ESG Investment Universe: 100% ICE BOFA 1-3 YEAR GLOBAL CORPORATE INDEX

Investment Portfolio Score: 0.75

ESG Investment Universe Score¹: 0.16

ESG Coverage (source: Amundi) *

	Portfolio	ESG Investment Universe
Percentage with an Amundi ESG rating ²	100.00%	97.10%
Percentage that can have an ESG rating ³	90.73%	100.00%

* Securities that can be rated on ESG criteria. The total may be different from 100% to reflect the real exposure of the portfolio (cash included).

ESG Terminology

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:

- "E" for Environment (energy and gas consumption levels, water and waste management, etc.).
- "S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).
- "G" for Governance (independence of board of directors, respect for shareholders' rights, etc.).

ESG Rating

The issuer's ESG rating: each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).

ESG rating of the investment universe and the portfolio: the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers' scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

Amundi ESG Mainstreaming

In addition to complying with Amundi Responsible Investment Policy⁴, Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

¹ The investment universe reference is defined by either the fund's reference indicator or an index representative of the ESG-related investable universe.
² Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight) that can be related.
³ Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
⁴ The updated document is available at <https://www.amundi.com/int/ESG>.

Sustainability Level (source : Morningstar)

The sustainability level is a rating produced by Morningstar that aims to independently measure the level of responsibility of a fund based on the values in the portfolio. The rating ranges from very low (1 Globe) to very high (5 Globes).

STANDARD MONEY MARKET ■

SRI Terminology

Socially Responsible Investment (SRI)

The SRI expresses sustainable development objectives in investment decisions by adding Environmental, Social and Governance (ESG) criteria in addition to the traditional financial criteria.

SRI thus aims to balance economic performance and social and environmental impact by financing companies and public entities which contribute to sustainable development whatever their business sector. By influencing the governance and behaviour of stakeholders, SRI promotes a responsible economy.

ESG criteria

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:

"E" for Environment (energy and gas consumption levels, water and waste management, etc.).

"S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).

"G" for Governance (independence of board of directors, respect for shareholders' rights, etc.).

SRI according to Amundi

An SRI portfolio follows these rules :

- 1 - Exclusion of G score¹
- 2 - Overall portfolio rating above the benchmark index/investment universe rating after exclusion of 20% of the lowest rated issuers
- 3 - ESG rating for 90% minimum of portfolio stock²

Focus on Environmental, Social and Governance key performance indicators

In addition to the overall ESG assessment of the portfolio and the E, S and G dimensions, the manager uses impact indicators to assess the ESG quality of his portfolio. Four representative indicators of Environment, Social, Human Rights and Governance have been identified. The manager's minimum objective is to deliver a quality score higher than that of the index on at least two of the indicators.

Sources and definitions

1. Environmental indicator/Climate indicator: Carbon intensity (in metric tons of CO₂ per million of revenue). This data is provided by Trucost. This corresponds to companies' annual greenhouse gas emissions expressed in metric tons of carbon dioxide equivalent. (CO₂e). It covers the six greenhouse gases identified in the Kyoto Protocol with emissions converted into global warming potential (GWP) in CO₂ equivalent.

Definition of scopes:

- Scope 1: All direct emissions from sources that are owned or controlled by a company.
- Scope 2: All indirect emissions arising from the purchase or production of electricity, steam or heat.
- Scope 3: All other indirect emissions, upstream and downstream of the value chain. For reasons of data robustness, Amundi has chosen to use emissions from activities upstream of Scope 3
- Source: Trucost EEI-O model (input/output model extended to the Trucost environment).

2. Management diversity: Average percentage of women managers. This indicator gives a more global measure of the advancement of women within the company than the data limited to the number of women Board members. Data provider: Refinitiv

3. Human Rights Compliance Indicator: percentage of companies with policies that exclude forced or obligatory child labor or that guarantee freedom of association and which are applied universally regardless of local laws. This indicator enables better assessment of fundamental human rights issues. Data provider: Refinitiv

4. Board independence: average percentage of independent directors on the Board of Directors. Data provider: Refinitiv

For these 4 indicators, the total for the portfolio/investment universe is equal to the companies' average for these indicators adjusted for their weight in the portfolio/investment universe.
