Performance data quoted reflect past performance and are no guarantee of future results. Current performance may be higher or lower than the performance quoted. The net asset value performance above shows the Fund's average annual total returns excluding sales charges, which are not applicable to Class I shares. The investment return and principal value of an investment in the fund will fluctuate so that shares, on any given day or when redeemed, may be worth more or less than their original cost. Please refer to the Share Class Information table below for since inception dates; benchmark since inception is 18/03/2020. Returns for periods of less than one year are not annualized. Currency-hedged share classes use hedging techniques in an attempt to reduce fluctuations between the hedged share class and the portfolio's base currency. The goal is to deliver returns that track the portfolio's base currency returns more closely. Any gains/losses associated with the hedging techniques will accrue solely to the relevant hedged share class. There can be no guarantee that these techniques will be successful.

Key Risks: The Fund is subject to risks associated with investing in debt securities, including credit risk, interest rate risk, high yield risk, mortgage and asset backed securities risk and derivatives risk. For share classes denominated in a currency other than U.S. dollars, changes in currency exchange rates may reduce or increase fund returns. Please refer to the end of this document as well as the Fund's KIID and prospectus for more detailed risk information.

PORTFOLIO BREAKDOWN

Allocations are reported as of the date a security transaction is initiated however, certain transactions may not settle until several days later. Accordingly, cash may appear as a negative allocation as a result of forward-settling instruments such as currency forwards, certain mortgage-backed securities, and U.S. treasury futures. "Other" may include municipal bonds and non-index holdings.

CREDIT QUALITY DISTRIBUTION

Ratings (other than U.S. Treasury securities or securities issued or backed by U.S. agencies) provided by Standard & Poor's, Moody's, and Fitch. For certain securities that are not rated by any of these three agencies, credit ratings from other agencies may be used. When the rating agencies rate a security differently, Lord Abbett uses the median, but if there are only two ratings, the lower is used. Totals may not add to 100% due to rounding.

GLOSSARY OF TERMS

Effective Duration is the change in the value of a fixed-income security that will result from a 1% change in market interest rates, taking into account anticipated cash flow fluctuations from mortgage prepayments, puts, adjustable coupons, and potential call dates. Duration is expressed as a number of years, and generally, the longer a duration, the greater the interest-rate risk or reward for a portfolio's underlying bond prices. Where applicable, securities, such as common or preferred stock, convertible bonds and convertible preferred stock, ETFs, ADRs, and CPI swaps and related futures are excluded from these calculations.

Average Coupon is the weighted average coupon for all the securities in a portfolio. A bond's coupon is the annual rate of interest on a bond's face value that the issuer agrees to pay the holder.

Average Life measures how long it will take, on average, to receive the repayment of the principal amount on a debt security. Average life is often used in connection with mortgage-backed securities as a measurement of the length of time, on average, before the underlying mortgages are paid, refinanced, or otherwise retired.

Average Yield to Worst is the lowest yield that can be received on a bond without defaulting.

Average Yield to Maturity is the rate of return anticipated on a bond if held until it matures. Yield to maturity assumes all the coupon payments are reinvested at an interest rate that equals the yield-to-maturity. The yield to maturity is the long-term yield expressed as an annual rate.

Investors should carefully consider the investment objectives, risks, charges, and expenses of the Fund. This and other important information is contained in the Fund's prospectus, fund supplements, KIIDs, and Summary of Shareholder Rights. Read these documents carefully before you invest. Subscribing for shares in the Fund shall not provide an investor a direct interest in any assets of the Fund.

Morningstar Rating Information (If Applicable): For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three, five, and ten year (if applicable).
