INVESTMENT STRATEGY

ODDO BHF Avenir is a French (at least 70%) small and mid-cap equity fund. It aims to be permanently invested in equities, targeting long-term capital growth. It primarily selects some of the best performing cyclical and non-cyclical companies in France, which often have an international presence, where the price is considered attractive taking long-term prospects into account.

*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the Information section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainability provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

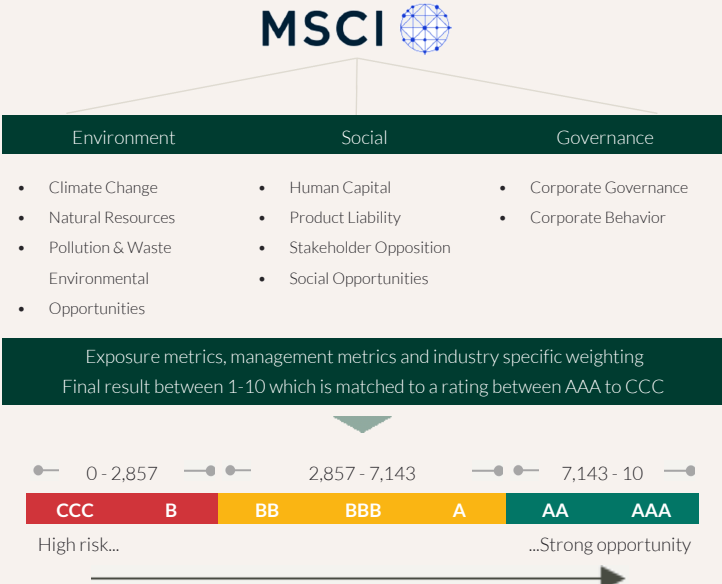

ESG ratings

- Usage of MSCI data based on a “Best-in-Class” approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management’s voting policy
- Escalation procedure if engagement is not conclusive

ESG rating methodology

The diagram illustrates the MSCI ESG rating methodology. It is structured into three main pillars: Environment, Social, and Governance. Each pillar has a list of specific indicators. The Environment pillar includes Climate Change, Natural Resources, Pollution & Waste, Environmental Opportunities, and Social Opportunities. The Social pillar includes Human Capital, Product Liability, Stakeholder Opposition, and Social Opportunities. The Governance pillar includes Corporate Governance and Corporate Behavior. These indicators are evaluated based on exposure metrics, management metrics, and industry-specific weighting to produce a final score between 1 and 10. This score is then mapped to an ESG rating from CCC to AAA. A scale at the bottom shows the mapping: 0-2,857 (CCC), 2,857-7,143 (B, BB, BBB, A), and 7,143-10 (AA, AAA). The scale is labeled 'High risk...' on the left and '...Strong opportunity' on the right.

Sources: ODDO BHF AM SAS, MSCI.

Carbon metrics methodology: We updated our methodology of carbon intensity calculation. Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used. The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

MONTHLY MANAGEMENT COMMENT

Equity markets fell sharply in March due to the Iran war and blockade of the Strait of Hormuz, through which 20% of the world's oil production passes. This caused oil prices to soar over the month, with Brent Crude up 63% and WTI gaining 51%. The regions most dependent on the Strait of Hormuz suffered the most: MSCI Europe NR -7.7%, MSCI Europe Smid Cap NR -7.1%, MSCI EM -13.3%, S&P 500 -5.1% and Nasdaq -4.8%.

Against this backdrop, the major central banks all left their rates unchanged but took a much more cautious stance on inflation. The themes of cyclical recovery and interest rate cuts gave way to a focus on the Middle East, energy risk and the new fear of stagflation. As a result, the European Energy sector easily outperformed the market in March (+14.5%), followed by Chemicals (down only -2.7% amid fears of shortages), Utilities (-3.3%) and Telecoms (-3.6%). Conversely, cyclical sectors suffered the most in Europe, starting with Consumer Goods (-15%), followed by Real Estate (-14.5%), Automotive (-12.7%), Construction (-12%), Industrials (-12%), then Banks (-11%) and Tech (-9.6%, mainly due to fears about memory prices, partly linked to Google's TurboQuant innovation). The Health Care sector did not play its traditional defensive role this month (-8.2% in March), probably owing to fears about the rising costs faced by certain medical equipment manufacturers.

Against this backdrop, and despite our underweight position in the energy sector, the Fund nevertheless slightly outperformed its benchmark thanks to earnings reports and guidance that were generally well received, in particular for several of the portfolio's technology stocks (Semco, Aixtron, 2CRSI, Sidetrade, etc.).

In an increasingly uncertain and changing world, we stand by our investment philosophy. We invest in companies that are able to adapt to the new rules of international trade, and to the ongoing technological and geopolitical shifts. We make sure that their competitive advantage remains sustainable, ensuring their ability to grow across the world and to outpace global GDP growth. Nevertheless, in order to limit the risk of divergence from the index, exposure to banks and insurance companies may be undertaken via ETFs, up to a maximum of 10% of the portfolio.

RISKS:

The fund is exposed to the following risks :risk of capital loss, equity risk, interest rate risk, credit risk, risk associated with discretionary management, counterparty risk, risk associated with holding small and medium capitalisations, risks associated with securities financing transactions and collateral management, Sustainability risk and on an ancillary basis currency risk

SFDR CLASSIFICATION²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

DISCLAIMER

This document has been drawn up by ODDO BHF AM SAS. Potential investors should consult an investment advisor before subscribing to the fund. The investor is informed that the fund presents a risk of capital loss, but also many risks linked to the financial instruments/strategies in the portfolio. In case of subscription, investors must read the Key Information Document (KID) and the fund's prospectus in order to acquaint themselves with the detailed nature of any risks incurred and all costs. The value of the investment may vary both upwards and downwards and may not be returned in full. The investment must be made in accordance with investors' investment objectives, their investment horizon and their capacity to deal with the risk arising from the transaction. ODDO BHF AM SAS cannot be held responsible for any direct or indirect damages resulting from the use of this document or the information contained in it.
