Outperformance fees	None

Operational information

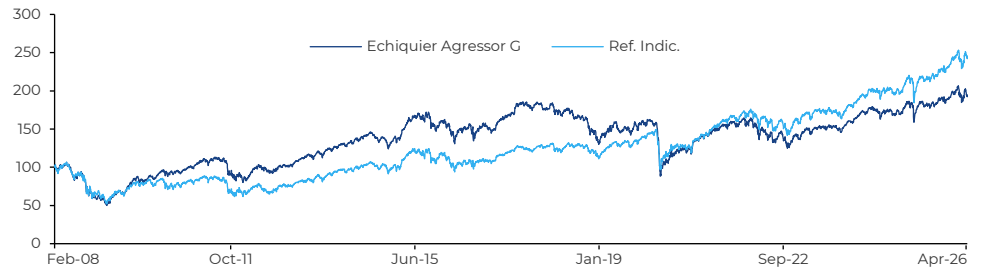

Valorisation frequency	Daily
Cut off	Noon
Settlement	D+2
Fund administrator	Société Générale
Custodian	BNP Paribas SA
Decimalisation	Ten-thousandths

Fund Manager comments

Echiquier Agressor G turned in a positive monthly performance of 3.48% and of 1.16% year-to-date.

Equity markets were buoyed by the entry into force of the ceasefire in the Middle East. Despite this geopolitical easing, investors' attention remained focused on the uncertainties surrounding inflation. Oil prices were particularly volatile, fluctuating between \$83 and \$115 for Brent. Fears of a rate hike as early as April faded over the course of the month, with the Fed and the ECB ultimately leaving their rates unchanged at the end of April. Against this backdrop, the portfolio underperformed its benchmark index. Relative performance was mainly dragged down by healthcare — both pharmaceutical companies and medtech stocks — as well as by semiconductors, a sector underrepresented in the portfolio and limited to ASML, which was the segment's worst-performing stock. Conversely, the overweight position in banks partially offset this underperformance. During the month, we took advantage of the rise in Wolters Kluwer and ArcelorMittal to take profits and close out the positions. We also reduced SAP, L'Oréal and Schneider Electric to increase our holdings in Rheinmetall, Munich Re and EssilorLuxottica. A new position was initiated in GEA Group.

Evolution of the performance of the fund and its reference indicator since inception (base 100)

Perf. (%)

	Annualised						
	1 month	YTD	1 year	3 Years	5 Years	10 years	Since inception
Fund	+3.5	+1.2	+10.2	+8.7	+5.5	+2.6	+3.7
Ref. Indic.	+5.2	+4.2	+18.4	+12.0	+9.9	+8.7	+5.1

Performance by calendar year (%)

Past performance is not an indication of future performance. Returns indicated are after management fees but before taxes paid by the investor. The fund's performance and that of the benchmark index are calculated with net coupons reinvested. All fees and commissions are included in the calculation. Until the 12/31/2012, the reference index was CAC ALL TRADABLE. Then until the 12/31/2015 CAC ALL TRADABLE NR. And since the 01/01/2016, MSCI EUROPE NR.

Risk indicator

Important risk(s) for the fund not taken into account in this indicator: credit risk, guarantees. The risk category associated with this fund is not guaranteed and may change over time.

The synthetic risk indicator shows the level of risk of this product compared with others. It indicates the probability that this product will incur losses in the event of market movements or if we are unable to pay you. We have classified the product in risk class 4 out of 7, which is a low to medium risk class. In other words, the potential losses associated with the future performance of the product are low to medium and, if the situation were to deteriorate on the financial markets, it is unlikely that our ability to pay you would be affected.

This indicator represents the risk profile shown in the KID. The risk indicator assumes that you hold the share for 5 years. Warning: the real risk may be very different if you opt to exit before that time, and you may get less in return.

*15% of the net outperformance versus the benchmark, if the fund's performance is positive

Glossary

Lexicon of financial conditions

Swing pricing	Mechanism by which the net asset value is adjusted upwards (or downwards) when the change in liabilities is positive (or negative) in order to reduce the cost of portfolio rebalancing to the holders of the fund as a result of changes in liabilities.
----------------------	---

Lexicon of risk indicators

Volatility	Measure of the amplitude of variations in the price of a share, a market or a fund. It is calculated over a given period and is used to assess the regularity of the performance of a share, market or fund.
Sharpe ratio	Indicator of the (marginal) return obtained per unit of risk taken. If the ratio is negative: less profitability than the benchmark. If the ratio is between 0 and 1: outperformance with too much" risk taken.
Bêta	If the ratio is greater than 1: outperformance that does not come at the cost of "too much" risk."Indicator which corresponds to the fund's sensitivity in relation to its benchmark index. For a beta of less than 1, the fund is likely to fall less than its index; if the beta is greater than 1, the fund is likely to fall more than its index.
Information ratio	Synthetic indicator of the effectiveness of the risk/return trade-off. A high indicator means that the fund regularly outperforms its benchmark index.
Tracking error	An indicator that compares the fund's volatility with that of its benchmark index. The higher the tracking error, the further the fund's average performance is from its benchmark index.
Max. drawdown	Max drawdown measures the biggest fall in the value of a portfolio.
Time to recovery (business days)	Recovery time, which corresponds to the time needed for the portfolio to return to its highest level (before the "max drawdown").
Sensitivity	Variation in the value of an asset when another factor varies at the same time. For example, the interest-rate sensitivity of a bond corresponds to the variation in its price caused by a rise or fall in interest rates of one basis point (0.01%).

Lexicon of financial analysis

EV/Sales	Enterprise valuation ratio: enterprise value/sales.
PER	Company valuation ratio: Price Earning Ratio = market capitalisation/net profit.
Consumer discretionary	In contrast to basic consumption, it represents all goods and services considered non-essential.
Basic consumption	As opposed to discretionary consumption, it represents goods and services considered essential.
Communication Services	This sector includes telecoms network operators and providers of communications and data transmission services.
Emerging countries	Emerging countries are countries whose economic situation is in the process of development. This growth is calculated on the basis of GDP, new businesses and infrastructure, and the standard of living and quality of life of the inhabitants.
Commodities	A natural resource used in the production of semi-finished or finished products, or as a source of energy.

Lexicon of credit analysis

Investment grade bond	A bond is said to be "investment grade", i.e. if its financial rating by the rating agencies is higher than BB+.
High yield bond	A high-yield bond is one rated below BBB- by the rating agencies.
Duration	The average life of its cash flows weighted by their present value. All other things being equal, the higher the duration, the greater the risk.
Yield to worst	The worst return a bond can achieve without the issuer defaulting.
Yield (all calls exercised)	The yield on a bond includes any call dates incorporated into the bond. These "call" dates correspond to intermediate maturities which give the possibility of redeeming the bond before its final maturity date.

For more information

The SICAV was created on December 4, 2012 for an indefinite period. The subfund was launched on November 29, 1991.

This document, which is of a commercial nature, is above all a monthly report on the management and risks of the sub-fund. It is also intended to provide you with simplified information on the characteristics of the sub-fund.

For further information on the characteristics and costs of this sub-fund, we invite you to read the regulatory documents (prospectus available in English and French and DIC in the official languages of your country) available free of charge on our website www.lfde.com.

Investors or potential investors are informed that they can obtain a summary of their rights in the official language of their country or in English on the Regulatory Information page of the management company's website www.lfde.com or directly via the link below: <https://cdn.lfde.com/upload/partner/Droitsdelinvestisseur.pdf>

Information on withholding tax rates: for distribution units, dividends paid are taxed at 30%. For capitalization units of funds investing more than 10% of their net assets in debt securities, taxation at 30% on income derived directly or indirectly from the yield on debt securities.

Investors or potential investors may also file a claim in accordance with the procedure laid down by the management company. This information is available in the official language of the country or in English on the Regulatory Information page of the management company's website www.lfde.com or directly via the link below: <https://cdn.lfde.com/upload/partner/Droitsdelinvestisseur.pdf>

Finally, the investor's attention is drawn to the fact that the manager or the management company may decide to terminate the marketing agreements for its collective investment schemes in accordance with Article 93a of Directive 2009/65/EC and Article 32a of Directive 2011/61/EU.
