INVESTMENT STRATEGY

ODDO BHF Artificial Intelligence is a global thematic equity fund using Artificial Intelligence with the objective to detect the most alpha-generating sub-themes and innovative companies linked to the theme of Artificial Intelligence. The sustainable investment objective of the fund is to contribute to carbon-reduction and to seize opportunities arising from the transition to a low-carbon economy. After the definition of the investment universe utilizing artificial intelligence, an ESG and carbon analysis reduces this universe according to the sustainable investment objective of the fund. Then, a quantitative screening and a rigorous fundamental analysis are performed by the portfolio management team in order to select the strongest 30-60 convictions. The fund is actively managed by the management team.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

MONTHLY MANAGEMENT COMMENT

January 2024 was another month of strong growth for all fund units. This is broken down as follows: around one third came from the rise in our benchmark index (the MSCI World Developed Countries), and around two thirds came from the outperformance of our fund against this benchmark index.

Our best contributors to performance were: 1) Nvidia, with all the indicators relating to investment in GPUs linked to generative AI are in the green; 2) CrowdStrike, against a backdrop where spending intentions on cybersecurity are still on the right track, customers want to consolidate their spending around a very small number of platforms and customers want to be able to use the same platforms in the same way; and 3) Nvidia's open rival AMD with its MI300 chips, as we were able to take some profits just before the semiconductor's share price dropped at the end of the month.

The main drags on performance over the month were: 1) ST Micro, after announcing a lower-than-expected outlook for 2024, penalised by the dynamic performance of its industry and automotive divisions to a lesser extent; 2) Intel, whose guidance for Q1 2024 is below expectations due to an air pocket in its PC and programmable semiconductor businesses; 3) Samsung Electronics, whose quarterly results are temporarily disappointing due to a policy of limiting production in order to manage DRAM price dynamics.

RISKS:

The fund is exposed to the following risks : risk of capital loss, equity risk, interest rate risk, credit risk, risk associated with discretionary management, currency risk, risk associated with commitments on forward financial instruments, counterparty risk, liquidity risk of underlying assets, risk associated with holding small and medium capitalisations, emerging markets risk, volatility risk, modelling risk, Stock Connect, Bond Connect, Investing in China, Sustainability risk

SFDR CLASSIFICATION²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.
