Environmental, social and governance rating

ESG Investment Universe: 100% MSCI WORLD

Investment Portfolio Score: 0.32

ESG Investment Universe Score¹: -0.22**ESG Coverage (source: Amundi) ***

	Portfolio	ESG Investment Universe
Percentage with an Amundi ESG rating ²	100.00%	99.80%
Percentage that can have an ESG rating ³	89.81%	100.00%

* Securities that can be rated on ESG criteria. The total may be different from 100% to reflect the real exposure of the portfolio (cash included).

ESG Terminology**ESG criteria**

The criteria are extra-financial criteria used to assess the Environmental, Social and Governance practices of companies, states or local authorities:

"E" for Environment (energy and gas consumption levels, water and waste management, etc.).

"S" for Social/Society (respect for human rights, health and safety in the workplace, etc.).

"G" for Governance (independence of board of directors, respect for shareholders' rights, etc.)

ESG Rating

The issuer's ESG rating: each issuer is assessed on the basis of ESG criteria and obtains a quantitative score, the scale of which is based on the sector average. The score is translated into a rating on a scale from A (highest rating) to G (lowest rating). The Amundi methodology provides for a comprehensive, standardised and systematic analysis of issuers across all investment regions and asset classes (equities, bonds, etc.).

ESG rating of the investment universe and the portfolio: the portfolio and the investment universe are given an ESG score and an ESG rating (from A to G). The ESG score corresponds to the weighted average of the issuers' scores, calculated according to their relative weighting in the investment universe or in the portfolio, excluding liquid assets and non-rated issuers.

Amundi ESG Mainstreaming

In addition to complying with Amundi Responsible Investment Policy⁴, Amundi ESG Mainstreaming portfolios have an ESG performance objective that aims to achieve a portfolio ESG score above the ESG score of their ESG Investment universe.

¹ The investment universe reference is defined by either the fund's reference indicator or an index representative of the ESG-related investable universe.

² Percentage of securities with an Amundi ESG rating out of the total portfolio (measured in weight) that can be related.

³ Percentage of securities for which an ESG rating methodology is applicable out of total portfolio (measured in weight).
