Transaction fees received by the Management Company	None

INVESTMENT STRATEGY

ODDO BHF Génération is a European equity fund of all market caps that seeks to invest mainly in companies with stable and sustainable shareholdings (often family-owned companies). It aims to be permanently invested in equities, targeting long-term capital growth. The fund follows a pure stock-picking strategy based on fundamental analysis and individual stock valuation to find attractively priced stocks with regard to their long-term prospects

Sustainalytics provides company-level analysis used in the calculation of Morningstar's Sustainability Score.

(1) The summary risk indicator (SRI) is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you. It ranges from 1 (low risk) to 7 (high risk). This indicator is not constant and will change according to the fund's risk profile. The lowest category does not mean risk-free. Historical data, such as that used to calculate the SRI, may not be a reliable indication of the fund's future risk profile. There is no guarantee that the investment objectives in terms of risk will be achieved.

(2) Information on the EU Sustainable Finance Disclosure Regulation (SFDR) can be found in the SFDR classification(2) section of the document.

*: rebased on the rated part of the fund | In accordance with the update to our ESG integration policy published, the internal ESG rating scale now ranks the investment universe from 1 (High Risk) to 5 (Strong Opportunity) in ascending order.

The ESG approach consists in selecting companies with the best environmental, social and governance policies by favouring the best-rated issuers within an investment universe in terms of non-financial criteria (Best in Universe) and/or issuers showing an improvement in their ESG practices over time (Best Effort).

Past performance is not an indication of future results. Performance may vary over time.

SUSTAINABLE REPORT – METHODOLOGY

ODDO BHF AM considers that measuring the environmental, social and governance impact of an investment is an essential step in disseminating good practices in ESG integration. To do this, it is imperative to have reliable, simple quantitative criteria (no reprocessing) and to allow comparison between portfolios regardless of their composition (large vs midcaps, geographical and sectoral diversity). The choice of indicators is therefore crucial for the relevance of impact measurement.

We systematically indicate the availability of the data at the level of the portfolio and its benchmark.

Carbon metrics methodology: We updated our methodology of carbon intensity calculation.

Starting January 31st, 2023, when reported carbon values are unavailable or inconsistent, estimated carbon values are used.

The estimations are based on average carbon value (scope 1+2 emissions) of sectoral peers as a function of revenues

CN-EUR - Eur | Fundamental Equity - Large Cap - Europe

MONTHLY MANAGEMENT COMMENT

Equity markets ultimately ended the month at levels close to those seen at the end of October. In the United States, the S&P 500 ended with a modest gain of 0.1%, while the Nasdaq fell 1.5%. In Europe, the MSCI Euro NR index rose by 0.3% and the MSCI Smid Cap Europe NR index remained stable.

10-year Treasury yields fell by 0.06% to 4.01% in the United States, with the prospect of further cuts in the Fed's key interest rates, and the 10-year Bund rose by 0.06% to 2.69% in Germany, where the ECB is maintaining the status quo on refinancing rates.

However, this apparent stability in equities masks periods of uncertainty, marked by the rise in value of Nvidia and other technology stocks, but also periods of hope, with the prospect of peace in Ukraine and a cut in key interest rates by the Fed at its meeting on 10 December.

Within the sectors, the best performers were banking (+4.2%), construction and building materials (+3.7%), buoyed by the prospect of reconstruction in Ukraine, and health care (+5.0%), which benefited from strong gains by Roche (+19%) and AstraZeneca (+12%). Conversely, industrials (-4.5%) suffered from profit-taking in the aerospace and defence sectors and among data centre-sensitive companies, as did technology stocks, which were buffeted by the Nasdaq's turbulence.

The portfolio performed similarly to its benchmark over the period. The biggest contributions to performance came from Technoprobe (Italy, semiconductors), Jungheinrich (Germany, logistics), De Longhi (Italy, consumer goods), Trigano (France, motorhomes), UCB (Belgium, health care), Aperam (Luxembourg, stainless steel), Knorr-Bremse (Germany, capital goods), Santander (Spain, banking), Carlsberg (Denmark, beverages), Richemont (Switzerland, luxury goods), and Ottobock (Germany, health care). At the other end of the spectrum, the fund was hit by the poor performance of ASM International (Netherlands, semiconductors), Renk (Germany, defence), Besi (Netherlands, semiconductors), SAP (Germany, software), Fresenius (Germany, health care), Técnicas Reunidas (Spain, oil services), Andritz (Austria, capital goods), Publicis (France, advertising agency), Wacker Chemie (Germany, chemicals), Sopra (France, IT services), bioMérieux (France, health care), and Dassault Systèmes (France, software).

In terms of portfolio changes, we scaled back our holdings in Technoprobe (Italy, semiconductors), Aperam (Luxembourg, stainless steel), UCB (Belgium, health care) and Jungheinrich (Germany, logistics) to strengthen our investments in LVMH (France, luxury goods), L'Oréal (France, cosmetics) and Kingspan (Ireland, building materials).

We are keeping the portfolio's overall ESG rating above that of the reference universe.

RISKS:

The fund is exposed to the following risks :risk of capital loss, equity risk, interest rate risk, credit risk, risk associated with discretionary management, currency risk, risk associated with commitments on forward financial instruments, counterparty risk, risk associated with holding small and medium capitalisations, risks associated with securities financing transactions and collateral management, Sustainability risk and on an ancillary basis emerging markets risk

SFDR CLASSIFICATION²

The EU Sustainable Finance Disclosure Regulation (SFDR) is a set of EU rules which aim to make the sustainability profile of funds transparent, more comparable and better understood by end investors. Article 6: The management team does not consider sustainability risks or adverse effects of investment decisions on sustainability factors in the investment decision making process. Article 8: The management team addresses sustainability risks by integrating ESG criteria (Environment and/or Social and/or Governance) into its investment decision making process. Article 9: The management team follows a strict sustainable investment objective that significantly contributes to the challenges of the ecological transition, and addresses Sustainability Risks through ratings provided by the Management Company's external ESG data provider.

DISCLAIMER

This document has been drawn up by ODDO BHF AM SAS. Potential investors should consult an investment advisor before subscribing to the fund. The investor is informed that the fund presents a risk of capital loss, but also many risks linked to the financial instruments/strategies in the portfolio. In case of subscription, investors must read the Key Information Document (KID) and the fund's prospectus in order to acquaint themselves with the detailed nature of any risks incurred and all costs. The value of the investment may vary both upwards and downwards and may not be returned in full. The investment must be made in accordance with investors' investment objectives, their investment horizon and their capacity to deal with the risk arising from the transaction. ODDO BHF AM SAS cannot be held responsible for any direct or indirect damages resulting from the use of this document or the information contained in it.
