

Investment Objective

The Arcus Japan Fund (a sub-fund of Arcus FUND SICAV, hereafter 'AJF' or the 'Fund') focuses on investing in Japanese equities with the objective of achieving a return in excess of the return of the TOPIX Total Return (TOPIX TR) Index (the "Benchmark").¹

Performance Commentary

The Fund's A ACC JPY Class rose 2.1% in January, while TOPIX TR gained 4.6%.

By sector, the highest contribution came from Chemicals (+0.6% relative performance contribution), followed by Services (+0.5%) and Construction (+0.2%). Banks (-1.3%) were a relative drag.

Fund performance versus the Benchmark

A ACC JPY Unhedged share class has been included for reference to its track record only and is not available to retail investors. The Benchmark has been selected as a target benchmark for the Fund as it is representative of the types of investment made by the Fund. The Investment Manager is not bound by the Benchmark when making its decisions and can invest in assets that are not included in the Benchmark.

Chart data: Arcus Japan Fund. Representative share class: A ACC unhedged JPY (ISIN: LU0243544235), launched on the 29th of June 2006. The Platform and B classes are available to retail investors (investing via eligible counterparties). This graph includes the performance of the A share class as that class has the longest track record. The performance of the Platform and B (Yen) classes is likely to have been substantially similar to the performance of the A (Yen) class (Note: (a) launch dates (b) unhedged share classes are subject to fluctuations in exchange rates). However, as the Platform & B class were more recently (re)launched (see table below), they are not included in this chart but the data can be found at the end of this newsletter. The only difference between the A (Yen) Class and the Platform/B (Yen) classes is a 0.04% higher ongoing charge arising from taxation matters. The index information is included merely to show the general trend in the relevant markets in the periods indicated. It is not intended to imply that the portfolio of the fund was or will be similar to the index either in composition or element of risk. Performance disclaimers

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS listed investments are traded at the ruling price/last traded price, and although they can engage in scrip lending and borrowing, AJF does not.

A schedule of fees, charges, and maximum commissions is available on request from the Manager. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. Performance has been calculated using net NAV to NAV numbers with income reinvested. There is no guarantee in respect of capital or returns in a portfolio.

CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies, and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase-in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impact the Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic, political, foreign exchange, tax, and settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risks associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption, and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. The NAV (price) is released after 13:00 (SA) each dealing day.

This is a marketing communication. Arcus Investment Limited is authorised and regulated by the Financial Conduct Authority (FRN:188741).

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

There is no guarantee in respect of capital or returns in a portfolio. Annualised performance shows longer-term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request. Highest and lowest returns for any 1 year over the period since inception have been shown. NAV is the net asset value and represents the assets of a Fund less its liabilities.

Past performance of a fund is neither an indication nor guarantee as to its performance in the future. The value of investments may fall as well as rise. The return information shown is net of management and performance fees, but gross of taxation. Acquiring shares/units may expose an investor to a significant risk of losing the entire amount invested. The tax treatment of this investment depends on the individual circumstances of each investor and may be subject to change in the future. Any person who is in any doubt about investing in the funds should consult an authorised person specialised in advising on such investments.

There is no guarantee that a fund's investment objective will be achieved. Any projections, market outlooks, or estimates in this document are forward-looking statements and are based upon certain assumptions. Other events which are not taken into account may significantly affect the returns or performance of the fund. Any projections, outlooks, or assumptions should not be construed to be indicative of the actual events which will occur.
