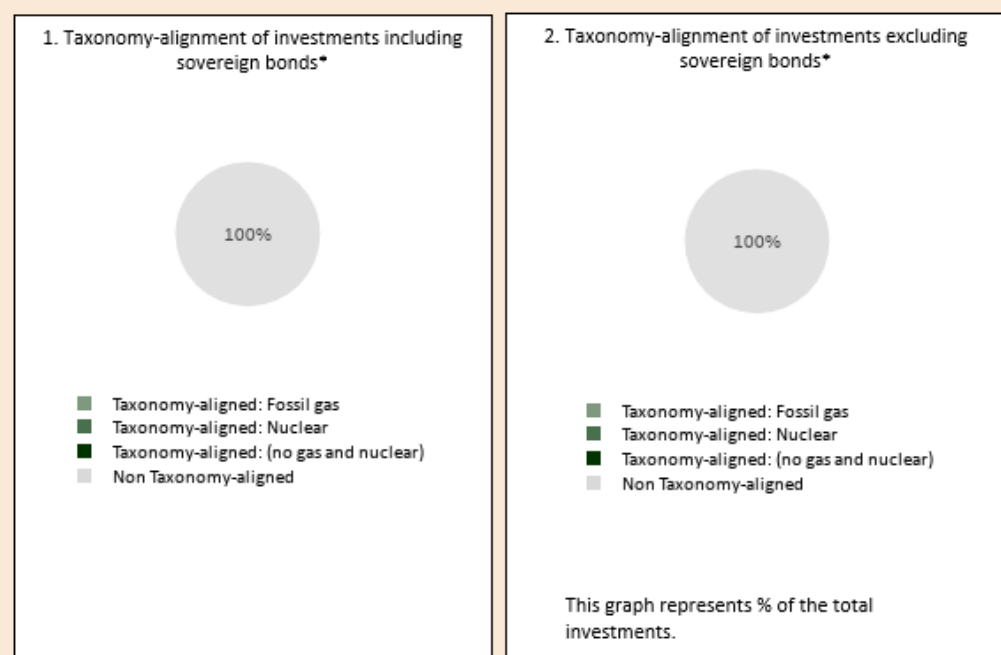

In nuclear energy

☒

No

To comply with EU taxonomy, the criteria applicable to **fossil gas** include limitations on emissions and the switch to fully renewable electricity or low carbon fuels by end-2035. As for **nuclear energy**, the criteria include rules for nuclear security and waste management. **Enabling activities** directly allow other activities to make a substantial contribution to an environmental objective. **Transitory activities** are activities for which there is still no low-carbon alternative and, among others, whose GHG emissions correspond to the best performances achievable.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What is the minimum share of investments in transitional and enabling activities?

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU taxonomy?

The Sub-Fund has an overall minimum sustainable investment commitment of 10% but has **not committed to a minimum share of sustainable investments that are not aligned with the EU green taxonomy.**

² Activities related to fossil gas and/or nuclear only comply with EU Taxonomy if they help to limit climate change (mitigation of climate change) and do no major harm to any objective of EU Taxonomy – see the explanatory note in the left-hand margin. All the criteria applicable to economic activities in the fossil gas and nuclear sectors that comply with EU Taxonomy are defined in (EU) regulation 2022/1214 of the Commission.

What is the minimum share of socially sustainable investments?

The Sub-Fund has an overall minimum sustainable investment commitment of 10% but has **not committed to a minimum share** of investment in sustainable investment that have a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The instruments in the “#2 Others” category are diversification tools principally used to manage the portfolio’s cash holdings and to counter unfavourable short-term market trends. This category includes hedging and exposure derivatives, securities with derivatives attached, deposits and cash holdings and borrowed funds. It may also include equities that are not rated by external agencies (very small capitalisations, IPOs etc.). These investments may be subject to the requirements of the Sub-fund’s sectoral and normative exclusions and Amiral Gestion’s policy with respect to controversies mentioned above and included in the DNSH SFDR, subject to data availability.

Benchmark indices allow us to ascertain if a financial product has the environmental or social characteristics that it promotes

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index.

However, the fund management team tracks ESG characteristics and performances of the portfolio relative to **an index* that is coherent with the Sub-fund’s investment strategy** and comprises 3,470 issuers: **the Global HY (LG30TRUU Index)**

** Note that the Sub-fund adopted this ESG reference universe in 2023 as part of its commitment to monitor the relative performance of the portfolio on the basis of PAI each quarter from 31 March 2023. Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023.*

- **How is the benchmark index permanently aligned with each of the environmental or social characteristics promoted by the financial product?**

Not applicable

- **How is alignment of investment strategy with the methodology of the index guaranteed on a permanent basis?**

Not applicable

- **How is the index different from a general market index?**

Not applicable

- **Where can I find the method used to calculate the selected index?**

Not applicable

Where can I find more product specific information online?

More product-specific information can be found on the website:

Appendix III¹

Pre-contractual information model for the financial products covered by Article 9, paragraphs 1 to 4b, of (EU) regulation 2019/2088 and article 5, first sub-paragraph, of (EU) regulation 2020/852

Name of the product: SEXTANT CLIMATE TRANSITION

Identity of the legal entity: 969500HKVRINHZE1DR30

Sustainable investment objective

Sustainable investment implies an investment in an economic activity that contributes to an environmental or social objective, provided it does not have any major adverse impact on such objectives, and the company in which the financial product invests implements good governance practices.

EU taxonomy is a system of classification arising from (EU) regulation 2020/ 852, which drew up a **list of environmentally-sustainable economic activities**. This regulation does not include a list of socially-sustainable economic activities. Sustainable investments that have an environmental objective are not necessarily aligned with the taxonomy.

Does this financial product have a sustainable investment objective?

☒ ☒ ☒ **Yes**

☒ **It will make a minimum of sustainable investments with an environmental objective: 90%***

☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ in economic activities that do not qualify as environmentally sustainable under the EU taxonomy

☐ **It will make a minimum of sustainable investments with a social objective: %**

**i.e. 90% of the portfolio including cash and derivatives used occasionally, i.e. 100% of equity investments*

☐ ☐ ☐ **No**

☐ **It promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU taxonomy

☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy

☐ with a social objective

☐ **It promotes E/S characteristics, but will not make any sustainable investments**

¹ Publication date of the document: January 2024

What is the sustainable investment objective of this financial product?

Sextant Climate Transition Europe is a sub-fund with a management objective to outperform the MSCI EMU Small Cap index over the recommended five-year investment period, net dividends reinvested. This objective shall be achieved via exposure to the equities of European companies that are remarkable for their leadership in climate-related issues, as well as good environmental, social and governance (ESG) policies. Investments are selective on the basis of their Socially Responsible Investment (SRI) policies relative to an investible universe.

Therefore, the non-financial objective of the Sub-fund in relation to climate is to:

- Finance small- and mid-sized companies whose business models take account of climate-related issues
- Actively support companies that can, over the recommended investment period, make a tangible positive contribution to the fight against global warming.

In this respect and in accordance with its Article 9 SFDR classification, the Sub-fund implements an investment strategy focused on a sustainable investment objective as defined by SFDR, with a commitment to invest 100%* of net assets in sustainable investments that contribute to the environmental objective of mitigating climate change** based on Amiral Gestion's definition and eligibility criteria to qualify a sustainable investment with an environmental objective, summarised in the following section of the present document and detailed in the Methodology Note on the Company website: <https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

The Sub-fund's investment strategy is not benchmarked against an EU "climate transition" index or an EU "Paris agreement" index as defined by (EU) regulation 2016/2011, and its investment policy focuses on climate transition not covered by an index at present. To offset the absence of an index that is appropriate for the investment strategy, **the Sub-fund has defined an investment universe** coherent with its investment strategy and reflecting a universe that would be eligible for inclusion in the Sub-fund. **This universe comprises 2,100 small and mid-cap European companies selected by applying a double materiality climate filter** to an initial investment universe of 2,620 companies.

**i.e. at least 90% of the portfolio including cash and derivatives used on an occasional basis*

*** of which at least 5% aligned with EU green taxonomy*

What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?

Sextant Climate Transition Europe is a Sub-fund of SEXTANT SICAV classed "Article 9" in SFDR and with a sustainable investment strategy focused on an environmental objective of climate change mitigation according to the definition and eligibility criteria used by Amiral Gestion to qualify sustainable investment, summarised below.

To assess achievement of this sustainable investment objective, the main indicators* are:

- **The share of sustainable investments in the portfolio** based on the approach and criteria detailed below (in green), noting that **the Sub-fund has committed to 100% of securities qualifying as sustainable investments with an environmental objective to mitigate climate change** (i.e. at least 90% of the portfolio including cash and derivatives used on an occasional basis).
- **The share of investments aligned with EU green taxonomy**, noting that **the green share in the portfolio must be at least 5% of assets**.
- **Alignment of the portfolio with the Paris Agreement on Climate and the sub-fund's Temperature with a three-year commitment relative to its ESG climate benchmark index ****
- **The engagement and climate maturity score of companies represented in the portfolio**. This score (/100) is an assessment tool developed internally by Amiral Gestion. It enables us to assess the maturity of companies in terms of risk management and climate opportunities at the governance level /20%, transparency and consistency of engagements /40% and related action plans including the contribution of products and services /40%. The score notably helps to identify points requiring attention and ways of improving climate performance that could be the object of engagement actions with companies.

- **The exclusion rate resulting from the climate materiality*** filter**
- **The exclusion rate resulting from ESG and non-financial filters** (ESG and governance ratings, sectoral and normative exclusions and controversies)
- **Compliance with normative policy****** (i.e. the UN Global Compact and the OECD's Guidelines for Multinational Enterprises), relies on the Sustainalytics agency for application of the normative exclusion policy implemented by the Sub-fund.
- **Compliance with the Sub-fund's policy of excluding controversies******: monitoring of controversies relies on information supplied by the Sustainalytics agency, which assesses and classified incidents according to how serious they are on a scale from 1 (least serious) to 5 (most severe).
- **Compliance with sectoral policy******: filters are applied to identify companies exposed to sectors whose activity is prohibited by the Sub-fund's investment policy.
- **The average ESG performance rating**** of the portfolio**, relative to that of the ESG climate universe* (sources: MSCI ESG Ratings, Amiral Gestion ESG rating / Ethifinance BDD Gaïa Ratings, Amiral Gestion ESG Quality Rating)
- **The average internal ESG Quality Rating of the portfolio**, reflecting the presence of ESG considerations in fundamental analysis.
- **Monitoring of climate metrics and other environmental footprints******* in accordance with the requirements of TCFD:
 - i) Carbon intensity per million euros of revenue generated
 - ii) Brown assets, reflecting the portfolio's exposure to fossil fuels (as a percentage)
 - iii) Environmental footprint, which quantifies different sources of impact related to the company's activity in a monetary form. This mainly involves measuring the value of negative externalities arising from greenhouse gas emissions, the use of water resources, waste production, air/soil/water pollution and the use of natural resources. This metric is expressed as a percentage of revenues, reflecting the cost of these externalities.
 - v) Exposure to the risks of Transition 2030, which aims to measure the risks entailed by higher emission prices per ton of carbon. This metric is expressed as a % of EBITDA representing extra costs arising from these risks.
 - vi) Exposure to physical risks related to climate change (water stress, fires, floods, heatwaves, cold spells, hurricanes, coastal flooding) summarised by a score out of 100.

Furthermore:

- **The Sub-fund aims to support companies that have a role to play in the climate transition and engages in active dialogue to assist them in this domain.** It will therefore note any related shareholder engagement initiatives in its periodic report "Appendix 5 SFDR" including dialogue and reports of systematic participation at shareholder meetings in accordance with Amiral Gestion's voting policy (except where technical factors prevent voting).
- **The Sub-fund has committed to monitoring and reporting its Principal Adverse Impacts (PAI),** described in "How indicators of negative impacts are taken into consideration" in the present document.

➔ AMIRAL GESTION SUSTAINABLE INVESTMENT DEFINITION AND QUALIFICATION CRITERIA

Amiral Gestion defines sustainable investment as: "An investment in a financial instrument that is involved in one or several economic activities:

- Contributing significantly to environmental objectives to: i) mitigate climate change with the goal of reaching carbon neutrality by 2050, in accordance with the Paris Agreement on Climate; ii) adapt to the effects of climate change.*****
- Making a net positive contribution to one or several of the United Nations Sustainable Development Goals (SDG) at the social level by 2030.

These investments must not have any major adverse impact on other environmental or social objectives, and the companies in which the investments are made must respect the principles of good governance. ""

Sustainable investment eligibility criteria are summarised below and a more detailed explanation can be found in our Sustainable Investment Methodology Note, which is available on the company website: <https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

Presented below are the indicators that assess the real contribution of companies in the portfolio to the objective of mitigating climate change and adapting*** to its effects:**

1) Temperature alignment: < or = 2°C

Source: (Source: Iceberg Data Lab and - when not available - S&P Trucost)

or

2) Taxonomy alignment – minimal green share > or = 10 % of revenues

Source: (Source: Sustainalytics, prioritising data supplied by companies, otherwise estimated data)

or

3) Companies that have accepted SBTi ("Target set") or have made a public commitment ("Committed") to the process or supplied a letter of intent to join the SBT initiative within 12 months

Source: <https://sciencebasedtargets.org/reports/sbti-progress-report-2021/progress-data-dashboards/datadashboard>;

or

4) Companies that derive at least 25% of revenues from enabling or transitory activities that contribute to an objective that is environmental, but not yet identified in the taxonomy due to their innovative nature or very specific usefulness

Source: Amiral Gestion. Companies whose securities qualify as a sustainable investment under this criteria will be documented by the fund manager and approval will be requested from the IR/RSE team and/or the IR/RSE Pilot Committee)

II. At the social level, the criteria to qualify as a Sustainable Investment are based on the net positive contribution to social SDGs, assessed with the help of research by MSCI ESG - Sustainable Impact Metrics and using a method described in detail in Amiral Gestion's Sustainable Investment Methodology Note, which is available on the company website:

<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

**Methodologies and sources for these indicators detailed with the metrics in the Sub-fund's "Appendix 5 SFDR" periodic report*

***The ESG-Climate benchmark universe is described above in the section "What is the sustainable investment goal of this financial product?"*

****The climate materiality filter is described in "Investment Strategy" section of the present document*

*****For more information, see "ESG constraints" in the present document*

****** These indicators are described in the Amiral Gestion Sustainability Report (appendix II): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>*

****** The substantial contribution to the objective of adapting to climate change has been an effective criterion for Sustainable Investment qualification since 1 January 2024*

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

The Sub-fund has several other requirements to ensure that its investments do not seriously harm the environment or people. These requirements take the form of investment rules applicable to all products classified as Article 8 and Article 9 SFDR across the entire portfolio, and a set of reinforced requirements on sustainable investments. These requirements are listed below and are **enforced both ex post and ex ante where they impact eligibility of companies in the portfolio, i.e. pour Sextant Climate Transition Europe:**

- **Sectoral and normative exclusions and controversies**
- **Stronger requirements that aim to confirm the sustainable nature of an investment exigences**, as the Sub-fund is classed Article 9 under SFDR and has thus committed to making 100% sustainable investments in accordance with the portfolio's environmental objective (*i.e. at least 90% of the portfolio including cash and derivatives used on an occasional basis*).
- **Checking for good governance practices: a minimum Governance score of 5/10 is required for inclusion in this portfolio.** For more information, refer to the section "*How does the Sub-fund assess governance practices at the companies in which it has invested?*" of this document.

PAIs are taken into consideration ex post, as this indicator tracks externalities of investments in order to gradually reduce them gradually and is not an ex-ante selection criteria (except PAI 4, 10 and 11 which concern exclusions).

ESG and climate investment rules specific to this Sub-fund are described under the heading “What are the binding elements of investment strategy” and complete the DNSH principle.

DNSH PROCEDURE APPLIED ACROSS THE PORTFOLIO

+ Assessing good governance practices

For more detail, please see under the heading:
« What is the policy to assess good governance
policies of investee companies? »
in this document

1. Respect for Amiral Gestion's Sectoral policy, i.e. non-involvement of companies in the portfolio in activities connected with tobacco, controversial arms, pornography, thermal coal, unconventional fossil energies (except N. American shale oil and gas).
Exclusion criteria and thresholds are detailed in Amiral Gestion's Sectoral Policy, available on the Company website:
<https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>
& additional sectoral exclusions specific to certain portfolios
The criteria are detailed where appropriate in the section entitled « What are the binding elements of investment strategy » in this SFDR pre-contractual document

+

2. Respect Amiral Gestion's Normative Policy, i.e. compliance with the United Nations Global Compact and the OECD Guidelines for Multinational Enterprises

+

3. Controversy monitoring and exclusions: Exclusion of companies exposed to severe (Level 5)* ESG controversies, and even to serious (Level 4)* for certain portfolios.
The exclusion levels for each portfolio are detailed in the section entitled « What are the binding elements of investment strategy »
And special attention is paid to all controversies related to the following themes, irrespective of the level of gravity:

REINFORCED DNSH

APPLIED TO SUSTAINABLE INVESTMENTS**

- Human rights
- Climate and biodiversity
- Fiscal responsibility

+

4. Taking into account
Principal Adverse Impacts: Set of practices applicable to all portfolios

For more information, please see Amiral Gestion's policy for taking PAI into consideration (Appendix I) on the website under « Responsible Investment »:
<https://www.amiralgestion.com/fr/investissement-responsable>

5. Confirmation of the contribution to objective E or S by checking that no harm is caused to other sustainability objectives**

Taking PAI indicators into consideration: additional methods applicable to Sustainable Investment (SI)
For more information, please refer to « How are PAI indicators are taken into consideration? » in this document

Specific DNSH / Social objective:

A favourable DNSH SDG: the company must attain a neutral score for the Product Alignment and Operational Alignment criteria in all social SDGs i.e. = or > -1** (Source: MSCI ESG Research)

Specific DNSH / Environmental objective:

Absence of environmental controversies for which the level of gravity is significant (3), serious (4) or severe (5)*, especially when related to the six environmental themes of the taxonomy. (Source: Sustainalytics)

Minimum social safeguards: Absence of exposure to social controversies for which the level of gravity is serious (4) or severe (5)*;
Removal of « Sustainable Investment » status for companies placed on the Watchlist of the UN Global Compact and/or OECD Guidelines and exclusion in cases of non-compliance (Source: Sustainalytics)

+ Minimum governance score to qualify as a 'Sustainable Investment':
5/10

* On the Sustainalytics scale

** The criteria for positive contribution positive were detailed previously in the question concerning the objectives of sustainable investment

*** For more information, please refer to Amiral Gestion proprietary methodology to qualify Sustainable Investment on the website:
<https://api.amiralgestion.com/documents/permalink/2357/doc.pdf>

— How have the indicators for adverse impacts on sustainability factors been taken into account?

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) on sustainability factors through 16 PAI indicators stemming from the European SFDR regulation. **To take account of these PAI indicators, the Sub-Fund:**

- **Implements Amiral Gestion's PAI policy:** This policy, including the global approach, the sources and measures put in place for each PAI indicator, is available on the Amiral Gestion website under the heading "Responsible Investment":
<https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>
- **Deploys additional measures specific to it:** Given the positioning and sustainable investment objective of Sextant Climate Transition Europe, which focuses on the fight against climate change, the sub-fund gives priority to taking into account PAIs #1, #2, #3 and #4 in accordance with the terms and conditions set out in the table below.

"Reference and name of PAI indicator"		Additional and specific measures for PAI considerations by Sextant Climate Transition Europe, classified Article 9 SFDR, complementary to the inclusion of all PAI indicators as part of overall PAI policy at Amiral Gestion
PAI 1	GHG emissions <i>Expressed in T/CO2eq</i>	<p>Inclusion of three PAI indicators central to the investment strategy of Sextant Climate Transition Europe, focused on mitigation of climate change.</p> <p>Measuring and monitoring indicators of emissions, carbon footprint and intensity of portfolios as part of Climate analysis in compliance with TCFD, notably given the following objectives that Sextant Climate Transition Europe has set for itself:</p> <p>1.Reduce the Sub-fund's temperature within three years (at the portfolio level) This objective will be attained by an effective reduction in the temperature of issuers in the portfolio, putting them on a 1.5°C trajectory (excluding the impact of any arbitrage)</p> <p>2. Increase "engagement score and climate maturity" for all companies between their entry to, and exit from, the portfolio, especially those in "Climate Transition" category.</p> <p>Shareholder engagement: the Sub-fund aims to support companies that have a role to play in the climate transition and encourages them by active dialogue to step up their progress in this respect. Amiral Gestion's shareholder engagement policy may apply to companies in the Climate Core Business and Climate Transition categories. In addition, a reinforced support initiative has been taken specifically targeting Climate Transition companies.</p> <p>Inclusion of Climate issues in voting policy: analysis of measures taken by the Board of Directors to combat climate change effectively influences votes concerning re-election of the directors concerned.**</p> <p><i>*The engagement and climate maturity score (/100) is an assessment tool developed internally by Amiral Gestion. It appraises the maturity of a company in terms of risk management and climate opportunities at the governance level /20%, transparency and consistency of engagements /40% and related action plans including the contribution of products and services /40%. The score notably allows us to identify vigilance areas as well as ways to improve climate performance that could lead to engagement initiatives with companies.</i></p> <p><i>** For more information, please see the Amiral Gestion voting policy on the Company website: https://api.amiralgestion.com/documents/permalink/2165/doc.pdf"https://api.amiralgestion.com/documents/permalink/2165/doc.pdf</i></p>
PAI 2	Carbon footprint <i>Expressed in T/CO2e/EURm invested</i>	
PAI 3	Carbon intensity <i>Expressed in tCO2e/EURm turnover</i>	
PAI 4	Exposure to companies active in fossil energies <i>Expressed as a percentage of investments</i>	<p>Sectoral exclusions: the Fund excludes thermal coal, oil and gas*.</p> <p><i>* The Oil & Gas sector (exploration, extraction, refining, distribution) is not included in the Initial Investment Universe, except in exceptional cases validated by the ESG Committee, if the latter considers that the company has a proven substantial contribution to make to the climate transition, validates the DNSH of the taxonomy, complies with the good practice of "Say on Climate" and that the quality of its ESG profile is among the best-in-class or best-effort in its sector.</i></p>

— — — *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

To ensure that the Sub-fund's investments, including those which are considered sustainable, comply with the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, **Amiral Gestion's normative exclusion policies** are implemented ex-ante and ex-post on the basis of Sustainalytics research, whose conclusions may be confirmed or adjusted following an internal analysis by the fund manager and approved by Amiral Gestion's committee for surveillance of controversies. Companies in the portfolio that appear on the Sustainalytics Watchlist are put on surveillance by Amiral Gestion and are no longer considered Sustainable Investments if this status is confirmed by the committee for monitoring of controversies, making them ineligible for this sub-fund which is classed SFDR Article 9.

In addition, the portfolio excludes the most serious controversies**, including those that may be linked to the principles of these two international standards, and the ESG and management teams are particularly vigilant when assessing and monitoring the quality of company ESG profiles, especially their exposure to events, controversies or other risk factors related to the following issues:

- Human rights (notably forced and child labour)
- Environmental controversies related to climate change and biodiversity
- Fiscal responsibility and transparency

The normative exclusion policy contained in DNSH SFDR applies to sub-funds classed SFDR 8 and 9, as mentioned above.

** Levels excluded are specified under the heading "ESG constraints" of the present document*

Does this financial product consider principal adverse impacts on sustainability factors?

☒ **Yes**

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts of its investments (PAI SFDR) on sustainability factors, in order to identify and gradually take appropriate action. The Sub-fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

The methods used by this Sub-fund to take account of each indicator are presented above in the question *"How are indicators of negative incidents taken into consideration?"*

The metrics and the information whereby PAIs are taken into consideration will be published annually in the Sub-fund's periodic document "SFDR Appendix 5", starting in 2024 for the year 2023.

☐ **No**

The **Investment strategy** guides investment decisions, taking into account factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

In order to meet its management objective and to be eligible for inclusion in a PEA (equity-saving scheme), the Sub-fund always invests 75% of its assets in European equities that are eligible for a PEA. The remaining 25% may be invested in non-EU equities (exclusively UK, Swiss and Norwegian stocks).

Definition of universes:

a. The **“Initial investment universe”** comprises small- and mid-capitalisations (i.e. at the time of the investment, EU capitalisations of less than €7 billion, but also UK, Swedish, Swiss and Norwegian ones). And up to 10% of the Sub-fund’s net assets in capitalisations exceeding €7 billion in the geographic zone mentioned. The investment universe comprises **2,620 stocks**.

b. **Subsequently, the fund manager determines the Eligible Investment Universe**, based on an in-house score that measures the material nature of climate issues. The latter are assessed by an analysis of non-financial indicators (see below) that quantify by means of a **“double materiality” proprietary score**: exposure of these companies to the risks and opportunities of climate change, as well as the risks that the activities of these companies pose for climate change.

The data and the indicators used to quantify the double materiality score are:

- the risks that a company will have a negative impact on climate: direct carbon emissions (scopes 1 et 2), indirect carbon emissions (scope 3), carbon footprint, energy and water consumption, quantity of waste produced.
- the risks that climate change may have adverse impacts on a company: an estimate of revenues to 2030 at risk, based on the most pessimistic climate change projections (transition risk); aggregate score to assess physical risks to 2030, again based on the most pessimistic climate change projections
- opportunities arising from climate change: extent of alignment with European taxonomy to mitigate climate change, on the basis of aligned revenues, CAPEX and OPEX; consumption of renewable energy produced or purchased, initiatives to reduce the quantity of inputs (excluding energy), energy-savings plans.

The greater a company’s risks of adverse impacts on climate, the higher its score.

The greater the risk of climate change having an adverse impact on a company, the higher its score.

The greater the opportunities created by climate change, the higher the score.

The Sub-fund has committed to exclude, on the basis of this double materiality score, 20% of companies in the Initial Investment Universe that have the lowest materiality to climate issues, in order to obtain an “Eligible Investment Universe”.

This approach is significant because it is based on non-financial criteria that assess exposure to climate risks and opportunities for each component of the initial universe, irrespective of sector or ESG quality.

Lastly, a final **ESG filter** (described below) is applied to exclude at least 20% of companies from the “Eligible Investment Universe” and thus arrive at an **“Investible Universe”**.

From the Investible Universe, the fund manager selects the companies and divides them into two groups: “Climate core business” or “Climate transition”. The following climate allocation matrix determines (a) temperature alignment relative to a “less than 2°C*” trajectory of global warming and (b) a score for own climate engagement out of 100**, the criteria for which are set out in the following table.

* The calculation of a temperature that is aligned with a global warming scenario is derived from an analysis of greenhouse gas emissions, based on the SB2A methodology of data supplier Iceberg Datalab.

Amiral Gestion's proprietary score is a tool to assess a company's maturity in climate issues, both in terms of governance, the consistency of its climate engagement and related action plans. This score notably allows us to identify points requiring attention and ways of improving climate performance and may lead to engagement with companies represented in the portfolio

This classification makes it possible to determine objectives for climate performance and, as a corollary, a tool for commitment and specific monitoring of the companies in each group according to their level of maturity and positive contribution to the fight against global warming. The final portfolio should be concentrated (roughly 25 positions)

Criteria for the Amiral Gestion's own climate engagement score

<i>Governance Climate</i>	<i>/20</i>	<i>Measures and climate engagements</i>	<i>/40</i>
<i>Inclusion of climate in compensation schemes</i>	<i>/10</i>	<i>Carbon report including at least part of scope 3</i>	<i>/5</i>
<i>Level of climate expertise and involvement of the Board and Directors</i>	<i>/2.5</i>	<i>Analysis of a scenario to measure exposure to transition and physical risks</i>	<i>/3</i>
<i>Committee for assessment and management of climate risks</i>	<i>/2.5</i>	<i>CDP reporting and/or an equivalent, recognised local reference</i>	<i>/7</i>
<i>Say on climate</i>	<i>/5</i>	<i>Short-term targets for GHG emissions reduction:</i> → Setting objectives to reduce emissions – 5pts → BTi "Target set" – 5pts → 1.5°C objective rather than Below 2°C – 5pts → Aiming for a quantified decrease in scope 3 – 5pts	<i>/20</i>
		<i>Long-term objective for contribution to carbon neutrality</i>	<i>/5</i>

Bonus ACT: + 5 points

Selection of securities is also based on an internal Quality Rating devised by the management team as part of its fundamental analysis and guiding our investment decisions. This Quality Rating takes account of 10 ESG criteria of the 28 analysed qualitatively. These criteria focus on social utility, the nature of the business activity, the motivation and pride of employees in their role at the company and respect for team members (training policy and career development, corporate culture etc.), a global assessment of the company's environmental policy in the light of sectoral exposure, the existence of controversies, governance policy and alignment of the company's interests with those of minority shareholders, communication and transparency, incentives to encourage directors to act responsibly and to promote sustainable development, respect for the interests of stakeholders, clients and other parties concerned (suppliers, government, fiscal transparency etc).

● **What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?**

In accordance with its management strategy, the Sub-fund's sustainable investment objective is to "Finance small- and mid-sized companies whose business models take account of climate issues and actively supports companies that can, over the recommended investment period, make a positive, quantifiable contribution to the fight against global warming".

Our responsible investment policy focuses on companies that have capacity to mitigate or to adapt to climate change:

- either because they are striving to reduce their own GHG emissions;
- or because they are helping other economic agents to reduce their GHG emissions;
- or because they provide solutions that allow adaption to the physical consequences of global warming.

Objectives underlying the Sub-fund's sustainability goals:

1. Reduce the Sub-fund's temperature over three years (at the portfolio level). This objective shall be reached by reducing the actual temperature of companies in the portfolio, by putting them on a 1.5°C trajectory (excluding the impact of any arbitrage)*

2. Raise the "climate engagement score"* of all companies in the portfolio, especially for the "Climate Transition" group** during the time the Sub-fund is a shareholder. The criteria for this score are presented in the previous section of this document.

→ To achieve these objectives and complementary to the DNSH principle described previously, the Sub-fund applies a series of filters leading to a reduced list of securities that are in the portfolio or have the potential to satisfy the requirement of investment strategy:

i) a **Climate filter, based on the double materiality score** leading to the exclusion of 20% of companies** in the Initial Investment Universe that have the lowest materiality to climate issues, in order to obtain an "Eligible Investment Universe"

ii) An **ESG filter that excludes from the "Eligible investment universe" at least 20% of companies and yields an "Investible Universe"**. This filter takes account of:

- **The sectoral exclusion policy** for controversial arms, tobacco and pornography in accordance with Amiral Gestion' policy** with respect to these issues according to the terms and thresholds applicable to the Sub-fund (<https://api.amiralgestion.com/documents/permalink/2675/doc.pdf>), as well as companies exposed to extraction of thermal coal, oil and gas***.
- **Compliance with the normative exclusion:** exclusion/non-investment in companies in breach of the UN Global Compact and/or the OECD Guidelines for Multinational Enterprises, following an internal review and confirmation of the breach by the committee for monitoring of controversies. **Ineligibility for sustainable investment** (and therefore for inclusion or retention in this portfolio) are companies with Watch List status according to Sustainalytics, and whose status is confirmed by the Controversy Monitoring Committee following an internal review.
- **Exclusion/non-investment in companies exposed to severe controversies (i.e. Level 4 and 5 on the Sustainalytics scale)** if confirmed by the committee for monitoring of controversies following an internal review. Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities.
- **Respect of a minimal threshold of ESG analysis***:** in order to ensure that the companies included in the Sub-fund's portfolio meet a minimum threshold, the management team screens the stocks in the universe using its own proprietary evaluation method based on Ethifinance's Gaïa Ratings database. At least 90% of the companies in the portfolio are thus covered by an ESG analysis; the maximum 10% not covered is intended to take into account exceptional cases that do not allow for immediate coverage (small caps for which ESG information is not available or is not readily available, IPOs, etc.).

- **An ESG rating of at least 4/10******* is required to be included or to remain in the portfolio
- **A G rating of at least 5/10******* in line with the sustainable investment qualification to which the Sub-fund adheres for 100% of securities in the portfolio.

In addition to its climate policy, Sextant Climate Transition Europe relies on ESG selectivity i.e. the application of ESG filters and exclusions which reduce by at least 20% the eligible investment universe of roughly 2,100 European small- and mid-cap stocks to **an investible universe of 1,470 stocks**. This breakdown is coherent with the investment strategy of the Sub-fund.

Furthermore, when the portfolio invests in unit trusts, the latter must have the same SFDR classification as the Sub-fund.

** By reducing the temperature of issuers between their entry and exit from the portfolio. calculation of a temperature that is aligned with a global warming scenario is derived from an analysis of greenhouse gas emissions, based on the SB2A methodology of data supplier Iceberg Datalab.*

***This score is described in the previous section*

**** Sector policy is available on the Company website: <https://api.amiralgestion.com/documents/permalink/2675/doc.pdf>*

***** The Oil & Gas sector (exploration, extraction, refining, distribution) is not included in the Investment Universe, except in exceptional cases validated by the ESG Committee, if the latter considers that the company has a proven substantial contribution to make to the climate transition, validates the DNSH of the taxonomy, complies with the good practice of "Say on Climate" and that the quality of its ESG profile is among the best-in-class or best-effort in its sector*

****** Mainly MSCI ESG Ratings, otherwise the Amiral Gestion ESG performance rating from Ethifinance's Gaia database or the Internal Quality Rating to complete coverage if necessary.*

Good governance
practices include
sound management
structures, employee
relations,
remuneration of staff
ad tax compliance.

● **What is the policy to assess good governance practices of the investee companies?**

The sub-fund's managers assess governance at two levels:

- **An internal Quality Rating arising from our fundamental analysis which guides our stock picking:** an ex-ante qualitative assessment in our fundamental analysis which covers 10 out of 28 ESG-related criteria. The governance criteria assessed by this rating are management quality, respect for minority shareholders, transparency and the quality of financial communication, responsible compensation for directors and employees. Note that this list has been enriched by adding three new criteria: appraisal of the governance structure, fiscal responsibility and business ethics.
- **An external ESG rating* (source: MSCI ESG Ratings) that helps to determine the eligible universe** and is used ex-post to check the ESG performance of the portfolio relative to its universe. This rating covers six governance topics: Ownership and control, Board of Directors, Payments, Accounting, Business ethics and Fiscal transparency.
- These criteria allow us to assess and to factor into our analysis the dimensions necessary for sound management structures, good relations with – and fair remuneration of – employees and respect for fiscal commitments.

Furthermore:

- **We also monitor the governance rating of companies in the portfolio:** the Sub-fund requires a **minimum governance rating of 5/10**** for a security to enter or remain in the portfolio as this is the minimum level to qualify as a sustainable investment and the Sub-fund has committed to sustainable investments accounting for 100% of its portfolio (i.e. at least 90% of assets including cash and derivatives used occasionally). *This qualification is evidence of good governance practices by companies represented in the portfolio.*
- **We are particularly vigilant about controversies related to fiscal responsibility and transparency this question, however serious** and we initiate a dialogue with the company if we believe the incident calls for shareholder engagement. We are especially wary of such cases of such controversies, irrespective of how serious they are.

Shareholder engagement on governance may concern fiscal responsibility, any other significant controversy identified, or even a governance-related PAI (i.e. PAI 10-13)* if an analysis of these indicators highlights serious weaknesses. This dialogue takes the following approach:**

- Improvement recommendations are drawn up in writing by the fund manager and/or the ESG team when the shortcomings were identified (Year N)
- An initial intermediate report is submitted after one year (N+1) as part of the analysis of the company and if no progress is noted: a reminder is issued and the manager may vote against if the shortcoming identified is linked to one or more resolutions tabled at the general meeting
- A final report is submitted after two years (N+2), which may lead to disinvestment in some high-risk cases if the companies have not shown improvement (or made an effort to improve****

And in accordance with the policy of normative exclusion, the Sub-fund cannot invest in companies that are in violation of the United Nations Global Compact or the OECD Guidelines, or which are on the Watchlist of one of these international standards according to Sustainalytics***, or which are exposed to serious (level 4), or severe (Level 5) controversies*****, notably concerning governance.**

** This rating is described in the Amiral Gestion Sustainability Report (appendix II):*

<https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

*** Source: MSCI ESG Ratings or our internal governance Quality Rating*

**** Dialogue on PAIs begins in 2024*

***** Qualitative and/or quantitative analysis"*

****** Following internal confirmation of non-compliance by the committee for monitoring of controversies*

What is the asset allocation planned for this financial product?

To calculate the share of sustainable investments, we mainly concentrate on equity holdings if other instruments (derivatives for hedging and exposure) are marginal. The denominator is the portfolio's net assets. **At least 90%* of the portfolio's net assets must comply with the qualification criteria for sustainable investment mentioned previously**, and at least 90% of investments in the portfolio must pass the Sub-fund's relevant exclusion filters and be covered by ESG analysis leading to a non-financial rating.

* At least 90% of the portfolio including cash and derivatives used occasionally, i.e. 100% of equity investments

How does the use of derivatives attain the sustainable investment objective?

The Sextant Climate Transition Europe Sub-fund may use derivatives in order to gain exposure to – or partially hedge against – favourable or unfavourable trends in equities, indices, interest rates and forex. These instruments are not used to achieve the environmental or social characteristics promoted by the product.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sextant Climate Transition Europe Sub-fund makes sustainable investments, as defined by the taxonomy, for which the aligned green share is at least 5% of its assets. The green share is correlated to the climate change objective*.

Indeed, our valuation approach for a minimal green share is still cautious at present given that communication of alignment data remains partial due to gradual deployment of the CSRD directive. However, this Sub-fund will communicate its green share in its periodic report on the basis of data reported by companies.

As a result, the Sub-fund will reassess its minimum green share commitment in response to progress in the quality of data available.

* Source of data: Sustainalytics

** See Amiral Gestion Methodology Note on the definition of sustainable investment:

<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

Asset allocation

refers to the share of investment in a given asset class.

Activities aligned with the taxonomy are expressed as a %:

- of revenues to reflect the share derived from green activities of companies in which the Sub-fund has invested;
- of capital expenditure (CapEx) to show green investments by companies in which the financial product invests, for a transition to a green economy, for example;
- of operating costs (OpEx) to reflect green operations of companies in which the Sub-fund has invested

● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?²

☐ Yes: ☐ In gas ☐ In nuclear energy

☒ No

The Sub-fund has committed to having at least 5% of investments aligned with EU green taxonomy, but **there is no minimum share for fossil gas and/or nuclear energy, in accordance with the requirements of EU taxonomy.**

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents % of the total investments.

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What is the minimum share of investments in transitional and enabling activities?**

Sextant Climate Transition Europe has made **no commitment to a minimum share of investments in transitory or enabling activities.**

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Sextant Climate Transition Europe has a target of **less than 85%** for sustainable investments with an environmental objective non-aligned with the taxonomy. The Sub-fund has a global commitment to holding at least 90% of net assets in sustainable investments with an environmental objective (i.e. 100% of equities) of which at least 5% aligned with EU green taxonomy. Apart from this green share which must be at least 5% excluding cash and derivatives used occasionally, the rest of the portfolio shall exclusively contain sustainable investments with an environmental objective non-aligned with European taxonomy.

**Of total assets, including cash and derivatives used occasionally*

What is the minimum share of socially sustainable investments?

The Sub-fund has committed to holding at least 90%* of net asset in the portfolio in sustainable investments with an environmental objective (i.e. **has not committed to a minimum share** of sustainable investments with a social objective).

** Of total assets, including cash and derivatives used occasionally*

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The instruments in the “#2 Others” category are diversification tools principally used to manage the portfolio’s cash holdings and to counter unfavourable short-term market trends. Included in this category are hedging and exposure derivatives, cash, deposits. So far, their inclusion in the calculation of sustainable investment has been considered inappropriate for the Amiral Gestion’s definition of sustainable investment.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

The Sub-fund’s investment strategy is **not benchmarked against a European “climate transition” index or a “Paris Agreement” index** as defined by (EU) regulation 2016/2011, because the Sub-fund’s climate transition investment policy that favours is not covered by an index to date.

To offset the absence of an appropriate index, the Sub-fund has defined an investment universe coherent with its investment strategy and reflecting a universe that would be eligible for inclusion in the Sub-fund. This universe comprises **2,100 small and mid-cap European companies** selected by applying a double materiality climate filter to an initial investment universe of 2,620 companies.

The methodology used to constitute the climate universe is described above in the section “What investment strategy does this product implement?”

This symbol represents sustainable investments that have an environmental objective but do **not take into account criteria** applicable to environmentally sustainable economic activities as defined by EU taxonomy.

Benchmark indices allow us to ascertain if a financial product has the environmental or social characteristics that it promotes

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

Not applicable

- ***How is alignment of investment strategy with the methodology of the index guaranteed on a permanent basis?***

Not applicable

- ***How is the index different from a general market index?***

Not applicable

- ***Where can I find methodology used for the calculation of the designated index?***

Not applicable

Where can I find more product specific information online?

Pre-contractual information for the financial products paragraphs 1, 2 and 2b, of (EU) regulation 2019/2088 and article 6, first subparagraph, of (EU) regulation 2020/852

Name of the product: SEXTANT REGATTA 2031
Identity of the legal entity: 969500B8FST6H03J4604
Name of the Management Company: Amiral Gestion

Environmental and/or social issues

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It promotes **Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It will make a minimum of **sustainable investments with a social objective:** ____%

It promotes E/S characteristics, **but will not make any sustainable investments**

Sustainable investment implies an investment in an economic activity that contributes to an environmental or social objective, provided it does not have any major adverse impact on such objectives, and the company in which the financial product invests implements good governance practices.

EU taxonomy is a system of classification arising from (EU) regulation 2020/ 852, which drew up a **list of environmentally-sustainable economic activities**. This regulation does not include a list of socially-sustainable economic activities. Sustainable investments that have an environmental objective are not necessarily aligned with the taxonomy.

¹ Publication date of the document: July 2024

Which environmental and/or social issues does this financial product support?

The Sextant Regatta 2031 Sub-fund promotes environmental and social issues, while keeping a watchful eye on company governance practices by means of non-financial metrics applied to the Sub-fund and materialised by the areas monitored by "Sustainability Indicators", set out in the following section of this document. **These ESG issues are notably factored into results-based monitoring of the portfolio's ESG performance**, including ESG analysis of the Sub-fund based on the 'MSCI ESG Ratings' methodology of data agency MSCI*. To round this out, **greater inclusion of certain environmental, social and governance (ESG) challenges in the analysis of issuers is currently being deployed**, resulting in increased consideration of ESG issues in credit research in 2024.

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. **However, the fund management team tracks ESG characteristics and performances of the portfolio relative to an index **** that is coherent with the Sub-fund's investment strategy and comprises roughly 3,470 issuers: **the Global HY (LG30TRUU Index).**

The "MSCI ESG Ratings" methodology of the MSCI agency is described in more detail in Amiral Gestion's Sustainability Report (appendix II) <https://api.amiralgestion.com/documents/permalink/2391/doc.pdf>

*** Note that the Sub-fund adopted this ESG reference universe in 2023 as part of its commitment to monitor the relative performance of the portfolio on the basis of PAI each quarter from 31 March 2023. Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023.*

Which sustainability indicators are used to measure success in supporting the environmental or social issues promoted by the financial product?

The Sub-fund relies on the following sustainability indicators to assess alignment of the portfolio with the environmental and social characteristics that it promotes:

- **An average external ESG score for the portfolio relative to that of its benchmark index described in the previous section.** This ex-post monitoring is mainly based on data supplied by MSCI ESG Rating, but it may also use the ESG performance ratings of Ethifinance's Gaïa database to complete coverage if necessary.
- **Compliance with the Sub-fund's policy of excluding controversies:** monitoring of controversies relies on information supplied by the Sustainalytics agency, which assesses and classified incidents according to how serious they are on a scale from 1 (least serious) to 5 (most severe).
- **Compliance with sectoral policy:** filters are applied to identify issuers exposed to sectors whose activity is prohibited by the Sub-fund's investment policy.
- **Compliance with the UN Global Compact and the OECD's Guidelines for Multinational Enterprises,** relies on the Sustainalytics agency for application of the normative exclusion policy implemented by the Sub-fund.
- **Monitoring average carbon intensity of the portfolio relative* to a benchmark index described in the previous section** (emissions in tons of CO₂/€m of revenue), WACI, on the wider Scope 1, Scope 2 and upstream Scope 3), **as well as climate and environmental footprint metrics** that meet TCFD requirements. These metrics are contained in a periodic report "Appendix 4 - SFDR" attached to the Sub-fund's annual report.
- **Reporting of our traceable ESG dialogue** ESG with issuers represented in the portfolio on:
 - i) Awareness of best ESG practices, regular discussions on ESG topics via identification of potential factors of value creation and/or risks.
 - ii) Special attention to - and possible surveillance of - issuers whose transparency on ESG practices does not meet our analysis criteria.

Moreover, the Sub-fund has committed to monitoring and appraising Principal Adverse Impacts (PAI).

The sources and methodologies relative to these indicators are described in more detail on the Amiral Gestion website under the heading "Responsible Investment": <https://www.amiralgestion.com/fr/investissement-responsable>

**Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023*

Sustainability indicators are used to check whether the financial product complies with the environmental and social issues in question.

● **Which sustainable investment goals does the financial product intend to pursue, and how can the investments made contribute to these objectives?**

The SEXTANT REGATTA 2031 Sub-fund promotes environmental and social issues. At this stage, however, **the Sub-fund has not committed to a minimum share of sustainable investments. On the other hand, the Sub-fund may reveal its share of sustainable investments** on the basis of the characteristics listed below.

DEFINITION OF SUSTAINABLE INVESTMENT: AMIRAL GESTION APPROACH

Amiral Gestion defines sustainable investment as: *“An investment in a financial instrument that is involved in one or several economic activities:*

- *Contributing significantly to environmental objectives to: i) mitigate climate change with the goal of reaching carbon neutrality by 2050, in accordance with the Paris Agreement on Climate; ii) adapt* to the effects of climate change.*
- *Making a net positive contribution to one or several of the United Nations Sustainable Development Goals (SDG) at the social level by 2030.*

These investments must not have any major adverse impact on other environmental or social objectives, and the companies in which the investments are made must respect the principles of good governance. ”

The criteria to assess quality of a Sustainable investment under this definition are described in detail in the Sustainable Investment Methodology Note which is available on the Amiral Gestion website: <https://api.amiralgestion.com/documents/permalink/2357/doc.pdf>

**The substantial contribution to the objective of adapting to climate change will be an effective criterion for Sustainable Investment qualification from 1 January 2024*

● **To what extent do the financial product’s sustainable investments have a significant adverse impact on a sustainable investment objective in environmental or social terms?**

The **principle adverse impacts** are the negative consequences arising from investment decisions for sustainability factors related to environmental and social issues, human resources, respect for human rights, the fight against corruption and acts of corruption

The Sub-fund has several other requirements to ensure that its investments do not seriously harm the environment or people. These are:

- **Investment rules that apply to all funds and mandates classed SFDR 8 and 9 and to the whole portfolio:** exclusion policies, Principal Adverse Impact (PAI) considerations, good governance practices.
- **A set of reinforced requirements for sustainable investments*** to confirm the contribution to an environmental or social objective and ensure that no harm is done to other sustainability objectives.

This whole DNSH principle, and whether the various measures are applied ex ante and/or ex post, is described in more detail in the Methodology note on our definition of Sustainable Investment and is available on our website:

<https://api.amiralgestion.com/documents/permalink/2357/doc.pdf>

ESG investment rules specific to this Sub-fund are described under the heading “ESG constraints” and complete the DNSH principle.

**As mentioned previously, the Sub-fund has not committed to a minimum share of sustainable investments, but it will disclose its share of ex-post sustainable investments in its periodic report.*

● — — How are indicators concerning adverse impacts taken into consideration?

The Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) on sustainability factors through 16 PAI indicators stemming from the European SFDR regulation. **Taking these indicators into consideration is part of Amiral Gestion's PAI policy.** This policy, including the global approach, the sources and measures put in place for each PAI indicator, is available on the Amiral Gestion website under the heading "Responsible Investment":

<https://api.amiralgestion.com/documents/permalink/2693/doc.pdf>

This document includes:

- **In appendix I: measures implemented across the whole portfolio**
- **In appendix II: additional measures applied to sustainable investments*.**

** The Sub-fund has not committed to a minimum share of sustainable investments, but it will disclose the percentage of ex-post sustainable investments in its periodic report in Appendix 4 SFDR.*

● — — To what extent do sustainable investments comply with OECD Guidelines for Multinational Enterprises and United Nations Principles on Business and Human Rights? Detailed description:

To ensure that the Sub-fund's investments, including those which are considered sustainable*, comply with the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, **Amiral Gestion's normative exclusion policies are implemented ex-ante and ex-post** on the basis of Sustainalytics research, whose conclusions may be confirmed or adjusted following an internal analysis by the fund manager and approved by Amiral Gestion's committee for surveillance of controversies. If a company in the portfolio is added to the Sustainalytics Watchlist, it is put on surveillance.

In addition, the portfolio excludes the most serious controversies**, including those that may be linked to the principles of these two international standards, and the ESG and management teams are particularly vigilant when assessing and monitoring the quality of company ESG profiles, especially their exposure to events, controversies or other risk factors related to the following issues:

- Human rights (notably forced and child labour)
- Environmental controversies related to climate change and biodiversity
- Fiscal responsibility and transparency

The normative exclusion policy contained in DNSH SFDR applies to sub-funds classed SFDR 8 and 9, as mentioned above.

** As mentioned previously, the Sub-fund has not committed to a minimum share of sustainable investments, but it will disclose its share of ex-post sustainable investments in its periodic report.*

*** The levels excluded are specified under the heading "ESG constraints" of the present document*

The EU taxonomy contains a principle of "Do No Significant Harm" according to which investments aligned with the taxonomy should not seriously damage EU taxonomy objectives, in addition to the EU's own criteria.

The principle of 'Do No Significant Harm' applies exclusively to the investments underlying a financial product that takes account of EU criteria with respect to environmentally sustainable economic activity. The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

No other sustainable investment should do significant harm to environmental or social objectives.

Does the financial product take into consideration the Principle Adverse Impacts on sustainability factors?

☒ Yes

The Sub-fund commits to monitoring and taking into consideration the Principal Adverse Impacts of its investments (PAI SFDR) on sustainability factors, in order to identify and gradually take appropriate action. The Sub-fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

Amiral Gestion's PAI policy, including details of sources and methods for taking account of each indicator, is available on the company website under the heading "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2693/doc.pdf>

The metrics and information for taking account of PAIs will be disclosed in the periodic document "Appendix 4 - SFDR" of the Sub-fund, for the first time in 2024 and concerning 2023.

☐ No

What investment strategy is followed for this financial product?

The **Investment strategy** guides investment decisions, taking into account factors such as investment objectives and risk tolerance.

SEXTANT REGATTA 2031 is a sub-fund that seeks to achieve a performance net of costs and estimated default risk calculated by the Management Company, annualised, equal to 4.00% for A and AD shares, and 4.60% for I and ID shares. This return shall be achieved by investing chiefly in bonds issued by state and semi-state companies and financial institutions.

The Sub-fund's investment strategy is based mainly on a holding or buy-and-hold policy (acquisition of securities with the intention of holding them in the portfolio until the first date of final maturity or early redemption following a decision by the issuer or holder). Nevertheless, the Management Company is free to manage the portfolio actively, for example by selling securities, buying new ones, for one or several bonds in the portfolio in case of early redemption, OST, a deterioration in the issuer's credit profile or even an improvement which causes the bond to become unattractive: To construct the portfolio, the fund manager carries out his own qualitative analysis of bonds. He also refers to agency ratings, although he does not rely on these systematically and exclusively.

As the bonds in the portfolio gradually mature and are redeemed, the Management Company may reinvest:

- In bonds whose maturity (final, or because the holder exercises a redemption option) is no later than 31 December 2031
- In credit notes (maturing on or before 31 December 2031) or money market instruments up to 100% of the Sub-fund's assets,
- The Sub-fund may have up to 10% exposure to contingent convertibles for the purposes of diversification and yield, but this exposure is carefully monitored.
- Up to 10% of the Sub-fund's net assets in bonds whose final maturity is after 31 December 2031, provided the holder has an option to redeem before 31 December 2031.

The selection of bonds is based on an internal fundamental analysis of the risk of each issuer. Risk analysis takes into consideration:

- The cyclical nature and operational risks of the business line;
- The company's past results and its reputation;
- Regularity of cash generation (or equity for financial institutions);
- The reasonable nature of debt ratios (net debt/Ebitda, gearing) with regard to the business line, the Sub-fund's working capital requirements and any tangible and transferable assets that may be held by the issuer;
- The issuer's resources, liquidity requirements and debt structure;
- Quality of the shareholder base.

Securities are selected after this analysis, and following application of the ESG requirements described in the section below entitled "Constraints defined to respect all the environmental or social issues."

● **What are the constraints of the investment strategy when selecting investments that respect all the environmental and social issues promoted by this financial product?**

The universe of securities eligible for inclusion in Sextant Regatta 2031 is determined after application of the global DNSH principle described previously, and after taking into consideration the following constraints which are specific to the Sub-fund:

- **Compliance with the compartment's sectoral exclusion policy:** thermal coal, tobacco, controversial weapons, civilian firearms, pornography, unconventional fossil fuels with the exception of North American shale oil and gas. Particular attention is also paid to the gambling and alcohol sectors. The criteria, thresholds and procedures for applying this due diligence and exclusion policy are specified in the Amiral Gestion sector policy available on its website: <https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>
- **Compliance with the normative exclusion* policy:** exclusion/non-investment in companies in breach of the UN Global Compact and/or the OECD Guidelines for Multinational Enterprises, following an internal review and confirmation of the breach by the committee for monitoring of controversies. Surveillance of companies that appear on the Sustainalytics Watchlist where this status has been confirmed by the committee for monitoring of controversies following an internal review.
- **Exclusion / non-investment in companies exposed to severe controversies (i.e. Level 5 on the Sustainalytics scale)** if confirmed by the committee for monitoring of controversies following an internal review. Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities.

Furthermore,

- the Sub-fund has committed to **monitoring PAI indicators** (for more detail, see the sections devoted to these themes in the present document)
- when the portfolio invests in **unit trusts**, the latter must have the **same SFDR rating** as the Sub-fund.

**When issuers in which the Sub-fund has invested are found to be exposed to severe (level 5) controversies, or to no longer comply with the UN Global Compact and OECD principles, their case shall be put to the committee for surveillance of controversies in order to verify the severity/non-compliant status and decide on possible exclusion from the portfolio, or to put the company on surveillance in the hope that the level of severity will decrease following an internal analysis.*

● **What is the minimum rate the financial product commits to reducing the scope of planned investments before implementation of this investment strategy?**

The Sub-fund **has not set a minimal rate of exclusions** from the investment universe arising from use of this filter and non-financial approaches.

● **What policy is implemented to assess good governance practices at the companies in which the financial product has invested?**

Managers of the Sub-fund assess governance via an external ESG Score (Source: MSCI ESG Ratings)*, used to monitor the portfolio's ESG performance and which verifies six aspects of governance: Ownership and control, Board of Directors, Payments, Accounting, Business ethics and Fiscal transparency.

All of these criteria allow us to assess and to factor into our analysis the dimensions necessary for sound management structures, good relations with – and fair remuneration of – employees and respect for fiscal commitments.

In terms of commitment, we may reopen dialogue issuers in the following cases:

- Those whose external ESG Rating** is below 4/10 for Governance
- Those which are exposed to controversies related to fiscal responsibility and transparency.

This dialogue takes the following approach:

- Improvement recommendations are drawn up in writing by the fund manager and/or the ESG team when the shortcomings were identified (Year N);
- An initial intermediate report is submitted after one year (N+1);

Good governance practices for sound management structures, good relations with – and remuneration of – employees and respect for tax commitments

- A final report is submitted after two years (N+2), which may lead to disinvestment in some high-risk cases if the issuer have not shown improvement (or made an effort to improve)***

Moreover, to qualify as a Sustainable Investment, issuers cannot have a governance rating that is lower than 5/10. And in accordance with the policy of normative exclusion, the Sub-fund cannot invest in companies that are in violation of the United Nations Global Compact or the OECD Guidelines, or ones which are exposed to severe (Level 5) controversies, notably concerning governance.

* This rating is described in the Amiral Gestion Sustainability Report (appendix II):

<https://api.amiralgestion.com/documents/permalink/2391/doc.pdf>

** If the issuer is not covered by this Sub-fund's main external non-financial rating agency (MSCI ESG Ratings), verification will be done by means of internal analysis

*** Qualitative and/or quantitative analysis

Asset allocation

refers to the share of investment in a given asset class.

Activities aligned with the taxonomy are expressed as a %:

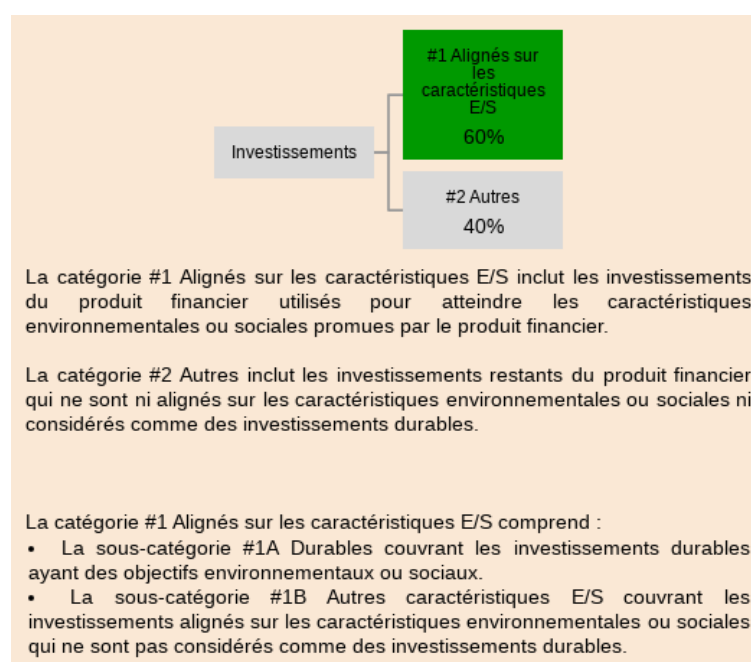

- **of revenues** to reflect the share derived from green activities of companies in which the Sub-fund has invested;
- **of capital expenditure** (CapEx) to show green investments by companies in which the financial product invests, for a transition to a green economy, for example;
- **of operating costs** (OpEx) to reflect green operations of companies in which the Sub-fund has invested

What asset allocation is planned for this financial product?

In order to calculate alignment with E/S characteristics, we focus on all instruments except cash, derivatives, and short-term debt. **At least 60%** of securities in the portfolio have passed the exclusion filter applicable to the Sub-fund and are covered by ESG analysis that results in a non-financial rating.

To calculate the percentage of sustainable investments*, we only include investments that meet the sustainability criteria mentioned previously. The denominator is the portfolio's net assets.

*As mentioned previously, the Sub-fund has not committed to a minimum share of sustainable investments, but it will disclose the share of ex-post sustainable investments in its periodic report.

How does the use of derivatives help to achieve the environmental and social objectives promoted by the financial product?

The Sextant Regatta 2031 Sub-fund may use derivatives in order to gain exposure to or partially hedge against favourable or unfavourable trends in equities, indices, interest rates and forex. These instruments are not used to achieve the environmental or social characteristics promoted by the product.

What is the minimum level to which sustainable investments with an environmental objective are aligned with EU taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments, and therefore is not compelled to invest in sustainable investments that have an environmental objective aligned with EU green

To comply with EU taxonomy, the criteria applicable to **fossil gas** include limitations on emissions and the switch to fully renewable electricity or low carbon fuels by end-2035. As for

taxonomy. The Sub-fund has acquired positions in sustainable investments as defined by the taxonomy, up to the minimum aligned green share representing 0% of its assets. To date, communication of alignment data remains partial due to gradual deployment of the CSRD directive.

However, the Sub-fund will communicate its green share ex-post in its annual report on the basis of the data reported by the companies.

Does the financial product invest in activities related to fossil gas and/or nuclear energy that are in compliance with EU Taxonomy?²

Not applicable, as the portfolio has no commitment to a minimum share of investments aligned with EU Taxonomy.

☐ Yes:

☐ In gas ☐ In nuclear energy

☒ No

The two graphs below show the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

² Activities related to fossil gas and/or nuclear only comply with EU Taxonomy if they help to limit climate change (mitigation of climate change) and do no major harm to any objective of EU Taxonomy – see the explanatory note in the left-hand margin. All the criteria applicable to economic activities in the fossil gas and nuclear sectors that comply with EU Taxonomy are defined in (EU) regulation 2022/1214 of the Commission.

What is the minimum proportion of net assets invested in transitory and enabling activities?

Not applicable

This symbol represents sustainable investments that have an environmental objective but do **not take into account** criteria applicable to environmentally sustainable economic activities as defined by EU taxonomy.

What is the minimum proportion of sustainable investments with an environmental objective non-aligned with EU taxonomy?

The Sextant 2031 Regatta Sub-fund has **not committed to a minimum share** of sustainable investments with an environmental objective but not aligned with EU Taxonomy.

What is the minimum share of sustainable investments with a social objective?

The SEXTANT Regatta 2031 Sub-fund **has not committed to a minimum share** of investment in sustainable investment that have a social objective.

Which investments are included in the “#2 Others” category? What is their purpose and are there any minimum environmental and social guarantees?

The instruments in the “#2 Others” category are diversification tools principally used to manage the portfolio’s cash holdings and to counter unfavourable short-term market trends. This category includes hedging and exposure derivatives, securities with derivatives attached, deposits and cash holdings and borrowed funds. It may also include equities that are not rated by external agencies (very small capitalisations, IPOs etc.). These investments may be subject to the requirements of the Sub-fund’s sectoral and normative exclusions and Amiral Gestion’s policy with respect to controversies mentioned above and included in the DNSH SFDR, subject to data availability.

Benchmark indices allow us to ascertain if a financial product has the environmental or social characteristics that it promotes

Has a specific index been selected as a benchmark to determine if this financial product is aligned with the characteristics

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. **However, the fund management team tracks ESG characteristics and performances of the portfolio relative to an index*** that is coherent with the Sub-fund’s investment strategy and comprises 3,470 issuers: **the Global HY (LG30TRUU Index).**

** Note that the Sub-fund adopted this ESG reference universe in 2023 as part of its commitment to monitor the relative performance of the portfolio on the basis of PAI each quarter from 31 March 2023. Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023.*

How is the benchmark index permanently aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable

How is alignment of investment strategy with the methodology of the index guaranteed on a permanent basis?

Not applicable

How is the index different from a general market index?

Not applicable

- ***Where can one find the method used to calculate the selected index?***

Not applicable

Where on the web can information be found that is specifically for the product?

More detailed information on the product is available on the website:

<https://www.amiralgestion.com/fr/sextant-2031>

Pre-contractual information for the financial products paragraphs 1, 2 and 2b, of (EU) regulation 2019/2088 and article 6, first subparagraph, of (EU) regulation 2020/852

Name of the product: **SEXTANT OPTIMAL INCOME**

Identity of the legal entity: 969500E56F17ACQS4442

Name of the Management Company: Amiral Gestion

Environmental issues

Sustainable investment implies an investment in an economic activity that contributes to an environmental or social objective, provided it does not have any major adverse impact on such objectives, and the company in which the financial product invests implements good governance practices.

EU taxonomy is a system of classification arising from (EU) regulation 2020/ 852, which drew up a **list of environmentally-sustainable economic activities**. This regulation does not include a list of socially-sustainable economic activities. Sustainable investments that have an environmental objective are not necessarily aligned with the taxonomy.

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective:** ____%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It will make a minimum of **sustainable investments with a social objective:** ____%

It promotes **Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, **but will not make any sustainable investments**

¹ Publication date of the document: December 2024

Which environmental and/or social issues does this financial product support?

SEXTANT OPTIMAL INCOME promotes environmental and social issues, while keeping a watchful eye on company governance practices by means of non-financial metrics applied to the Sub-fund and materialised by the areas monitored by “Sustainability Indicators”, set out in the following section of this document. **These ESG issues are notably factored into results-based monitoring of the portfolio’s ESG performance**, including ESG analysis of the Sub-fund based on the ‘MSCI ESG Ratings’ methodology of data agency MSCI*. To round this out, **greater inclusion of certain environmental, social and governance (ESG) challenges in the analysis of issuers is currently being deployed**, resulting in increased consideration of ESG issues in credit research.

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. However, the management team monitors the ESG characteristics and performance of the portfolio in absolute terms without a relative universe**.

* The “MSCI ESG Ratings” methodology is described in the Amiral Gestion Sustainability Report (appendix II): <https://api.amiralgestion.com/documents/permalink/2391/doc.pdf>

** Note that the Sub-fund plans to define an ESG reference universe in 2025 as part of its commitment to monitor the relative performance of the portfolio on the basis of PAI each quarter from 31 January 2026 (first internal reporting closed on 31 March 2026). Performance relative to ESG ratings and other ESG-climate indicators will be monitored as of 31 December 2025.

Which sustainability indicators are used to measure success in supporting the environmental or social issues promoted by the financial product?

Sustainability indicators are used to check whether the financial product complies with the environmental and social issues in question.

The Sub-fund relies on the following sustainability indicators to assess alignment of the portfolio with the environmental and social characteristics that it promotes:

- **The Sub-fund’s average external ESG Score.** This ex-post monitoring is mainly based on data supplied by MSCI ESG Rating, but it may also use the ESG performance ratings of Ethifinance’s Gaia database to complete coverage if necessary.
- **Compliance with the Sub-fund’s policy of excluding controversies:** monitoring of controversies relies on information supplied by the Sustainalytics agency, which assesses and classified incidents according to how serious they are on a scale from 1 (least serious) to 5 (most severe).
- **Compliance with sectoral policy:** filters are applied to identify issuers exposed to sectors whose activity is prohibited by the Sub-fund’s investment policy.
- **Compliance with the UN Global Compact and the OECD’s Guidelines for Multinational Enterprises,** relies on the Sustainalytics agency for application of the normative exclusion policy implemented by the Sub-fund.
- **Monitoring average carbon intensity of the portfolio relative* to a benchmark index described in the previous section** (emissions in tons of CO₂/€m of revenue), WACI, on the wider Scope 1, Scope 2 and upstream Scope 3), **as well as climate and environmental footprint metrics** that meet TCFD requirements. These metrics are contained in a periodic report “Appendix 4 - SFDR” attached to the Sub-fund’s annual report.
- **Reporting of our traceable ESG dialogue** ESG with issuers represented in the portfolio on:
 - i) Awareness of best ESG practices, regular discussions on ESG topics via identification of potential factors of value creation and/or risks
 - ii) Special attention to - and possible surveillance of - issuers whose transparency on ESG practices does not meet our analysis criteria.

Moreover, the Sub-fund has committed to monitoring and appraising Principal Adverse Impacts (PAI) as of 2026, as well as the share of sustainable investments by the portfolio as of the publication of its first SFDR periodic reporting (Appendix 4).

The sources and methodologies relative to these indicators are described in more detail on the Amiral Gestion website under the heading “Responsible Investment”: <https://www.amiralgestion.com/fr/investissement-responsable>

*Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023

● **Which sustainable investment goals does the financial product intend to pursue, and how can the investments made contribute to these objectives?**

SEXTANT OPTIMAL INCOME promotes environmental and social issues. In this respect, it has not committed to a minimum share of sustainable investments. Although it does not have an investment strategy focused on a sustainable investment objective as defined by the SFDR Disclosure regulation, the Sub-fund has committed to presenting ex-post in its annual periodic reporting, the share of its assets in **sustainable investments**, according to the qualification criteria below stemming from the Amiral Gestion approach described below.

DEFINITION OF SUSTAINABLE INVESTMENT: AMIRAL GESTION APPROACH:

Amiral Gestion defines sustainable investment as: *"An investment in a financial instrument that is involved in one or several economic activities:*

- *Contributing significantly to environmental objectives to: i) mitigate climate change with the goal of reaching carbon neutrality by 2050, in accordance with the Paris Agreement on Climate; ii) adapt* to the effects of climate change,*
- *Making a net positive contribution to one or several of the United Nations Sustainable Development Goals (SDG) at the social level by 2030.*

These investments must not have any major adverse impact on other environmental or social objectives, and the companies in which the investments are made must respect the principles of good governance."

The criteria to qualify as a Sustainable investment under this definition are described in detail in the Sustainable Investment Methodology Note which is available on the Amiral Gestion website:
<https://api.amiralgestion.com/documents/permalink/2357/doc.pdf>

**The substantial contribution to the objective of adapting to climate change will be an effective criterion for Sustainable Investment qualification from 1 January 2024*

● **To what extent do the financial product's sustainable investments have a significant adverse impact on a sustainable investment objective in environmental or social terms?**

Amiral Gestion has several other requirements to ensure that its investments do not seriously harm the environment or people. These are:

- **Investment rules that apply to all funds and mandates classed SFDR 8 and 9 and to the whole portfolio:** exclusion policies, Principal Adverse Impact (PAI) considerations, good governance practices.
- **A set of reinforced requirements for sustainable investments** to confirm the contribution to an environmental or social objective and ensure that no harm is done to other sustainability objectives.

This whole DNSH principle, and whether the various measures are applied ex ante and/or ex post, is described in more detail in the Methodology note on our definition of Sustainable Investment and is available on our website:

<https://api.amiralgestion.com/documents/permalink/2357/doc.pdf>

ESG investment rules specific to this Sub-fund are described under the heading "ESG constraints" and complete the DNSH principle.

The principle adverse impacts are the negative consequences arising from investment decisions for sustainability factors related to environmental and social issues, human resources, respect for human rights, the fight against corruption and acts of corruption

● — How are indicators concerning adverse impacts taken into consideration?

As of 1 January 2026, the Sub-fund will be committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) on sustainability factors through 16 PAI indicators stemming from the European SFDR regulation. **Taking these indicators into consideration is part of Amiral Gestion's PAI policy.** This policy, including the global approach, the sources and measures put in place for each PAI indicator, is available on the Amiral Gestion website under the heading "Responsible Investment":

<https://api.amiralgestion.com/documents/permalink/2693/doc.pdf>

This document includes:

- In appendix I: measures implemented across the whole portfolio
- In appendix II: additional measures applied to sustainable investments.

● — To what extent do sustainable investments comply with OECD Guidelines for Multinational Enterprises and United Nations Principles on Business and Human Rights?

To ensure that the Sub-fund's investments, including those which are considered sustainable, comply with the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, **Amiral Gestion's normative exclusion policies are implemented ex-ante and ex-post on the basis of Sustainalytics research**, whose conclusions may be confirmed or adjusted following an internal analysis by the fund manager and approved by Amiral Gestion's committee for surveillance of controversies. If a company in the portfolio is added to the Sustainalytics Watchlist, it is put on surveillance.

In addition, the portfolio excludes the most serious controversies*, including those that may be linked to the principles of these two international standards, and the ESG and management teams are particularly vigilant when assessing and monitoring the quality of company ESG profiles, especially their exposure to events, controversies or other risk factors related to the following issues:

- Human rights (notably forced and child labour)
- Environmental controversies related to climate change and biodiversity
- Fiscal responsibility and transparency

The normative exclusion policy contained in DNSH SFDR applies to sub-funds classed SFDR 8 and 9, as mentioned above.

**The levels excluded are specified in the section "Constraints defined to respect all environmental or social characteristic" section of this document.*

The EU taxonomy contains a principle of "Do No Significant Harm" according to which investments aligned with the taxonomy should not seriously damage EU taxonomy objectives, in addition to the EU's own criteria.

The principle of 'Do No Significant Harm' applies exclusively to the investments underlying a financial product that takes account of EU criteria with respect to environmentally sustainable economic activity. The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

No other sustainable investment should do significant harm to environmental or social objectives.

Does the financial product take into consideration the Principle Adverse Impacts on sustainability factors?

☐ Yes

☒ No

At the end of its first year in operation, the Sub-fund will be committed as of 1 January 2026, to monitoring and taking into consideration the Principal Adverse Impacts of its investments (PAI SFDR) on sustainability factors, in order to identify and gradually take appropriate action. The Sub-fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

Amiral Gestion's PAI policy, including details of sources and methods for taking account of each indicator, is available on the company website under the heading "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2693/doc.pdf>

The metrics and information for taking account of PAIs will be disclosed in the periodic document "Appendix 4 - SFDR" of the Sub-fund, for the first time in 2024 and concerning 2023.

What investment strategy is followed for this financial product?

The **Investment strategy** guides investment decisions, taking into account factors such as investment objectives and risk tolerance.

The Sub-fund will invest up to 100% of net assets in bonds, including subordinated bonds up to 100% of net assets and in marketable debt instruments largely denominated in euros of public and private issuers. It may also invest up to 30% of net assets in non-euro securities.

The Sub-fund may invest up to 20% of net assets in bonds that are convertible, exchangeable or indexed (except government bonds) and up to 10% in contingent convertible bonds ("CoCos"). They are acquired by means of firm orders, repo operations or borrowing of securities. Exposure to equities via convertibles will be less than 10%.

Assets that are rated (the security if possible, otherwise the issuer) below BBB- (Standard & Poors or other recognised rating agencies, or judged equivalent by the management company's analysts), are classed as speculative and may account for up to 30% of net assets.

Unrated securities or issuers may account for up to 50% of net assets.

Assessment of the risk of default by a security or its issuer is based on the management company's analysis using our proprietary methodology for assessing credit risk.

If there are several agency ratings, a median score is calculated based on the official agency ratings and on the management company's internal rating. In such cases, our internal rating has the same weighting as the agency ratings.

The Sub-fund's sensitivity to interest-rate risk is between -3 and 5.

The management company may decide to rely on its internal rating rather than the median rating. Therefore, the decision to acquire or divest a security is not automatically and exclusively based on the criteria of recognised rating agencies but is also based on internal credit or market risk analysis of the management company.

The portfolio may also include Euro Commercial Paper up to 10% of net assets.

Lastly, the Sub-fund may occasionally invest in assets issued by securitisation bodies that respect the conditions for eligibility as financial securities as defined by the Monetary and Financial Code.

The Sub-fund's investment strategy includes an Environmental, Social and Governance (ESG) approach which is assessed by means of sustainability risk. A sustainability risk is an environmental, social or governance event or situation that, if it occurs, could have a material adverse effect, actual or potential, on the value of the investment. In order to quantify this risk, the management company currently uses the ESG Risk Score of its supplier, MSCI ESG Ratings. This score represents the extent to which the economic value of the company is exposed to ESG factors.

After this analysis and following application of the ESG requirements described in the next section, managers may freely invest according to their convictions.

● ***What are the constraints on investment strategy when selecting investments that respect all the environmental and social issues promoted by this financial product?***

The securities eligible for inclusion in SEXTANT OPTIMAL INCOME is determined after application of the global DNSH principle described previously, and after taking into consideration the following constraints which are specific to the Sub-fund:

- **Compliance with the compartment's sectoral exclusion policy:** thermal coal, tobacco, controversial weapons, civilian firearms, pornography, unconventional fossil fuels with the exception of North American shale oil and gas. The criteria, thresholds and procedures for applying this due diligence and exclusion policy are specified in the Amiral Gestion sector policy available on its website: <https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>
- **Compliance with the normative exclusion policy*:** exclusion/non-investment in companies in breach of the UN Global Compact and/or the OECD Guidelines for Multinational Enterprises, following an internal review and confirmation of the breach by the committee for monitoring of controversies. Surveillance of companies that appear on the Sustainalytics Watchlist where this status has been confirmed by the committee for monitoring of controversies following an internal review.
- **Exclusion / non-investment* in companies exposed to severe controversies (i.e. Level 5 on the Sustainalytics scale)** if confirmed by the committee for monitoring of controversies following an internal review. Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities.

Furthermore, when the portfolio invests in **unit trusts**, the latter must have the **same SFDR rating** as the Sub-fund.

**When issuers in which the Sub-fund has invested are found to be exposed to severe (level 5) controversies, or to no longer comply with the UN Global Compact and OECD principles, their case shall be put to the committee for surveillance of controversies in order to verify the severity/non-compliant status and decide on possible exclusion from the portfolio, or to put the company on surveillance in the hope that the level of severity will decrease following an internal analysis..*

● ***What is the minimum rate the financial product commits to in reducing the scope of planned investments before implementation of this investment strategy?***

Not applicable. The Sub-fund did not define an investment universe when launched.

Good governance practices for sound management structures, good relations with – and remuneration of – employees and respect for tax commitments

What policy is implemented to assess good governance practices at the companies in which the financial product has invested?

Managers of the Sub-fund assess governance via an external ESG Score (Source: MSCI ESG Ratings)* used to monitor the portfolio's ESG performance and which verifies six aspects of governance: Ownership and control, Board of Directors, Payments, Accounting, Business ethics and Fiscal transparency. In case of non-coverage by the agency, analysis to assess an issuer's governance is carried out by the Credit Management team on the basis of proprietary analysis criteria. These governance criteria are assessed internally and notably include quality of management policy, transparency, quality of financial communication, assessment of governance structure, responsible tax policy and business ethics.

All of these criteria allow us to assess and to factor into our analysis the dimensions necessary for sound management structures, good relations with – and fair remuneration of – employees and respect for fiscal commitments.

In terms of commitment, we may reopen dialogue issuers in the following cases:

- **Those with external ESG Rating** below 4/10 for Governance**
- **Those exposed to controversies related to fiscal responsibility and transparency.**

This dialogue takes the following approach:

- Improvement recommendations are drawn up in writing by the fund manager and/or the ESG team when the shortcomings were identified (Year N);
- An initial intermediate report is submitted after one year (N+1);
- A final report is submitted after two years (N+2), which may lead to disinvestment in some high-risk cases if the issuer have not shown improvement (or made an effort to improve)***

Moreover, to qualify as a Sustainable Investment, issuers cannot have a governance rating that is lower than 5/10. And in accordance with the policy of normative exclusion, the Sub-fund cannot invest in companies that are in violation of the United Nations Global Compact or the OECD Guidelines, or ones which are exposed to severe (Level 5) controversies, notably concerning governance.

**This rating is described in the Amiral Gestion Sustainability Report (appendix II):*

<https://api.amiralgestion.com/documents/permalink/2391/doc.pdf>

*** If the issuer is not covered by this Sub-fund's main external non-financial rating agency (MSCI ESG Ratings), verification will be done by means of internal analysis*

**** Qualitative and/or quantitative analysis*

What asset allocation is planned for this financial product?

Asset allocation refers to the share of investment in a given asset class.

In order to calculate alignment with E/S characteristics, we focus on all instruments except cash, derivatives, and short-term debt. **At least 60%** of securities in the portfolio have passed the exclusion filter applicable to the Sub-fund and are covered by ESG analysis that results in a non-financial rating.

Activities aligned with the taxonomy are expressed as a %:

- **of revenues** to reflect the share derived from green activities of companies in which the Sub-fund has invested;
- **of capital expenditure** (CapEx) to show green investments by companies in which the financial product invests, for a transition to a green economy, for example;
- **of operating costs** (OpEx) to reflect green operations of companies in which the Sub-fund has invested

● **How does the use of derivatives help to achieve the environmental and social objectives promoted by the financial product?**

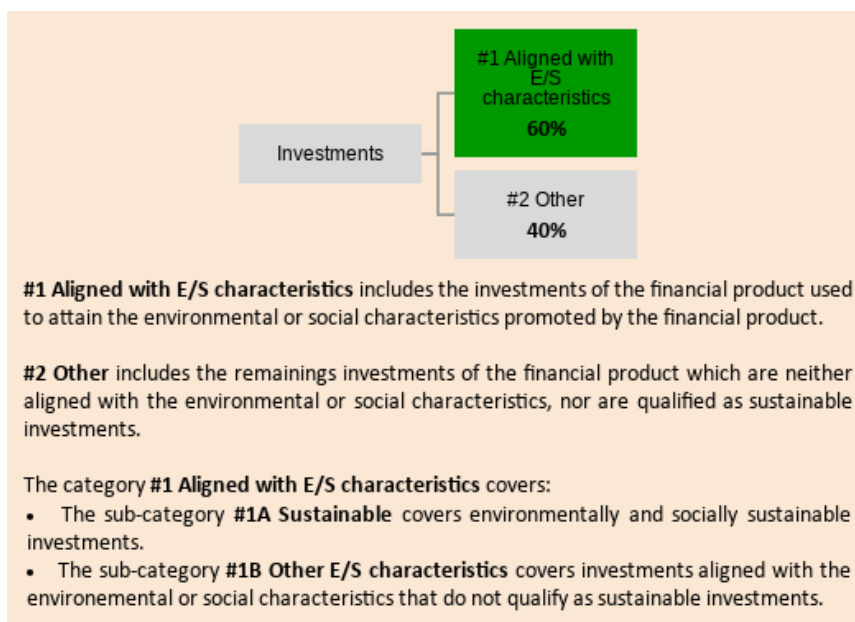

These instruments are not used to achieve the environmental or social characteristics promoted by the product.

● **What is the minimum level to which sustainable investments with an environmental objective are aligned with EU taxonomy?**

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective, but not aligned with EU Taxonomy. The Sub-fund has acquired positions in sustainable investments as defined by the taxonomy, up to the minimum aligned green share representing 0% of its assets. To date, communication of alignment data remains partial due to gradual deployment of the CSRD directive.

However, the Sub-fund will communicate its green share *ex-post* in its annual report on the basis of the data reported by the companies.

● **Does the financial product invest in activities related to fossil gas and/or nuclear energy that are in compliance with EU Taxonomy?²**

Not applicable, as the portfolio has no commitment to a minimum share of investments aligned with EU Taxonomy.

☐

Yes:

☐

In gas

☐

In nuclear energy

☒

No

² Activities related to fossil gas and/or nuclear only comply with EU Taxonomy if they help to limit climate change (mitigation of climate change) and do no major harm to any objective of EU Taxonomy – see the explanatory note in the left-hand margin. All the criteria applicable to economic activities in the fossil gas and nuclear sectors that comply with EU Taxonomy are defined in (EU) regulation 2022/1214 of the Commission.

To comply with EU taxonomy, the criteria applicable to **fossil gas** include limitations on emissions and the switch to fully renewable electricity or low carbon fuels by end-2035. As for **nuclear energy**, the criteria include rules for nuclear security and waste management. **Enabling activities** directly allow other activities to make a substantial contribution to an environmental objective. **Transitory**

The two graphs below show in green? the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What is the minimum proportion of net assets invested in transitory and enabling activities?

Not applicable

This symbol represents sustainable investments that have an environmental objective, but do **not take into account criteria** applicable to environmentally sustainable economic activities as defined by EU taxonomy.

What is the minimum proportion of sustainable investments with an environmental objective non-aligned with EU taxonomy?

Not applicable. The Sub-fund has **not committed to a minimum share of sustainable investments**.

What is the minimum share of sustainable investments with a social objective?

Non applicable. The Sub-fund has **not committed to a minimum share of sustainable investments**.

Which investments are included in the “#2 Others” category? What is their purpose and are there any minimum environmental and social guarantees?

The instruments in the “#2 Others” category are diversification tools principally used to manage the portfolio’s cash holdings and to counter unfavourable short-term market trends. This category includes hedging and exposure derivatives, securities with derivatives attached, deposits and cash holdings and borrowed funds. These investments may be subject to the requirements of the Sub-fund’s sectoral and normative exclusions and Amiral Gestion’s policy with respect to controversies mentioned above and included in the DNSH SFDR, subject to data availability.

Has an index been selected as a benchmark to determine if this financial product is aligned with the environmental and/or social objectives it promotes?

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index.

- *How is the benchmark index permanently aligned with each of the environmental or social characteristics promoted by the financial product?*

Not applicable

- *How is alignment of investment strategy with the methodology of the index guaranteed on a permanent basis?*

Not applicable

- *How is the index different from a general market index?*

Not applicable

- *Where can one find the method used to calculate the selected index?*

Not applicable

Where on the web can information be found that is specifically for the product?

More detailed information on the product is available on the website:
<https://www.amiralgestion.com/fr/sextant-optimal-income>

Benchmark indices allow us to ascertain if a financial product has the environmental or social characteristics that it promotes

Appendix II¹

Pre-contractual information model for the financial products described in Article 8 paragraphs 1, 2 and 2b, of (EU) regulation 2019/2088 and article 6, first sub-paragraph, of (EU) regulation 2020/852

Name of the product: **SEXTANT FRANCE ENGAGEMENT**

Identity of the legal entity: 969500MGFW3NB3B3NI32

Environmental and/or social characteristics

Sustainable investment implies an investment in an economic activity that contributes to an environmental or social objective, provided it does not have any major adverse impact on such objectives, and the company in which the financial product invests implements good governance practices.

EU taxonomy is a classification system arising from (EU) regulation 2020/852, which drew up a **list of environmentally-sustainable economic activities**. This regulation does not include a list of socially-sustainable economic activities. Sustainable investments that have an environmental objective are not necessarily aligned with the taxonomy.

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective**: ____%

in economic activities that qualify as environmentally sustainable under the EU taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU taxonomy

It will make a minimum of **sustainable investments with a social objective**: ____%

It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, **but will not make any sustainable investments**

¹ Publication date of the document: January 2024

What environmental and/or social characteristics are promoted by this financial product?

Sextant France Engagement is a sub-fund of the SRI-labelled SEXTANT SICAV, which has a dual objective:

- **Financial:** to achieve, over the recommended investment period of five years, a performance net of management fees higher than the CAC All Tradable Index, net dividends reinvested, through a selection of French equities of all capitalisation sizes.
- **Non-financial:** to invest in companies that stand out for their good ESG practices, according to a best-in-class approach, but also to support those with good potential for improvement, according to a best-effort approach based on shareholder engagement.

These objectives entail ESG characteristics that are taken into consideration at two levels:

- **An ESG Performance Rating*** that is used on the one hand ex-ante to determine a universe of securities eligible to investment and on the other hand for an ex-post verification of the portfolio's ESG quality. This rating, whose criteria comply with the charter of the Relance label** which the Sub-fund holds, is based on our fundamental analysis and leads to an internal ESG quality rating and indicators selected by our teams on the basis of Ethifinance Gaïa Ratings and constitutes an external ESG Performance rating.

Environment 5 criteria - 22 indicators

- *Positive environmental impact of the company's business activity and initiatives in this area (0-25%)*
- *Overall environmental strategy (12%)*
- *Controlling environmental impacts (37%)*
- *Managing climate-related risks and contributing to the energy transition (19%)*
- *Responsible supply chain: Environment (8%)*

Social 4 criteria - 18 indicators

- *Positive social and societal impact of the company's business activity and initiatives in this area (0-25%)*
- *Social policy and job preservation (39%)*
- *Improving health and safety conditions (19%)*
- *Responsible supply chain: Social (17%)*

Governance 4 criteria - 25 indicators

- *Integrity of governance bodies, quality of communication and transparency (25%)*
- *Governance best practices (48%)*
- *Business Ethics (14%)*
- *Gender equality (14%)*

Criteria assessed qualitatively by Amiral Gestion's portfolio managers & analysts

- **An internal Quality Rating*** established by the management team as part of fundamental analysis and notably guiding our selection of investments. This Quality Rating takes account of 10 ESG criteria of the 28 analysed qualitatively. These criteria focus on social utility, the nature of the business activity, the motivation and pride of company employees and respect for team members (training policy and career development, corporate culture etc.), a global assessment of the company's environmental policy in the light of sectoral exposure, the existence of controversies, governance policy and alignment of the company's interests with those of minority shareholders, communication and transparency, incentives to encourage directors to act responsibly and to promote sustainable development, respect for the interests of stakeholders, clients and other parties concerned (suppliers, government, fiscal transparency etc).

Moreover, Sextant France Engagement refuses to invest in certain sectors that have significant negative environmental and/or social impacts, or in companies involved in serious controversies or ones that do not respect international guidelines concerning Responsibility***. The Sub-fund therefore implements sectoral and normative exclusion policies and avoids controversies, as described under the heading "ESG constraints" of this document.

Lastly, as required by the Relance label, the Sub-fund promotes job creation and favours participation in primary market operations.

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. However, the fund management team tracks ESG characteristics and performances of the portfolio relative to a benchmark universe that is coherent with the Sub-fund's investment strategy and comprises 350 French companies of all capitalisation sizes without taking ESG performance into account when compiling it.

* For details of the methodology underlying these two ESG ratings, see Appendix II of the Amiral Gestion Sustainability Report on the Company website: <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

** For more information about the relance label charter: https://www.economie.gouv.fr/files/files/directions_services/plan-de-relance/Charte_label_relance.pdf?v=1694094995

*** Those which violate the United Nations Global Compact and/or OECD Guidelines for Multinational Enterprises

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?**

The Sub-fund relies on the following sustainability indicators to assess alignment of the portfolio with the environmental and social characteristics that it promotes:

- **The average ESG performance rating of the portfolio**, which must be higher than that of its benchmark universe** in compliance with the Sub-fund's ESG commitments. The score is based on source data from our internal analysis as well as from indicators selected by our teams from the Gaia Ratings database of Ethifinance.
- **The average internal Quality Rating of the portfolio**, reflecting ESG integration into fundamental.
- **SRI selectivity**, reflecting the percentage reduction in the benchmark universe** following application of the various non-financial filters, and should be at least 20% to comply with the Sub-fund's ESG commitments.
- **Compliance with the Sub-fund's policy of excluding controversies*****: monitoring of controversies relies on information supplied by the Sustainalytics agency, which assesses and classified incidents according to how serious they are on a scale from 1 (least serious) to 5 (most severe).
- **Compliance with sectoral policy*****: filters are applied to identify companies exposed to sectors whose activity is prohibited by the Sub-fund's investment policy.
- **Compliance with the UN Global Compact and the OECD's Guidelines for Multinational Enterprises*****, relies on the Sustainalytics agency for application of the normative exclusion policy implemented by the Sub-fund.
- **Two quality indicators****** on which the Sub-fund has committed to being more highly rated than its universe**:
 - i) Human Rights: Intensity of human rights controversies: For the portfolio: number of human rights controversies / Total number of companies in the portfolio*100 For the universe: Number of human rights controversies / Total number of companies in the universe*100)
 - ii) Environment/climate change: Carbon intensity (WACI measurement) corresponding to the weighted average of carbon footprint ratios per revenue (sum of weight footprint ratio for each share, on extended Scope 1, Scope 2 and Scope 3 upstream).
- **Four social and human rights progress indicators***** on which the portfolio is committed to improving relative to its benchmark universe** over three years:
 - Social/promoting gender equality: Average percentage of women on the Executive Committee and average number of women managers
 - Governance / Value sharing: Share of companies with employee share ownership and Average share of capital held by employees
 - Total number of people employed in France by companies represented in the portfolio (an indicator of the France Relance label)
 - Number of primary market operations in which the portfolio has participated (an indicator of the France Relance label)

- **Monitoring of climate and environmental footprint metrics* as required by TCFD** and summarised in our periodic “Appendix 4 SFDR” report attached to the Sub-fund’s annual report:
 - i) Carbon intensity per million euros generated (i.e. one of the ESG quality indicators mentioned above).
 - ii) Alignment with 2°C. This metric is an objective of the Paris Agreement to limit global warming to 2°C relative to pre-industrial levels by 2100. It reveals the portfolio’s climate trajectory.
 - iii) Green assets, representing the percentage alignment of the Sub-fund with the European taxonomy.
 - iv) Brown assets, reflecting the portfolio’s exposure to fossil fuels (as a percentage)
 - v) Environmental footprint, which quantifies different sources of impact related to the company’s activity in a monetary form. This mainly involves measuring the value of negative externalities arising from greenhouse gas emissions, the use of water resources, waste production, air/soil/water pollution and the use of natural resources. This metric is expressed as a percentage of revenues, reflecting the cost of these externalities.
 - vi) Exposure to Transition 2030 risks related to higher prices per ton of carbon emissions. This metric is expressed as a % of EBITDA, reflecting the additional cost of these risks.
 - vii) Exposure to physical risks related to climate change (water stress, fires, floods, heatwaves, hurricanes, coastal flooding) summarised by a mark out of 100.
- **Reporting of our traceable ESG dialogue** ESG with issuers represented in the portfolio on:
 - i) Awareness of best ESG practices, regular discussions on ESG topics via identification of potential factors of value creation and/or risks
 - ii) Special attention to - and possible surveillance of - issuers whose transparency on ESG practices does not meet our analysis, with the possibility of divestment in certain cases
- **Reporting of the Sub-fund’s voting policy:** the Sub-fund has committed to participate systematically***** in voting of companies in which it has invested, applying the principles of the Management Company’s proprietary voting policy that aims for exemplary policies in governance and social and environmental responsibility

Moreover, the Sub-fund has committed to monitoring and reporting:

- **Principle Adverse Impacts (PAI)**, described in the section “How indicators of negative impacts are taken into consideration” of this document.
- **the share of sustainable investments in the portfolio**, in order to ensure that the Sub-fund has achieved the minimum level required, based on Amiral Gestion’s own methodology to qualify sustainable investments, available on the website: [Responsible Investment– Amiral Gestion](#)

* Methodologies and sources for these indicators are described in more detail in Amiral Gestion’s Sustainability Report (respectively in section 2.3 and in Appendix II): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

** The reference universe is described above in the section “ESG characteristics”

*** These exclusions are described in the section “Constraints of the investment strategy” in this document.

More globally, commitments to coverage and/or performance are associated with certain indicators mentioned above and are detailed where necessary in the section “Constraints of the investment strategy” in this document.

**** These indicators of quality and progress are described in more detail in the Sub-fund’s SRI Transparency Code, available on the Amiral Gestion website: <https://www.amiralgestion.com/en/sextant-france-engagement>

***** Except in cases where technical issues prevent voting

● **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

Sextant France Engagement promotes environmental and social issues. Although it does not have an investment strategy focused on a sustainable investment objective as defined by the SFDR Disclosure regulation, the Sub-fund has committed to investing at least **30% of its assets in sustainable investments**, according to the qualification criteria below stemming from the Amiral Gestion approach.

DEFINITION OF SUSTAINABLE INVESTMENT: AMIRAL GESTION APPROACH

Amiral Gestion defines a sustainable investment as *instrument that is involved in one or several of the following economic activities*:

- *Contributing significantly to environmental objectives to: i) mitigate climate change with the goal of reaching carbon neutrality by 2050, in accordance with the Paris Agreement on Climate; ii) adapt* to the effects of climate change*
- *Making a net positive contribution to one or several of the United Nations Sustainable Development Goals (SDG) at the social level by 2030.*

These investments must not have any major adverse impact on other environmental or social objectives, and the companies in which the investments are made must respect the principles of good governance. "

Criteria for qualification as a sustainable investment (Source: Amiral Gestion's Methodological Note on Sustainable Investment, available on the Company website:
<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>)

Presented below are the indicators that assess the real contribution of companies in the portfolio to the objective of mitigating climate change and adapting* to its effects:

1) Temperature alignment: < or = 2°C (Source: Iceberg Data Lab and - when not available - S&P Trucost)

or

2) Taxonomy alignment – minimal green share > or = 10 % of revenues (Source: Sustainalytics, prioritising data supplied by companies, otherwise estimated data)

or

3) Companies that have accepted SBTi ("Target set") or have made a public commitment ("Committed") to the process, or supplied a letter of intent to join the SBT initiative within 12 months following a traceable engagement action by the Management

Source: SBT – <https://sciencebasedtargets.org/reports/sbti-progress-report-2021/progress-data-dashboard#datadashboard>;
Amiral Gestion

or

4) Companies that derive at least 25% of revenues from enabling or transitory activities that contribute to an objective that is environmental, but not yet identified in the taxonomy due to their innovative nature or very specific usefulness

Source: Amiral Gestion. Companies whose securities qualify as a sustainable investment under this criteria will be documented by the fund manager and approval will be requested from the IR/RSE team and/or the IR/RSE Pilot Committee

** The substantial contribution to the objective of adapting to climate change has been effective criterion for Sustainable Investment qualification since January 1, 2024.*

Criteria for qualification as a sustainable investment on the basis of net positive contribution to the social SDGs are presented below. Source: MSCI ESG - Sustainable Impact Metrics)

Of the 17 Sustainable Development Goals, seven SDGs with social objectives are selected to measure the net positive contribution:

- SDG 1: No poverty - Eradicate poverty in all its forms
- SDG 2: Zero hunger - Put an end to global hunger, attain food security, improve nutrition, promote sustainable agriculture
- SDG 3: Good health and well-being - Allow people to live in good health and promote well-being for all age groups
- SDG 4: Good quality education - Access to good, inclusive education; apprenticeship opportunities for all throughout the working life
- SDG 5: Equality of sexes - Achieve gender equality and promote autonomy of women and girls

- SDG 8: Decent working conditions and economic growth - Promote sustainable, inclusive economic growth, full productive employment, and a good job for all
- SDG 10: Reduce inequalities - Reduce inequalities between and within countries

On the basis of SDGs 1, 2, 3, 4, 5, 8, 10, for a company to qualify as a sustainable investment under the Management Company's definition, it must obtain:

- ⇒ a Net Alignment score = or > 2 for one or several SDGs
- +
- ⇒ A positive DNSH SDG filter: The company must have a neutral score (i.e. = or > -1) on the Product Alignment and Operational Alignment criteria for all social SDGs

This research assesses alignment of companies in the portfolios of our Sub-funds with social SDGs via:

- identification of companies supplying potential solutions to the challenges mentioned above, thanks to products and services that generate revenues related to these objectives and by estimating the percentage of underlying revenues ("Product alignment score").
- an analysis of the ways in which companies contribute to SDGs through their business activities by improving operational practices, drawing up long-term strategies and being transparent about their progress ("Operational alignment score").

To determine their net alignment contributions, the methodology includes a measure of the positive contribution, but also another key component of DNSH by identifying as the adverse impacts cases of non-alignment by the company due to major ESG controversies, key metrics related to the SDG in question, or exposure to controversial activities. The net alignment score corresponds to the average between the Product Alignment score and the Operational Alignment score. The DNSH of social SDGs is included in each of the scores.

Scores range from -10 ("*strongly misaligned*") to +10 ("*strongly aligned*") on the basis of two assessment levels: Product Alignment, which is balance between positive contribution / adverse impacts of goods and services, and Operational Alignment, which is the balance between positive contribution / adverse impacts on social SDGs in business and operations.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Sub-fund has several other requirements to ensure that its investments do not seriously harm the environment or people. These requirements take the form of investment rules applicable to all products classified as Article 8 and Article 9 SFDR, including Sextant France Engagement, across the entire portfolio, and a set of reinforced requirements on sustainable investments.

The measures presented in the chart below are implemented **both ex post and ex ante when they affect eligibility of companies in the portfolio** (sectoral and normative exclusions, controversies, etc).

The following tools are used exclusively on an ex-post basis:

- **Requirement to confirm the sustainable nature of investments for portfolios classed SFDR Article 8 (including Sextant France Engagement)**, as this verification allows the company to be qualified a "Sustainable Investment" without affecting inclusion of the security in the portfolio if company policies are in line with ESG characteristics
- **PAIs taken into consideration**, to track externalities of investments and not an ex-ante selection criteria (except PAI 4, 10 and 11 which concern exclusions)
- **Monitoring of governance practices for SFDR Article 8 portfolios (including Sextant France Engagement)**: for more information refer to the section "How does the Sub-fund assess governance practices at the companies in which it has invested?" in this document

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

DNSh PROCEDURE APPLIED ACROSS THE PORTFOLIO

+ Assessing good governance practices

For more detail, please see under the heading:
« What is the policy to assess good governance
policies of investee companies? »
in this document

1. Respect for Amiral Gestion's Sectoral policy, i.e. non-involvement of companies in the portfolio in activities connected with tobacco, controversial arms, pornography, thermal coal, unconventional fossil energies (except N. American shale oil and gas).
Exclusion criteria and thresholds are detailed in Amiral Gestion's Sectoral Policy, available on the Company website:
<https://api.amiralgestion.com/documents/permalink/2398/doc.pdf>
& **additional sectoral exclusions specific to certain portfolios**
The criteria are detailed where appropriate in the section entitled « What are the binding elements of investment strategy » in this SFDR pre-contractual document

+

2. Respect Amiral Gestion's Normative Policy, i.e. compliance with the United Nations Global Compact and the OECD Guidelines for Multinational Enterprises

+

3. Controversy monitoring and exclusions: Exclusion of companies exposed to severe (Level 5)* ESG controversies, and even to serious (Level 4)* for certain portfolios.
The exclusion levels for each portfolio are detailed in the section entitled « What are the binding elements of investment strategy »

And special attention is paid to all controversies related to the following themes, irrespective of the level of gravity:

- Human rights
- Climate and biodiversity
- Fiscal responsibility

+

4. Taking into account Principal Adverse Impacts:
Set of practices applicable to all portfolios

For more information, see table 1 under:
« How have the indicators for adverse impacts on sustainability factors been taken into account? » in this document

REINFORCED DNSh APPLIED TO SUSTAINABLE INVESTMENTS**

5. Confirmation of the contribution to objective E or S by checking that no harm is caused to other sustainability objectives**

Taking PAI indicators into consideration: additional methods applicable to Sustainable Investment (SI)
For more information, see Amiral Gestion's Policy for taking PAI into consideration (Appendix II)

Specific DNSh / Social Objective:

A favourable DNSh SDG filter: the company must attain a neutral score for the Product Alignment and Operational Alignment criteria in all social SDGs i.e. = or > -1 ** (Source: MSCI ESG Research)

Specific DNSh / Environmental objective:

Absence of environmental controversies for which the level of gravity is significant (3), serious (4) or severe (5)*, especially when related to the six environmental themes of the taxonomy. (Source: Sustainalytics)

Minimum social safeguards: Absence of exposure to social controversies for which the level of gravity is serious (4) or severe (5)*;
Removal of « Sustainable Investment » status for companies placed on the Watchlist of the UN Global Compact and/or OECD Guidelines, and exclusion in cases of non-compliance (Source: Sustainalytics)

+ Minimum Governance Rating to qualify as a « Sustainable Investment »: 50/100

* On the Sustainalytics scale

** The criteria for positive contribution positive were detailed previously in the question concerning the objectives of sustainable investment

*** For more information, please refer to Amiral Gestion proprietary methodology to qualify Sustainable Investment on the website: <https://api.amiralgestion.com/documents/permalink/2357/doc.pdf>

ESG investment rules specific to this Sub-fund are described under the heading “ESG constraints” and complete the DNSh

— — How have the indicators for adverse impacts on sustainability factors been taken into account?

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAIs) on sustainability factors through 16 PAI indicators stemming from the European SFDR regulation. **Consideration of these indicators is based on:**

The Amiral Gestion PAI Policy. This policy, including the global approach, the sources and measures put in place for each PAI indicator, is available on the Amiral Gestion website under the heading “Responsible Investment”: <https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

- Table 1 measures implemented across the whole portfolio
- Table 2 points out additional measures applied to sustainable investments.

Table 1: Measures implemented across the whole portfolio

"Reference and name of PAI indicator"		Measures to take account of PAIs across the entire Sextant France Engagement portfolio
PAI 1	GHG emissions <i>Expressed in T/CO2eq</i>	<p>Measuring and monitoring emission indicators, carbon footprint and intensity of the portfolio as part of TCFD climate analysis, notably ahead of definition of a 2030 decarbonisation target by Amiral Gestion in 2024, as a component of Climate Strategy.</p> <p>Inclusion in ESG analysis, especially for the highest-emission sectors, in a double materiality logic.</p> <p>Dialogue with companies falling short on these metrics, especially small and mid capitalisations, as part of our shareholder engagement approach to encourage them to:</p> <ul style="list-style-type: none"> - improve transparency on their carbon impact and encourage them to publish these metrics ahead of full deployment of the CSRD Directive* - implement a strategy to reduce their carbon emissions, including a set of written objectives. <p>These engagement initiatives take the form of individual dialogue and/or collaborative initiatives in which Amiral Gestion participates (CDP, SBTi notably)**</p> <p>A commitment to outperformance by the portfolio relative to its benchmark index.</p> <p>"WACI": Weighted average of carbon intensity ratios by turnover (sum weight * intensity ratio for each stock) (Source: S&P - Trucost database)</p>
PAI 2	Carbon footprint <i>Expressed in T/CO2e/EURm invested</i>	<p>Inclusion of Climate issues in voting policy: analysis of measures taken by the Board of Directors to combat climate change effectively influences votes concerning re-election of the directors.***</p> <p>*The scope of application will be extended gradually from 11,600 companies in 2023 to almost 50,000 by 2028</p> <p>** For more information, please see the Activist Shareholder Report on the Amiral Gestion website: https://api.amiralgestion.com/documents/permalink/2392/doc.pdf</p> <p>*** For more information, please see the Amiral Gestion voting policy on the Company website: https://api.amiralgestion.com/documents/permalink/2165/doc.pdf https://api.amiralgestion.com/documents/permalink/2165/doc.pdf</p>
PAI 3	Carbon intensity <i>Expressed in tCO2e/EURm turnover</i>	
PAI 4	Exposure to companies active in fossil energies <i>Expressed as a percentage of investments</i>	<p>Sector exclusions: The Sub-Fund excludes coal and conventional and unconventional oil & gas.</p> <p>Exclusion criteria and thresholds are detailed in the SRI transparency Code which is available on the Amiral Gestion website: https://www.amiralgestion.com/fr/sextant-france-engagement</p>
PAI 5	Share of renewable energies (Production and consumption) <i>Expressed as a percentage</i>	<p>The energy mix of operations and the intensity of energy consumption are taken into consideration in ESG analysis where appropriate for the sector, in a double materiality logic (i.e. respectively, PAI 5: companies that have the largest share of non-renewable energy consumption or production; PAI 6: companies operating in sectors that emit the highest levels of GHG and which have the highest energy consumption).</p> <p>Shareholder engagement: dialogue with companies potentially concerned and whose transparency is inadequate, notably small and mid capitalisations, to persuade them to improve transparency on energy consumption and on production / consumption of non-renewable energies and encourage them to publish these metrics ahead of full deployment of the CSRD Directive*. These engagement initiatives take the form of individual dialogue and/or collaborative initiatives in which Amiral Gestion participates (CDP notably)**</p>
PAI 6	Energy consumption <i>Expressed in MWh/EURm of turnover</i>	<p>Apart from the points mentioned above, Amiral Gestion has not at this stage set a target for improvement on these metrics, and will define a more detailed procedure for these PAI after a period of observation of results on these indicators for optimal targeting of the measures.</p> <p>*The scope of application will be extended gradually from 11,600 companies in 2023 to almost 50,000 by 2028</p> <p>** For more information, please see the Activist Shareholder Report on the Amiral Gestion website: https://api.amiralgestion.com/documents/permalink/2392/doc.pdf https://api.amiralgestion.com/documents/permalink/2392/doc.pdf</p>
PAI 7	Biodiversity <i>Share expressed as percentage of companies with an impact</i>	<p>Impact on biodiversity is taken into consideration qualitatively in ESG analysis if the activity of the company is likely to generate such negative externalities in protected areas and/or ones rich in biodiversity.</p> <p>The involvement of governance bodies in biodiversity issues is notably monitored by dedicated indicators produced by the CDP (when data is available).</p> <p>Special attention is also paid to all controversies related to biodiversity, however serious. This vigilance may lead to surveillance, dialogue or exclusion, depending on how serious the incident is deemed.</p> <p>Moreover, as part of our environmental policy, Amiral Gestion has committed* to open a reflection in 2025 to set 2030 biodiversity objectives, in accordance with the principles of the Convention on biological diversity.</p> <p>*For more information, please see section 5.3 of the Sustainability Report: https://api.amiralgestion.com/documents/permalink/2391/doc.pdf</p>
PAI 8	Water pollution <i>Expressed in tonnes</i>	<p>These metrics are taken into consideration in ESG analysis where appropriate for the sector, in a double materiality logic (i.e. respectively, PAI 8: as industrial activities produce large amounts of effluents and other sources of water pollution; PAI 9: activities that generate large quantities of hazardous waste).</p>
PAI 9	Production of hazardous waste <i>Expressed in tonnes</i>	<p>Apart from taking this into account when appraising companies, Amiral Gestion has not at this stage set a target for improvement on these metrics, and will define a more detailed procedure for these PAI after a period of observation of results on these indicators for optimal targeting of the measures.</p>

**Table 1: Measures implemented across the whole portfolio
(continued)**

"Reference and name of PAI indicator"	Measures to take account of PAIs across the entire Sextant France Engagement portfolio
<p>PAI 10</p> <p>Violations of the United Nations Global Compact and/or OECD Guidelines for Multinational Enterprises</p> <p><i>Expressed as a percentage of investments</i></p>	<p>The Sub-fund excludes investment in any company exposed to:</p> <ul style="list-style-type: none"> - a verified and proven violation of the UN Global Compact or the OECD Guidelines for Multinational Enterprises - a controversy that is serious (Level 4) or severe (Level 5)* indicating a significant violation of the fundamental principles of Responsibility, including those of the two international references mentioned here. <p>*On the Sustainability scale which runs from 1 (least serious) to 5 (most serious)</p>
<p>PAI 11</p> <p>Lack of processes and compliance mechanisms to ensure compliance with the United Nations Global Compact and/or OECD Guidelines for Multinational Enterprises</p> <p><i>Expressed as a percentage of investments</i></p>	<p>We closely monitor companies whose practices are insufficient to ensure respect for the UN Global Compact and OECD Guidelines for Multinational Enterprises:</p> <ul style="list-style-type: none"> - those for which the risk of controversy related to these references is judged "high" by our agency partner Ethifinance - those on the Watchlist of our agency partner Sustainability. <p>This surveillance may lead to a dialogue if we deem the risk significant.</p>
<p>PAI 12</p> <p>Compensation differences according to gender</p> <p><i>Expressed as average percentage pay gap</i></p>	<p>This metric is included in ESG analysis, especially for sectors where human capital is a key factor.</p> <p>Apart from taking this into account when appraising companies, Amiral Gestion has not at this stage set a target for improvement on this metric, and will define a more detailed procedure for these PAI after a period of observation of results on this indicator for optimal targeting of the measures.</p>
<p>PAI 13</p> <p>Gender diversity on the Board of Director</p> <p><i>Expressed as an average percentage of women directors</i></p>	<p>Gender parity on the Board of Directors is taken into consideration in ESG analysis when assessing the diversity of governance bodies.</p> <p>Moreover, we make full use of our voting rights* and frequently initiate a dialogue ahead of shareholders' meetings where we see a necessity, to encourage greater awareness of gender parity issues in the composition of Boards of Directors.</p> <p>* For more information, please see the Amiral Gestion voting policy on the Company website: https://api.amiralgestion.com/documents/permalink/2165/doc.pdf https://api.amiralgestion.com/documents/permalink/2165/doc.pdf</p>
<p>PAI 14</p> <p>Exposure to controversial arms</p> <p><i>Expressed as percentage of investments</i></p>	<p>Exclusion of controversial arms, in accordance with Amiral Gestion's global sectoral policy: any company involved in the development, production, maintenance or commerce of controversial arms or some key components (clusterbombs; antipersonnel mines; chemical and biological arms; incendiary weapons (including white phosphorus); depleted-uranium arms; non-treaty nuclear arms; laser blinding weapons; incendiary devices; undetectable fragments).</p> <p>Sextant France Engagement also excludes conventional and nuclear arms.</p> <p>* Exclusion criteria and thresholds are detailed in the SRI transparency Code which is available on the Amiral Gestion website: https://www.amiralgestion.com/fr/sextant-france-engagement</p>
<p>PAI S additional</p> <p>Absence of a human rights management policy</p> <p><i>Expressed as a percentage</i></p>	<p>The existence of a written policy for management of human rights is taken into consideration in ESG analysis, especially for companies exposed to these issues due to geographic location of operations and/or the structure of their supply chain. Amiral Gestion participates in a working party devoted to this theme, chaired by the FIR and supported by Human Rights Without Borders, the objective of which is to co-construct with several investors a methodology for analysis of this theme, notably forced and child labour.</p> <p>The intensity of human rights controversies is one of the quality indicators on which Sextant France Engagement aims to outperform its investment universe. (For the portfolio: Number of human rights controversies / Total number of companies in the portfolio*100 For the universe: Number of human rights controversies / Total number of companies in the universe*100)</p> <p>In addition, close attention is paid to controversies related to human rights, however serious. This vigilance may lead to surveillance, dialogue or exclusion, depending on how serious the incident is deemed.</p>
<p>PAI E additional</p> <p>Water consumption and recycling</p> <p><i>Expressed in m3</i></p>	<p>This metric is taken into consideration in ESG analysis where appropriate for the sector, in a double materiality logic (i.e. companies whose activities are intensive in water consumption and located in areas of water stress).</p> <p>Apart from taking this into account when appraising companies, Amiral Gestion has not at this stage set a target for improvement on these metrics, and will define a more detailed procedure for this PAI after a period of observation of results on this indicator for optimal targeting of the measures.</p>

Table 2: Additional measures applied to sustainable investments

PAI concerned	Additional measures applicable to Sustainable Investments <i>These measures round out those already implemented when taking into account PAI for all products classified Article 8 and Article 9 across the whole portfolio</i>		
<p>All PAI indicators except PAI 4, 10 and 14 give rise to exclusions. These indicators are contained in the previous table.</p>	<p>DNSH / Social or environmental objective</p>	<p>Dialogue arising from monitoring of PAI metrics and ESG analysis</p>	<p>Dialogue with companies whose activity is highly exposed to the PAI (i.e. significant impacts and existing improvement avenues) and whose safeguards against negative externalities are insufficient or non-existent. => Identification* of priority targets for dialogue on the basis of these criteria.</p> <p>The dialogue takes the following approach:</p> <ul style="list-style-type: none"> - Initiation of dialogue in year N (i.e. the year the engagement target is identified) - First interim report in N+1: if no improvement is noted and no action has been taken** a reminder is issued and there is a possibility of a negative vote at the shareholders' meeting if a related resolution is on the agenda*** - Final report in N+2: if no improvement is noted and no action has been taken** => loss of Sustainable Investment status. <p><i>*Identification takes place after a period of observation and analysis of 2023 PAI indicators. The first rounds of structured DNSH dialogues will begin in 2024.</i> <i>**Based on quantitative and/or qualitative analysis</i> <i>*** Voting principles concerning PAI 1, 2, 3 and 13 are detailed in Amiral Gestion's voting policy.</i></p>
<p>PAI 7 Biodiversity "Proportion of companies in the portfolio that declare or are estimated to have activities that impact protected areas and/or ones rich in biodiversity" This indicator is set out in the previous table</p>	<p>DNSH / environmental objective</p>	<p>Dialogue arising from controversies</p>	<p>Special attention is paid to all controversies related to biodiversity, however serious.</p> <p>In cases of sustainable investments, this vigilance causes the team to begin a dialogue with the company if an internal review of the controversy confirms the risk of a major negative impact on biodiversity and ecosystems. In which case, the dialogue is conducted along the following lines:</p> <ul style="list-style-type: none"> - Initiation of dialogue in year N (i.e. the year the controversy is identified) - First interim report in N+1: If satisfactory answers are provided, the dialogue is concluded and the company remains in the portfolio - If no corrective measures has been noted and no action has been taken* a reminder is sent to the company. - Final report in N+2: if no corrective has been noted and no action has been taken* => loss of Sustainable Investment status. <p><i>*Based on a quantitative and/or qualitative analysis</i></p>

— — How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

To ensure that the Sub-fund's investments, including those which are considered sustainable, comply with the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, Amiral Gestion's normative exclusion policies are implemented ex-ante and ex-post on the basis of Sustainalytics research, whose conclusions may be confirmed or adjusted following an internal analysis by the fund manager and approved by Amiral Gestion's committee for surveillance of controversies. If a company in the portfolio is added to the Sustainalytics Watchlist, it is put on surveillance.

In addition, the portfolio excludes the most serious controversies**, including those that may be linked to the principles of these two international standards, and the ESG and management teams are particularly vigilant when assessing and monitoring the quality of company ESG profiles, especially their exposure to events, controversies or other risk factors related to the following issues:

- Human rights (notably forced and child labour)
- Environmental controversies related to climate change and biodiversity
- Fiscal responsibility and transparency

The normative exclusion policy contained in DNSH SFDR applies to sub-funds classed SFDR 8 and 9, as mentioned above.

** Levels excluded are specified under the heading "ESG constraints" of the present document.*

The EU taxonomy contains a principle of "Do No Significant Harm" according to which investments aligned with the taxonomy should not seriously damage EU taxonomy objectives, in addition to the EU's own criteria.

The principle of 'Do No Significant Harm' applies exclusively to the investments underlying a financial product that takes account of EU criteria with respect to environmentally sustainable economic activity. The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

No other sustainable investment should do significant harm to environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts of its investments (PAI SFDR) on sustainability factors, in order to identify and gradually take appropriate action. The Sub-fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

The methods by which each indicator is taken into account by this Sub-Fund are presented above, in the question "How are indicators concerning adverse impacts taken into consideration"

The metrics and the information whereby PAIs are taken into consideration will be published annually in the Sub-fund's periodic document "SFDR Appendix 4", starting in 2024 for the year 2023.

☐ No

The **Investment strategy** guides investment decisions, taking into account factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

The managers of the Sextant France Engagement Sub-fund apply a management philosophy that aims to achieve the best possible long-term performance while minimizing risk, through a fundamental approach focused on value analysis. The fund managers select companies that they believe to be significantly undervalued in relation to their intrinsic value and whose management strategy and business model quality support them. This is a genuine stock picking strategy, applied in accordance with the principles of value investing inherited from the great American investors such as Benjamin Graham, Philip Fisher and Warren Buffett.

The investment process fully integrates the consideration of ESG criteria into its fundamental analysis. The Sub-fund aims to invest in companies that stand out for their good ESG practices, using a best-in-class approach, but also to support those with good potential for improvement by conducting an active dialogue with them, in order to guide them towards a process of progress on the main key ESG issues in their sector of activity (sources of significant impact, existing levers for improvement). This approach is based on a dual responsibility that fuels the management team's efforts and summarizes their philosophy of responsible investment:

- The fiduciary responsibility of the management team through the central role of ESG analysis in understanding and identifying the material risks of the company and its sources of value creation;
- Their social and shareholder responsibility as an investor.

The Sub-fund implements the investment procedure illustrated below, notably with upstream ESG filters (ESG performance rating, sectoral and normative exclusions and exclusions related to controversies), taking ESG criteria into consideration when selecting securities by means of an internal, fundamental analysis Quality Rating for which one-third of criteria are ESG and checking the portfolio against several ESG indicators.

The ESG constraints entailed by this SRI procedure are detailed below

● **What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?**

The universe of securities eligible for inclusion in Sextant France Engagement is determined after application of the global DNSH principle described previously, and after taking into consideration the following constraints which are specific to the Sub-fund:

- **Compliance with the Sub-fund's sectoral exclusion policy:** coal, unconventional and conventional fossil fuels, controversial weapons, conventional and nuclear weapons, tobacco, pornography. *The exclusion criteria and thresholds are detailed in the SRI Transparency Code on the Company website, on the page dedicated to the Sub-fund: <https://www.amiralgestion.com/en/sextant-france-engagement/>*
- **Compliance with the normative exclusion policy*:** exclusion of companies in violation of the UN Global Compact and/or the OECD Guidelines for Multinational Enterprises, following an internal review and confirmation of the violation by the committee for monitoring of controversies. Surveillance of companies that appear on the Sustainalytics Watchlist where this status has been confirmed by the committee for monitoring of controversies following an internal review.
- **Exclusion / non-investment* in companies exposed to severe controversies (i.e. Level 4 or 5 on the Sustainalytics scale)** if confirmed by the committee for monitoring of controversies following an internal review. Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities.
- **Ineligibility of the lowest-rated ESG stocks and a commitment to minimum portfolio coverage through an ESG analysis:** in order to ensure that the companies included in the Sub-fund's portfolio meet a minimum threshold, the management team screens the stocks in the universe using its own proprietary evaluation method based on Ethifinance's Gaïa Ratings database. **At least 90%** of the companies in the portfolio are thus covered by an ESG analysis;** the maximum 10% not covered is intended to take into account exceptional cases that do not allow for immediate coverage (small caps for which ESG information is not available or is not readily available, IPOs, etc.). **The minimum ESG rating applied to the Sextant France Engagement SRI fund is 35/100.**
- **SRI selectivity of at least 20%:** The SRI approach of Sextant France Engagement is mainly based on an ESG selectivity methodology, i.e. non-financial filters that lead to a **reduction of at least 20% in the initial investment universe**, comprising 350 French stocks divided into groups of small- mid- and large caps covered using data from the Gaïa Ratings database of our non-financial ratings partner, the Ethifinance agency. This breakdown is coherent with the investment strategy of the Sub-fund.***

In addition, the Sub-fund has committed to respecting:

- **ESG performance:** In accordance with the requirements of the France Relance Label and the SRI label the Sub-fund holds, Sextant France Engagement is also committed to being better assessed than its investment universe in three areas:
 - i) An ESG indicator aggregated within the Global ESG Performance Score: this score translates into the average ESG score of the portfolio on all E, S and G criteria taken into account in the ESG analysis grid of Amiral Gestion
 - ii) A quality indicator relative to the intensity of Human Rights controversies (minimum coverage 90%)
 - iii) A Quality/Environment indicator: Carbon intensity based on the WACI measure (at least 90% coverage)
for more detail on these three metrics, see "Sustainability indicators" in this document.
- **An ESG progress commitment:** Four other progress indicators of a social and governance nature are also monitored with the aim of improving the portfolio's performance in relation to its investment universe. The Sextant France Engagement Sub-fund is thus committed to targeting portfolio companies for their performance on these indicators and/or via its commitment actions to improve them in order to reduce the gap with the universe if the portfolio is underperforming and/or to exceed it in order to widen the gap within three years. The four indicators concerned are:
 - In the theme "Promotion of gender equality":
 - Average number of women on the Executive Committee
 - Average percentage of women managers
 - In the theme "Value sharing"
 - Share of companies with employee share ownership
 - Average share of capital held by employees

Furthermore,

- The Sub-fund has committed to hold a **minimum share of sustainable investments of 30%** and to **monitoring PAI indicators** (for more detail, see the sections devoted to these themes in the present document)
- When the portfolio invests in **unit trusts**, the latter must have the **same SFDR classification** as the Sub-fund and they must also be **SRI labelled**.

** When issuers in which the Sub-fund has invested are found to be exposed to severe (level 4 5) controversies, or to no longer comply with the UN Global Compact and OECD principles, their case shall be put to the committee for surveillance of controversies in order to verify the severity/non-compliant status and decide on possible exclusion from the portfolio, or to put the company on surveillance in the hope that the level of severity will decrease following an internal analysis.*

***This rate may be expressed as a percentage of the sub-fund's net assets or in terms of the number of issuers in the UCI.*

****The detailed methodologies for definition of the universe and for calculation of the Sub-fund's ESG performance relative to its universe are described in the Sub-fund's SRI Transparency Code which is available on the website*

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

As detailed previously in the questions on investment strategy and ESG constraints, the combination of ESG non-financial filters applied to the Sub-fund (minimum ESG performance rating, sectoral and normative exclusions, exclusion of companies exposed to level 4 and 5 controversies) results in SRI selectivity of at least 20% i.e. **the Sub-fund's reference universe* is reduced by at least 20%**.

** The reference universe is described above in the section "ESG characteristics"*

● **What is the policy to assess good governance practices of the investee companies?**

Managers of the Sub-fund assess governance on two levels:

- **The internal Quality Rating arising from our fundamental analysis*** which guides our stock picking: an ex-ante qualitative assessment in our fundamental analysis which covers 10 out of 28 ESG-related criteria. The governance criteria assessed by this rating are management quality, respect for minority shareholders, transparency and the quality of financial communication, responsible compensation for directors and employees. Note that this list has been enriched by adding three new criteria: appraisal of the governance structure, fiscal responsibility and business ethics.
- **The ESG Performance Rating* used upstream to determine the eligible universe and ex-post to gauge ESG performance of the portfolio relative to its universe:**
This rating covers four governance comprising 25 indicators:
 1. Integrity of governance bodies, quality of communication and transparency (Source: internal qualitative assessment from Amiral Gestion's fundamental analysis)
 2. Best governance practices (source: Gaïa Rating database of Ethifinance)
 3. Business ethics (source: Gaïa Rating database of Ethifinance)
 4. Equal opportunities for men/women (source: Gaïa Rating database of Ethifinance)

All these criteria allow us to assess and to factor into our analysis the dimensions necessary for sound management structures, good relations with – and fair remuneration of – employees and respect for fiscal commitments.

As the Sub-fund enforces a **minimum ESG performance rating for portfolio eligibility** we check that company governance is satisfactory by excluding companies whose practices are poor and by monitoring the G rating of those in the portfolio.

Good governance practices for sound management structures, good relations with – and remuneration of – employees and respect for tax commitments

In terms of shareholder engagement, we may reopen dialogue with issuers in the following cases:

- **If the external ESG Rating** is below 4/10 for Governance** if the verification by our internal teams reveals major shortcomings that may could affect the Company's global profile especially if the weaknesses are in PAI 10-13 which concern governance***
- **If the issuer is exposed controversies related to fiscal responsibility and transparency** and the incident reveals a need for shareholder engagement. We are particularly vigilant on this question and pay close attention to all such controversies, however serious they are.

This dialogue takes the following approach:

- Improvement recommendations are drawn up in writing by the fund manager and/or the ESG team when the shortcomings were identified (Year N)
- An initial intermediate report is submitted after one year (N+1) as part of the analysis of the company and if no progress is noted: a reminder is issued and the manager may vote against if the shortcoming identified is linked to one or more resolutions tabled at the general meeting
- A final report is submitted after two years (N+2), which may lead to disinvestment in some high-risk cases if the companies have not shown improvement (or have not made an effort to improve****).

Moreover, to qualify as a Sustainable Investment, issuers cannot have a governance rating that is lower than 50/100.

And in accordance with the policy of normative exclusion, the Sub-fund cannot invest in companies that are in violation of the United Nations Global Compact or the OECD Guidelines, or ones which are exposed to serious (Level 4) and severe (Level 5) controversies, notably concerning governance.

**These two ratings are described in the section "ESG characteristics" in this document and in more detail in our Sustainability Report (Appendix II): <https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>*

*** The Performance rating is based on internal analysis and on a selection of indicators tracked by Ethifinance.*

If the company is not followed by Ethifinance, verification is based on internal analysis

**** Dialogue on PAIs from 2024*

***** Qualitative and/or quantitative analysis*

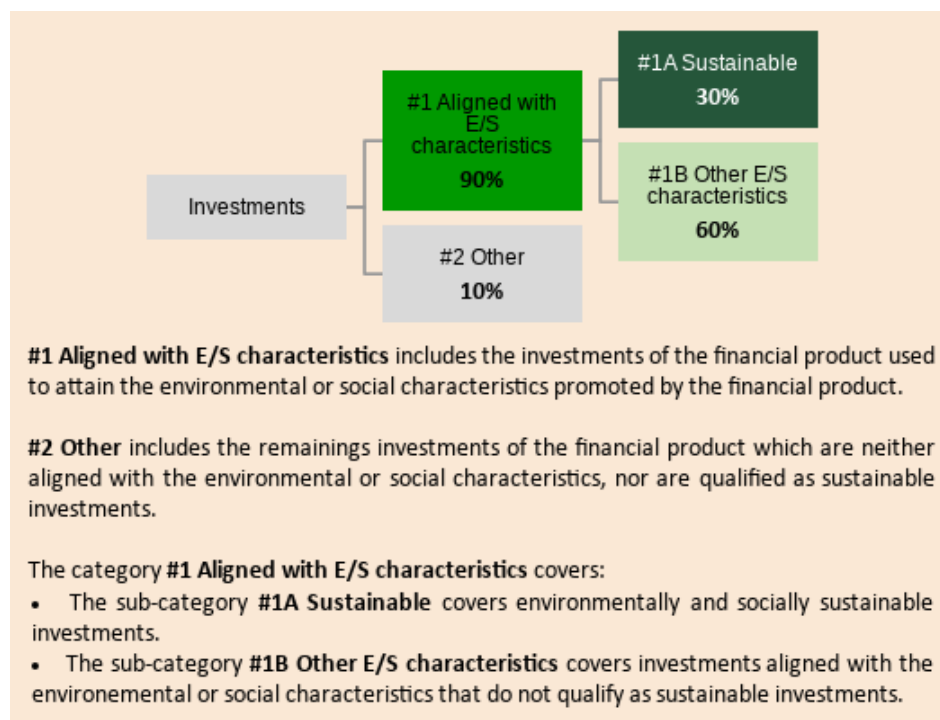

What is the asset allocation planned for this financial product?

For calculation of alignment with E/S characteristics, we mainly consider securities invested in equities as long as other instruments remain negligible (i.e. less than 10% of the Sub-fund's net assets), i.e. money market instruments, exposure derivatives linked to a corporate underlying, fund units and other off-balance sheet diversification assets mentioned above.

The instruments excluded from the calculation are included in "#2 Others" in the following chart. **At least 90%** of securities in the portfolio have passed the exclusion filter applicable to the Sub-fund and are covered by ESG analysis that results in a non-financial rating.

To calculate the percentage of sustainable investments, representing at least 30% of investments in the portfolio, we only include investments that meet the sustainability criteria mentioned previously. The denominator is the portfolio's net assets

Asset allocation refers to the share of investment in a given asset class.

Activities aligned with the taxonomy are expressed as a %:

- **of revenues** to reflect the share derived from green activities of companies in which the Sub-fund has invested;
- **of capital expenditure** (CapEx) to show green investments by companies in which the financial product invests, for a transition to a green economy, for example;
- **of operating costs** (OpEx) to reflect green operations of companies in which the Sub-fund has invested

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The Sextant France Engagement Sub-fund may use derivatives in order to gain exposure to or partially hedge against favourable or unfavourable trends in equities, indices, interest rates and forex.

Investment in derivatives is conditional*:

- The portfolio must not be overexposed
- The provisional nature of exposure (use of derivatives for hedging or exposure)
- Securities underlying the derivatives must also be ESG assessed (same for counterparties to OTC instruments)
- Derivatives cannot be used for shorting or non-ESG securities.

*The conditions for use of derivatives are detailed in the SRI transparency Code which is available on the Amiral Gestion website: <https://www.amiralgestion.com/en/sextant-france-engagement>

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments with an environmental objective but not aligned with EU Taxonomy. The Sub-fund has acquired positions in sustainable investments as defined by the taxonomy, up to the minimum aligned green share representing 0% of its assets. To date, communication of alignment data remains partial due to gradual deployment of the CSRD directive.

However, this Sub-fund will communicate its green share in its annual report on the basis of data reported by companies.

- Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?²

Not applicable, as the portfolio has no commitment to a minimum share of investments aligned with EU Taxonomy.

☐ Yes:

☐ In gas ☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What is the minimum proportion of net assets invested in transitory and enabling activities?

Not applicable

What is the minimum proportion of sustainable investments with an environmental objective non-aligned with EU taxonomy?

The Sub-Fund has an overall minimum sustainable investment commitment of 30% but has not committed to a minimum share of sustainable investments that are not aligned with the EU green taxonomy.

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What is the minimum share of socially sustainable investments?

The Sub-Fund has an overall minimum sustainable investment commitment of 30% but has not committed to a minimum share of investment in sustainable investment that have a social objective.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The instruments in the “#2 Others” category are diversification tools principally used to manage the portfolio’s cash holdings and to counter unfavourable short-term market trends. This category includes hedging and exposure derivatives, securities with derivatives attached, deposits and cash holdings and borrowed funds. It may also include equities that are not rated by external agencies (very small capitalisations, IPOs etc.). These investments may be subject to the requirements of the Sub-fund’s sectoral and normative exclusions and Amiral Gestion’s policy with respect to controversies mentioned above and included in the DNSH SFDR, subject to data availability.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index.

However, the fund management team tracks ESG characteristics and performances of the portfolio relative to a **benchmark universe that is coherent with the Sub-fund’s investment strategy and comprises 350 French companies** of all capitalisation sizes without taking ESG performance into account when compiling it.

- ***How is the benchmark index permanently aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable

- ***How is alignment of investment strategy with the methodology of the index guaranteed on a permanent basis?***

Not applicable

- ***How is the index different from a general market index?***

Not applicable

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.amiralgestion.com/en/sextant-france-engagement>

Appendix II¹

Pre-contractual information model for the financial products covered by paragraphs 1, 2 and 2b, of (EU) regulation 2019/2088 and article 6, first subparagraph, of (EU) regulation 2020/852

Product name: **SEXTANT ASIA EX-JAPAN**

Legal entity identifier: **969500X6ZZFVQE3J9258**

Management company: **Amiral Gestion**

Environmental and/or social characteristics

Sustainable investment means investing in an economic activity that contributes to an environmental or social objective without doing serious harm to any of these objectives, and in companies that apply good governance practices

EU taxonomy is a system of classification arising from (EU) regulation 2020/852, which drew up a **list of environmentally-sustainable economic activities**. This regulation does not include a list of socially-sustainable economic activities. Sustainable investments that have an environmental objective are not necessarily aligned with the taxonomy.

Does this financial product have a sustainable investment objective?

Yes

No

It will make a minimum of **sustainable investments with an environmental objective: ____%**

in economic activities that qualify as environmentally sustainable under the EU taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU taxonomy

It will make a minimum of **sustainable investments with a social objective: ____%**

It promotes **Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ____% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU taxonomy

with a social objective

It promotes E/S characteristics, **but will not make any sustainable investments**

¹ Publication date of the document: January 2024

What environmental and/or social characteristics are promoted by this financial product?

Sextant Asia Ex-Japan promotes environmental and social issues, while keeping a watchful eye on company governance practices by means of non-financial metrics applied to the Sub-fund and materialised by the areas monitored by “Sustainability Indicators” set out in the following section of this document. These ESG issues are notably factored into:

- **Amiral Gestion’s own ex-ante fundamental analysis** expressed as a Quality Rating* which embraces 10 ESG criteria out of 28 analysed qualitatively
- **Results-based monitoring of the portfolio’s ESG performance**, including ESG analysis of the Sub-fund based on the ‘MSCI ESG Ratings’ methodology of data agency MSCI*.

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. **However, the fund management team tracks ESG characteristics and performances of the portfolio relative to an index**** that is coherent with the Sub-fund’s investment strategy and comprises 1,170 issuers: **the MSCI Daily Small cap Growth TR Pacific USD**.

** Methodology indicators are described in the Amiral Gestion Sustainability Report (appendix II):*

<https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

*** that the Sub-fund adopted this ESG reference universe in 2023 as part of its commitment to monitor the relative performance of the portfolio on the basis of PAI each quarter from 31 March 2023. Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023.*

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The Sub-fund relies on the following sustainability indicators to assess alignment of the portfolio with the environmental and social characteristics that it promotes:

- **Average internal Quality Rating of the portfolio**, reflecting ESG integration into fundamental analysis.
- **An average external ESG score for the portfolio relative to that of its benchmark index described in the previous section**. This ex-post monitoring is mainly based on data supplied by MSCI ESG Rating, but it may also use the ESG performance ratings of Ethifinance’s Gaïa database to complete coverage if necessary.
- **Compliance with the Sub-fund’s policy of excluding controversies**: monitoring of controversies relies on information supplied by the Sustainalytics agency, which assesses and classifies incidents according to how serious they are on a scale from 1 (least serious) to 5 (most severe).
- **Compliance with sectoral policy**: filters are applied to identify companies exposed to sectors whose activity is prohibited by the Sub-fund’s investment policy.
- **Compliance with the UN Global Compact and the OECD’s Guidelines for Multinational Enterprises**, relies on the Sustainalytics agency for application of the normative exclusion policy implemented by the Sub-fund.
- **Monitoring average carbon intensity of the portfolio relative* to a benchmark index described in the previous section** (emissions in tons of CO₂/€ m of revenue), **as well as climate and environmental footprint metrics** that meet TCFD requirements. These metrics are contained in a periodic report "Appendix 4 - SFDR" attached to the Sub-fund’s annual report.
- **Reporting of the Sub-fund’s voting policy**: the Sub-fund has committed to participate systematically** in voting of companies in which it has invested, applying the principles of the Management Company’s proprietary voting policy that aims for exemplary policies in governance and social and environmental responsibility.
- **Reporting of our traceable ESG dialogue** ESG with issuers represented in the portfolio on:
 - i) Awareness of best ESG practices, regular discussions on ESG topics via identification of potential factors of value creation and/or risks.
 - ii) Special attention to - and possible surveillance of - issuers whose transparency on ESG practices does not meet our analysis criteria.

Moreover, the Sub-fund has committed to monitoring and appraising Principal Adverse Impacts (PAI).

Sustainability

indicators are used to check whether the financial product complies with the environmental and social issues in question.

The sources and methodologies relative to these indicators are described in more detail on the Amiral Gestion website under the heading "Responsible Investment": [Responsible Investment – Amiral Gestion](#)

*Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023

**Except in cases where technical issues prevent voting

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The SEXTANT ASIA EX-JAPAN Sub-fund promotes environmental and social issues. However, the portfolio may contain some small and mid-cap Asian stocks that are not subject to the regulatory or normative regulations on ESG transparency and climate in force in the EU. This may result in (i) incomplete analysis due to the non-availability of data and (ii) to data that is considered unreliable or inaccurate by our internal analysts, because it is based on biased estimates supplied by non-financial rating agencies. As such, **in view of this bias, the Sub-fund has not committed to a minimum share of sustainable investments. On the other hand, the Sub-fund may reveal its share of sustainable investments** on the basis of the qualifying characteristics stemming from the Amiral Gestion approach listed below.

DEFINITION OF SUSTAINABLE INVESTMENT: AMIRAL GESTION APPROACH

Amiral Gestion defines sustainable investment as: "An investment in a financial instrument that is involved in one or several economic activities:

- Contributing significantly to environmental objectives to: i) mitigate climate change with the goal of reaching carbon neutrality by 2050, in accordance with the Paris Agreement on Climate; ii) adapt to the effects of climate change,
- Making a net positive contribution to one or several of the United Nations Sustainable Development Goals (SDG) at the social level by 2030.

These investments must not have any major adverse impact on other environmental or social objectives, and the companies in which the investments are made must respect the principles of good governance."

The criteria for qualification as a sustainable investment are described in detail in the Amiral Gestion Methodology Note available on the Company website:

<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

**The substantial contribution to the objective of adapting to climate change has been an effective criterion for Sustainable Investment qualification since 1 January 2024*

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Sub-fund has several other requirements to ensure that its investments do not seriously harm the environment or people. These are:

- **Investment rules that apply to all funds and mandates classed SFDR 8 and 9 and to the whole portfolio:** exclusion policies, Principal Adverse Impact (PAI) considerations, good governance practices.
- **A set of reinforced requirements for sustainable investments*** to confirm the contribution to an environmental or social objective and ensure that no harm is done to other sustainability objectives.

This whole DNSH principle, and whether the various measures are applied ex ante and/or ex post, is described in more detail in the Methodology note on our definition of Sustainable Investment and is available on our website:

<https://api.amiralgestion.com/documents/permalink/2192/doc.pdf>

ESG investment rules specific to this Sub-fund are described under the heading "ESG constraints" and complete the DNSH principle.

**As mentioned previously, the Sub-fund has not committed to a minimum share of sustainable investments, but it will disclose its share of ex-post sustainable investments in its periodic report.*

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● — — How have the indicators for adverse impacts on sustainability factors been taken into account?

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the Principal Adverse Impacts (PAI) for sustainability factors through 16 PAI indicators stemming from the European SFDR regulation. **Taking these indicators into consideration is part of Amiral Gestion's PAI policy.** This policy, including the global approach, the sources and measures put in place for each PAI indicator, is available on the Amiral Gestion website under the heading "Responsible Investment": <https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

This document includes:

- **In appendix I: measures implemented across the whole portfolio**
- **In appendix II: additional measures applied to sustainable investments*.**

** The Sub-fund has not committed to a minimum share of sustainable investments, but it will disclose the percentage of ex-post sustainable investments in its periodic report in Appendix 4 SFDR.*

● — — How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

To ensure that the Sub-fund's investments, including those which are considered sustainable*, comply with the principles of the UN Global Compact and OECD Guidelines for Multinational Enterprises, **Amiral Gestion's normative exclusion policies are implemented ex-ante and ex-post** on the basis of Sustainalytics research, whose conclusions may be confirmed or adjusted following an internal analysis by the fund manager and approved by Amiral Gestion's committee for monitoring of controversies. If a company in the portfolio is added to the Sustainalytics Watchlist, it is put on surveillance.

In addition, the portfolio excludes the most serious controversies** including those that may be linked to the principles of these two international standards, and the ESG and management teams are particularly vigilant when assessing and monitoring the quality of company ESG profiles, especially their exposure to events, controversies or other risk factors related to the following issues:

- Human rights (notably forced and child labour)
- Environmental controversies related to climate change and biodiversity
- Fiscal responsibility and transparency

The normative exclusion policy contained in DNSH SFDR applies to sub-funds classed SFDR 8 and 9, as mentioned above.

**As mentioned previously, the Sub-fund has not committed to a minimum share of sustainable investments, but it will disclose the share of ex-post sustainable investments in its periodic report.*

***excluded levels are specified under the heading "ESG constraints" of the present document*

The EU taxonomy contains a principle of "Do No Significant Harm" according to which investments aligned with the taxonomy should not seriously damage EU taxonomy objectives, in addition to the EU's own criteria.

The principle of 'Do No Significant Harm' applies exclusively to the investments underlying a financial product that takes account of EU criteria with respect to environmentally sustainable economic activity. The investments underlying the remaining assets of this financial product do not take account of EU criteria with respect to environmentally sustainable economic activity.

No other sustainable investment should do significant harm to environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Since end-2022, the Sub-fund has notably committed to monitoring and taking into consideration the **Principal Adverse Impacts of its investments (PAI SFDR) on sustainability factors**, in order to identify and gradually take appropriate action. The Sub-fund thus monitors the 14 SFDR PAI indicators, plus two additional indicators selected from the list of optional PAIs in Appendix 1 of the SFDR RTS.

Amiral Gestion's PAI policy, including details of sources and methods for taking account of each indicator, is available on the company website under the heading "Responsible Investment":

<https://api.amiralgestion.com/documents/permalink/2703/doc.pdf>

The metrics and information for taking account of PAIs will be disclosed in the periodic document "Appendix 4 - SFDR" of the Sub-fund, for the first time in 2024 and concerning 2023.

☐ No

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

What investment strategy does this financial product follow?

SEXTANT ASIA EX-JAPAN is a dynamic fund whose objective is to outperform its benchmark (MSCI AC Asia Index) net of dividends reinvested, over the recommended investment period of five years, through a selection of international equities of all capitalisation sizes and in particular equities from countries in Asia including Japan. In order to achieve its management objective, the SEXTANT ASIA EX-JAPAN Sub-fund is mainly exposed to international equities, with a minimum of 60% of the net assets invested in shares of companies having their registered office in one of the countries of Asian, including Japan.

The manager of the SEXTANT ASIA EX-JAPAN Sub-fund applies a management philosophy aimed at achieving the best possible long-term performance while minimising risk, through a fundamental approach focused on value analysis. The fund managers select companies that they believe to be significantly undervalued in relation to their intrinsic value and whose management strategy and business model quality support them. This is a genuine stock picking strategy, applied in accordance with the principles of value investing inherited from the great American investors such as Benjamin Graham, Philip Fisher and Warren Buffett. Thus, the investment process of this Sub-fund is based on different steps, namely: fundamental analysis of companies and their business models, valuation work, and concluding with an investment decision. Fundamental analysis also embraces environmental, social and de governance criteria, which account for about one-third of the overall rating (10 of the 28 criteria).

Securities are selected after this analysis and following application of the ESG requirements described in the section below entitled "Constraints defined to respect all the environmental or social issues."

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The universe of securities eligible for inclusion in SEXTANT ASIA EX-JAPAN is determined after application of the global DNSH principle described previously, and after taking into consideration the following constraints which are specific to the Sub-fund:

- **Respect of the Sub-fund's sector exclusion policy:** thermal coal, tobacco, controversial arms, pornography, unconventional fossil energies (except North American shale oil and gas) in line with the terms and thresholds of the Amiral Gestion exclusion policy applicable to the Sub-fund. This policy is available on the Amiral Gestion website under "Responsible Investment":
<https://api.amiralgestion.com/documents/permalink/2675/doc.pdf>
- **Compliance with the normative exclusion* policy:** exclusion/non-investment in companies in violation of the UN Global Compact and/or the OECD Guidelines for Multinational Enterprises, following an internal review and confirmation of the violation by the committee for monitoring of controversies. Surveillance of companies that appear on the Sustainability Watchlist where this status has been

confirmed by the committee for monitoring of controversies following an internal review.

- **Exclusion / non-investment in companies exposed to severe controversies (i.e. Level 5 on the Sustainalytics scale)** if confirmed by the committee for monitoring of controversies following an internal review. Close attention is also paid to controversies related to climate change, biodiversity, fundamental human rights and tax responsibilities.

Furthermore,

- the Sub-fund has committed **to monitoring PAI indicators** (for more detail, see the sections devoted to these themes in the present document)
- when the portfolio invests in **unit trusts**, the latter must have the **same SFDR classification** as the Sub-fund.

**When issuers in which the Sub-fund has invested are found to be exposed to severe (level 5) controversies, or to no longer comply with the UN Global Compact and OECD principles, their case shall be put to the committee for surveillance of controversies in order to verify the severity/non-compliant status and decide on possible exclusion from the portfolio, or to put the company on surveillance in the hope that the level of severity will decrease following an internal analysis.*

● **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

However, the Sub-fund **has not set a minimal rate of exclusions** from the investment universe arising from use of this filter.

● **What is the policy to assess good governance practices of the investee companies?**

Managers of the Sub-fund assess governance on two levels:

- **The internal Quality Rating arising from our fundamental analysis*** which guides our stock picking: an ex-ante qualitative assessment in our fundamental analysis which covers 10 out of 28 ESG-related criteria. The governance criteria assessed by this rating are management quality, respect for minority shareholders, transparency and the quality of financial communication, responsible compensation for directors and employees. Note that this list has been enriched by adding three new criteria: appraisal of the governance structure, fiscal responsibility and business ethics.
- **External ESG rating* (source: MSCI ESG Ratings), used to monitor the portfolio's ESG performance** and which verifies six aspects of governance: Ownership and control, Board of Directors, Payments, Accounting, Business ethics and Fiscal transparency. All these criteria allow us to assess and to factor into our analysis the dimensions necessary for sound management structures, good relations with – and fair remuneration of – employees and respect for fiscal commitments.

In terms of commitment, we may reopen dialogue issuers in the following cases:

- Those with the external ESG Rating** below 4/10 for Governance
- Those exposed to controversies related to fiscal responsibility and transparency.

This dialogue takes the following approach:

- Improvement recommendations are drawn up in writing by the fund manager and/or the ESG team when the shortcomings were identified (Year N)
- An initial intermediate report is submitted after one year (N+1)
- A final report is submitted after two years (N+2), which may lead to disinvestment in some high-risk cases if the issuer have not shown improvement (or not made an effort to improve)***

Moreover, to qualify as a Sustainable Investment, issuers cannot have a governance rating that is lower than 5/10. And in accordance with the policy of normative exclusion, the Sub-fund cannot invest in companies that are in violation of the United Nations Global Compact or the OECD Guidelines, or ones which are exposed to severe (Level 5) controversies, notably concerning governance.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

* These two scores are described in the Amiral Gestion Sustainability Report (appendix II):

<https://api.amiralgestion.com/documents/permalink/2435/doc.pdf>

** If the issuer is not covered by this Sub-fund's main external non-financial rating agency (MSCI ESG Ratings), verification will be done by means of internal analysis

*** Qualitative and/or quantitative analysis

Asset allocation
describes the share of investments in specific assets.

Activities aligned with the taxonomy are expressed as a share of:

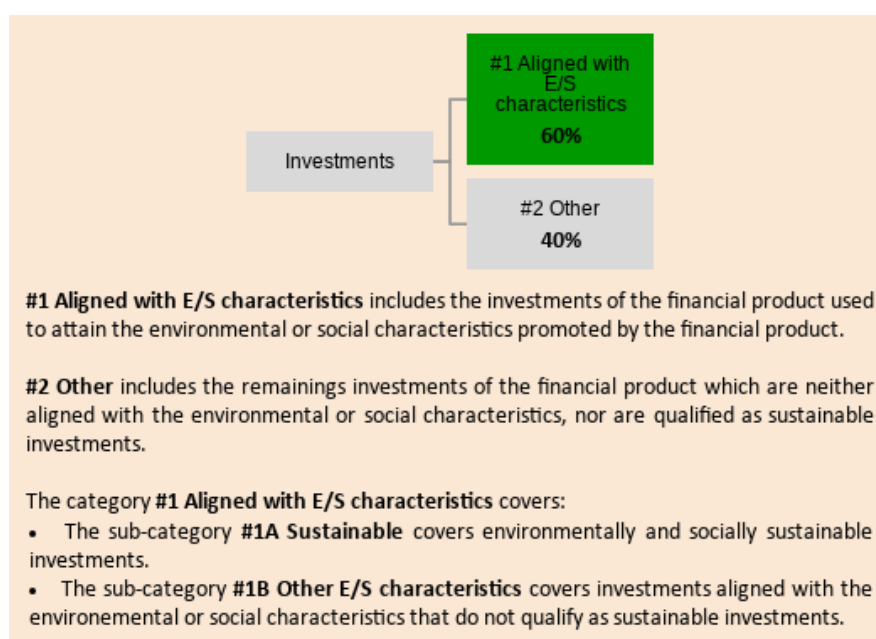

- **turnover** to reflect the share derived from green activities of companies in which the Sub-fund has invested;
- **capital expenditure** (CapEx) to show green investments by companies in which the financial product invests, for a transition to a green economy, for example;
- **operating costs** (OpEx) to reflect green operations of companies in which the Sub-fund has invested

What is the asset allocation planned for this financial product?

In order to calculate alignment with E/S characteristics, we focus on all instruments except cash, derivatives, and short-term debt. **At least 60%** of securities in the portfolio have passed the exclusion filter applicable to the Sub-fund and are covered by ESG analysis that results in a non-financial rating.

To calculate the percentage of sustainable investments*, we only include investments that meet the sustainability criteria mentioned previously. The denominator is the portfolio's net assets

*As mentioned previously, the Sub-fund has not committed to a minimum share of sustainable investments, but it will disclose the share of ex-post sustainable investments in its periodic report.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The SEXTANT ASIA EX-JAPAN Sub-fund may use derivatives in order to gain exposure to – or partially hedge against – favourable or unfavourable trends in equities, indices, interest rates and forex. These instruments are not used to achieve the environmental or social characteristics promoted by the product.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU taxonomy?

The Sub-fund has not committed to a minimum share of sustainable investments, and therefore is not compelled to invest in sustainable investments that have an environmental objective aligned with EU green taxonomy. The portfolio therefore makes sustainable investments as defined by the taxonomy, with a green share equal to 0% of net assets, notably in view of investments in Asia that are not subject to EU regulations concerning sustainability, especially European taxonomy.

However, the Sub-fund will communicate its green share in its annual report on the basis of data reported by companies.

● Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy?²

Not applicable, as the portfolio has no commitment to a minimum share of investments aligned with EU Taxonomy.

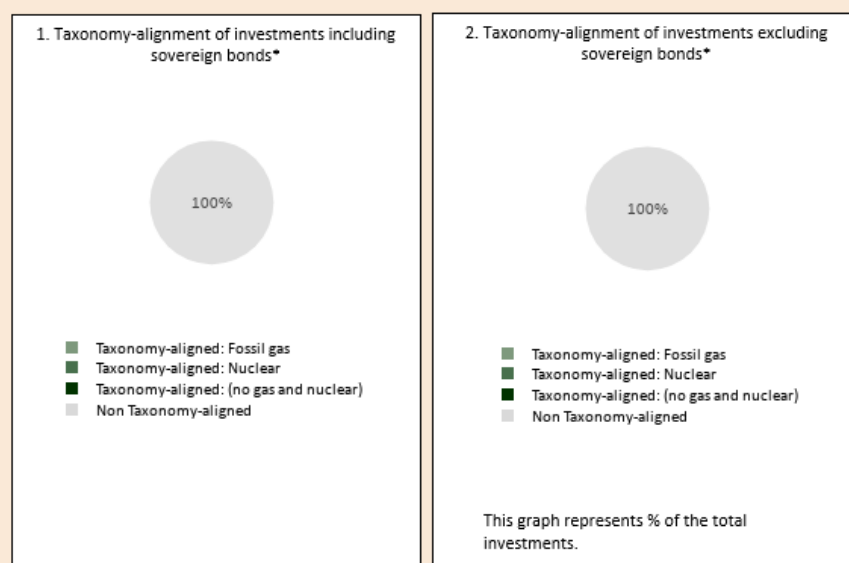

☐ Yes:

☐ In gas

☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● What is the minimum share of investments in transitional and enabling activities?

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Sextant Asia Ex-Japan Sub-fund has **not committed to a minimum share** of sustainable investments with an environmental objective but not aligned with EU Taxonomy.

This symbol represents sustainable investments that have an environmental objective but do not take into account criteria applicable to environmentally sustainable economic activities as defined by EU taxonomy.

What is the minimum share of socially sustainable investments?

The Sextant Asia Ex-Japan Sub-fund has **not committed to a minimum share** of investment in sustainable investment that have a social objective.

² Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The instruments in the “#2 Others” category are diversification tools principally used to manage the portfolio’s cash holdings and to counter unfavourable short-term market trends. This category includes hedging and exposure derivatives, securities with derivatives attached, deposits and cash holdings and borrowed funds. It may also include equities that are not rated by external agencies (very small capitalisations, IPOs etc.). These investments may be subject to the requirements of the Sub-fund’s sectoral and normative exclusions and Amiral Gestion’s policy with respect to controversies mentioned above and included in the DNSH SFDR, subject to data availability.

Benchmark indices allow us to ascertain if a financial product has the environmental or social characteristics that it promotes

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The non-financial metrics used by the Sub-fund are not benchmarked against any specific sustainable index. **However, the fund management team tracks ESG characteristics and performances of the portfolio relative to an index**** that is coherent with the Sub-fund’s investment strategy and comprises 1,170 issuers: **the MSCI Daily Small cap Growth TR Pacific USD.**

** Note that the Sub-fund adopted this ESG reference universe in 2023 as part of its commitment to monitor the relative performance of the portfolio on the basis of PAI each quarter from 31 March 2023. Performance relative to ESG ratings and other ESG-climate indicators has been monitored since 29 December 2023.

- **How is the benchmark index permanently aligned with each of the environmental or social characteristics promoted by the financial product?**
Not applicable
- **How is alignment of investment strategy with the methodology of the index guaranteed on a permanent basis?**
Not applicable
- **How is the index different from a general market index?**
Not applicable
- **Where can one find the method used to calculate the selected index?**
Not applicable

Where can I find more product specific information online?
