INVESTMENT STRATEGY

Since 2007, ODDO BHF Polaris Dynamic has offered a global and broadly diversified, dynamic multi-asset investment solution. It is characterized by an equity allocation between 70% and 100% and a bond portfolio that invests mainly in investment-grade bonds. The portfolio may invest in securities listed or traded on regulated markets, primarily in Europe, the US or Emerging Markets.
The investment objective is to generate attractive asset growth with reduced fluctuations in value through value-oriented investments, while taking into account environmental, social issues and corporate governance (ESG) criteria.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It rangesfrom 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indicationof the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved..

ASSET ALLOCATION

MONTHLY MANAGEMENT COMMENT

Against a backdrop of rising prices and increasing shortages of oil products such as diesel, yields on safe government bonds remain at high levels, reflecting ongoing inflation concerns. As expected, the US Federal Reserve has raised key interest rates. In the US, both 10-year and 30-year government bonds are now yielding more than 5 per cent. The equity markets remained largely unfazed by the scepticism of the bond markets and were supported by robust corporate results and positive economic data. Against the backdrop of rising interest rates, we further reduced the fund's equity allocation. As Allianz shares have recently risen significantly, we took profits through partial sales for valuation reasons. However, given its leading market position in Europe, strong capital base and reliable dividend policy, the share remains in the portfolio. In view of the increased risk in the semiconductor sector, we divested our position in Micron, which has benefited significantly from demand for memory chips for AI applications and data centres. We remain invested in this segment via an emerging markets fund. Safran, a leading global aerospace and technology group benefiting from strong demand for commercial aircraft and rising defence spending, was added to the portfolio. To increase the weighting of the pharmaceutical sector, we also added UCB shares to the portfolio. The company has significant growth drivers in the form of several newly launched medicines.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).
The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based: exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based: total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornography and coal...)

ESG ratings

- Usage of MSCI data based on a « Best-in-Class » approach

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive
