

Swisscanto (LU) Money Market Fund Committed EUR DT

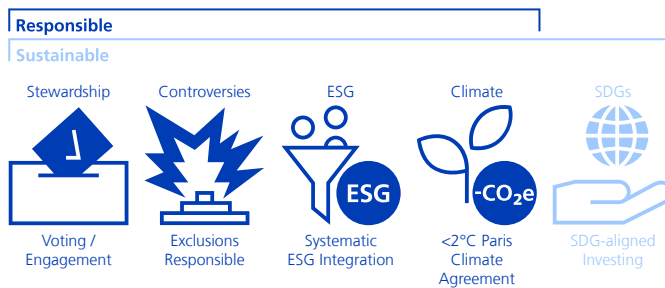

Money Market | reinvesting | May 2026 - Marketing Material

Fund Description

The fund invests in first-class money market investments in EUR. The Portfolio Manager carefully selects the stocks and actively diversifies the issuer risk across sectors and maturities. The focus is on high liquidity of the overall portfolio.

Sustainability Policy

In the implementation of the sustainability policy, a distinction is made between the two characteristics 'Responsible' and 'Sustainable'. Depending on the characteristic, the sustainability approaches listed below are applied. Further information on the sustainability policy can be found in the accompanying explanations.

Notes:
 - Light-coloured sustainability characteristics and approaches are not applicable to the assets in question.
 - Exclusions in accordance with SVVK-ASIR (Swiss Association for Responsible Investments) are applied.

Swisscanto Sustainability Rating

high **A B C D E F G** low

Profile/Suitability

This product is suitable for investors who

- have at least a very short-term investment horizon.
- are seeking an actively managed money market portfolio in EUR.
- are striving for a broad diversification over various counterparties.
- have the necessary risk tolerance towards the interest rate and credit risks of the asset class.

Portfolio Data

	Fund
Number of Positions	76
Modified Duration	0.50
Yield	2.59%

¹ Year/period: Since start performance calculation or at the longest for the last 5 or 10 years/periods.

² Minor deviations can be caused by rounding errors.

^a The performance shown is less all regular fund fees incurred. Further potential costs incurred, which can be directly charged to the fund assets, are disclosed in the fund prospectus.

^b The gross performance indicated is before deduction of any regular fund fees incurred.

The performance stated refers to the past and is not a reliable indicator of future results. The calculation is made in the reference currency of the share class. Performance in other currencies may rise or fall as a result of currency exchange rate fluctuations. The performance data assume that any dividends will be reinvested. The data take into account the costs incurred at fund level (such as administrative fees). The net performance including Agio (issue surcharge max. 2.00%) represents the performance after deduction of fees.

Explanations of the Sustainability Policy

Sustainability Characteristics

In the implementation of the sustainability policy, two characteristics are distinguished, each applying different sustainability approaches. The 'Responsible' characteristic typically includes the application of exclusion criteria, systematic ESG analysis as an integral part of the investment process, and a reduction in the CO₂e intensity of investments. The 'Sustainable' characteristic typically includes, in addition to the aforementioned approaches, the application of even more extensive exclusions and focuses on SDG and ESG Leaders. For further information on the application of the sustainability approaches, please see the following explanations.

Stewardship – Voting / Engagement

As a shareholder, we actively engage in continuous dialogue with the companies management. This takes place in accordance with the engagement guidelines of Zürcher Kantonalbank's asset management. Among other things, companies are required to formulate ambitious greenhouse gas reduction targets, implement them consistently and report on them transparently. Our engagement activities and guidelines are published on <https://www.zkb.ch/en/home/asset-management/sustainability/investment-stewardship.html>. Our voting guidelines are based on Swiss and international corporate governance principles and on the United Nations Principles for Responsible Investment (UN PRI). The threshold for exercising voting rights in our foreign voting markets is CHF 2 million per shareholding. For Swiss shares, we vote across the board. More information on our voting behaviour can be viewed at: <https://www.swisscanto.com/voting>

Controversies – Exclusions Responsible

Application of further exclusion criteria – in addition to the exclusions based on SVVK-ASIR – in order to reduce sustainability risks and with the aim of not investing in securities with business models that are critical from a sustainability perspective. The exclusion criteria apply to companies associated with the extraction of coal (excluding metal production; >5% revenue)*, coal reserves (excluding metal production)*, production of weapons and ammunition, manufacture of military hardware (>5% revenue), production of pornography, exploitative child labour and/or UN Global Compact violations (excluding green and sustainability bonds, if applicable). Violations of the UN Global Compact principles revealed by our screening are examined in closer detail by our analysts. As part of the engagement, we seek dialogue and encourage companies to change their behaviour. If no change occurs within a reasonable period of time, existing systems must be sold. *Excluding green and sustainability bonds

ESG – Systematic ESG Integration

The systematic analysis of ESG criteria forms an integral component of the active investment process, with the aim of identifying risks and opportunities based on ESG trends at an early stage. ESG criteria supplement the pure financial analysis and lead to more informed investment decisions.

Climate – <2°C Paris Climate Agreement

In accordance with the Paris Climate Agreement, the investment activity of the portfolio is aimed at reducing the CO₂e intensity of the investments by at least 4% per year. The investment strategy target is based on the CO₂e intensity of the investment universe at the end of 2019.

SDGs – SDG-aligned Investing

This approach focuses on returns through investments in companies and countries with social benefits (SDG leaders). SDG leaders use their investment power to create environmentally and socially responsible products and services. In doing so, they contribute to the fulfillment of one or more of the UN's Sustainable Development Goals (SDGs). For diversification purposes, a best-in-class approach can also be used to invest in securities that are considered to have above-average positive ESG criteria (ESG Leaders).

Note:

- Light-coloured sustainability characteristics and approaches are not applicable to the assets in question.

Further information

Further, supplementary product-specific explanations regarding the sustainability approaches applied can be found in the relevant legal documents at products.swisscanto.com.

Sustainability approaches

The sustainability approaches apply to all assets or to a substantial part of the assets. Detailed information on this can be found in the prospectus, fund agreement or investment guidelines.

CO₂e

CO₂e equivalents (CO₂e) are a measure to standardise the climate impact of the greenhouse gases carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O) and fluorinated greenhouse gases (CFCs). All of these gases remain in the atmosphere for different lengths of time and do not contribute equally to the greenhouse effect.

ESG

ESG stands for the aspects of environment (E), social (S) and governance (G).

SVVK-ASIR

The Swiss Association for Responsible Investments (SVVK) is an association of institutional investors and was founded in 2015. The association provides services to its members so that they can focus their investment decisions on the environment, society and the economy.

Swisscanto Sustainability Rating

The proprietary Swisscanto Sustainability Rating provides information on the current sustainability level of the portfolio. It is calculated from the values of the collective assets and individual securities contained in the portfolio and is divided into seven sustainability classes from A (highest level) to G (lowest level). To calculate the rating, companies and countries are assessed on the 4 pillars of our sustainability research: controversial areas of business (controversy), sustainable corporate governance (ESG), greenhouse gas emissions (climate) and impact of products on the environment and society (Sustainable Purpose). The Swisscanto Sustainability Rating is recalculated once per quarter end.

MSCI® ESG

Although Zürcher Kantonalbank's information providers, including without limitation, MSCI ESG Research LLC and its affiliates (the "ESG Parties"), obtain information (the "Information") from sources they consider reliable, none of the ESG Parties warrants or guarantees the originality, accuracy and/or completeness, of any data herein and expressly disclaim all express or implied warranties, including those of merchantability and fitness for a particular purpose. The Information may only be used for your internal use, may not be reproduced or disseminated in any form and may not be used as a basis for, or a component of, any financial instruments or products or indices. Further, none of the Information can in and of itself be used to determine which securities to buy or sell or when to buy or sell them. None of the ESG Parties shall have any liability for any errors or omissions in connection with any data herein, or any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Comments to the Fund

Target Investor Group - Term

Wealth management clients or institutional investors

Target Investor Group - Description

D class is offered to all institutional investors and wealth management clients. The second letter «T» indicates that the class reinvests profits (accumulating). A flat rate administrative fee is charged.

Flat Fee (FF)

The AIF is used to compensate the fund management company and fund administration, asset management and - if compensated - the distribution of the fund as well as the custodian bank for the services it provides.

Total Expense Ratio (TER)

The Total Expense Ratio (TER) refers to the annual costs that are continuously charged to the fund's assets and is expressed as a percentage of the fund's assets. The figure corresponds to the level of the TER in the most recently completed financial year and does not guarantee a similar level in the future. For share classes of funds domiciled in Luxembourg that were launched within the last 12 months, the expected TER is shown.

Swinging single pricing (SSP) indirectly

According to fund master data, this fund does not exhibit any swinging single pricing (SSP). However, it cannot be ruled out that an investment is made in a target fund with SSP indirectly.

Benchmark comparison

This is just a benchmark comparison. The fund's performance does not depend on the benchmark, particularly in terms of the portfolio composition.

License terms of external data providers

Benchmarks Disclaimer - CORPORATELSEG is the administrator of certain indices and benchmarks as detailed at <https://www.lseg.com/en/ftse-russell/benchmarks>. No other information provided, displayed or contained in any LSEG service is made available for use as a benchmark, whether in relation to a financial instrument, financial contract or to measure the performance of an investment fund, or otherwise in a way that would require the relevant information to be administered by a benchmark administrator pursuant to the Benchmarks Regulation (the "Prohibited Use"). LSEG does not grant rights for you to access or use such information for the Prohibited Use and you may breach the Benchmarks Regulation and/or any contract with LSEG if you do. In the event that you identify the Prohibited Use of information by any person, you must promptly notify LSEG and provide such details as we may reasonably request to ensure the cessation of the Prohibited Use, where appropriate. Notwithstanding the foregoing, where you have entered into a direct license with a third-party provider which permits the Prohibited Use with respect to such third party provider's information, you are solely responsible for compliance with Benchmarks Regulation and LSEG shall have no liability or responsibility for any loss or damages that arise from or in connection with the Prohibited Use. LSEG and its affiliates do not warrant that any information is provided in compliance with the Benchmarks Regulation and accept no liability and have no responsibility for any loss or damages that arise from or in connection with the Prohibited Use of the information. "Benchmarks Regulation" means, in respect of the EEA, EU Regulation 2016/1011, in respect of UK, UK benchmarks regulation and in respect of another country, the equivalent legislation. If you are in any doubt about the meaning of the Prohibited Use or your obligations under the Benchmarks Regulation, you should seek professional advice.

Explanation of general risks

The investment differs from an investment in deposits. Investment involves risks, especially with regard to fluctuations in value, capital and return. Investments in foreign currencies are subject to exchange rate fluctuations. Custody and counterparty risks represent further significant risks. We hereby refer to the detailed description of various risks which are included in the prospectus.

Risk Indicator

The historical data used to calculate the risk and return category cannot be used as a reliable indication of the future risk profile. The reported risk and return category may well be subject to change. The lowest risk category cannot be compared with a risk-free investment. There is no capital guarantee or capital protection. The risk of capital loss is borne by the investor.

Notes on the Breakdowns

– Minor deviations can be caused by rounding errors.

Breakdown Allocations

Allocation refers to invested fund capital adjusted to 100%. Minor deviations can be caused by rounding errors. The weighting of the money market may include the synthetic exposure from the equity hedging strategy.

Volatility

Volatility is a statistical measure of risk which indicates the extent to which the absolute return on an investment or a portfolio fluctuates on average around its mean value in the course of a year.

Sharpe Ratio

The Sharpe ratio is a performance measure which indicates the risk-adjusted excess return (difference between the portfolio return and the risk-free return) compared to the investment risk incurred (volatility).

Modified Duration

The modified duration indicates by how many percent the price of a bond changes if the market interest rate changes by one percentage point.

Yield

The yield refers to the duration-weighted yield on the portfolio in local currency.

SFDR

Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosure requirements in the financial services sector (SFDR).

ISO Certification

Asset Management at Zürcher Kantonalbank is ISO 9001 certified. The ISO 9001 certification guarantees that the authorised user has a management system that meets the requirements of a suitable and recognised standard and has been successfully certified/assessed by the Swiss Association for Quality and Management Systems (SQS).

Further Specific Explanations

– The fund is a standard VNAV money market fund. The fund does not rely on external support in order to guarantee its liquidity or keep the NAV per share stable.

Disclaimer

This document is for informational and advertising purposes only. It is intended for distribution in Spain and is not directed at persons in other countries or individuals whose nationality or place of residence prohibits access to such information under applicable legislation. The fund is an undertaking for collective investment in transferable securities (UCITS) within the meaning of EU Directive 2009/65/EC and is subject to the supervision of the Luxembourg supervisory authority (CSSF). The fund is registered for distribution in Spain with the competent Spanish supervisory authority (CNMV).

Any investment carries risks, particularly those related to fluctuations in value and income. The risks are described in the sales prospectus and the key information document. Past performance and returns are no guarantee of future investment success. The performance data do not take into account the commissions and costs charged for the issuance and redemption of units. The Total Expense Ratio (TER) refers to the ongoing costs charged to the fund's assets (operating expenses) and is expressed as a percentage of the fund's assets. The stated TER corresponds to the level in the most recently completed financial year or half-year and does not guarantee a corresponding level in the future.

This document has been prepared with the customary care. However, no guarantee is given for the accuracy or completeness of the information contained herein, and any liability for damages resulting from the use of this document is disclaimed. It does not constitute an offer or a recommendation to subscribe, redeem, buy, hold, or sell financial instruments. Recipients are advised to verify the information - if necessary, with the help of an advisor - regarding its compatibility with their personal circumstances in terms of legal, tax, and other consequences.

The fund described in this document is not available to U.S. persons in accordance with the relevant regulations.

The current fund documents (sales prospectus, terms and conditions, key information document, and annual and semi-annual reports) are available free of charge at <https://products.swisscanto.com/>. Information on sustainability-related aspects in accordance with Regulation (EU) 2019/2088 is also available on the same website.
