<sup>(1)</sup> The Sub-Fund Eurizon Fund - Bond Emerging Markets In Local CurrenciesESG was renamed Eurizon Fund - Bond Emerging Markets In Local Currencies on 6 June 2025.

The different Units which are available to investors for all Sub-Funds are detailed in the prospectus of the Fund.

## 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Fund keeps the books of each Sub-Fund in its respective currency and the financial statements are prepared in Euro in accordance with the Luxembourg regulations relating to Undertakings for Collective Investment and in particular using the following rules:

a) Presentation of the financial statements

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment in transferable securities (UCITS) and with generally accepted accounting principles. The financial statements have been prepared on a going concern basis, using the last official/tradeable net asset value of the financial period (30 June 2025).

**b) Valuation of investment securities**

Investment securities, including zero-coupon bonds and money market instruments quoted on an official stock exchange or on another regulated market are valued according to the last known Closing or Bid price at the time when the valuation is carried out, and, in the event of being quoted on several markets, according to the last known Closing or Bid price of the principal market.

Valuation of investment securities, including zero-coupon bonds and money market instruments, not quoted on an official stock exchange or on another regulated market is fixed in a reasonable way on the basis of the sale prices anticipated cautiously and in good faith or, in the absence of a market value, according to the probable value in the reasonable estimation of the Board of Directors of the Management Company.

The value of each investment in open-ended funds is based on the last known Net Asset Value on the Valuation Day.

If there is no relevant quotation or if the quotations are not representative of the fair value, the evaluation is done in good faith by the Board of Directors of the Management Company.

Non-listed securities are valued on the basis of their probable sales price as determined in good faith by the Board of Directors of the Management Company.

**c) Net realised profit / (loss) on sales of investments**

Realised profits or losses made on the sales of investments are calculated according to the average weighted cost.

**d) Option contracts**

Option contracts quoted on an official stock exchange or on another regulated market are valued according to the last known market price or, if there are several markets, according to the last known price of the principal market.

Option contracts not quoted on an official stock exchange or on another regulated market are valued at their last known market value or, in the absence of a market value, according to their probable market value in the reasonable estimation of the Board of Directors of the Management Company.

The market value of option contracts is recorded in the Statement of Net Assets.

In the case of options on futures, no premium margin is required because here a daily profit and loss adjustment (variation margin) is made by the procedure known as "marking-to-market". The profit of one party to the contract is the loss of the other party. The resulting profits and losses are either debited or credited to the appropriate account on a daily basis via the mark-to-market process. Unrealised profits and losses are recorded in the Statement of Net Assets. The final valuation is made at the final settlement price of either the expiration date of the option or the day on which it was exercised.

The variation of unrealised profits and losses on option contracts is recorded in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on option contracts".

**e) Forward foreign exchange contracts**

Forward foreign exchange contracts are valued at forward foreign exchange rate for the remaining period to run until maturity at the date of valuation.

Unrealised profits and losses are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on forward foreign exchange contracts".

**f) Future contracts**

Commitments related to future contracts are recorded off balance sheet and future contracts are valued according to the last available contract price.

Unrealised profits and losses on future contracts are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on future contracts".

Guarantee deposits and margin calls are recorded under the Statement of Net Assets under the headings "Other banks and broker accounts" and "Amounts due to brokers", if any.

## g) Swap contracts

Swaps are, in general, contracts by which two parties commit themselves during a given period to exchange two flows, one in exchange of the other, determined on the basis of a nominal value. The flows may be linked to interest rate(s), exchange rate(s), share(s), index(es) or credit event(s).

Swap contracts are valued using the difference between the values of forecasted flows the counterparty is to pay to the Sub-Fund and those owed by the Sub-Fund to its counterparty.

Unrealised profits and losses on swap contracts are recorded in the Statement of Net Assets and their variations in the Statement of Changes in Net Assets under the heading "Change in unrealised appreciation / (depreciation) on swap contracts".

All the Swap contracts are presented at clean price, except for Inflation Swap contracts which are presented at dirty price, therefore the interests related to Swap contracts are recorded under the heading "Interest received/paid on swap contracts" in the Statement of Changes in Net Assets.

## h) Reverse repurchase agreements

Reverse repurchase agreements (reverse repos) consist in a purchase of securities with a simultaneous agreement to resell them at a specific future date and price. The sale price corresponds to the purchase price increased by an interest rate. These operations, if any, including accrued interest, are recorded in the Statement of Net Assets under the heading "Reverse repurchase agreements".

For reverse repurchase agreements, interest returns which consist in the difference between the purchase price and the sale price of the securities are accounted for on a pro rata temporis basis over the course of the operation and recorded in the accounts in the Statement of Changes in Net Assets under the heading "Net income from investments".

## i) Combined statements of the Fund

The combined statements correspond to the sum of the statements of each Sub-Fund. Cross Sub-Funds investments (where one Sub-Fund has invested in another Sub-Fund of the Fund) and related inter-Fund accounts have not been eliminated for presentation purposes of the combined statements. Cross Sub-Funds investments represent 1,08% of the combined net assets with value of EUR 703 271 638,25 as at 30 June 2025. Excluding the cross Sub-Funds investments from the calculations, the combined net assets as at 30 June 2025 is EUR 64 195 651 816,49. Cross Sub-Funds investments are disclosed in the Portfolio as at 30 June 2025 for the respective Sub-Funds.

## j) Cost of purchase of securities in portfolios

For securities in currencies other than the base currency of the Sub-Fund, the purchase price is converted in the base currency of the Sub-Fund based on the closing exchange rates of the day of purchase.

## k) Income

Dividends are recognised on the date on which the shares/units concerned are quoted "ex-dividend", net of withholding tax. Interest is calculated on a pro rata temporis basis and recorded net of withholding tax.

Interest income from debt securities is recognised daily on an accruals basis and includes the amortisation of premiums and accretion of discounts on a straight line basis.

## l) Swing Pricing

On business days when the net number of a Sub-Fund's units purchased or redeemed exceeds 2% of the Sub-Fund's total net assets, the Management Company may value that Sub-Fund's assets at offer price or bid price, respectively. This adjustment reflects an assessment of the overall costs incurred in buying and selling investments to satisfy purchases or sales of units (understanding that a Sub-Fund generally maintains adequate daily liquidity to handle ordinary cash flows with little or no impact on ordinary investment operations).

This mechanism was not activated during the period ended 30 June 2025.

## m) Translation of items expressed in foreign currencies

Assets and liabilities in foreign currencies are converted into the base currency of the Sub-Fund at the closing exchange rates of the final day of the financial period.

Income and expenses in currencies other than the base currency of the Sub-Fund are converted into the base currency of the Sub-Fund at the closing exchange rates in force on the day of the transaction.

The resulting realised and unrealised profit or loss made on foreign exchange is included in the Statement of Changes in Net Assets; any unrealised profit or loss on cash positions, assets receivable and liabilities payable denominated in currencies other than the base currency of the Sub-Fund being recorded under the heading "Change in unrealised appreciation / (depreciation) on foreign currencies".

The exchange rates as at 30 June 2025 are the following:

As regards the valuation of the assets of the Sub-Funds authorised as money market funds in accordance with Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds, such assets are valued by using mark-to-market method (means the valuation of positions at readily available close out prices that are sourced independently, including exchange prices, screen prices, or quotes from several independent reputable brokers) whenever possible.

When using mark-to-market method:

- such assets are valued at the more prudent side of bid and offer unless the asset can be closed out at mid-market;
- only good quality market data are used; such data are assessed on the basis of all of the following factors:
  - the number and quality of the counterparties;
  - the volume and turnover in the market of the asset of the money market fund;
  - the issue size and the portion of the issue that the money market fund plans to buy or sell.

The Net Asset Value of any Unit Class in Sub-Funds authorised as money market funds shall be calculated at least daily and rounded to the nearest basis point or its equivalent when the Net Asset Value is published in a currency unit.

The following Sub-Funds have been identified as falling under the scope of the Money Market Fund Regulation (EU) 2017/1131 (the "Regulation") and accordingly fulfill the requirements of the Regulation:

#### 14. SECURITIES LENDING TRANSACTIONS

The Fund may lend securities but only under the conditions and procedures specified by recognised clearing systems or by another first-bank financial institution specialized in this kind of operations.

The Fund has entered into a securities lending agreement with a specialized financial institution, authorizing the latter to carry out lending transactions of the Fund's securities. In relation to its lending transactions, the Fund must receive security of a value which, at the conclusion of the lending agreement, must be at least equal to the value of the global valuation of the securities lent.

This collateral must be given in the form of cash and/or of securities issued or guaranteed by member states of the OECD or by their local authorities or by supranational institutions and organizations with EU, regional and worldwide scope and blocked in favor of the Fund until termination of the lending contract.

All collateral received by the Fund under the securities lending agreement is transferred under a title transfer arrangement. The collateral is held in custody by a sub-custodian of the depository for the duration of the transaction.

**15. RUSSIA UKRAINE CONFLICT**

The direct exposure of the products established by the Fund to Russia, Belarus and Ukraine securities was relatively low at the beginning of Russia’s invasion of Ukraine on 24 February 2022, with no Sub-Fund reporting an exposure in excess of 5% of its total net assets. Nevertheless, the Management Company closely monitors the evolution of international sanctions, operational restrictions and disruptions relating to the Russian securities and markets as they adversely impact, or could impact, the ability of these Sub-Funds to operate on such securities and/or related local cash accounts. Liquidity and valuation issues related to these securities are monitored on a continuous basis by the Management Company so as to ensure the interests of the investors are preserved. In particular, as at 30 June 2025, certain securities are valued on the basis of fair valuation procedures, which may result in such securities being deemed to have a near-zero or zero value. In addition, no accrued interests are recorded for bonds denominated in roubles and value adjustments are posted to offset the value of Type S RUB cash accounts (segregated) as non-resident investors are currently restricted from any deliveries or receipts of RUB with respect to such accounts.

Considering the persisting liquidity constraints related to the conflict, the Board of Directors of Eurizon Capital S.A. has resolved on 11 December 2024, in the best interest of the Unitholders and with immediate effect to liquidate the Sub-Fund Eurizon Fund - Bond Emerging Markets LC LTE. The liquidation process begun on 12 December 2024 and proceeds resulting from the monetization of all liquid assets were paid before year-end. In light of the extraordinary conditions prevailing for assets held in Russia, including Type S RUB cash accounts, the Board of Directors cannot anticipate a closure date for the liquidation. Unitholders will receive the final liquidation proceeds, if any, when the Sub-Fund will dispose of these assets again and will be able to sell and/or repatriate them.
