Company Headlines

The start of 2026 was characterised by a renewed shift in preferences within the equity universe. The healthcare sector was unable to maintain the momentum established in the closing quarter of 2025, and recorded a below-average performance in the month under review. The medical technology sector could not break away from this negative trend and recorded an even weaker performance than that of the healthcare sector. In contrast to this performance trend, the reporting season for the fourth quarter of 2025, which began in the second half of the month, has reinforced a persistently robust business development with excellent results, which for the most part exceeded forecasts, but were not always rewarded with a positive price reaction.

Abbott Laboratories achieved a persistent double-digit growth rate of 10.4% in the core segment of medical technology. This strong result was overshadowed by considerably weak demand in the nutrition business, however – responsible for almost 20% of total sales – which saw revenue fall by 9.1%. Management expects to see a gradual return to growth for this area over the course of 2026. Nevertheless, at a group level, the outlook for 2026 lagged behind market expectations, with organic sales growth of 6.5% to 7.5%. We used the considerable price correction of around 13% to purposefully build on our strongly underweight position. **Intuitive Surgical** continued its growth trajectory in the closing quarter of 2025. The number of interventions carried out using the da Vinci system rose by 17%, while total sales rose by almost 19%. The forecast for fiscal 2026 was in line with expectations, and it is likely – as has been the case in the past – that this will be raised over the course of the year. With that being said, the strong result led to profit taking that we also used to build on our position. While the quarterly statements for our participations in the area of laboratory equipment slightly exceeded expectations, the promised acceleration in growth for 2026 was unable to fully meet investors' expectations. After a strong performance in the closing quarter of 2025, the shares of **Thermo Fisher** traded sideways in the month under review, while **Danaher** recorded a 4% decline. Stryker exceeded expectations again with its results for the fourth quarter of 2025. Organic sales growth reached an impressive 11%, and the initial growth projection for 2026 was also convincing. **ResMed**, a global leader in the area of sleep therapy, achieved sales growth above expectations, at 9%, in the fiscal quarter ending in December. Stryker stocks rose by 5% in January, and ResMed stocks by more than 7%.

At the start of the month, **Boston Scientific** announced that it would be acquiring US company **Penumbra**. Following on from Hologic at the end of 2025, this already represents the second overweight portfolio position within a short amount of time to make a positive contribution to the fund's performance, thanks to the takeover premium offered. Overall, the beneficial stock selection in the quarter under review led to an outperformance against the benchmark of 70 basis points, after around 130 basis points in the closing quarter of 2025.

Investments in medical devices

Investment Strategy

The MIV Global Medtech Fund invests globally in listed medical device companies. The investment process is based on a combined top-down / bottom-up approach. Against the background of the particular macroeconomic environment, the most interesting markets and companies are determined based on an intensive primary analysis. Alongside an attractive valuation, a strong market position, good growth potential, excellent products, sustainable profitability and high-quality management are the decisive parameters for investment. The consideration of sustainability criteria (ESG) is integrated in the research, analysis and investment process. Risks are managed by means of portfolio diversification. The portfolio of the MIV Global Medtech Fund is structured more defensively or cyclically in the best possible anticipation of economic trends, with a view to achieving a higher return than the benchmark and the general market indices.

Benefits

Owing to demographic trends and the desire for quality of life and mobility, the medical device industry is a long-term growth market. Emerging markets will have a positive impact on the medical device industry's future growth thanks to the state-backed expansion of their healthcare systems. Medical device suppliers' priority is the development of innovative, minimally invasive products. These are beneficial for patients and cost efficient for the healthcare system due to shorter convalescence periods. Most interesting from an investor's perspective are the industry's high growth rates, above-average profitability and oligopolistic market structures with their high entry barriers for new competitors. Even in a demanding environment, significant product innovations continue to offer attractive growth prospects.

Risks

The MIV Global Medtech Fund invests in equity securities and may therefore be subject to high fluctuations in value. For this reason, a medium-term to long-term investment horizon and corresponding risk tolerance and capacity are required for an investment into this Sub-Fund. As the MIV Global Medtech Fund pursues an active management style, the Sub-Fund's performance can deviate substantially from that of its reference index. The focus on equity securities of global medical device companies potentially exposes the Sub-Fund to additional sector-specific risks and currency risks. The Sub-Fund may, for the purpose of hedging and the efficient management of the portfolio, make use of derivatives, which can lead to additional risks (particularly counter party risk). All investments are subject to market fluctuations. Every Fund has specific risks, which can significantly increase under unusual market conditions.

Sustainability profile - ESG

MIV Asset Management identifies, monitors and mitigates ESG risks that are, or could become, material to the performance of medical technology companies. The approach is based on the following factors:

- **Integration:** The consideration of sustainability criteria (ESG) is integrated into the research, analysis and investment process. The Fund invests in companies with a good ESG profile. The Fund does not invest in companies with a Sustainalytics ESG Risk Rating above 40 (severe) as well as a Sustainalytics Controversy Score above 4 (high).
- **Exclusion:** The Fund excludes investments in companies, that are not compliant with global norms (OECD Guidelines for Multinational Enterprises, UN Guiding Principles for Business and Human Rights, International Labour Organization's Fundamental Principles) as well as investments in controversial industries (particularly conventional and controversial weapons).
- **Sustainable Investments:** A minimum portion of 33% of assets is invested in Sustainable Investments with a social objective (contribution to UN Sustainable Development Goals).
- **Dialogue:** Close and regular contact with the management of actual and potential investments, amongst other, with the goal of improving ESG practices and disclosure at these companies.
- **Ownership rights:** Exercise of MIV Global Medtech Fund's voting rights delegated to the ISS proxy with Sustainability Policy. In case of controversial decisions, MIV Asset Management gets directly involved.

- ☑ The MIV Global Medtech Fund is classified as a financial product under **EU SFDR Article 8**
- ☑ MIV Asset Management is a signatory to the **UN Principles for Responsible Investment**
- ☑ The MIV Global Medtech Fund's investments support **UN Sustainable Development Goals, in particular no. 1, 3, 5, 8 and 10**
- ☑ MIV Asset Management works together with the **proxy ISS with Sustainability Policy**
- ☑ The MIV Global Medtech Fund has an **above-average MSCI ESG Score (6.6)** and **MSCI ESG Rating (A)**
- ☑ The MIV Global Medtech Fund has an **above-average Sustainalytics ESG profile**

Glossary

Benchmark	An index, which is used as a reference for the measurement of the performance of the Fund.
Inception	Launch date of the Fund and/or the Fund class.
Management fee	Portfolio Manager's fee for the management and the distribution of the Fund.
NAV	Net Asset Value: total Fund assets divided by total number of Fund shares outstanding.
TER	Total Expense Ratio: sum of all fees and costs, which are charged to the Fund on a continuous basis.
