## INVESTMENT STRATEGY

ODDO BHF Avenir Europe is a European small and mid cap equity fund, invested in companies having their registered office in the European Union or in a European OECD member state. It aims to be permanently invested in equities, targeting long-term capital growth. It primarily selects some of the best performing cyclical and non-cyclical companies in Europe, which often have an international presence, where the price is considered attractive taking long-term prospects into account.

Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

## SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

### ESG integration at ODDO BHF Asset Management | 3 systematic steps

#### Exclusions

- **Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- **Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

#### ESG ratings

- Usage of MSCI data based on a “Best-in-Class” approach
- All titles considered for investments have at least a BB rating

#### Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive

### ESG rating methodology

Environment	Social	Governance
<ul style="list-style-type: none"> <li>• Climate Change</li> <li>• Natural Resources</li> <li>• Pollution &amp; Waste</li> <li>• Environmental Opportunities</li> </ul>	<ul style="list-style-type: none"> <li>• Human Capital</li> <li>• Product Liability</li> <li>• Stakeholder Opposition</li> <li>• Social Opportunities</li> </ul>	<ul style="list-style-type: none"> <li>• Corporate Governance</li> <li>• Corporate Behavior</li> </ul>

Exposure metrics, management metrics and industry specific weighting  
Final result between 1-10 which is matched to a rating between AAA to CCC

High risk...

...Strong opportunity

**Carbon metrics methodology: We updated our methodology of carbon intensity calculation.**

Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used.

The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

## MONTHLY MANAGEMENT COMMENT

The equity markets saw significant growth in October, buoyed by technology; results publications, which were somewhat better than the previous conservative expectations; and the Fed's lowering of key interest rates.

In the United States, the S&P 500 gained 2.27% and the Nasdaq was up 4.70%. In Europe, the MSCI Europe NR index rose by 2.55% and the MSCI Smid Cap Europe NR index gained 1.92%. At sector level, utilities (+7.5%) and raw materials (+6.5%) – including the mining sector, which benefited from tensions between the US and China regarding rare earths – recorded the strongest growth. Within the technology sector (+3.5%), semiconductors gained 6.2% and energy rose by 5.7%. Consumer discretionary (+4.0%), benefited from the publication of LVMH's excellent results. Conversely, financials, construction, chemicals, media and leisure all hovered around 0%.

The economic world and the stock markets are benefiting from the colossal investments being made in artificial intelligence by industry leaders. These investments primarily benefit electronic component manufacturers, especially the leading player, NVDIA, whose market capitalisation has exceeded USD 5 trillion, but they also have a knock-on effect on other sectors of the economy, such as energy production.

The stabilisation of core inflation at around 2.5% on both sides of the Atlantic also allows central banks to maintain an accommodative stance, even though the Fed has issued a more cautious statement regarding the continuation of its policy of lowering key interest rates. Generally, 10-year government bond yields narrowed slightly over the month and supported equity valuations.

Our fund posted a significantly positive performance for the month. It benefited from the publication of good results by Metso and FLSmidth (mining equipment), Temenos (banking software), Kuros (medical equipment), Wartsila, Exosens, Andritz (industrials) and ASMI (technology). Conversely, it also suffered disappointments from Groupe SEB (consumer goods), Sodexo (business services) and Landis+Gyr (industrials).

In an uncertain and changing world, we stand by our investment philosophy. We invest in companies that are able to adapt to the new rules of international trade, and to the ongoing technological and geopolitical shifts. We make sure that their competitive advantage remains sustainable, ensuring their ability to grow across the world and to outpace global GDP growth.

## RISKS:

The fund is exposed to the following risks :risk of capital loss, equity risk, interest rate risk, credit risk, risk associated with discretionary management, currency risk, risk associated with commitments on forward financial instruments, counterparty risk, risk associated with holding small and medium capitalisations, risks associated with securities financing transactions and collateral management, Sustainability risk and on an ancillary basis risk associated with convertible bonds

## SFDR CLASSIFICATION<sup>2</sup>

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

## DISCLAIMER

This document has been drawn up by ODDO BHF AM SAS. Potential investors should consult an investment advisor before subscribing to the fund. The investor is informed that the fund presents a risk of capital loss, but also many risks linked to the financial instruments/strategies in the portfolio. In case of subscription, investors must read the Key Information Document (KID) and the fund's prospectus in order to acquaint themselves with the detailed nature of any risks incurred and all costs. The value of the investment may vary both upwards and downwards and may not be returned in full. The investment must be made in accordance with investors' investment objectives, their investment horizon and their capacity to deal with the risk arising from the transaction. ODDO BHF AM SAS cannot be held responsible for any direct or indirect damages resulting from the use of this document or the information contained in it. This information is provided for indicative purposes and may be modified at any moment without prior notice. Any opinions presented in this document result from our market forecasts on the publication date. They are subject to change according to market conditions and ODDO BHF AM SAS shall not in any case be held contractually liable for them. The net asset values presented in this document are provided for indicative purposes only. Only the net asset value marked on the transaction statement and the securities account statement is authoritative. Subscriptions and redemptions of mutual funds are processed at an unknown asset value.
