Fund Objective

The Algebris Financial Income Fund can invest in the capital structure of financial companies globally, in both equities and fixed income. The objective of the Fund is to maximise income and generate superior risk adjusted returns over an investment cycle by investing in high dividend yielding stocks and bonds. The Fund invests in equities and subordinated debt capital instruments of financial institutions globally, including preference shares and hybrid capital instruments (e.g. Additional Tier 1 securities), which may be rated investment grade or below investment grade.

Investment in the Fund may be suitable for investors with a medium to long term investment horizon.

About Algebris

Algebris Investments is an independent global asset manager, founded by Davide Serra in 2006. Financials have been at the core of its expertise since inception, spanning across credit, equity and private debt. Over the years, the firm has widened its capabilities to global credit and global equity, including Italian equity. On the private investments side, the firm supports the transition to a greener and more sustainable economy, via its private equity solutions. As a specialist asset manager, Algebris' focused and thematic approach has been the cornerstone of its strategies. As of 31.01.2026, Algebris manages approximately EUR 34.6bn in assets, with a global team of over 170 professionals across offices in London, Milan, Rome, Zurich, Dublin, Boston, Singapore, and Tokyo.

Algebris (UK) Limited is authorised and regulated by the Financial Conduct Authority. Algebris Investments (US) Inc is a SEC registered Investment Adviser. Algebris Investments (Ireland) Limited is authorised and regulated by the Central Bank of Ireland. Algebris Investments (Asia) Pte Ltd is a Licensed Fund Management Company with the MAS. Algebris Investments K.K. is licensed by Financial Services Agency.

General Risks associated with the Fund

The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested. Past performance does not predict future returns. The performance data do not take account of the commissions and costs incurred on the issue and redemption of units. Returns may increase or decrease as a result of currency fluctuations. Yields shown are a representation of the performance of the underlying investments held by the fund, they do not refer to the yields paid on shares in the fund nor are they an overall measurement of performance. Some investments/bonds may not be liquid and therefore may not be sold instantly. If these investments must be sold on short notice, you might suffer a loss. The fund may invest in Contingent convertibles (CoCos), which are a type of subordinated debt issued by banks. These securities are high-risk as during periods of market uncertainty and volatility there is potential for diminishing value, leading to a total loss. The fund may invest in financial derivative instruments ("FDI") which may expose the fund to higher leverage, counterparty, liquidity, valuation, volatility, market and over the counter transaction risks. The Fund invests in emerging markets. Such markets carry additional risks such as political instability, weaker auditing and financial reporting standards and less government supervision and regulation. The Fund's investment strategy is described as one that could cause its NAV to fluctuate significantly, meaning the value of the fund's assets could change rapidly and unpredictably. Tax treatments depend on the circumstances of the individual client and may be subject to change in the future. Sustainability risks may adversely affect the returns of the Fund. A sustainability risk is an environmental, social or governance (ESG) event that if it occurs, could cause an actual or potential material negative impact on the value of the Fund's investment. The Fund's investments are also exposed to the risk of losses resulting from reputational damage an issuer may face in connection with an ESG event.

Important Information

This material does not constitute an offer or invitation to anyone in any jurisdiction in which such distribution is not authorised. Unless otherwise specified, Algebris Investments is the source of all data. All information contained in this material is current at the time of issue and, to the best of our knowledge, accurate. Any opinion expressed is that of Algebris, is not a statement of fact, is subject to change and does not constitute investment advice. This product is an Article 8 product, as defined under EU regulation (EU) 2019/2088, it promotes environmental or social characteristics and invests in companies that follow good governance practices. This product does not have sustainable investment as its objective.

Singapore, the collective investment scheme which is the subject of this document is not authorised or recognised by the Monetary Authority of Singapore (MAS) under the Securities and Futures Act 2001, as modified or amended from time to time (SFA) and units in the scheme are not allowed to be offered to the retail public in Singapore. However, the scheme has been notified to the MAS as a restricted scheme for the purposes of Section 305 of the SFA. This document is not a prospectus as defined in the Securities and Futures Act 2001 (SFA). Accordingly, statutory liability under the SFA in relation to the content of prospectuses would not apply. You should consider carefully whether the investment is suitable for your client.

Hong Kong, the content of this document has not been reviewed by any regulatory authority in Hong Kong. The Fund referred to in the document is only available for investment to "professional investors" as defined in the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) and any rules made under the Securities and Futures Ordinance and to persons outside Hong Kong. This document should not be provided, copied or forwarded to any person in Hong Kong other than a person who falls within the definition of "professional investor".

Glossary

Annualised volatility: measures the extent to which returns vary up and down over a given period. The measure is expressed as an annualised value.

Dilution Adjustment: a mechanism used to protect existing investors in a single-priced fund from the costs associated with buying or selling the fund's underlying assets, which can occur when there are significant inflows or outflows of money into the fund.

Sharpe ratio: measures the performance of an investment adjusting for the amount of risk taken (compared to a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Effective duration: price sensitivity (expressed in years) of a fixed income security to a change in interest rates. Effective duration is a duration calculation for bonds that have embedded options. A higher (effective) duration indicates a higher price sensitivity.

Yield to worst (YTW): the lowest potential yield that can be received on a bond which can be redeemed by the issuer on a call date which is earlier than the final maturity date. The reported yield is gross of fees and expenses and does not include interest generated from the cash held in the fund. The yield is reported in local currency, and is not specific to share class.

Fund Yield (Gross): reflects 1. the yield to worst for the bond portfolio, 2. the yield inclusive of cash distributions and an expectation for future share buybacks for the equity portfolio, and 3. the interest generated from the cash held in the fund. Any estimate of future yields is not an exact indicator.
