FUND MANAGERS COMMENT

April was punctuated by numerous developments in the geopolitical situation in the Middle East, none of which brought greater clarity or progress towards a definitive resolution of the conflict. In spite of this, equity markets rebounded strongly. The Euro Stoxx rose by 6.4%, while the MSCI EMU Small Cap index and the fund increased by 8.8% and 8.0%, respectively, over the month.

Among the positive contributors to the portfolio's performance, Siltronic (+52%) benefited from a strong Q1 earnings release as well as some signs of improving fundamentals in the semiconductor market, a trend that also supported the performance of PVA Tepla (+24%). Hiab (+25%), Rosenbauer (+22%), and 74Software (+17%) also reported excellent quarterly results. Conversely, the declines of Sto (-5%), Washtec (-3%), and Alzchem (-2%), despite quarterly results in line with expectations, weighed on the month's performance. Norma (-12%) traded down with no specific newsflow.

During the month, we took some profits on our positions in Siltronic, Alzchem, PVA Tepla, and De'Longhi.

CONTACTS AND ADDITIONAL INFORMATION

Glossary :

Alpha represents the return of a portfolio that is attributable to the manager's investment decisions.
Beta measures a fund's sensitivity to movements in the overall market.
Information ratio represents the value added by the manager (excess return) divided by the tracking error.
Sharpe ratio measures return in excess of the risk free rate for every unit of risk taken.
Tracking error measures the volatility of the difference between a portfolio's performance and the benchmark.
Volatility is a measure of the fund's returns in relation to its historic average.
Yield to Maturity indicates the rate of return generated if a security is held to its maturity date.
Coupon Yield is the annual coupon value divided by the price of the bond.
Average Credit Spread is the credit spread of a bond over LIBOR, taking into account the value of the embedded option.

Average Rating is the weighted average credit rating of bonds held by the Fund.

Modified Duration is the percentage change in the value of a bond resulting from a 1% interest rate change.

Average Maturity is the average time to maturity of all bonds held by the Fund.

Spread Duration is the sensitivity of a bond price to a change in spreads.

Yield is the internal rate of return of a bond if held to maturity, but not accounting for conversion features of a convertible bond.

Delta represents the sensitivity of convertible bonds held by the Fund to a change in the underlying security price.
