ESG Pillar Score

B EUR Class

Morningstar Index

ESG Pillar Scores are an objective way to assess the components of a portfolio's ESG risk through the traditional ESG thematic framework. ESG risk pillars and their contributions to the Portfolio Sustainability Score allows for comparison of the thematic risk drivers, as well as a deeper understanding of the ESG risk composition of portfolios. The pillar scores are calculated as an asset-weighted average of the corresponding company-level risk scores from Sustainalytics.

The Pillar Scores represent the amount of risk in the Portfolio's sustainability score attributed to each component (i.e. E, S or G). Unallocated: Unmanaged risk for companies with an ESG Risk rating which hasn't been broken out by Environmental, Social or Governance components.

ESG information is provided with reference to a Morningstar Index which closely aligns to the Fund's Benchmark and is for illustrative purposes only.

Sustainability Score

Carbon Intensity

Scope 1+2/Scope 1+2+3 is the asset-weighted average for the portfolio of the underlying holdings' Carbon Intensity scope 1, 2 and 3 (in USD terms). The average only includes holdings for which company Carbon Intensity Scope 1, 2 and 3 (in USD terms) is available. Carbon intensity for a company represents the volume of carbon emissions per million dollars of revenue, computed as follows: Total Emissions Scope 1, 2 and 3 (metric tons of CO₂) / Revenue (Mil USD). For a portfolio, carbon intensity represents the average carbon efficiency of its investments, in metric tons of CO₂. A lower value indicates lower intensity, and greater carbon efficiency.

Corporate ESG Risk Distribution

The AUM distribution of corporate holdings by ESG Risk Classification as per Sustainalytics classification methodology.

Morningstar Sustainability Rating

The Fund has achieved a Morningstar Sustainability rating of **4**, as at 31/12/2025 based on 98.94 AUM coverage and out of 2,486 funds in the EAA Fund Europe Large-Cap Growth Equity category. Sustainalytics provides company-level analysis used in the calculation of Morningstar's Historical Sustainability Score. Data is based on long positions only.
