## Risks

Guinness Global Energy Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The Fund invests only in companies involved in the energy sector; it is therefore susceptible to the performance of that one sector, and can be volatile. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement; you may not get back the amount originally invested. For full information on the risks, please refer to the Prospectus, Supplement, and KID/KIID for the Fund, which are available on our website.

Source: FE fundinfo net of fees to 31.12.25. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). The current OCF is 0.77%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return. ## Fund Profile

### Aim

Long-term capital growth

### Investment Case

Provides exposure to growth opportunities in energy equities. Global population growth, industrialisation and diminishing fossil fuel supplies, pushing energy prices higher, and creating a favourable environment for energy companies. Energy equities can be a long-term hedge against inflation.

### Process

50% top down, 50% bottom up. Value bias in bottom-up stock selection.

### Portfolio

Equities of companies in the exploration, production or distribution of oil, gas and other energy sources. Concentrated portfolio of 30 positions. Majority of Fund invested in stocks over \$1bn in size.

### Investment Objective

An equity fund investing primarily in globally based companies principally engaged in the production, exploration or discovery, or distribution of energy derived from fossil fuels and the research and development of production of alternative energy sources.

The Fund is actively managed and uses the MSCI World Energy Index as a comparator benchmark only.

For the avoidance of doubt, if you decide to invest, you will be buying units/shares in the Fund and will not be investing directly in the underlying assets of the Fund.
