Performance Fund class N2 EUR

Important legal information

Past performance is not a reliable indicator of current or future performance. Performance data take no account of the commissions and costs charged when units are issued and redeemed. The return of the Fund may go down as well as up due to changes in rates of exchange between currencies.

Company Headlines

The reporting month was once again strongly influenced by volatility around artificial-intelligence-related capital expenditure as well as the intermittent hostilities in the Middle East.

While the MSCI World only rose slightly (+0.5%) in July, the healthcare sector recorded a marginally better performance at +1.4% in US dollars. Within the healthcare sector, the medical technology segment regained investor favour, with sentiment improving and the sector rising 4.7%.

The modest underperformance of the fund in July is mostly attributable to UCITS-related investment constraints. Since the start of the year, excluding costs, the fund is approximately 180 basis points ahead of its medical devices benchmark, MSCI World Healthcare Equipment & Supplies, or around 120 basis points including costs. As share price volatilities created investment opportunities, we were able to further develop our deviation from the benchmark. We expanded outside the benchmark with new positions in **Waters, Teleflex** as well as **Axogen**.

During the ongoing earnings season, the companies generally reported solid results, supported by stable underlying procedure trends and a continued robust hospital capital expenditure environment in the US and in Europe. On the other hand, market conditions remained challenged in China.

After **Abbott** still had disappointed investors at Q1, the company could please with an acceleration in organic sales growth to 5% in Q2. Management conveyed an upbeat message and was confident to further accelerate organic sales growth in H2. Another stand-out was **Edwards Lifescience**, which delivered organic sales growth of 13% in Q2, a material positive surprise. Indicative of the solid momentum and execution, management upgraded its full year outlook for the second time this year. On the other hand, bellwethers **Intuitive Surgical** and **Stryker** did not fully live up to expectations of the usual beat and raise, which was punished by investors. With underlying growth of 7%, **Boston Scientific** delivered respectable Q2 results, but lowered its full year guidance once again on decelerated market growth at stroke prophylaxis product Watchman as well as more intensive competition in electrophysiology. However, with the stock off sharply, year to date, such was already discounted. Finally, our diversified off benchmark position in Life Science & Tools companies paid solid dividends in July. In particular, **Thermo Fisher** with underlying sales growth of 5% delivered a substantial and broad-based positive surprise to investors, allowing management to lift full-year guidance, which was strongly rewarded by investors.

While the fund performance has not yet lived up to expectations year-to-date, we remain confident that the sector's strong fundamentals will ultimately prevail. We continue to see risks mainly stemming from rising inflation and interest rates as well as potential pressure on the utilization of healthcare providers in the US, as a result of political decisions to reduce subsidies in the healthcare sector.

Investments in medical devices

Investment Strategy

The MIV Global Medtech Fund invests globally in listed medical device companies. The investment process is based on a combined top-down / bottom-up approach. Against the background of the particular macroeconomic environment, the most interesting markets and companies are determined based on an intensive primary analysis. Alongside an attractive valuation, a strong market position, good growth potential, excellent products, sustainable profitability and high-quality management are the decisive parameters for investment. The consideration of sustainability criteria (ESG) is integrated in the research, analysis and investment process. Risks are managed by means of portfolio diversification. The portfolio of the MIV Global Medtech Fund is structured more defensively or cyclically in the best possible anticipation of economic trends, with a view to achieving a higher return than the benchmark and the general market indices.

Benefits

Owing to demographic trends and the desire for quality of life and mobility, the medical device industry is a long-term growth market. Emerging markets will have a positive impact on the medical device industry's future growth thanks to the state-backed expansion of their healthcare systems. Medical device suppliers' priority is the development of innovative, minimally invasive products. These are beneficial for patients and cost efficient for the healthcare system due to shorter convalescence periods. Most interesting from an investor's perspective are the industry's high growth rates, above-average profitability and oligopolistic market structures with their high entry barriers for new competitors. Even in a demanding environment, significant product innovations continue to offer attractive growth prospects.

Risks

The MIV Global Medtech Fund invests in equity securities and may therefore be subject to high fluctuations in value. For this reason, a medium-term to long-term investment horizon and corresponding risk tolerance and capacity are required for an investment into this Sub-Fund. As the MIV Global Medtech Fund pursues an active management style, the Sub-Fund's performance can deviate substantially from that of its reference index. The focus on equity securities of global medical device companies potentially exposes the Sub-Fund to additional sector-specific risks and currency risks. The Sub-Fund may, for the purpose of hedging and the efficient management of the portfolio, make use of derivatives, which can lead to additional risks (particularly counter party risk). All investments are subject to market fluctuations. Every Fund has specific risks, which can significantly increase under unusual market conditions.

Sustainability profile - ESG

MIV Asset Management identifies, monitors and mitigates ESG risks that are, or could become, material to the performance of medical technology companies. The approach is based on the following factors:

- **Integration:** The consideration of sustainability criteria (ESG) is integrated into the research, analysis and investment process. The Fund invests in companies with a good ESG profile. The Fund does not invest in companies with a Sustainalytics ESG Risk Rating above 40 (severe) as well as a Sustainalytics Controversy Score above 4 (high).
- **Exclusion:** The Fund excludes investments in companies, that are not compliant with global norms (OECD Guidelines for Multinational Enterprises, UN Guiding Principles for Business and Human Rights, International Labour Organization's Fundamental Principles) as well as investments in controversial industries (particularly conventional and controversial weapons).
- **Sustainable Investments:** A minimum portion of 33% of assets is invested in Sustainable Investments with a social objective (contribution to UN Sustainable Development Goals).
- **Dialogue:** Close and regular contact with the management of actual and potential investments, amongst other, with the goal of improving ESG practices and disclosure at these companies.
- **Ownership rights:** Exercise of MIV Global Medtech Fund's voting rights delegated to the ISS proxy with Sustainability Policy. In case of controversial decisions, MIV Asset Management gets directly involved.

- ☑ The MIV Global Medtech Fund is classified as a financial product under **EU SFDR Article 8**
- ☑ MIV Asset Management is a signatory to the **UN Principles for Responsible Investment**
- ☑ The MIV Global Medtech Fund's investments support **UN Sustainable Development Goals, in particular no. 1, 3, 5, 8 and 10**
- ☑ MIV Asset Management works together with the **proxy ISS with Sustainability Policy**
- ☑ The MIV Global Medtech Fund has an **above-average MSCI ESG Score (6.7)** and **MSCI ESG Rating (A)**
- ☑ The MIV Global Medtech Fund has an **above-average Sustainalytics ESG profile**
