**Risk Indicator (SRI)**

The risk indicator SRI rates this fund on a scale of 1 to 7. This indicator is used to assess the level of risk of this product in comparison to other funds and a category 1 rating does not mean that the investment is risk free. In addition, it indicates the likelihood that this product will incur losses in the event of market movements or our inability to pay you. This indicator assumes that you hold the product until the end of the recommended holding period of this fund. The actual risk may be very different if you choose to exit before the end of the recommended holding period of this Fund.

**Administrative information**

Inception date : 10/03/2008

Legal form : SICAV

Recommended investment period : 3 years

**Fund Managers**

Julien de SAUSSURE, Benjamine NICKLAUS, Miguel RAMINHOS

The portfolio managers presented in this document may not be the same over the entire life of the product.

**INVESTMENT OBJECTIVE**

The Product's objective is to outperform the benchmark index over the recommended investment period, which comprises 80% of the ICE BofA Euro Financial index and 20% of the ICE BofA Contingent Capital index, through a portfolio that is primarily invested in bonds issued by international financial institutions. The Product applies a dedicated ESG strategy based on the analysis of non-financial criteria that are taken into account when selecting the portfolio's securities. The Product is managed actively, which means that the Manager makes investment decisions in line with the Product's investment policy with a view to achieving the Product's objectives. This active-management process entails taking decisions regarding the selection of assets, regional allocations, sectoral views and overall market exposure. The Manager is in no way limited by the composition of the benchmark index in the positioning of the portfolio, and the Product may not hold all the components of the benchmark index, or even any of the components in question at all. The fund may diverge wholly or significantly from the benchmark index or, occasionally, very little.

**PERFORMANCES****Performance** (Basis 100 - Net of fees)

**Benchmark (Index):** 80% ICE BofA Euro Financial + 20% ICE BofA Contingent Capital Index Hedged en EUR

The benchmark has changed since this product was created. The performance data for the benchmark has been chain-linked in order to take the successive changes into account.

## HISTORICAL DATA

### Benchmark modification history since 10 years

#### Date

From 01/07/2021	20% ICE BofA Contingent Capital Index Hedged in EUR
From 10/01/2018	80% ICE BofA Euro Financial BofA Merrill Lynch Euro Financial (EUR)

## RISKS

The risks listed below are not exhaustive (Please refer to the prospectus for more details):

#### Capital risk

The Sub-fund does not guarantee or protect the capital invested, so investors may not recover the full amount of the capital they initially invested, even if they retain the shares for the duration of the recommended investment period.

#### Inflation risk

The sub-fund will be exposed to risks linked to inflation, i.e. an overall rise in prices. The level of inflation affects changes in interest rates and therefore money market instruments.

#### Credit risk

The main risk linked to debt securities and/or money market instruments such as treasury bills (BTFs and BTANs) or short-term negotiable securities is that of issuer default, due either to the non-payment of interest and/or the non-repayment of capital. Credit risk is also associated with the downgrading of an issuer. Unitholders are reminded that the net asset value of the UCITS is likely to fall if a total loss is recorded on a financial instrument following default by an issuer. The inclusion of debt securities in the portfolio, whether directly or through UCIs, exposes the UCITS to the effects of variations in credit quality.

#### Interest rate risk

The exposure to interest rate products (debt securities and money market instruments) makes the Sub-fund sensitive to interest rate fluctuations. Interest rate risk might result in a fall in the value of the security and thus the net asset value of the Sub-fund in the event of a change in the yield curve.

#### Sector risk

The UCITS carries a sector risk as a result of the fact that it invests in securities in one business sector: the energy, commodities and natural resources sector. Should this market fall, there will also be a fall in the net asset value.

#### Risks related to contingent convertible bonds (CoCo)

CoCos are subordinated debt securities issued by credit institutions or insurance or reinsurance companies that are eligible for inclusion in their capital requirement and that have the specific feature of potentially being converted into shares or having their par value reduced (write-down mechanism) in response to a trigger, as previously defined in the prospectus. A CoCo includes an option to convert into shares at the initiative of the issuer in the event that their financial situation deteriorates. In addition to the inherent interest rate and credit risk involved with bonds, activating the conversion option may cause the value of the CoCo to decrease by an amount greater than that recorded on other traditional bonds of the issuer. Under the conditions set out by the CoCo concerned, certain trigger events may lead to the main investment and/or accrued interest permanently depreciating to zero, or to the conversion of the bond into a share.

## DEFINITIONS AND METHODOLOGIES

The definitions and methodologies below are not exhaustive and are available in more detail at [https://medianet.edmond-de-rothschild.fr/edram/pdf/Methodology\\_en.pdf](https://medianet.edmond-de-rothschild.fr/edram/pdf/Methodology_en.pdf) and if applicable at <https://funds.edram.com/> in the fund's downloadable documentation.

**Volatility** : The volatility of a security is the difference between performance and average performance and therefore makes it possible to gauge the consistency of performance obtained. It comprises a measure of risk. If this is zero, the individual performances are identical. The higher it is, the greater the difference between individual performances.

**Tracking error** : The tracking error (available if the fund has a benchmark index) shows the volatility of a fund's relative performance against that of its benchmark. It shows the difference between performances and their average and so makes it possible to gauge the consistency of relative performance. The lower the tracking error, the closer the fund's performance is to that of its benchmark.

**Alpha** : The alpha (available if the fund has a benchmark index) corresponds to the fund's average performance. More specifically, it measures the fund managers' added value while cancelling out market influence, which cannot be controlled. This measure is expressed as a percentage.

**Sharpe ratio** : The Sharpe ratio shows the fund's outperformance against a zero-risk interest rate, adjusted for fund volatility.

**Transaction fees** : Transaction costs represent the cost of buying and selling the underlying investments for this Product. The actual amount will vary depending on the volumes bought and sold. They remunerate the financial intermediaries involved in the chain of placing and processing orders on the market. This fee is not collected by the management company.

**Management fees and other fees** : Ongoing charges represent the costs we incur each year in managing this Product. This percentage is based on the actual costs of the previous year. They remunerate all parties involved in the financial and administrative management of the fund. They include, on the one hand, financial management fees and, on the other hand, other fees (operating expenses, other administrative costs, costs incurred as a result of holding collective investment undertakings (CIUs), as well as interest expenses).

**Outperformance fees** : Performance fees reward the financial management for its ability to generate outperformance. They are calculated by comparing the performance of the Product's share with that of an indexed reference asset, over the relevant calculation period. This fee is payable even in the event of a decrease in the Net Asset Value, as long as this decrease is less than that of the benchmark index. The calculation method is described in the prospectus.

## PRODUCT DISCLAIMER

This document was issued on 29/05/2026 by Edmond de Rothschild Asset Management (France) - 47 rue du Faubourg Saint-Honoré - 75401 Paris Cedex 08 - France ; A limited company with executive and supervisory boards and capital of 11,033,769 eur - AMF approval number GP 04000015 - 332.652.536 R.C.S. Paris - www.edr.com.

Global Distributor : Edmond de Rothschild Asset Management (France)

EdR SICAV - Financial Bonds is a sub-fund of the Investment Company with Variable Capital (SICAV) EdR SICAV incorporated in France and authorised by the AMF. This fund is an Undertaking for Collective Investment in Transferable Securities (UCITS).

This document has no contractual value and is intended for information purposes only. Any reproduction or use of all or part of its contents is strictly prohibited without the authorization of the Edmond de Rothschild Group.

The Management Company may decide to cease marketing this Fund in accordance with Article 93a of Directive 2009/65/EC and Article 32a of Directive 2011/61/EU. "Edmond de Rothschild Asset Management" or "EdRAM" is the trading name of the asset management entities of the Edmond de Rothschild Group.

Tax treatment depends on the individual situation of each client and may be modified at a later date.

The Management Company may pay as remuneration a proportion of the financial management costs of the fund to intermediaries such as investment firms, insurance companies, management companies, marketing intermediaries, distributors or distribution platforms with whom an agreement has been signed in the context of the distribution, placement of the units of the fund or the establishment of relations with other investors. This remuneration is variable and depends on the business relationship in place with the intermediary and on the improvement of the quality of the service provided to the client for which the beneficiary of this remuneration can justify. The remuneration may be a flat fee or calculated on the basis of the net assets subscribed as a result of the intermediary's action. The intermediary may or may not be a member of the Edmond de Rothschild Group. Each intermediary shall communicate to the client, in accordance with the regulations applicable to it, all useful information on costs and fees and its remuneration.
