INVESTMENT STRATEGY

Since 2005, ODDO BHF Polaris Moderate has offered a global and broadly diversified, moderate multi-asset investment solution. It is characterized by an equity allocation between 0% and 40% and a bond segment that invests mainly in investment grade bonds. The portfolio invests in securities listed or traded on regulated markets, mainly in Europe, the US or Emerging Markets. It can also invest up to 10% in gold by certificates or similar.

The investment objective is to avoid major setbacks due to price fluctuations and to generate an additional return to a bond investment, while taking into account environmental, social issues and corporate governance (ESG) criteria.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

ASSET ALLOCATION

MONTHLY MANAGEMENT COMMENT

The stock markets continued their recovery in May, buoyed primarily by better-than-expected first-quarter corporate results. This led to significant upward revisions in the expected earnings growth of the S&P 500. However, the markets remain highly polarised: in the US, around 60% of share price gains since the start of the year have been attributable to just five technology stocks, and a similar picture is evident in the Asian markets, which are dominated by major semiconductor manufacturers. The unresolved conflict between the US and Iran had largely no impact on share prices, whilst rising inflation expectations drove up long-term yields at times, although the situation has eased recently. In anticipation of higher interest rates, gold lost its appeal and fell accordingly. In the equity portfolio, we further increased our exposure to the booming semiconductor sector, which is benefiting from high demand for memory chips and the resulting rise in prices. To this end, we bought Micron, Lam Research and Cadence Design Systems. We increased our existing positions in the defence company Rheinmetall and the software group SAP. Conversely, we reduced our holdings in European stocks such as Allianz, Zurich and L'Oréal. We sold our entire holdings in Biomerieux and Mercedes. We further reduced our gold position. The bond portfolio benefited from the recent fall in interest rates. Whilst we remained cautious on high-yield and subordinated bonds due to high valuations, we invested in attractively valued new issues from companies such as Booking, Amadeus and Teleperformance.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity). The choice of indicators is therefore crucial for the relevance of impact measurement. The data for the environmental indicators come from our external non-financial analysis provider, MSCI. We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

ESG integration at ODDO BHF Asset Management | 3 systematic steps

Exclusions

- Norm-based:** exclusion of companies that do not comply with certain international standards.(chemical weapons , anti-personnel mines, violation of the principles of the Global Compact, etc.)
- Sector-based:** total or partial exclusion of sectors or activities based on ethical considerations (tobacco, gambling, weapon, adult entertainment / pornographie and Coal...)

ESG ratings

- Usage of MSCI data based on a « Best-in-Class » approach

Dialogue and engagement

- Regular dialogue with companies on ESG issues
- Individual and joint engagement
- Inclusion of ESG research within ODDO BHF Asset Management's voting policy
- Escalation procedure if engagement is not conclusive
