What is this Product ?

Type

This Product is an investment fund under Luxembourg law, société d'investissement à capital variable - SICAV - incorporated as a société anonyme and governed by part I of the Luxembourg law of December 17, 2010 concerning undertakings for collective investment.

Term

The lifespan of This Product is not limited.

Objectives

The investment objective of the Product is to achieve long-term capital growth investing, either directly or via third party UCITS and/or UCIs which are themselves invested in worldwide securities.

Benchmark Index

The Product is actively managed through discretionary investments. The Product is not constrained by a benchmark.

Investment Policy

The Product has a directional, equity linked mandate and, as such, it will tend to invest predominantly in underlying funds which are themselves invested in worldwide equities.

While complying with the above policy and for treasury purposes, the Product may also invest in money market instruments, term deposits maturing within one year at credit institutions, fixed income securities and money market funds. Fixed income issuers will preferably be public issuers with investment grade rating with short-term maturity of less than twelve months.

The Product invests with no prescribed industry sector or market capitalization limits for its underlying funds.

The Product asset allocation, geographical exposure, currency allocation and the underlying funds selection are tailored in order to ensure that the portfolio is well diversified and invested in the areas where the Portfolio Manager identifies with the better risk-reward characteristics for capital growth.

This Product may combine direct investment in securities and investment through financial derivative instruments, if it considers that the combination might better realize the investment objective.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Non-distribution shares: any income generated by the Product is reinvested.

Please note that transaction costs may have material impact on performance.

Intended retail investor

The investor needs to accept the risk attached to worldwide equities. The investors will therefore have a good tolerance towards risks as well as investors with higher levels of capital who would consider this investment as a good diversification of their portfolio. The investor needs to accept the risk attached to worldwide equities and his time horizon will be of the order of 3-5 or so years. Classes A intended for subscription by: (i) investors with an initial minimum subscription amount of EUR 500,000, or (ii) any person investing via an intermediary that is rendering portfolio management or investment advice services and directly pays for these services under a separate fee arrangement.

The type of investor for whom the Product is intended may include retail investors with no financial industry experience.

Practical information

Custodian: Edmond de Rothschild (Europe)

The Redemption Price corresponds to the Net Asset Value per Share for the relevant Valuation Day. Orders regarding subscriptions and redemptions must be received by the Registrar and Transfer Agent no later than 2.00 p.m., Luxembourg time on each Business Day. The NAV applicable to the orders received by the Registrar and Transfer Agent no later than 2.00 p.m., Luxembourg time on each Business Day will be the NAV of such day. The Redemption Price shall be paid no later than 3 Business Days following the day in which the relevant orders are received by the Registrar and Transfer Agent.

Copies of the prospectus and the last annual and semi-annual reports of the entire Product as well as other practical information such as the latest price for the shares may be obtained free of charge, in English, at the registered office of the Product: 4 rue Robert Stumper, L-2557 Luxembourg, Grand Duchy of Luxembourg and on the following website: www.abanteasesores.com.

The latest published prices of the class, the information regarding the net asset value, the calculations of the monthly performance scenarios and the past performances of the Product are available on the website www.abanteasesores.com.

What are the risks and what could I get in return ?

Risk Indicator

1	2	3	4	5	6	7
---	---	---	---	---	---	---

←----->
Lower risk Higher risk

The summary risk indicator assumes you keep the Product until maturity end of the recommended holding period (5 years). The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

In addition, you will be exposed to the following risks (not captured in the synthetic risk indicator), namely:

Investments into other UCI/UCITS: A Product which invests in other collective investment schemes will not have an active role in the day-to-day management of the collective investment schemes in which it invests. Moreover, a Product will generally not have the opportunity to evaluate the specific investments made by any underlying collective investment schemes before they are made. Accordingly, the returns of a Product will primarily depend on the performance of these unrelated underlying product managers and could be substantially adversely affected by the unfavourable performance.

Liquidity risk: The Product will invest in illiquid investments (in particular but not limited to real estate assets and private equity type assets) which may not readily be sold within a reasonable timeframe and there can be no guarantee that the liquidity of the Product will always be sufficient to comply with redemption requests at the time they are made. Moreover, the Product may invest in investments that are subject to a lock-up period or closed ended. Any absence of liquidity may have an impact upon the liquidity of a Product's Shares and the value of its Investments. For this reason, when shareholders are entitled to request the redemption of their Shares, the processing of redemption requests may be delayed, including in the event of the absence of liquidity which may make it difficult to determine the Net Asset Value per Share of the Product's Shares and consequently lead to the suspension of Shares issues and redemptions.

Risk linked to the use of derivative instruments: The Product uses derivative instruments, which means financial instruments whose value depends on those of an underlying asset. Therefore, fluctuations in the price of an underlying asset, even if minor, could lead to significant variations in the price of the corresponding derivative instrument. With the use of over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Product.

Derivatives for hedging purposes: The use of derivatives for hedging in a rising market may restrict potential gains.

Currency risk: The Product invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

Credit risk: The issuer of a bond or other debt security (including, but not limited to, governments and their agencies, state and provincial governmental entities, supranationals and companies) may default on their obligations by failing to make payments due, or repay principal and interest in a timely manner which will affect the value of the debt securities held by the portfolio.

Counterparty risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments may expose the Product to financial loss.

Operational risk: Risk of loss resulting from human errors, inadequate or failed internal systems, processes or controls or from external events.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

Beware of currency risk. If an Investment Product is denominated in a currency other than the official currency of the State in which this Product is marketed, the final gain will therefore depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator above.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable, scenarios presented represent examples using the best and worst performances, as well as the average performance of the Product and/or the appropriate benchmark indicator over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Investment EUR 10,000

The recommended holding period is 5 years.		If you exit after 1 year	If you exit after 5 years (recommended holding period)
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress scenario	What you might get back after costs	EUR 5,370	EUR 4,520
	Average return each year	-46.30%	-14.68%
Unfavourable scenario	What you might get back after costs	EUR 7,650	EUR 10,290
	Average return each year	-23.50%	0.57%
Moderate scenario	What you might get back after costs	EUR 10,210	EUR 12,420
	Average return each year	2.10%	4.43%
Favourable scenario	What you might get back after costs	EUR 13,830	EUR 14,380
	Average return each year	38.30%	7.54%

This table shows the money you could get back over the recommended holding period of 5 years, under the different scenarios, assuming you invest EUR 10,000.

Unfavourable scenario : this scenario occurred for an investment between 09/2017 and 09/2022.

Moderate scenario : this scenario occurred for an investment between 07/2019 and 07/2024.

Favourable scenario : this scenario occurred for an investment between 03/2020 and 03/2025.

What happens if Abante Asesores Gestion SGIIC, S.A.U. is unable to pay out ?

The Product's ability to pay out would not be affected by the insolvency of the manufacturer. You may however face a financial loss should the Depositary default on its obligations. Such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Product. There is no compensation or guarantee scheme in place which may offset, all or any of, these potential losses.

What are the costs ?

The person advising on or selling this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario

- EUR 10,000 is invested

Investment EUR 10,000	If you exit after 1 year	If you exit after 5 years (recommended holding period)
Total costs	EUR 263	EUR 1,722
Annual cost impact (*)	2.6%	2.7% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 7.18% before costs and 4.43% after costs.

We may share costs with the person selling the Product to you in order to cover the services they provide to you. If so, this person will inform you of the amount.

Composition of Costs

Investment EUR 10,000 and annual cost impact if you exit after 1 year

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	EUR 0
Exit costs	We do not charge an exit fee for this Product (but the person selling you the Product may do so).	EUR 0
Ongoing costs (taken each year)		
Management fees and other administrative or operating costs	2.30% of the value of your investment per year. This figure is based on actual costs over the past year.	EUR 230
Transaction costs	0.01% of the value of your investment per year. This is an estimate of the costs incurred when we buy or sell the underlying investments for the Product. The actual amount will vary depending on how much we buy and sell.	EUR 1
Incidental costs taken under specific conditions		
Performance fees and carried interest	0.32% , Description: 9% of the performance of the NAV per Share exceeding the high watermark (the greater of the latest NAV per Share on which a performance fee has been paid and the initial subscription price). Past losses can be reset after five years. Payment date 31 December. The calculation method is further described in the prospectus.	EUR 32

The table below shows the impact of the different types of costs on the investment return you might get at the end of the recommended holding period and what the different cost categories mean.

How long should I hold it and can I take the money out early ?

Recommended holding period : 5 years

This Product is designed for medium term investments. However, you can redeem your investment without penalty at any time during this time, or hold the investment longer.

The Redemption Price corresponds to the Net Asset Value per Share for the relevant Valuation Day. Orders regarding subscriptions and redemptions must be received by the Registrar and Transfer Agent no later than 2.00 p.m., Luxembourg time on each Business Day. The NAV applicable to the orders received by the Registrar and Transfer Agent no later than 2.00 p.m., Luxembourg time on each Business Day will be the NAV of such day. The Redemption Price shall be paid no later than 3 Business Days following the day in which the relevant orders are received by the Registrar and Transfer Agent.

How can I complain ?
