INVESTMENT STRATEGY

ODDO BHF Avenir Euro is a Euro Zone equity fund invested in small and mid caps with a maximum of 10% in companies domiciled outside the Euro Zone. It aims to be permanently invested in equities, targeting long-term capital growth. It selects some of the best performing cyclical and non-cyclical companies in the Euro Zone, which often have an international presence, where the price is considered attractive taking long-term prospects into account.

*The glossary of indicators used is available for download on www.am.oddo-bhf.com in the Information section. | Sources : ODDO BHF AM SAS, Bloomberg, Morningstar® Sustainability provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity).

The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- **Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- **Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

ESG ratings

- Usage of MSCI data based on a "Best-in-Class" approach
- All titles considered for investments have at least a BB rating

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive

ESG rating methodology

MSCI 

Sources: ODDO BHF AM SAS, MSCI.

Carbon metrics methodology: We updated our methodology of carbon intensity calculation.

Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used.

The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

MONTHLY MANAGEMENT COMMENT

Equity markets saw significant volatility in July, driven by AI-related issues, tensions in the Middle East and uncertainty over monetary policy. After a relatively quiet start to the month, geopolitical tensions drove up oil prices, reigniting fears of inflation and persistently high interest rates. At the end of the month, the easing of tensions between the United States and Iran led to a sharp fall in oil and commodity prices, easing inflationary pressures. Against this backdrop, the ECB and the Federal Reserve kept their rates unchanged, despite differences of opinion among the Fed's committee members. The theme of investment in AI remained a key focus, with a fall in the value of memory and semiconductor stocks and a rise in the software segment, shifting attention back to the cash flows of technology companies. Investment by major technology groups, expected to reach USD 700 billion by 2026, is also funded by debt, and the first signs of strain have emerged with Amazon's bond issue. US indices posted mixed results in July, with the NASDAQ falling by 5.1% but the S&P 500 and the Dow Jones rising by 0.1% and 0.4% respectively. The differences in performance were once again mainly attributable to exposure to tech stocks, particularly those relating to semiconductors and memory, which weighed heavily on the market – indeed, the Dow Jones, which is more heavily exposed to the financial and industrials sectors, held up better. In Europe, the MSCI Europe NR index rose by 1.5%, driven by energy (+18%) and financials (+5%). By contrast, AI infrastructure-related shares fell by 11% and health care shares fell by 1%. The MSCI Europe SMID NR rose by 2.3%, buoyed by the energy, consumer staples and financials sectors. Avenir Europe remained stable. The main factors were: (i) the steady performance of the health care sector, which accounts for a significant proportion of our fund, as well as (ii) the performance of banking and insurance stocks, offset by (iii) the decline in technology shares, particularly semiconductors, and industrial companies benefiting from investment in AI, following a strong first half of the year. Among the stocks that had the greatest impact over the month, Andritz and De'Longhi were the main positive contributors, thanks to better-than-expected results and a favourable outlook. Conversely, Nordex was penalised by the failure to raise its guidance, despite solid results, and Technoprobe also suffered from the correction in the European semiconductor sector. In an uncertain and changing world, we stand by our investment philosophy. We invest in companies that are able to adapt to the new rules of international trade, and to the ongoing technological and geopolitical shifts. We make sure that their competitive advantage remains sustainable, ensuring their ability to grow across the world and to outpace global GDP growth.

RISKS:

The fund is exposed to the following risks :risk of capital loss, equity risk, interest rate risk, credit risk, risk associated with discretionary management, risk associated with commitments on forward financial instruments, counterparty risk, risk associated with holding small and medium capitalisations, risks associated with securities financing transactions and collateral management, Sustainability risk and on an ancillary basis currency risk

SFDR CLASSIFICATION²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

DISCLAIMER

This document has been drawn up by ODDO BHF AM SAS. Potential investors should consult an investment advisor before subscribing to the fund. The investor is informed that the fund presents a risk of capital loss, but also many risks linked to the financial instruments/strategies in the portfolio. In case of subscription, investors must read the Key Information Document (KID) and the fund's prospectus in order to acquaint themselves with the detailed nature of any risks incurred and all costs. The value of the investment may vary both upwards and downwards and may not be returned in full. The investment must be made in accordance with investors' investment objectives, their investment horizon and their capacity to deal with the risk arising from the transaction. ODDO BHF AM SAS cannot be held responsible for any direct or indirect damages resulting from the use of this document or the information contained in it.
