ABOUT THE FUND

The Fund seeks to grow capital and generate income by investing in shares of worldwide -including Emerging countries- equities. It is actively managed and relatively concentrated (typically under 60 names) with low turn-over.

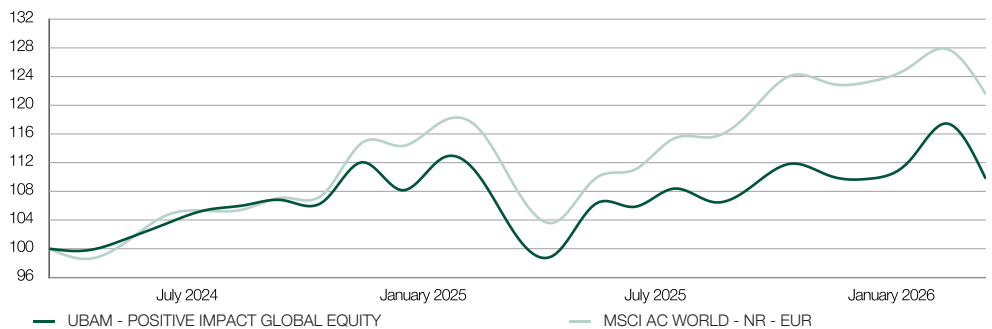

The Fund addresses the United Nation's Sustainable Developments Goals through 6 themes, 3 environmental (healthy ecosystems, climate stability, sustainable communities) and 3 societal (basic needs, health & wellbeing, inclusive & fair economies). The primary sustainable objective is to invest in companies which have products, services and/or processes which contribute to the solution of environmental and/or social problems as defined by the UN.

The investment process draws from the collaboration of the Investment Manager (Union Bancaire Privée, UBP SA) with Cambridge Institute for Sustainability Leadership ("CISL"). CISL is not involved in the stock selection of this Fund.

The Fund uses the MSCI AC World Net Return Index (USD) (the "Benchmark") for performance objective. The Benchmark is representative of the investment universe and of the risk profile of the Fund. The Investment Manager has significant discretion to deviate from the Benchmark's constituents in respect to countries, sectors, issuers and instruments.

The recommended holding period is 5 years.

Since launch. Source of data: UBP. Exchange rate fluctuations can have a positive or a negative impact on performance. Past performance is not a reliable indicator of future results. The value of investments can fall as well as rise. Past performance figures are stated in the currency of the share class and calculated with dividends reinvested; they are free of ongoing charges. The calculation does not take into account sales commissions and other fees, taxes and applicable costs to be paid by the investor. For example, with an investment of EUR 100, the actual investment would amount to EUR 99 in the case of an entrance fee of 1%. At investor level, additional costs may also be incurred (e. g. front-end load or custody fee charged by the financial intermediary).

GLOSSARY
Benchmark

Index used as basis for measuring the performance of an investment fund. Also called reference index or comparison index.

Counterparty risk

The probability that the other party in an investment, credit, or trading transaction may not fulfill its part of the deal and may default on the contractual obligations.

Currency risk

The Fund invests in overseas markets. It can be affected by changes in exchange rates which may cause the value of your investment to decrease or increase.

Emerging markets risk

Specific risks associated with investing in countries that are considered to be in the early stages of economic development or undergoing significant political and social

changes.

ESG and sustainability risk

The potential negative impacts on investments or businesses arising from environmental, social, or governance factors. It encompasses the risks associated with inadequate management or performance in these areas, which can affect the financial performance, reputation, and long-term viability of companies or investment portfolios.

Liquidity risk

There are liquidity risks when a specific security is difficult to buy or sell. If there is a high volume of transactions or if markets are partially illiquid (notably in the event of many instruments traded on an individual basis), it may prove to be impossible to carry out a transaction or unwind a position at a beneficial stock price under certain circumstances.
